**Post-Agreement Northern Irish Literature** Birte Heidemann.2016-06-23 This book uncovers a new genre of 'post-Agreement literature', consisting of a body of texts - fiction, poetry and drama - by Northern Irish writers who grew up during the Troubles but published their work in the aftermath of the Good Friday Agreement. In an attempt to demarcate the literary-aesthetic parameters of the genre, the book proposes a selective revision of postcolonial theories on 'liminality' through a subset of concepts such as 'negative liminality', 'liminal suspension' and 'liminal permanence.' These conceptual interventions, as the readings demonstrate, help articulate how the Agreement's rhetorical negation of the sectarian past and its aggressive neoliberal campaign towards a 'progressive' future breed new forms of violence that produce liminally suspended subject positions.

*Love, Cecil* Lisa Immordino Vreeland.2017-10-17 In *Love, Cecil*, Lisa Immordino Vreeland offers an evocative portrait of this talented whirlwind whose creative work captured many facets of the 20th century. Using photography, drawings, letters, and scrapbooks by Beaton and his contemporaries, along with excerpts from his sparkling diaries and other writings, Immordino Vreeland brings his spirit to life in a way that no previous book has been able to do. Immordino Vreeland organizes her book around the circles of Beaton's daily life: the people who inspired and influenced him, his colorful friends, his fellow photographers, his Hollywood conquests, his wartime service, and his English roots. This cavalcade offers a shimmering vision of high style, but it also captures often-troubled souls struggling to create the open, tolerant, creative worlds of art and culture that we have inherited today.

**If Animals Could Talk** Dr. Werner Gitt.2006-02-01 If animals could tell us about themselves, using our scientific knowledge, if they could tell us about the way they live, the special way they are made and many details about their individual design - what they would say would be unique praise to the Creator. Did you know that while in flight, the sparrow's heart can beat up to 760 times per minute? Or that a baby blue whale grows at a rate of 7.28 pounds an hour while it's nursing, a grand total of 17 tons by the end of the nursing stage? How about that glow worms have a light output efficiency of 100% as compared to only 4% for our incandescent bulbs? Dr. Werner Gitt, one of the foremost creationist

speakers in the world, uses his scientific expertise in this book to show the unique design features of some of God's most captivating creations. All people, young and old, layperson or expert, will be able to understand and enjoy this straightforward book. Told from the perspective of the animals being described, *If Animals Could Talk* clearly shows the impossibility of life without design. Dr. Gitt uses simple language to provoke a sense of wonder and awe at the marvelous design of the Creator.

**'Punto de Vista' and the Argentine Intellectual Left** Sofía Mercader.2021-09-20 This book is the first comprehensive account of the Argentine magazine *Punto de Vista* (1978-2008), a cultural review that gathered together prominent Argentine intellectuals throughout the last quarter of the twentieth century. Directed by cultural historian and public intellectual Beatriz Sarlo, the story of the magazine serves as a lens to study the evolution of Argentine intellectuals from the leftist mobilization of the 1960s through periods of military dictatorship and then the shifting politics of democratization in the 1980s and 1990s. The book argues that the way in which the Argentine intellectual left negotiated the political and cultural transformations of the late twentieth century can be understood as the history of two political defeats: that of the revolutionary utopias of the 1960s and 1970s and that of the social democrat project in the 1980s. By adopting an interdisciplinary approach, this book encompasses a wide range of debates taking place in Argentina, from the years prior to the dictatorship to the postdictatorship period.

**Yes, You Are Trans Enough** Mia Violet.2018-06-21 **LONGLISTED FOR THE POLARI FIRST BOOK PRIZE** 'Honest, raw, moving' CHRISTINE BURNS 'Radical vulnerability at its finest' OWL FISHER 'Highly recommended' SAN FRANCISCO REVIEW OF BOOKS This is the deeply personal and witty account of growing up as the kid who never fitted in. Transgender blogger Mia Violet reflects on her life and how at 26 she came to finally realise she was 'trans enough' to be transgender, after years of knowing she was different but without the language to understand why. From bullying, heartache and a botched coming out attempt, through to counselling, Gender Identity Clinics and acceptance, Mia confronts the ins and outs of transitioning, using her charged personal narrative to explore the inaccuracies of trans representation and confront what the media has gotten wrong. Deeply affecting, and narrated with warmth and honesty, this is an essential read for anyone who has had to fight to be themselves.

**Modal Logic** Herman Ruge Jervell. 2013-01-16 In modal logic we discuss multiple perspectives on truth - perspectives as given by time, by provability, by knowledge, by agents or by processes. We develop the theory of modal logic and emphasize the connections with and applications within computer science and mathematics. Among other things we develop Kurt Godel's incompleteness theorem and show memoryless determinacy of infinite games on finite arenas.

**Time- and Space-Efficient Self-Stabilizing Algorithms** Bernd Hauck. 2013-01-08 Self-stabilization is a general approach to design a system to tolerate arbitrary transient faults. This thesis presents new time- and space-efficient self-stabilizing algorithms for well-known problems in graph theory and provides new complexity analyzes for existing algorithms. The main focus of this thesis is on the proof techniques used in the complexity analyzes and the design of the algorithms. Selbststabilisierung ist ein Ansatz, der ein verteiltes System in die Lage versetzt, beliebige transiente Fehler zu tolerieren. In dieser Dissertation werden neue selbststabilisierende Algorithmen für bekannte graphentheoretische Probleme vorgestellt. Darüber hinaus werden bestehende Verfahren auf ihre Komplexität untersucht. Der Schwerpunkt dieser Arbeit liegt auf den Beweismethoden, die in der Komplexitätsanalyse benutzt werden, sowie auf dem Design der Algorithmen.

**Humean Libertarianism** Marius Backmann.2013-05-02 What does it mean for an agent to be free? Is determinism true? What are laws of nature? This book deals with the interconnections between these questions. Backmann argues for the view that libertarianism can be reconciled with determinism. In order to reach this goal, libertarianism – classically defined as an incompatibilist theory of free will – is defined as the thesis that at the time of decision, the agent must be able to choose between alternative courses of action. Backmann claims that this notion of libertarianism can be reconciled with determinism provided that determinism is understood in a Humean fashion, i.e. backed by a Humean theory of laws of nature. The resulting view – Humean Libertarianism – is an intermediate position between classical compatibilism and incompatibilism.

But when Nathan discovers Alan's secret, his older brother announces a high-stakes round of Cole vs. Cole. Each brother must complete seven nearly impossible tasks; whoever finishes the most wins the game. If Alan doesn't want to be outed to all of Evergreen Middle School, he's got to become the most well-known kid in school, get his first kiss, and stand up to Dad. Alan's determined to prove—to Nathan, to the world, to himself—that this goldfish can learn to swim. May the best Cole win.

**With Hearts, Hands and Voices** Margot Kässmann.2007 At a time when many people are trying to give depth to their lives and seeking answers for mind, body and spirit, this book by Margot Kässmann from Germany brings to light the wealth of spiritual tradition offered by Christianity. Against the background of the spiritual resources of the Bible, worship, prayer and song, the book explores the diversity of spiritual opportunities open to individuals or groups. Using examples from the past and from the present day, the book is an encouragement to hold together the tension between hope and struggle, prayer and action, the life of faith and responsibility for the world. Though written from a Protestant -- and specifically Lutheran -- perspective, this book is also an invitation to discover the ecumenical opportunities offered by spirituality. Keeping silence with one another, meditating, listening to music or being confronted with art, a spiritual approach to faith cuts across the borders of confession, culture and language.

**Vera the Mouse** Marjolein Bastin.1985-11-01

Every year at Christmastime, Marnie and her closest girlfriends mark their calendars for the cookie exchange. Everyone has to bring a batch of homemade cookies and a bottle of wine, but this year, it's their stories that are especially important—the passion and hopefulness of new romance, the betrayal and disillusionment some relationships bring, the joys and fears of motherhood, the stress of financial troubles. On this evening, at least, the sisterly love they have for one another rises above it all. Celebrating courage and joy in spite of hard times and honoring the importance of women's friendships as well as the embracing bonds of community, Ann Pearlman's delightful novel speaks to us all.

**And the Bride Closed the Door** Ronit Matalon.2019-10-01 A young bride shuts herself up in a bedroom on her wedding day, refusing to get married. In this moving and humorous look at contemporary Israel and the chaotic ups and downs of love everywhere, her family gathers outside the locked door, not knowing what to do. The bride's mother has lost a younger daughter in unclear circumstances. Her grandmother is hard of hearing, yet seems to understand her better than anyone. A male cousin who likes to wear women's clothes and jewelry clings to his grandmother like a little boy. The family tries an

array of unusual tactics to ensure the wedding goes ahead, including calling in a psychologist specializing in brides who change their mind and a ladder truck from the Palestinian Authority electrical company. The only communication they receive from behind the door are scribbled notes, one of them a cryptic poem about a prodigal daughter returning home. The harder they try to reach the defiant woman, the more the despairing groom is convinced that her refusal should be respected. But what, exactly, ought to be respected? Is this merely a case of cold feet? A feminist statement? Or a mourning ritual for a lost sister? This provocative and highly entertaining novel lingers long after its final page.

*From the Shtetl to the Stage* Alexander Granach.2017-07-05 Alexander Granach, who died while he was acting on Broadway in 1945, brilliantly relates the remarkable story of his unlikely path from a poverty-stricken, rough-and-tumble childhood to success on the German stage. This is the account of a daring, curiosity-filled, and perceptive Jewish child from poor towns in Galicia who was seized with a passion for the theater when he saw his first show at the age of 14. He overcame great odds to become a leading stage and film actor in Weimar Germany - and he had to have both legs broken to do it! Born in what is now southern Ukraine, Granach began working at the age of six in his father's bakery, where his heavy tasks left him visibly knock-kneed. With very little formal education but open for adventure and willing to work hard, Alexander ran away several times, the last time to Berlin, at the age of 16, where his talent and charm won him a place in Max Reinhardt's theater school. His career was abruptly interrupted by World War I and his time as a prisoner of war in Italy, but after a daring escape and the end of the war he resumed his rise to prominence in German artistic life. A natural storyteller, Granach's autobiography captures equally the charms, adventures, and trials of his shtetl days, the horrors of trench warfare, and the glamour and excitement of the German theater before Hitler came to power.

**Jesus Our Destiny** Wilhelm Busch.1987

**Proof Theory** Herman Ruge Jervell.2012 In proof theory we investigate the objects used for computations and arguments in computer science and mathematics. Our starting point is the classical analysis given by Gerhard Gentzen in the 1930s. We develop this further using a new theory of ordinal notation and connecting this with combinatorics on finite trees.

**Invariant Features and Enhanced Speaker Normalization for Automatic Speech Recognition** Florian Müller.2013-01-31 Automatic speech recognition systems have to handle various kinds of variabilities sufficiently well in order to achieve high recognition rates in practice. One of the variabilities that has a major impact on the performance is the vocal tract length of the speakers. Normalization of the features and adaptation of the acoustic models are commonly used methods in speech recognition systems. In contrast to that, a third approach follows the idea of extracting features with transforms that are invariant to vocal tract lengths changes. This work presents several approaches for extracting invariant features for automatic speech recognition systems. The robustness of these features under various training-test conditions is evaluated and it is described how the robustness of the features to noise can be increased. Furthermore, it is shown how the spectral effects due to different vocal tract lengths can be estimated with a registration method and how this can be used for speaker normalization.

*Devil Red* Joe R. Lansdale.2011-03-15 Hap and Leonard is now a Sundance TV series starring James Purefoy and Michael Kenneth Williams. If there's one thing Hap Collins and Leonard Pine like, it's trouble—and they especially like getting paid to find it. So when their friend and sometime boss Marvin Harmon asks the boys to look into a cold-case double homicide, they're happy to oblige. It turns out that both victims were set to inherit some serious money, and one of them ran with an honest-to-goodness vampire cult. The more closely Hap and Leonard look over the crime-scene photos, the more trouble they see. The image of a red devil's head painted on a tree is just the beginning—a little research turns up a slew of murders with that same fiendish signature. And if things aren't weird enough, Leonard has taken to wearing a deestalker cap . . . Will this be the case that finally sends Hap over the edge?

Consumer Behavior over the Life Course George P. Moschis.2019-01-31 This book examines consumer behavior using the "life course" paradigm, a multidisciplinary framework for studying people's lives, structural contexts, and social change. It contributes to marketing research by providing new insights into the study of consumer behavior and illustrating how to apply the life course paradigm's concepts and theoretical perspectives to study consumer topics in an innovative way. Although a growing number of marketing researchers, either implicitly or explicitly, subscribe to life course perspectives for studying a variety of consumer behaviors, their efforts have been limited due to a lack of theories and methods that would help them study consumers over the lifecycle. When studying consumers over their lifespan, researchers examine differences in the consumer behaviors of various age groups (e.g., children, baby boomers, elderly, etc.) or family life stages (e.g., bachelors, full nesters, empty nesters, etc.), inferring that consumer behavior changes over time or linking consumption behaviors to previous experiences and future expectations. Such efforts, however, have yet to benefit from an interdisciplinary research approach. This book fills this gap in consumer research by informing readers about the differences between some of the most commonly used models for studying consumers over their lifespan and the life course paradigm,

and providing implications for research, public policy, and marketing practice. Presenting applications of the life course approach in such research topics as decision making, maladaptive behaviors (e.g., compulsive buying, binge eating), consumer well-being, and cognitive decline, this book is beneficial for students, scholars, professors, practitioners, and policy makers in consumer behavior, consumer research, consumer psychology, and marketing research.
