Swiss Public Administration Andreas Ladner, Nils Soguel, Yves Emery, Sophie Weerts, Stéphane Nahrath, 2018-08-07 Swiss citizens approve of their government and the way democracy is practiced; they trust the authorities and are satisfied with the range of services Swiss governments provide. This is quite unusual when compared to other countries. This open access book provides insight into the organization and the functioning of the Swiss state. It claims that, beyond politics, institutions and public administration, there are other factors which make a country successful. The authors argue that Switzerland is an interesting case, from a theoretical, scientific and a more practice-oriented perspective. While confronted with the same challenges as other countries, Switzerland offers different solutions, some of which work astonishingly well.

Public Administration and the Modern State J. Lehrke, 2014-10-28 The challenges faced by the public sector are many and varied. Civil services at the forefront of tackling pressing problems in a whole range of areas from climate change to income inequality are being allocated less money to do so. This collection explores how public sectors have adapted to address the demands placed on them in the 21st Century.

Organ Transplantation in Times of Donor Shortage Ralf J. Jox, Galia Assadi, Georg Marckmann, 2015-08-06 This book analyzes the reasons for organ shortage and ventures innovative ideas for approaching this problem. It presents 29 contributions from a highly interdisciplinary group of world experts and upcoming professionals in the field. Every year

thousands of patients die while waiting for organ transplantation. Health authorities, medical professionals and bioethicists worldwide point to the urgent and yet unsolved problem of organ shortage, which will be even intensified due to the increasing life expectancy. Even though the practical problem seems to be well known, the search for suitable solutions continues and often restricts itself by being limited through disciplinary and national borders. Combining philosophical reflection with empirical results, this volume enables a unique insight in the ethics of organ transplantation and offers fresh ideas for policymakers, health care professionals, academics and the general public.

New Forms of Governance in Research Organizations Dorothea Jansen, 2007-03-14 This book undertakes to develop a sector specific theory of governance of the public research sector and applies it to the German research system. The book is the outcome of a large interdisciplinary project. It analyzes the reforms in the German research system from an integrated perspective of law, economics and social sciences. The case of Germany is compared to reforms in other European countries such as Austria, the Netherlands and the United Kingdom.

Deliberate Ignorance Ralph Hertwig, Christoph Engel, 2021-03-02 Psychologists, economists, historians, computer scientists, sociologists, philosophers, and legal scholars explore the conscious choice not to seek information. The history of intellectual thought abounds with claims that knowledge is valued and sought, yet individuals and groups often choose not to know. We call the conscious choice not to seek or use knowledge (or information) deliberate ignorance. When is this a virtue, when is it a vice, and what can be learned from formally modeling the underlying motives? On which normative grounds can it be judged? Which institutional interventions can promote or prevent it? In this book, psychologists, economists, historians, computer scientists, sociologists, philosophers, and legal scholars explore the scope of deliberate ignorance.

Organ Shortage Anne-Maree Farrell, David Price, Muireann Quigley, 2011-03-10 Organ shortage is an ongoing problem in many countries. The needless death and suffering which have resulted necessitate an investigation into potential solutions. This examination of contemporary ethical means, both practical and policy-oriented, of reducing the shortfall in organs draws on the experiences of a range of countries. The authors focus on the resolution and negotiation of ethical conflict, examine systems approaches such as the 'Spanish model' and the US Breakthrough Collaboratives, evaluate policy proposals relating to incentives, presumed consent, and modifications regarding end-of-life care, and evaluate the greatly increased use of (non-heart-beating) donors suffering circulatory death, as well as living donors. The proposed strategies and solutions are not only capable of resolving the UK's own organ-shortage crisis, but also of being implemented in other countries grappling with how to address the growing gap between supply and demand for organs.

The Legal Doctrines of the Rule of Law and the Legal State (Rechtsstaat) James R. Silkenat, James E. Hickey Jr., Peter D. Barenboim, 2014-05-28 This book explores the development of both the civil law conception of the Legal State and the common law conception of the Rule of Law. It examines the philosophical and historical background of both concepts, as

well as the problem of the interrelation between the two doctrines. The book brings together twenty-five leading scholars from around the world and provides both general and specific jurisdictional perspectives of the issue in both contemporary and historical settings. The Rule of Law is a legal doctrine the meaning of which can only be fully appreciated in the context of both the common law and the European civil law tradition of the Legal State (Rechtsstaat). The Rule of Law and the Legal State are fundamental safeguards of human dignity and of the legitimacy of the state and the authority of state prescriptions.

Angry Weather Friederike Otto, 2020-09-12 From leading climate scientist Dr. Friederike Otto, this gripping book reveals the revolutionary science that definitively links extreme weather events—including deadly heat waves, forest fires, floods, and hurricanes—to climate change. “Meet the forensic scientists of climate change; if you like CSI, you’ll be equally enthralled with the skill and speed these folks exhibit. But the stakes are infinitely higher!” —Bill McKibben, author of *Falter* and *The End of Nature* Tied with Hurricane Katrina as the costliest cyclone on record, Hurricane Harvey caused catastrophic flooding and over a hundred deaths in 2017. *Angry Weather* tells the compelling, day-by-day story of the World Weather Attribution unit—a team of scientists that studies extreme weather events while they’re happening—and their race to track the connection between the hurricane and climate change. As the hurricane unfolds, Otto reveals how attribution science works in real time, and determines that Harvey’s terrifying floods were three times more likely to occur due to human-induced climate change. At the forefront of cutting-edge climate science, Friederike Otto uncovers how the new ability to determine climate change’s role in extreme weather events can dramatically transform how we view the climate crisis: from how it will affect those of us who are most vulnerable, to the corporations and governments that may find themselves held accountable in the courts. The research laid out in *Angry Weather* will have profound impacts, both today and for the future of humankind. Published in Partnership with the David Suzuki Institute.

Economic Rationality and Practical Reason Julian Nida-Rümelin, 1997-04-30 The theory of practical rationality does not belong to one academic discipline alone. There are quite divergent philosophical, economical, sociological, psychological and politological contributions. Sometimes the disciplinary boundaries impede theoretical progress. On the other hand it is an indication for the high complexity of the subject that so many divergent paradigms compete with one another, or - what is worse - live separately in a kind of splendid isolation. Decision theory in the broader sense, embracing the theory of games and collective choice theory, can help to understand practical reason in philosophical analysis. But there are interesting

aspects which cannot be dealt with adequately within a decision-theoretic conceptual framework. To have both of these convictions justifies to neglect disciplinary boundaries and poses a problem for the orthodoxies of either sides. All the essays of this volume focus on the relation between economic rationality and practical reason and discuss different aspects of the same problem, i. e. a basic deficiency in the standard economic theory of practical rationality. But philosophical analysis would not be of much help if it just rejected the economic paradigm. It must rather help to integrate economic aspects into a broader view on practical reason.

Common European Sales Law (CESL) Reiner Schulze, 2012 The emergence of European Contract Law as a field of enquiry has been matched by a burgeoning literature. This includes textbooks, casebooks, monographs and commentaries as well as at least one journal and huge number of journal articles. As the field has matured, so has its elaboration and analysis by scholars, though it remains a field replete with contested viewpoints and many controversies. This new work by one of Germany's most well-known and respected private law scholars, seeks to present a complete and coherent view of the subject from the perspective of the jurisdiction which has arguably had more responsibility than any other for influencing the shape and content of European contract law

What is Power? Byung-Chul Han, 2018-12-28 Power is a pervasive phenomenon yet there is little consensus on what it is and how it should be understood. In this book the cultural theorist Byung-Chul Han develops a fresh and original perspective on the nature of power, shedding new light on this key feature of social and political life. Power is commonly defined as a causal relation: an individual's power is the cause that produces a change of behaviour in someone else against the latter's will. Han rejects this view, arguing that power is better understood as a mediation between ego and alter which creates a complex array of reciprocal interdependencies. Power can also be exercised not only against the other but also within and through the other, and this involves a much higher degree of mediation. This perspective enables us to see that power and freedom are not opposed to one another but are manifestations of the same power, differing only in the degree of mediation. This highly original account of power will be of great interest to students and scholars of philosophy and of social, political and cultural theory, as well as to anyone seeking to understand the many ways in which power shapes our lives today.

The Politics of a European Civil Code Martijn Willem Hesselink, 2006-01-01 With a significant number of claims having been brought under NAFTA Chapter 11 in the last 3 years, public and professional interest in this topic has been growing significantly. Quite simply, anyone doing business under NAFTA, or anyone representing a company doing business under NAFTA, must be completely familiar with the provisions of Chapter 11. Combining expert commentary with complete primary source materials and case law, Kluwer Law International's Investment Disputes Under NAFTA is the must-have resource for anyone planning - or already involved in - a Chapter 11 claim. NAFTA's Chapter 11, like many treaties, sets forth rules for arbitration. Current procedures have been developed, in part, as cases have arisen and been resolved. This book enables

anyone interested in these procedures to know exactly the current state of the law. Only Investment Disputes Under NAFTA delivers: Article-by-Article explanations of the ins and outs of Chapter 11; a valuable collection of key case law that has been affected by Chapter 11; accurate and thorough cross-referencing to help you quickly and easily find all relevant material; and logical organization of all materials as well as a complete index and table of cases. This one-of-a-kind resource is practice based and user-friendly. It is the only product to collect the body of NAFTA jurisprudence. It also incorporates substantial references to decisions in other investment treaty cases, decisions by mixed claims commissions and other arbitral bodies, Iran-U.S. Claims Tribunal jurisprudence, and International Court of Justice decisions. Kluwer Law International's Investment Disputes Under NAFTA also contains charts presenting valuable information such as the arbitrators in each case, the rules under which the arbitrations have been conducted, and the remedies granted in each particular case

Principles of Conduct John Murray, 1957-07-17 This classic study addresses ethical questions relating to such topics as marriage, labor, capital punishment, truthfulness, Jesus' teaching in the Sermon on the Mount, law and grace, and the fear of God. Murray points the reader to all of Scripture as the basic authority in matters of Christian conduct.

Federalism and Education Kenneth K. Wong, Felix Knüpling, Mario Kölling, 2018-04-01 Federalism has played a central role in charting educational progress in many countries. With an evolving balance between centralization and decentralization, federalism is designed to promote accountability standards without tempering regional and local preferences. Federalism facilitates negotiations both vertically between the central authority and local entities as well as horizontally among diverse interests. Innovative educational practices are often validated by a few local entities prior to scaling up to the national level. Because of the division of revenue sources between central authority and decentralized entities, federalism encourages a certain degree of fiscal competition at the local and regional level. The balance of centralization and decentralization also varies across institutional and policy domains, such as the legislative framework for education, drafting of curricula, benchmarking for accountability, accreditation, teacher training, and administrative responsibilities at the primary, secondary, and tertiary levels. Given these critical issues in federalism and education, this volume examines ongoing challenges and policy strategies in ten countries, namely Australia, Austria, Belgium, Canada, Germany, Italy, Spain, Switzerland, United Kingdom, and the United States. These chapters and the introductory overview aim to examine how countries with federal systems of government design, govern, finance, and assure quality in their educational systems spanning from early childhood to secondary school graduation. Particular attention is given to functional division between governmental layers of the federal system as well as mechanisms of intergovernmental cooperation both vertically and horizontally. The chapters aim to draw out comparative lessons and experiences in an area of great importance to not only federal countries but also countries that are emerging toward a federal system.

Become Younger Norman W. Walker, 2010-11-09 Dr. Walker lays out his program on how to become younger which he

partly defines as having all or most of the attributes of youth, health, energy, vitality and perpetual laughter on the lips and in the eyes. The key to accessing both more energy and more vitality lies in changing our eating, drinking, and living habits. Dr. Walker encourages people to develop a very definite philosophy he calls Right Thinking, which is maintaining a positive outlook and positive thoughts about themselves and others. Together with the other principles outlined in his program, he offers readers knowledge that gives them the courage to make the changes necessary. Readers are given a brief yet concise introduction to different parts of our anatomy and how these systems work for and against us, depending upon the food we consume. Dr. Walker recommends changing old eating habits to include natural, nourishing foods. The use of juicing, fasting, and eating natural, organic foods in their unprocessed forms, including mostly raw fruits and vegetables, play an important role in maintaining good health. Through his personal observations, experience, and knowledge, Dr. Walker provides the information needed to stay younger.

Enlargement of the European Union Allan F. Tatham, 2009-01-26 The development of EU enlargement has raised many thorny issues unanticipated by the framers of the EC Treaty. A significant upshot of these issues is that the concept of European identity – defined in terms of such factors as culture, history and economics – has supplanted the long-dominant theme of ‘widening and deepening,’ particularly since the Union’s expansion has become primarily eastward. The major contribution of this important book lies in its analysis of the conceptualization and perception of enlargement from various points of view, focusing on the concerns of stakeholders and the ‘identity’ conflicts and uncertainties incurred by enlargement initiatives. In the course of its presentation, it details the actual pre-accession Europeanization process and its complex history. Among the key elements discussed are the following: the conflict between ‘widening’ and ‘deepening’ and the effect on EU institutional reform; institutional requirements on candidate countries; pre-accession criteria and negotiations; administrative capacity, judicial capacity, and legal approximation in accession states; capacity of the EU to absorb new Member States; and EC law as part of European identity. Also covered are specific historical details of particular pre-accession negotiations (e.g., Greece, Spain, Portugal, Malta, and Cyprus), the still inconclusive negotiations with Turkey and the Western Balkan states, and political factors involved in the non-accession of Norway, Iceland and Switzerland. Assembling powerful evidence and applying incisive analysis, the author’s conclusion shows that, absent further (and major) EU institutional reform, it will be difficult for an enlarging Union to continue to ‘deliver the goods.’ A watershed in the continuing great debate on the fulfilment of the EC Treaty’s determination to foster and promote ‘an ever closer union of the peoples of Europe,’ this book will prove invaluable to anybody interested in the European integration project, particularly lawyers, academics, officials and policymakers in the EU Member States.
