The Absorbent Mind Maria Montessori, 2013-03-25 The Absorbent Mind was Maria Montessori's most in-depth work on her educational theory, based on decades of scientific observation of children. Her view on children and their absorbent minds was a landmark departure from the educational model at the time. This book helped start a revolution in education. Since this book first appeared there have been both cognitive and neurological studies that have confirmed what Maria Montessori knew decades ago.

Handbook of Perinatal Clinical Psychology Rosa Maria Quatraro, Pietro Grussu, 2020-03-26 The book examines the major issues in perinatal clinical psychology with the presence of theoretical information and operational indications, through a biopsychosocial approach. The multiplicity of scientific information reported makes this book both a comprehensive overview on the major perinatal mental health disorders and illnesses, and a clinical guide. It covers perinatal clinical psychology through a journey of 15 chapters, putting the arguments on a solid theoretical basis and reporting multiple operational indications of great utility for daily clinical practice. It has well documented new evidence bases in the field of clinical psychology that have underpinned the conspicuous current global and national developments in perinatal mental health. As such, it is an excellent resource for researchers, policy makers, and practitioners - in fact, anyone and everyone who wishes to understand and rediscover, in a single opera, the current scientific and application scenario related to psychological health during pregnancy and after childbirth.

Protecting Your Internet Identity Ted Claypoole, Theresa Payton, 2016-11-16 People research everything online - shopping, school, jobs, travel - and other people. Your online persona is your new front door. It is likely the first thing that new friends and colleagues learn about you. In the years since this book was first published, the Internet profile and reputation have grown more important in the vital human activities of work, school and relationships. This updated edition explores the various ways that people may use your Internet identity, including the ways bad guys can bully, stalk or steal from you aided by the information they find about you online. The authors look into the Edward Snowden revelations and the government's voracious appetite for personal data. A new chapter on the right to be forgotten explores the origins and

current effects of this new legal concept, and shows how the new right could affect us all. Timely information helping to protect your children on the Internet and guarding your business's online reputation has also been added. The state of Internet anonymity has been exposed to scrutiny lately, and the authors explore how anonymous you can really choose to be when conducting activity on the web. The growth of social networks is also addressed as a way to project your best image and to protect yourself from embarrassing statements. Building on the first book, this new edition has everything you need to know to protect yourself, your family, and your reputation online.

The Secret of Childhood Maria Montessori, 2019 This book helps us to recognize what the child's needs are, but from the child's perspective.

Rockwood and Wilkins' Fractures in Children James H. Beaty, James R. Kasser, 2010 The thoroughly revised, updated Seventh Edition of Rockwood and Wilkins' Fractures in Children offers a complete print and multimedia package: the established gold-standard reference on pediatric fractures and access to an integrated content website. The world's foremost authorities provide comprehensive coverage of all bone and joint injuries seen in children, thoroughly discuss alternative methods for treating each injury, and present their own preferred methods. This edition has a more international group of contributors, more tips and pearls in the authors' preferred method presentations, and expanded coverage of complications. New chapters cover casting, remodeling and what is unique about children's fractures; principles of physical examination of children with fractures; and treacherous children's fractures. A companion website contains the fully searchable text, an image bank, and videos of the ten most difficult procedures.

Strategies for Inclusion Lauren J. Lieberman, Cathy Houston-Wilson, 2009 This volume introduces teachers to variables that can be adapted to ensure appropriate inclusion in physical education. It covers skills for quantitative and qualitative assessment and strategies for including children with disabilities.

The Mother's Hands: Desire, Fantasy and the Inheritance of the Maternal Massimo Recalcati, 2019-06-04 In this book the bestselling author and psychoanalyst Massimo Recalcati offers a fundamental re-examination of what 'being a mother' means today, in a world where new social and sexual freedoms mean that motherhood is no longer the sole destiny of women. Questioning the belief that a mother's love is natural and unconditional, he paints a more complex and troubling picture of the mother-child relationship, observing that mothers may even resent their children as a result of unresolved conflicts between different dimensions of love. The mother's hands not only nurture but can also potentially harm. Recalcati argues that it is precisely in these competing demands that motherhood fulfills its function: only if the mother is 'not-all-mother' can a child experience the absence that enables it to access the symbolic and cultural world. Recalcati cuts through conventional

wisdom to offer a fresh perspective on the changing nature of motherhood today. An international bestseller, this book will appeal to a wide general readership, as well as to students and scholars of gender studies, psychoanalysis and related disciplines.

From Childhood to Adolescence Maria Montessori,1994 In this work, Maria Montessori examines the educational concerns of the older child, the adolescent, and even the mature university student. She considers each level and seeks the optimum method of facilitating growth.

Ventilazione meccanica non invasiva Stefano Nava,Francesco Fanfulla,2010-02-13 La crescita esponenziale dell'interesse per la ventilazione non invasiva (NIV) verificatasi negli ultimi 10-15 anni, non solo dal punto di vista clinico e applicativo, ma anche speculativo, ha pochi eguali nella recente storia della medicina. In Italia e in Europa in generale tale metodica è applicata su larga scala, prevalentemente nei reparti di Pneumologia e nelle Unità di Cure Intermedie Respiratorie, mentre per quanto riguarda la sua applicazione nei reparti di Terapia Intensiva Generale (UTI) i dati emersi da uno studio multicentrico condotto nei paesi francofoni vedono la NIV impiegata in una quantità di casi che rappresenta fino al 50% dei pazienti che richiedono assistenza ventilatoria. Il recente studio EUROVENT ha inoltre dimostrato come la NIV non si limiti alla sua applicazione "acuta", dal momento che circa 25.000 pazienti sono attualmente ventilati "in cronico" a domicilio. Inoltre, si calcola che milioni di cittadini europei soffrano attualmente di disturbi respiratori durante il sonno, e per molti di essi il trattamento medico di prima scelta è rappresentato dalla NIV. Questo libro si propone lo scopo di richiamare l'attenzione sulle più recenti acquisizioni in questo campo, con la speranza di fornire uno strumento valido e maneggevole per la scelta e l'impostazione della migliore modalità di ventilazione.

Constructing a Mind Antonio Imbasciati,2006-09-27 Can the Protomental System provide a new foundation for psychoanalytic theory? Constructing a Mind draws on psychoanalytic theories of mind and recent developments in cognitive science to present the Protomental System, a new and original explanatory theory of the development of the human mind. This book aims to move psychoanalytic theory away from its origins in Freud's theory, towards a model which gives priority to cognition and memory. This, Antonio Imbasciati argues, will make possible a successful and productive integration of psychoanalysis with other areas of psychology. Subjects covered include: The mind as an information-processing system Constructing the system: from fetus to baby, child, and finally adult The caregiver relationship as a decoding system for information processing The paranoid-schizoid metabolism of information Memory of functions and memory traces of affects Internal information generated by the system The depressive position and learning to know Reparation and thought. This thoughtful and thorough account of cognitive development provides a conceptual framework that succeeds in making some of the more complex areas of psychoanalytic theory more intelligible. Constructing a Mind will be of great interest to psychoanalysts, psychotherapists and cognitive psychologists, especially those with an interest in neuropsychology and

neonatal development.

Personalism Emmanuel Mounier,2011-10-25 Many of the earliest books, particularly those dating back to the 1900s and before, are now extremely scarce and increasingly expensive. Watching Baseball Smarter Zack Hample,2007-03-27 Zack Hample's bestselling, smart, and funny fan's guide to baseball explains the ins and outs of pitching, hitting, running, and fielding, while offering insider trivia and anecdotes that will appeal to anyone—whether you're a major league couch potato, life-long season ticket-holder, or a beginner. • What is the difference between a slider and a curveball? • At which stadium did “The Wave” first make an appearance? • Which positions are never played by lefties? • Why do some players urinate on their hands? Combining the narrative voice and attitude of Michael Lewis with the compulsive brilliance of Schott's Miscellany, Watching Baseball Smarter will increase your understanding and enjoyment of the sport—no matter what your level of expertise. Featuring a glossary of baseball slang, an appendix of important baseball stats, and an appendix of uniform numbers.

The Primary Triangle Elisabeth Fivaz-depeursinge,Antoinette Corboz-warnery,1999-05-18 In the spirit of Daniel Stern's landmark Interpersonal World of the Infant, this is the first book to extend the model of mother-infant dialogue to the larger family system.

EBOOK: European Child Health Services and Systems: Lessons without Borders Ingrid Wolfe,Martin McKee,2014-02-16 The book will focus on three key aspects of delivery of child health services: service integration and coordination, public

health measures, and enhancing the quality of care for children. Taking a child-centric view on understanding how health services and systems work the book aims to contribute towards improving children's health through deepening the understanding of children's health services. Focusing primarily on the western European countries the book draws on research conducted with child health leaders in ten countries: Austria, Britain, Finland, France, Israel, Italy, Netherlands, Norway, Poland, and Sweden. The chapters include clinical scenarios designed to help identify and describe the various ways in which children and their families negotiate health services when dealing with twelve different conditions. Using clinical scenarios in this way allows the book authors to capture the diverse aspects of each health system as well as assessment and analysis of the challenges involved in each, and their successes and failures.
