**Frontiers in the Roman World** Ted Kaizer, Olivier Hekster. 2011-05-10 This volume presents the proceedings of the ninth workshop of the international network 'Impact of Empire', which concentrates on the history of the Roman Empire. It focuses on different ways in which Rome created, changed and influenced (perceptions of) frontiers.

*Class Wargames* Richard Barbrook. 2014-12 Why should radicals be interested in playing wargames? Surely the Left can have no interest in such militarist fantasies? Yet, Guy Debord - the leader of the Situationist International - placed such importance on his invention of The Game of War described it as his most significant of his accomplishment. Intrigued by this claim, a multinational group of artists, activists and academics formed Class Wargames to investigate the political and strategic lessons that could be learnt from playing his ludic experiment. While the ideas of the Situationists continue to be highly influential in the development of subversive art and politics, relatively little attention has been paid to their strategic orientation. Determined to correct this deficiency, Class Wargames is committed to exploring how Debord used the metaphor of the Napoleonic battlefield to propagate a Situationist analysis of modern culture and politics. Inspired by his example its members have also hacked other military simulations: H.G. Wells' Little Wars; Chris Peers' Reds versus Reds and Richard Borg's Commands & Colors. Playing wargames is not a diversion from politics: it is the training ground of tomorrow's communist insurgents. Fusing together historical research on avant-garde artists, political revolutionaries and military theorists with narratives of five years of public performances, Class Wargames provides a strategic and tactical manual for subverting the economic, political and ideological hierarchies of early-21st century neoliberal capitalism. The knowledge required to create a truly human civilisation is there to be discovered on the game board!

*Gender, Politeness and Pragmatic Particles in French* Kate Beeching. 2002-12-13 This study aims to investigate politeness in women's and men's speech, with a particular focus on the use of *c'est-à-dire*, *enfin*, *hein* and *quoi* in contemporary spoken French. Politeness is defined as going beyond the notion of the face-threatening act, englobing both everyday ideas of politeness and the creation of sociability in face-to-face interaction. The pragmatic particles studied are demonstrated to serve both psycholinguistic and sociolinguistic purposes: they lubricate reformulation and contribute to both sociability and

social indexation. The study, which combines qualitative and quantitative analysis, is based on a corpus of spontaneous spoken French, comprising 155,000 words, 95 interviews and subjects ranging in age from 7 to 88 years. The sample contains speakers from a broader range of educational backgrounds than is often the case: a butcher, a video-salesman and a toiletteur canin rub shoulders with counter assistants, teachers and doctors.

The Power of Tests Elana Shohamy.2014-09-25 Language in Social Life is a major series which highlights the importance of language to an understanding of issues of social and professional concern. It will be of practical relevance to all those wanting to understand how the ways we communicate both influence and are influenced by the structures and forces of contemporary social institutions. In all modern societies individuals are subject to tests, whether to enter educational programs, to pass from one level to the next or to grant certificates to practice. Yet, tests are powerful tools which are often introduced in undemocratic and unethical ways as disciplinary tools for carrying out various policy agendas. Tests can be detrimental to people's lives as they are capable of affecting and defining the knowledge and behaviour of those who are being tested. The Power of Tests applies a critical perspective of language tests by examining their uses and consequences in education and society and by viewing tests not as isolated events but rather as embedded in social, educational and political contexts. The book is divided into four parts: the first part establishes the power of tests through echoing the voices of test takers, describing the features of the power of tests, and the temptations that tests offer to bureaucrats who use them for power and control. The second part reports on studies that provide empirical evidence about intentions and effects of a number of large scale language tests. The third part interprets the results by examining their consequences on education and society, arriving at a model of tests' use. The final section of the book offers strategies for controlling and minimising the misuses of tests by introducing the notion of Critical Language Testing which calls for the examination of the consequences and misuses of tests, monitoring of power and pointing to their unethical uses. It also provides a comprehensive discussion of the responsibilities of language testers, including a new Code of Ethics, as well as strategies for guarding and protecting the rights of test takers.

**Invisibility in African Displacements** Jesper Bjarnesen, Simon Turner. 2020-10-29 African migrants have become increasingly demonised in public debate and political rhetoric. There is much speculation about the incentives and trajectories of Africans on the move, and often these speculations are implicitly or overtly geared towards discouraging and policing their movements. What is rarely understood or scrutinised however, are the intricate ways in which African migrants are marginalised and excluded from public discourse; not only in Europe but in migrant-receiving contexts across the globe. *Invisibility in African Displacements* offers a series of case studies that explore these dynamics. What tends to be either ignored or demonised in public debates on African migration are the deliberate strategies of avoidance or assimilation that migrants make use of to gain access to the destinations or opportunities they seek, or to remain below the radar of restrictive governance regimes. This book offers fine-grained analysis of the ways in which African migrants negotiate structural and strategic invisibilities, adding innovative approaches to our understanding of both migrant vulnerabilities and resilience.

Translation and Globalization Michael Cronin. 2013-05-13 Translation and Globalization is essential reading for anyone with an interest in translation, or a concern for the future of our world's languages and cultures. This is a critical exploration of the ways in which radical changes to the world economy have affected contemporary translation. The Internet, new technology, machine translation and the emergence of a worldwide, multi-million dollar translation industry have dramatically altered the complex relationship between translators, language and power. In this book, Michael Cronin looks at the changing geography of translation practice and offers new ways of understanding the role of the translator in globalized societies and economies. Drawing on examples and case-studies from Europe, Africa, Asia, and the Americas, the author argues that translation is central to debates about language and cultural identity, and shows why consideration of the role of translation and translators is a necessary part of safeguarding and promoting linguistic and cultural diversity.

Translation and Identity Michael Cronin. 2006-09-27 Michael Cronin looks at how translation has played a crucial role in shaping debates about identity, language and cultural survival in the past and in the present. He explores how everything from the impact of migration on the curricula for national literature courses, to the way in which nations wage war in the modern era is bound up with urgent questions of translation and identity. Examining translation practices and experiences across continents to show how translation is an integral part of how cultures are evolving, the volume presents new perspectives on how translation can be a powerful tool in enhancing difference and promoting intercultural dialogue. Drawing on a wide range of materials from official government reports to Shakespearean drama and Hollywood films, Cronin demonstrates how translation is central to any proper understanding of how cultural identity has emerged in human history, and suggests an innovative and positive vision of how translation can be used to deal with one of the most salient issues in an

increasingly borderless world.

**The West** Conway, John F..2006 In time for Alberta's and Saskatchewan's 100th anniversary of Confederation, political commentator and writer John Conway examines the unique way the West has shaped the rest of Canada. The Riel Rebellions, the Winnipeg General Strike, the founding of the CCF, Social Credit and Reform parties, the struggle for provincial control of resources -- much of the impetus for political, social and economic change in Canada has come from the West. From pre-Confederation to the present, author John Conway, himself a Westerner, tells the story of the colourful and controversial figures who molded the region. His lively history of the West and its peoples offers insight into the experience of Western Canadians and documents their contribution to Canadian economic and political life. The third edition of this popular and successful history describes Stephen Harper's arrival on the political scene, as well as the rise and fall of such figures as Grant Devine, Bill Vander Zalm, Glen Clark, Roy Romanow, and Stockwell Day. It also describes how the West, the cradle of Canadian social democracy, was transformed into the bastion of the right during the last decade.

**The French party system** Jocelyn Evans.2018-07-30 This electronic version has been made available under a Creative Commons (BY-NC-ND) open access license. This book provides a complete overview of the of parties in France. The social and ideological profiles of all the major parties are analysed chapter by chapter, highlighting their principal functions and dynamics within the system. These are complemented by analyses of bloc and system features, including the pluralist left, Europe, and the ideological space in which the parties operate. In particular, the book addresses the impressive capacity of French parties and their leaders to adapt themselves to the changing concerns of their electorates and to a shifting institutional context.

*Temporality in Life As Seen Through Literature* Anna-Teresa Tymieniecka.2007-05-09 With a wealth of papers in its pages, this book examines that fundamental of human philosophy, the relationship between human beings and time. Having the human subject - the creator - at its center, literature is essentially engaged in temporality whether that of the mind or of the world of life through the creative process of writing, stage directing, or the reader's and viewer's reception. This text examines, among others, the work of Proust and Kafka.

**Cinema, Trance and Cybernetics** Ute Holl.2017-03-15 We've all had the experience of watching a film and feeling like we've been in a trance. This book takes that experience seriously, explaining cinema as a cultural technique of trance, one that unconsciously transforms our perceptions. Ute Holl moves from anthropological and experimental cinema through nineteenth-century psychological laboratories, which she shows developed technique of testing, measuring, and classifying the mind that can be seen as a prehistory of cinema, one that allows us to see the links among cinema, anthropology, psychology, and cybernetics.

**Maurice Blanchot and Fragmentary Writing** Leslie Hill.2012-07-05 Writing in fragments is often held to be one of the most distinctive signature effects of Romantic, modern, and postmodern literature. But what is the fragment, and what may be said to be its literary, philosophical, and political significance? Few writers have explored these questions with such probing radicality and rigorous tenacity as the French writer and thinker Maurice Blanchot. For the first time in any language, this book explores in detail Blanchot's own writing in fragments in order to understand the stakes of the fragmentary within philosophical and literary modernity. It attends in detail to each of Blanchot's fragmentary works (*Awaiting Forgetting*, *The Step Not Beyond*, and *The Writing of the Disaster*) and reconstructs Blanchot's radical critical engagement with the philosophical and literary tradition, in particular with Hegel, Nietzsche, Heidegger, Heraclitus, Levinas, Derrida, Nancy, Mallarmé, Char, and others, and assesses Blanchot's account of politics, Jewish thought, and the Shoah, with a view to understanding the stakes of fragmentary writing in Blanchot and within philosophical and literary modernity in general.

*Images of Canadianness* Louis Balthazar, International Council for Canadian Studies.1998 *Images of Canadianness* offers backgrounds and explanations for a series of relevant--if relatively new--features of Canada, from political, cultural, and

economic angles. Each of its four sections contains articles written by Canadian and European experts that offer original perspectives on a variety of issues: voting patterns in English-speaking Canada and Quebec; the vitality of French-language communities outside Quebec; the Belgian and Dutch immigration waves to Canada and the resulting Dutch-language immigrant press; major transitions taking place in Nunavut; the media as a tool for self-government for Canada's First Peoples; attempts by Canadian Indians to negotiate their position in society; the Canada-US relationship; Canada's trade with the EU; and Canada's cultural policy in the light of the information highway.

**The Doctrine of Res Judicata Before International Commercial Arbitral Tribunals** Silja Schaffstein. 2016 Today, international commercial disputes regularly involve multiple parties, contracts, and issues. As a result, the number of disputes that are tried in two or more different forums has increased, giving rise to difficult issues regarding the conclusive and preclusive effects of prior judgments or awards. As a result, the doctrine of res judicata, which requires that a final decision by a court or arbitral tribunal is conclusive and should not be re-litigated, is of increasing significance. Dr Silja Schaffstein provides the first practical and comprehensive guidelines for matters of res judicata for international commercial arbitration practitioners. Structured in two parts, part one examines the doctrine of res judicata in domestic and international litigation whilst part two determines whether and how the res judicata doctrine may be applied by international commercial arbitral tribunals. Dr Schaffstein identifies situations in which res judicata issues are likely to arise before international commercial arbitral tribunals and provides actionable solutions. The book determines the key features of the doctrine of res judicata in the laws of England, the United States, France and Switzerland, as representative of the common law system on the one hand and the civil law system on the other hand. The book also presents the doctrine of res judicata in the context of private international law, alongside its crucial aspects and application in public international law by international courts and tribunals. The aim of the work is to demonstrate how transnational principles of res judicata should be elaborated for international commercial arbitral tribunals. The analysis looks at how the doctrine should be applied by international commercial arbitral tribunals in their relations with other arbitral tribunals or state courts, and within the arbitral proceedings pending before them. The work sets out the transnational principles in the form of guidelines for international arbitrators.

**The Matrix in Theory** .2016-08-01 The Matrix trilogy continues to split opinions widely, polarising the downright dismissive and the wildly enthusiastic. Nevertheless, it has been fully embraced as a rich source of theoretical and cultural references. The contributions in this volume probe the effects the Matrix trilogy continues to provoke and evaluate how or to what extent they coincide with certain developments within critical and cultural theory. Is the enthusiastic philosophising and theorising spurred by the Matrix a sign of the desperate state theory is in, in the sense of "see how low theory (or 'post-theory') has sunk"? Or could the Matrix be one of the "master texts" for something like a renewal for theory as now being

mainly concerned with new and changing relations between science, technology, posthumanist culture, art, politics, ethics and the media? The present volume is unashamedly but not dogmatically theoretical even though there is not much agreement about what kind of theory is best suited to confront “post-theoretical” times. But it is probably fair to say that there is agreement about one thing, namely that if theory appears to be “like” the Matrix today it does so because the culture around it and which “made” it itself seems to be captured in some kind of Matrix. The only way out of this is through more and renewed, refreshed theorising, not less.

*This Deleuzian Century* .2015-03-10 Based on Deleuze's idea that philosophy is an activity that appeals to anyone who is attuned to the desire for the ethical life, the contributions in this book question how to live the ethical life today in academia, in art but above all in our multiple ecologies of belonging.

Heritage Regimes and the State Bendix, Regina, Eggert, Aditya, Peselmann, Arnika.2013-07-02 What happens when UNESCO heritage conventions are ratified by a state? How do UNESCO’s global efforts interact with preexisting local, regional and state efforts to conserve or promote culture? What new institutions emerge to address the mandate? The contributors to this volume focus on the work of translation and interpretation that ensues once heritage conventions are ratified and implemented. With seventeen case studies from Europe, Africa, the Caribbean and China, the volume provides comparative evidence for the divergent heritage regimes generated in states that differ in history and political organization. The cases illustrate how UNESCO’s aspiration to honor and celebrate cultural diversity diversifies itself. The very effort to adopt a global heritage regime forces myriad adaptations to particular state and interstate modalities of building and managing heritage.

**Jacques Derrida and the Institution of French Philosophy** Vivienne Orchard.2017-12-02 Jacques Derrida (1930-2004) was unquestionably one of the most celebrated and reviled French thinkers of the last thirty years. Outside France his influence in comparative literature circles, through deconstruction and other ideas, has been so profound that his personal role as a leader of contemporary French philosophy has been almost overlooked. Perhaps because there is no equivalent in English-speaking countries to the timetabling of philosophy in the French education system, writers on Derrida

outside France have not fully appreciated the importance of this political and cultural struggle. In this ground-breaking book, Orchard examines a hard-fought debate of great importance not only to Derrida himself, but also to France's idea of what studying 'philosophy' might mean after the student uprisings of 1968.

**Child Migration in Africa** Iman Hashim, Doctor Dorte Thorsen. 2011-02-10 Child Migration in Africa explores the mobility of children without their parents within West Africa. Drawing on the experiences of children from rural Burkina Faso and Ghana, the book provides rich material on the circumstances of children's voluntary migration and their experiences of it. Their accounts challenge the normative ideals of what a 'good' childhood is, which often underlie public debates about children's migration, education and work in developing countries. The comparative study of Burkina Faso and Ghana highlights that social networks operate in ways that can be both enabling and constraining for young migrants, as can cultural views on age- and gender-appropriate behaviour. The book questions easily made assumptions regarding children's experiences when migrating independently of their parents and contributes to analytical and cross-cultural understandings of childhood. Part of the groundbreaking Africa Now series, Child Migration in Africa is an important and timely contribution to an under-researched area.

**Hypnosis and Psychosomatic Medicine** Jean Lassner.2012-12-06 During the International Congress for Hypnosis and Psychosomatic Medicine, held in Paris from April 28th to 30th 1965 under the patronage of the World Federation for Mental Health, about one hundred papers were presented and the following panel discussions held: Electroencephalography and Hypnosis, chairman Prof. H. FISCHGOLD (Paris); The Teaching of Hypnosis, chairmen Dr. C. CEDERCREUTZ (Hamina) and Dr. H. ROSEN (Baltimore); Hypnosis and Pain, chairman Dr. M.H. ERICKSON (Phoenix); Hypnosis and the Psychotropic Drugs, chairman Dr. B.B. RAGINSKY (Montreal). The official languages of the Congress (German, French and English) were not always the speakers' mother tongues. A certain amount of editing was therefore necessary before publication, and this retarded the printing. Approximately half of the papers appear in this volume. We wish to thank the following organizations for the help they granted the Congress. Prof. J. **Towards a European Civil Code** E. H. Hondius.2004 Since its original publication ten years ago, Towards a European Civil Code has become an international classic. It is both a preeminent reference in the debate on the future of European private law, and a standard text in legal education in many European universities. This third, fully revised and expanded edition includes new contributions on such important matters as the following: constitutionalisation; social concerns; economic analysis; arguments against a European civil code; e-commerce; and sales, service and insurance contracts. All forty four chapters have been brought fully up to date with European and national developments, making Towards a European Civil Code the cornerstone in any endeavour involving issues in European private law.

**The Elastic Closet** S. **The Guitar and its Music** James Tyler,Paul Sparks.2002-08-29 Following on from James Tyler's The Early Guitar: A History and Handbook(OUP 1980) this collaboration with Paul Sparks (their previous book for OUP, The Early Mandolin,

appeared in 1989), presents new ideas and research on the history and development of the guitar and its music from the Renaissance to the dawn of the Classical era. Tyler's systematic study of the two main guitar types found between about 1550 and 1750 focuses principally on what the sources of the music (published and manuscript) and the writings of contemporary theorists reveal about the nature of the instruments and their roles in the music making of the period. The annotated lists of primary sources, previously published in *The Early Guitar* but now revised and expanded, constitute the most comprehensive bibliography of Baroque guitar music to date. His appendices of performance practice information should also prove indispensable to performers and scholars alike. Paul Sparks also breaks new ground, offering an extensive study of a period in the guitar's history—notably c.1759-c.1800—which the standard histories usually dismiss in a few short paragraphs. Far from being a dormant instrument at this time, the guitar is shown to have been central to music-making in France, Italy, the Iberian Peninsula, and South America. Sparks provides a wealth of information about players, composers, instruments, and surviving compositions from this neglected but important period, and he examines how the five-course guitar gradually gave way to the six-string instrument, a process that occurred in very different ways (and at different times) in France, Italy, Spain, Germany, and Britain.
