Why Learn History (When It's Already on Your Phone) Sam Wineburg, 2018-09-17 A look at how to teach history in the age of easily accessible—but not always reliable—information. Let's start with two truths about our era that are so inescapable as to have become clichés: We are surrounded by more readily available information than ever before. And a huge percent of it is inaccurate. Some of the bad info is well-meaning but ignorant. Some of it is deliberately deceptive. All of it is pernicious. With the Internet at our fingertips, what's a teacher of history to do? In *Why Learn History (When It's Already on Your Phone)*, professor Sam Wineburg has the answers, beginning with this: We can't stick to the same old read-the-chapter-answer-the-question snoozefest. If we want to educate citizens who can separate fact from fake, we have to equip them with new tools. Historical thinking, Wineburg shows, has nothing to do with the ability to memorize facts. Instead, it's an orientation to the world that cultivates reasoned skepticism and counters our tendency to confirm our biases. Wineburg lays out a mine-filled landscape, but one that with care, attention, and awareness, we can learn to navigate. The future of the past may rest on our screens. But its fate rests in our hands. Praise for *Why Learn History (When It's Already on Your Phone)* "If every K-12 teacher of history and social studies read just three chapters of this book—"Crazy for History," "Changing History . . . One Classroom at a Time," and "Why Google Can't Save Us" —the ensuing transformation of our populace would save our democracy." —James W. Lowen, author of *Lies My Teacher Told Me* and *Teaching What Really Happened* "A sobering and urgent report from the leading expert on how American history is taught in the nation's schools. . . . A bracing, edifying, and vital book." —Jill Lepore, *New Yorker* staff writer and author of *These Truths* "Wineburg is a true innovator who has thought more deeply about the relevance of history to the Internet—and vice versa—than any other scholar I know. Anyone interested in the uses and abuses of history today has a duty to read this book." —Niall Ferguson, senior fellow, Hoover Institution, and author of *The Ascent of Money* and *Civilization*

Why Study History? John Fea, 2024-03-26 What is the purpose of studying history? How do we reflect on contemporary life from a historical perspective, and can such reflection help us better understand ourselves, the world around us, and the God we worship and serve? Written by an accomplished historian, award-winning author, public evangelical spokesman, and respected teacher, this introductory textbook shows why Christians should study history, how faith is brought to bear on our understanding of the past, and how studying the past can help us more effectively love God and others. John Fea shows that

deep historical thinking can relieve us of our narcissism; cultivate humility, hospitality, and love; and transform our lives more fully into the image of Jesus Christ. The first edition of this book has been used widely in Christian colleges across the country. The second edition provides an updated introduction to the study of history and the historian's vocation. The book has also been revised throughout and incorporates Fea's reflections on this topic from throughout the past 10 years.

Historical Thinking and Other Unnatural Acts Samuel S. Wineburg, 2001 Demolishes the conventional notion that there is one true history and one best way to teach it. Although most of us think of history and learn it as a conglomeration of facts, for professional historians it is a way of knowing, a method for developing an understanding about the relationships of peoples and events in the past.

Why Study History? Marcus Collins, Peter N. Stearns, 2020-05-27 Considering studying history at university? Wondering whether a history degree will get you a good job, and what you might earn? Want to know what it's actually like to study history at degree level? This book tells you what you need to know. Studying any subject at degree level is an investment in the future that involves significant cost. Now more than ever, students and their parents need to weigh up the potential benefits of university courses. That's where the Why Study series comes in. This series of books, aimed at students, parents and teachers, explains in practical terms the range and scope of an academic subject at university level and where it can lead in terms of careers or further study. Each book sets out to enthuse the reader about its subject and answer the crucial questions that a college prospectus does not.

Knowing, Teaching, and Learning History Peter N. Stearns, Peter Seixas, Sam Wineburg, 2000-09 This four-part volume identifies the problems and issues in late 20th and early 21st-century history education, working towards an understanding of this evolving field. It aims to give both students and teachers insights into the best way of developing historical understanding in pupils.

How Students Learn National Research Council, Division of Behavioral and Social Sciences and Education, Committee on How People Learn, A Targeted Report for Teachers, 2005-01-28 How Students Learn: History in the Classroom builds on the discoveries detailed in the best-selling How People Learn. Now these findings are presented in a way that teachers can use immediately, to revitalize their work in the classroom for even greater effectiveness. The book explores the importance of balancing students' knowledge of historical fact against their understanding of concepts, such as change and cause, and their skills in assessing historical accounts. It also features illustrated suggestion for classroom activities.

Future-Focused History Teaching Mike Maxwell, 2018-07-28 This provocative book challenges the status quo in history education by proposing that isolated facts from the past be replaced by knowledge relevant to the future. Not a classroom teaching guide, this book examines the fundamental premises and practices that underlie the work of every history teacher from grade school through graduate school.

Studying History Robert Vincent Daniels, 1981

How History Gets Things Wrong Alex Rosenberg, 2018-10-09 Why we learn the wrong things from narrative history, and how our love for stories is hard-wired. To understand something, you need to know its history. Right? Wrong, says Alex Rosenberg in *How History Gets Things Wrong*. Feeling especially well-informed after reading a book of popular history on the best-seller list? Don't. Narrative history is always, always wrong. It's not just incomplete or inaccurate but deeply wrong, as wrong as Ptolemaic astronomy. We no longer believe that the earth is the center of the universe. Why do we still believe in historical narrative? Our attachment to history as a vehicle for understanding has a long Darwinian pedigree and a genetic basis. Our love of stories is hard-wired. Neuroscience reveals that human evolution shaped a tool useful for survival into a defective theory of human nature. Stories historians tell, Rosenberg continues, are not only wrong but harmful. Israel and Palestine, for example, have dueling narratives of dispossession that prevent one side from compromising with the other. Henry Kissinger applied lessons drawn from the Congress of Vienna to American foreign policy with disastrous results. Human evolution improved primate mind reading—the ability to anticipate the behavior of others, whether predators, prey, or cooperators—to get us to the top of the African food chain. Now, however, this hard-wired capacity makes us think we can understand history—what the Kaiser was thinking in 1914, why Hitler declared war on the United States—by uncovering the narratives of what happened and why. In fact, Rosenberg argues, we will only understand history if we don't make it into a story.

Teaching and Learning in History Ola Hallden, 2012-10-12 Research on history instruction and learning is emerging as an exciting new field of inquiry. The editors prepared this volume because the field is at an important moment in its development -- a stage where there is research of sufficient depth and breadth to warrant a collection of representative pieces. The field of research on history teaching and learning connects with both traditional research on social studies and with recent cognitive analyses of domains such as mathematics and physics. However, the newer research goes beyond these activities as well. Where traditional research approaches to social studies instruction and learning have focused on curriculum, they have avoided the study of purely disciplinary features, the textual components of history and the concomitant demands, as well as the nature of various learners. Where recent cognitive analyses of mathematics and physics have dealt with misconceptions and knowledge construction, they have avoided topics such as perspective-taking, interpretation, and rhetorical layerings. The new work, by contrast, has been concerned with these issues as well as the careful analyses of the nature of historical tasks and the nature of disciplinary and instructional explanations. The lines of research presented in these chapters are both compelling and diverse and include a range of topical questions such as: * What affects the quality of teaching? * How are historical documents interpreted in the writing of history? * How is history explained? * What are the classroom demands on an elementary school social studies teacher? * What does text accomplish

or fail to accomplish in educational settings? * How do teachers think about particular topics for history teaching? Although much of the research reflects a grounding in, or the influence of, cognitive psychology, not all of it derives from that tradition. Traditions of rhetoric, curriculum analysis, and developmental psychology are also woven throughout the chapters. The editors envision this volume as a contribution to educational research in a subject matter, and as a tool for practitioners concerned with the improvement of instruction in history. They also anticipate that it will contribute to cognitive science.

A History of the Food of Paris Jim Chevallier, 2018-06-15 Paris has played a unique role in world gastronomy, influencing cooks and gourmets across the world. It has served as a focal point not only for its own cuisine, but for regional specialties from across France. For tourists, its food remains one of the great attractions of the city itself. Yet the history of this food remains largely unknown. *A History of the Food of Paris* brings together archaeology, historical records, memoirs, statutes, literature, guidebooks, news items, and other sources to paint a sweeping portrait of the city's food from the Neanderthals to today's bistros and food trucks. The colorful history of the city's markets, its restaurants and their predecessors, of immigrant food, even of its various drinks appears here in all its often surprising variety, revealing new sides of this endlessly fascinating city.

Reading Like a Historian Sam Wineburg, Daisy Martin, Chauncey Monte-Sano, 2015-04-26 This practical resource shows you how to apply Sam Wineburg's highly acclaimed approach to teaching, *Reading Like a Historian*, in your middle and high school classroom to increase academic literacy and spark students' curiosity. Chapters cover key moments in American history, beginning with exploration and colonization and ending with the Cuban Missile Crisis.

A Little Book for New Historians Robert Tracy McKenzie, 2019-03-12 Many people think of history as merely the past—or at most, information about the past. But the real work of a historian is to listen to the voices of those who have gone before and humbly remember the flesh and blood on the other side of the evidence. What is their story? How does it become part of our own? In *A Little Book for New Historians* veteran historian Robert Tracy McKenzie offers a concise, clear, and beautifully written introduction to the study of history. In addition to making a case for the discipline in our pragmatic, present-tense culture, McKenzie lays out necessary skills, methods, and attitudes for historians in training. Loaded with concrete examples and insightful principles, this primer shows how the study of history, faithfully pursued, can shape your heart as well as your mind.

Pastplay Kevin Kee, 2014-03-10 In the field of history, the Web and other technologies have become important tools in research and teaching of the past. Yet the use of these tools is limited—many historians and history educators have resisted adopting them because they fail to see how digital tools supplement and even improve upon conventional tools (such as books). In *Pastplay*, a collection of essays by leading history and humanities researchers and teachers, editor Kevin Kee works to address these concerns head-on. How should we use technology? Playfully, Kee contends. Why? Because doing so

helps us think about the past in new ways; through the act of creating technologies, our understanding of the past is re-imagined and developed. From the insights of numerous scholars and teachers, Pastplay argues that we should play with technology in history because doing so enables us to see the past in new ways by helping us understand how history is created; honoring the roots of research, teaching, and technology development; requiring us to model our thoughts; and then allowing us to build our own understanding.

Teaching and Learning History in Elementary Schools Jere E. Brophy, Bruce VanSledright, 1997-01-01 In clear, concise language, this book deals with fundamental issues that must be addressed if teachers are to construct coherent and powerful history curricula, including: What are the purposes and goals that different types of teachers establish for their history teaching?, and What do children know and think about history, and what are the teaching implications for our schools? This book represents a major advance in developing a knowledge base about children's historical learning and thinking that applies to history teaching some of the principles involved in teaching for understanding and conceptual change teaching, methods that have been so successful in other school subjects.

Knowing History in Schools Arthur Chapman, 2021-01-07 The 'knowledge turn' in curriculum studies has drawn attention to the central role that knowledge of the disciplines plays in education, and to the need for new thinking about how we understand knowledge and knowledge-building. *Knowing History in Schools* explores these issues in the context of teaching and learning history through a dialogue between the eminent sociologist of curriculum Michael Young, and leading figures in history education research and practice from a range of traditions and contexts. With a focus on Young's 'powerful knowledge' theorisation of the curriculum, and on his more recent articulations of the 'powers' of knowledge, this dialogue explores the many complexities posed for history education by the challenge of building children's historical knowledge and understanding. The book builds towards a clarification of how we can best conceptualise knowledge-building in history education. Crucially, it aims to help history education students, history teachers, teacher educators and history curriculum designers navigate the challenges that knowledge-building processes pose for learning history in schools.

The Lessons of History Will Durant, Ariel Durant, 2012-08-21 A concise survey of the culture and civilization of mankind, *The Lessons of History* is the result of a lifetime of research from Pulitzer Prize-winning historians Will and Ariel Durant. With their accessible compendium of philosophy and social progress, the Durants take us on a journey through history, exploring the possibilities and limitations of humanity over time. Juxtaposing the great lives, ideas, and accomplishments with cycles of war and conquest, the Durants reveal the towering themes of history and give meaning to our own.

Public History and School Marko Demantowsky, 2018-12-17 How do schools and public history influence each other? Cases studies focusing on school and public history around the world shed light on the intricate relationships between

schools, students, teachers, policy makers and public historians. From why Robben Island is not included in South African curriculum to how German schools shape Holocaust memory, the case studies offered in this book sheds light on a current topic.
