State Power and Social Forces Joel Samuel Migdal, Atul Kohli, Vivienne Shue. 1994-08-26 Including cases drawn from Africa, the Middle East, Asia, and Latin America, this collection of scholarly essays is relevant to the growing state theory literature in the social sciences, stressing a state-in-society approach to the study of political development.

Creating an Ecosocial Welfare Future Mary P. Murphy. 2023-05-05 A uniquely hybrid approach to welfare state policy, ecological sustainability and social transformation, this book explores transformative models of welfare change. Using Ireland as a case study, it addresses the institutional adaptations needed to move towards a sustainable welfare state, and the policy of making such transformation happen. It takes a theoretical and practical approach to implementing an alternative paradigm for welfare in the context of globalisation, climate change, social cohesion, automation, economic and power inequalities, intersectionality and environmental sustainability, as well as perpetual crisis, including the pandemic.

Theories of Power and Domination Angus Stewart. 2001-03-20 Power and domination are central concepts in social science yet, up to now, they have been undertheorized. This wide-ranging book guides students through the complexities and implications of both concepts. It provides systematic accounts of current debates about the dynamics and rationale of state power in an era of globalization, social citizenship and the significance of social movements. The contributions of Parsons, Giddens, Foucault, Mann, Arendt, Habermas and Castells are clearly set out and critically assessed.

Domination and Power Peter Miller. 2019-11-21 First published in 1987. Our understanding of the nature of power in western societies is currently undergoing a major reassessment. The significance of this reassessment emerges forcefully through comparing the writings of the principal exponents of Critical Theory - Max Horkheimer, Herbert Marcuse and Jürgen Habermas - with those of Michel Foucault. Peter Miller suggests that these two traditions embody fundamentally distinct philosophical and sociological principles. He grounds his analysis in the concepts of domination (Critical Theory) and power (Foucault). Miller identifies the notion of subjectivity as central to a differentiation of the respective approaches of Critical Theory and Foucault. For Critical Theory it is the repression of subjectivity which provides the evidence of domination and the rationale for its critique, while for Foucault subjectivity in western societies is fabricated through power and linked to the

deployment of specific knowledges. Miller shows that despite the achievements of Critical Theory in bringing to light the repressive nature of advanced industrial societies, its thinking is inadequate as a basis for future analysis and critique. He argues that Foucault's genealogy of the modern subject, which highlights the role of the human sciences in its fabrication, is a more fruitful basis for charting and investigating the mode of operation of contemporary forms of power. The book includes a survey of all published works by Foucault, up to the time of his death in 1984, and commentaries on the writings of Max Horkheimer, Herbert Marcuse and Jürgen Habermas.

Women & Power Mary Beard.2017-11-02 An updated edition of the Sunday Times Bestseller Britain's best-known classicist Mary Beard, is also a committed and vocal feminist. With wry wit, she revisits the gender agenda and shows how history has treated powerful women. Her examples range from the classical world to the modern day, from Medusa and Athena to Theresa May and Hillary Clinton. Beard explores the cultural underpinnings of misogyny, considering the public voice of women, our cultural assumptions about women's relationship with power, and how powerful women resist being packaged into a male template. A year on since the advent of #metoo, Beard looks at how the discussions have moved on during this time, and how that intersects with issues of rape and consent, and the stories men tell themselves to support their actions. In trademark Beardian style, using examples ancient and modern, Beard argues, 'it's time for change - and now!' From the author of international bestseller SPQR: A History of Ancient Rome.

Philosophical Perspectives on Power and Domination Laura Duhan Kaplan, Laurence F. Bove.1997 The essays in this volume explore in detail many of the ways power structures our daily personal, political and intellectual lives, and evaluate the workings of power using a variety of theoretical paradigms, from Hobbesian liberalism to Foucauldian feminist postmodernism. Taken as a whole, the book aims towards an end to unjust and destructive uses of power and the flowering of an encouraging, educated empowerment for all human beings in a pluralistic world. Section I offers a progressive chain of arguments that moves from the acceptance of domination, through the rejection of domination and, finally, to a new vision of power based on equality and mutual respect. Section II explores the questions, how is the philosophical self, that is, our very understanding of who we are, implicated in the web of power and domination? Section III responds to political realism as it explores morally ideal solutions to the global problems of poverty, war and hunger. Section IV discusses ways in which our thought and practice in both public and private life are bound up in hierarchies of domination.

Rethinking Imperialism J. Milios, D. Sotiropoulos.2009-10-09 This book aims at presenting and assessing imperialism as a theoretical concept. It aims to provide a comprehensive evaluation, focusing specifically on the tension between Marx's theoretical system of the Critique of Political Economy and the theories of capitalist expansion and domination.

Recycling Reconsidered Samantha Macbride.2013-08-16 How the success and popularity of recycling has diverted

attention from the steep environmental costs of manufacturing the goods we consume and discard. Recycling is widely celebrated as an environmental success story. The accomplishments of the recycling movement can be seen in municipal practice, a thriving private recycling industry, and widespread public support and participation. In the United States, more people recycle than vote. But, as Samantha MacBride points out in this book, the goals of recycling—saving the earth (and trees), conserving resources, and greening the economy—are still far from being realized. The vast majority of solid wastes are still burned or buried. MacBride argues that, since the emergence of the recycling movement in 1970, manufacturers of products that end up in waste have successfully prevented the implementation of more onerous, yet far more effective, forms of sustainable waste policy. Recycling as we know it today generates the illusion of progress while allowing industry to maintain the status quo and place responsibility on consumers and local government. MacBride offers a series of case studies in recycling that pose provocative questions about whether the current ways we deal with waste are really the best ways to bring about real sustainability and environmental justice. She does not aim to debunk or discourage recycling but to help us think beyond recycling as it is today.

Freedom Is Power Lawrence Hamilton.2014-07-31 Using the history of political thought and real-world political contexts, including South Africa and the recent global financial crisis, this book argues that power is integral to freedom. It demonstrates how freedom depends upon power, and contends that liberty for all citizens is best maintained if conceived as power through political representation. Against those who de-politicise freedom through a romantic conception of 'the people' and faith in supposedly independent judicial and political institutions, Lawrence Hamilton argues that real modern freedom can only be achieved through representative and participative mechanisms that limit domination and empower classes and groups who become disempowered in the conflicts that inevitably pervade politics. This is a sophisticated contribution to contemporary political theory that will be of interest to scholars and students of history, politics, philosophy, economics, sociology, development studies and Southern African studies.

Handbook on the Geographies of Power Mat Coleman,John Agnew.2018-07-27 The so-called spatial turn in the social sciences means that many researchers have become much more interested in what can be called the spatialities of power, or the ways in which power as a medium for achieving goals is related to where it takes place. Most famous authors on the subject, such as Machiavelli and Hobbes, saw power as entirely equivalent to domination exercised by some over others. Though this meaning is hardly redundant, understandings of power have become more multidimensional and nuanced as a result of the spatial turn. Much recent writing in human geography, for example, has rigorously extended use of the term power beyond its typical understanding as a resource that pools up in some hands and some places to a medium of agency that has different effects depending on how it is deployed across space and how actors cooperate, or not, to give it effect. To address this objective, the book is organized thematically into four sections that cover the main areas in which much of the

contemporary work on geographies of power is concentrated: bodies, economy, environment and energy, and war.

Reasonable Democracy Simone Chambers.2018-10-18 In *Reasonable Democracy*, Simone Chambers describes, explains, and defends a discursive politics inspired by the work of Jürgen Habermas. In addition to comparing Habermas's ideas with other non-Kantian liberal theories in clear and accessible prose, Chambers develops her own views regarding the role of discourse and its importance within liberal democracies. Beginning with a deceptively simple question—Why is talking better than fighting?—Chambers explains how the idea of talking provides a rich and compelling view of morality, rationality, and political stability. She considers talking as a way for people to respect each other as moral agents, as a way to reach reasonable and legitimate solutions to disputes, and as a way to reproduce and strengthen shared understandings. In the course of this argument, she defends modern universalist ethics, communicative rationality, and what she calls a discursive political culture, a concept that locates the political power of discourse and deliberation not so much in institutions of democratic decision-making as in the type of conversations that go on around these institutions. While discourse and deliberation cannot replace voting, bargaining, or compromise, Chambers argues, it is important to maintain a background moral conversation in which to anchor other activities. As an extended case study, Chambers examines the conversation about language rights that has been taking place for more than twenty years in Quebec. A culture of dialogue, she shows, has proved a positive and powerful force in resolving some of the disagreements between the two linguistic communities there.

The End of Power Moises Naim.2014-03-11 The provocative bestseller explaining the decline of power in the twenty-first century -- in government, business, and beyond. Resistance and Power in Organizations John M. Jermier, David Knights, Walter R. Nord.1994-01-01 This state of the art collection develops the theme of resistance from below in everyday organizational life. Building on a body of theory dealing with power, control and domination in the labour process, international contributors expand the analysis by focusing on material circumstances and subjective states that lead to subtle forms of subversion and sabotage as well as to more overt forms of defiance and protest. Throughout the volume discussion is supported by case studies, interviews, surveys and ethnographic data drawn from around the world to reveal resistance practices which range from those hidden in the 'crawl-

spaces' of organizations to those that are more public and demonstrative. Recent developments in critical social theory are used to provoke thinking about resistance both as a response to power and a form of power. Uniquely, the contributions show that oppressive practices at work can be met with powerful counterforces, and that resistance need not only take the form of 'quiet resilience'. Presenting an empowering view of insubordination, this volume will be of interest to those in the fields of organizational sociology, organizational behaviour, industrial and labour relations and women's studies.

Marxist Political Economy and Bourdieu George Economakis, Theofanis Papageorgiou. 2023-06-30 This book systematically addresses Bourdieu's key ideas and concepts in the context of Marxist thought. In this book, Bourdieu's central theoretical points are analyzed within a political, sociological and politico-economic framework which allows for the development of a sequential narrative of his key ideas. Thus, the authors are able to highlight the theoretical consistencies and political conclusions which can be derived from Bourdieu's work. For example, Bourdieu's anti-neoliberal narrative is correlated with his analysis of class, and especially with his canonization of the petty bourgeoisie and its strategy for a reformed anti-neoliberal capitalism. The book also analyzes this coherent synthesis of Bourdieu's work in the context of Marxist political economy, including not only Marx but also Lenin, Althusser and Poulantzas. In this context, the book explores Bourdieu's work on the state, class strategy, socialism and capitalism. This unique perspective will be of great interest to social scientists, particularly in economics, politics and sociology, working on Bourdieu, Marx and capitalism.

Becoming Good American Schools Jeannie Oakes, Karen Hunter Quartz, Steve Ryan, Martin Lipton. 2002-04-04 A convincing portrait of teachers actively engaged in educational reform...offering a hopeful yet realistic vision of revitalized democracy inspired by a passion for the public good. This book is an eloquent defense of civic virtue. —Jonathan Kozol, author of *Amazing Grace* and *Savage Inequalities* Rich, realistic, invigorating, and scary. Any middle school educator who has been part of an effort to reform the educational process will see himself or herself in this book—as the brave risk taker, the naive visionary, the frightened frontline trooper, and the touched individual who can make a difference. —Judy Cunningham, principal, South Lake Middle School, Irvine, California This book tells the stories of sixteen schools in California, Illinois, Massachusetts, Texas, and Vermont that sought to alter their structures and practices and become places fostering innovative ideas, caring people, principles of social justice, and democratic processes. Based on longitudinal, comparative case-study research, these accounts attest to the power of committing to public virtue and the struggle of educators to transform that commitment into changed school practice. The authors argue that better schools will come only when policy makers, educators, and citizens move beyond technical and bureaucratic reforms to engage in the same educative, socially just, caring, and participatory processes they want for schoolchildren. Those processes constitute betterment—both the means and the ends of school reform. *Becoming Good American Schools* is for administrators, policy makers, practitioners, and citizens who are prepared to blend inspiration and caution, idealism and skepticism in their own pursuit of good schools.

Black Feminist Thought Patricia Hill Collins.2002-06-01 In spite of the double burden of racial and gender discrimination, African-American women have developed a rich intellectual tradition that is not widely known. In *Black Feminist Thought*, Patricia Hill Collins explores the words and ideas of Black feminist intellectuals as well as those African-American women outside academe. She provides an interpretive framework for the work of such prominent Black feminist thinkers as Angela Davis, bell hooks, Alice Walker, and Audre Lorde. The result is a superbly crafted book that provides the first synthetic overview of Black feminist thought.

Phenomena of Power Heinrich Popitz.2017-04-25 In *Phenomena of Power*, one of the leading figures of postwar German sociology reflects on the nature, and many forms of, power. For Heinrich Popitz, power is rooted in the human condition and is therefore part of all social relations. Drawing on philosophical anthropology, he identifies the elementary forms of power to provide detailed insight into how individuals gain and perpetuate control over others. Instead of striving for a power-free society, Popitz argues, humanity should try to impose limits on power where possible and establish counterpower where necessary. *Phenomena of Power* delves into the sociohistorical manifestations of power and breaks through to its general structures. Popitz distinguishes the forms of the enforcement of power as well as of its stabilization and institutionalization, clearly articulating how the mechanisms of power work and how to track them in the social world. Philosophically trained, historically informed, and endowed with keen observation, Popitz uses examples ranging from the way passengers on a ship organize deck chairs to how prisoners of war share property to illustrate his theory. Long influential in German sociology, *Phenomena of Power* offers a challenging reworking of one of the essential concepts of the social sciences.

Radical Republicanism Bruno Leipold,Karma Nabulsi,Stuart White.2020-03-05 Republicanism is a powerful resource for emancipatory struggles against domination. Its commitment to popular sovereignty subverts justifications of authority, locating power in the hands of the citizenry who hold the capacity to create, transform, and maintain their political institutions. Republicanism's conception of freedom rejects social, political, and economic structures subordinating citizens to any uncontrolled power - from capitalism and wage-labour to patriarchy and imperialism. It views any such domination as inimical to republican freedom. Moreover, it combines a revolutionary commitment to overturning despotic and tyrannical regimes with the creation of political and economic institutions that realise the sovereignty of all citizens, institutions that are resilient to threats of oligarchical control. This volume is dedicated to retrieving and developing this radical potential, challenging the more conventional moderate conceptions of republicanism. It brings together scholars at the forefront of tracing this radical heritage of the republican tradition, and developing arguments, texts, and practices into a critical and emancipatory body of political and social thought. The volume spans historical discussions of the English Levellers, French and Ottoman revolutionaries, and American abolitionists and trade unionists; explorations of the radical republican aspects of the thought of Machiavelli, Marx, and Rousseau; and theoretical examinations of social domination and popular

constitutionalism. It will appeal to political theorists, historians of political thought, and political activists interested in how republicanism provides a robust and successful radical transformation to existing social and political orders.

Critical Literacy with Adolescent English Language Learners Jennifer Alford.2021-05-25 This book examines critical literacy within language and literacy learning, with a particular focus on English as an Additional Language learners in schools who traditionally are not given the same exposure to critical literacy as native-English speakers. An important and innovative addition to extant literature, this book explains how English language teachers understand critical literacy and enact it in classrooms with adolescent English language learners from highly diverse language backgrounds. This book brings together the study of two intersecting phenomena: how critical literacy is constructed in English language education policy for adolescent English language learners internationally and how critical literacy is understood and enacted by teachers amid the so-called 'literacy crisis' in neoliberal eduscapes. The work traces the ways critical literacy has been represented in English language education policy for adolescents in five contexts: Australia, England, Sweden, Canada and the United States. Drawing on case study research, it provides a comparative analysis of how policy in these countries constructs critical literacy, and how this then positions critical engagement as a focus for teachers of English language learners. Empirically based and accessibly written, this timely book will be of interest to a wide range of academics in the fields of adolescent literacy education, English language learning and teaching, education policy analysis, and critical discourse studies. It will also appeal to teachers, post-graduate students and language education policy makers.

Philosophical Perspectives on Power and Domination Laurence F. Bove,Laura Duhan Kaplan.1997 The essays in this volume explore in detail many of the ways power structures our daily personal, political and intellectual lives, and evaluate the workings of power using a variety of theoretical paradigms, from Hobbesian liberalism to Foucauldian feminist postmodernism. Taken as a whole, the book aims towards an end to unjust and destructive uses of power and the flowering of an encouraging, educated empowerment for all human beings in a pluralistic world. Section II explores the questions, how is the philosophical self, that is, our very understanding of who we are, implicated in the web of power and domination? Section III responds to political realism as it explores morally ideal solutions to the global problems of poverty, war and hunger. Section IV discusses ways in which our thought and practice in both public and private life are bound up in hierarchies of domination.

Entanglements of Power Ronan Paddison,Chris Philo,Paul Routledge,Joanne Sharp.2002-09-11 This book argues that practices of resistance cannot be separated from practices of domination, and that they are always entangled in some configuration. They are inextricably linked, such that one always bears at least a trace of the other that contaminates or subverts it. The team of contributors explore themes of identity, embodiment, organisation, colonialism, and political

transformation, examining them from historical, contemporary and more abstract perspectives within a wide geographical and cultural spectrum. Case studies include German Reunification; Jamaican Yardies on British Television; Victorian Sexuality and Moralisation in Cremorne Gardens; Ethnicity, Gender and Nation in Ecuador; Sport as Power; the film *Falling Down*. *Entanglements of Power* presents an exciting and challenging account of the symbiotic relationship between domination and resistance, and contextualises this within the parameters of geography with a rich body of case-study material and a respected team of contributors.

Rethinking Power Thomas E. Wartenberg. 1992-07-01 The authors represent the cutting edge of current research into the concept of power. Among the topics discussed are power in social theory, feminist conceptions of power, power and sexuality, modes of oppression and domination, the significance of Foucault's theory of power, and power in market transactions. Included are contributions by Amelie Oksenberg Rorty, Terence Ball, Jeffrey Isaac, Thomas McCarthy, Gayatri Spivak, Iris Marion Young, Jean Baker Miller, Nancy C. M. Hartsock, Samuel Bowles, Herbert Gintis, and Roger S. Gottlieb.

Rethinking Revolution Leo Panitch, Greg Albo. 2016-12 One hundred years ago, "October 1917" galvanized leftists and oppressed peoples around the globe, and became the lodestar for 20th century politics. Today, the left needs to reckon with this legacy—and transcend it. Social change, as it was understood in the 20th century, appears now to be as impossible as revolution, leaving the left to rethink the relationship between capitalist crises, as well as the conceptual tension between revolution and reform. Populated by an array of passionate thinkers and thoughtful activists, *Rethinking Revolution* reappraises the historical effects of the Russian revolution—positive and negative—on political, intellectual, and cultural life, and looks at consequent revolutions after 1917. Change needs to be understood in relation to the distinct trajectories of radical politics in different regions. But the main purpose of this Socialist Register edition—one century after "Red October"—is to look forward, to what might happen next. Acclaimed authors interrogate and explore compelling issues,

including: • Greg Albo: New socialist strategies—or detours? • Jodi Dean: Are the multitudes communing? Revolutionary agency and political forms today. • Adolph Reed: Are racial minorities revolutionary agents? • Zillah Eisenstein: Revolutionary feminisms today. • Nina Power: Accelerated technology, decelerated revolution. • David Schwartzman: Beyond global warming: Is solar communism possible? • Andrea Malm: Revolution and counter-revolution in an era of climate change.

A Political Economy of Contemporary Capitalism and its Crisis Dimitris P Sotiropoulos, John Milios, Spyros Lapatsioras. 2013-06-19 The recent financial meltdown and the resulting global recession have rekindled debates regarding the nature of contemporary capitalism. This book analyses the ongoing financialization of the economy as a development within capitalism, and explores the ways in which it has changed the organization of capitalist power. The authors offer an interpretation of the role of the financial sphere which displays a striking contrast to the majority of contemporary heterodox approaches. Their interpretation stresses the crucial role of financial derivatives in the contemporary organization of capitalist power relations, arguing that the process of financialization is in fact entirely unthinkable in the absence of derivatives. The book also uses Marx's concepts and some of the arguments developed in the framework of the historic Marxist controversies on economic crises in order to gain an insight into the modern neoliberal form of capitalism and the recent financial crisis. Employing a series of international case studies, this book will be essential reading for all those with an interest in the financial crisis, and all those seeking to comprehend the workings of capitalism.

Blessed Are the Organized Jeffrey Stout. 2010-10-11 How ordinary citizens band together to bring about real change In an America where the rich and fortunate have free rein to do as they please, can the ideal of liberty and justice for all be anything but an empty slogan? Many Americans are doubtful, and have withdrawn into apathy and cynicism. But thousands of others are not ready to give up on democracy just yet. Working outside the notice of the national media, ordinary citizens across the nation are meeting in living rooms, church basements, synagogues, and schools to identify shared concerns, select and cultivate leaders, and take action. Their goal is to hold big government and big business accountable. In this important new book, Jeffrey Stout bears witness to the successes and failures of progressive grassroots organizing, and the daunting forces now arrayed against it. Stout tells vivid stories of people fighting entrenched economic and political interests around the country. From parents and teachers striving to overcome gang violence in South Central Los Angeles, to a Latino priest north of the Rio Grande who brings his parish into a citizens' organization, to the New Orleans residents who get out the vote by taking a jazz band through streets devastated by Hurricane Katrina, Stout describes how these ordinary people conceive of citizenship, how they acquire and exercise power, and how religious ideas and institutions contribute to their successes. The most important book on organizing and grassroots democracy in a generation, *Blessed Are the Organized* is a passionate and hopeful account of how our endangered democratic principles can be put into action.

The Later Foucault Jeremy Moss.1998-03-06 Why does Foucault's work continue to be of central importance in current debates in sociology, political science and philosophy? Why do we still read him as a guide to contemporary social and cultural life? Foucault's work presents a provocative challenge to orthodox, habitual forms of belief and practice. The Later Foucault, with an impressive interdisciplinary focus, argues that one of the keys to understanding Foucault is his political thought. It is this which he expressed clearly in his last writings and which pulled together his earlier interests in power, agency and subjectivity. In this volume a distinguished array of Foucauldian scholars and commentators on politics explore the significance of these last writings. They examine such key issues as the question of Foucault and human rights; his relationship to ethical thought, power and freedom; his relationship to feminism; and comparisons of his work with Levinas and Rawls.

Researching Elites and Power Francois Denord,Mikael Palme,Bertrand Réau.2020-08-12 This open access book describes how elite studies theoretically and methodologically construct their object, i.e. how particular conceptualizations of elites are turned into research practice using different methods for collecting, dealing with and analyzing empirical data. The first of four sections focuses on what Mills named the power elite and includes Bourdieu's field of power. The second section addresses studies of the domain of economic power, whereas the third section centers on research on elite education. The fourth and last section highlights research on symbolic power, either within social fields or as a dimension of social structure at large, areas where recognition is essential. All sections comprise empirical case studies of elites and power, whereby each of which makes explicit the various methodological choices made in the research process. Through focusing on methodological approaches for the study of elites and power and on how such approaches relate to each other as well as to the theoretical perspectives that underpin them, this book will be a valuable source for social scientists.

Alternative Theories of Competition Jamee K. Moudud,Cyrus Bina,Patrick L. Mason.2012 This book takes a radically different approach to the analysis of competition by rejecting the perfect vs. imperfect competition dichotomy and draws on the insights of classical political economists such as Marx, Schumpeter, Hayek and Andrews.

The Forms of Power Thomas E. Wartenberg.1991-08-21 The concept of power has played a fundamental role in critical reflection about society. However, even the most basic questions concerning the concept of power have been subject to ongoing debate. Examining the ways in which philosophers from Plato onwards have used the concept of power, Wartenberg develops a field theory of power that rejects many of the reigning assumptions made about power. Incorporating the insights of feminist theorists, he argues that power has a positive as well as a negative role to play in social relations. Arguing that an adequate theory of power needs to recognize a plurality of forms of power, the author uses the example of teaching to show the multiple ways in which power is a factor in social relationships. As an important corrective to the consensual and domination models, Wartenberg's field theory gives social theorists and philosophers a more adequate tool for thinking about

the nature of power. Author note: Thomas E. Wartenbertis Associate Professor of Philosophy at Mount Holyoke College.

Agency and Social Transformation in South African Higher Education Grace Ese-osa Idahosa. 2019-07-04 This book explores the process of transformation, discussing how individuals are capable of acting to enable transformation of structures and cultures through the lens of South African higher education. Agency and Social Transformation in South African Higher Education examines the role of agency in effecting change amidst the rigid conditions within South African universities. Arguing for a focus on transformation from below, it explores transformation and agency from the perspective of academic staff. Through discussing moments at which faculty members embedded in rigid structures and cultures perceive themselves as having had the agency to interrupt and transform them, despite their rigidity, this book describes the nuances of social action and agency within the South African higher education institutional context and the ways in which contextual histories may provide enabling/limiting conditions to individuals within them. This book makes an important contribution to the field of agency and social transformation theoretically, methodologically and geographically as it details the motivations for transformation, how individuals become agents of change and the practical experiences of these individuals from a

localised perspective. Agency and Social Transformation in South African Higher Education will be of interest to scholars and students of African higher education, transformation studies and postcolonial studies.

Empowering Women Carmen Diana Deere, Magdalena León de Leal. 2001-01-15 The expansion of married women's property rights was a main achievement of the first wave of feminism in Latin America. As Carmen Diana Deere and Magdalena Leon reveal, however, the disjuncture between rights and actual ownership remains vast. This is particularly true in rural areas, where the distribution of land between men and women is highly unequal. In their pioneering, twelve-country comparative study, the authors argue that property ownership is directly related to women's bargaining power within the household and community, point out changes resulting from recent gender-progressive legislation, and identify additional areas for future reform, including inheritance rights of wives.

Education, Learning and the Transformation of Development Amy Skinner, Matt Baillie Smith, Eleanor Brown, Tobias Troll. 2016-07-15 Whilst education has been widely recognised as a key tool for development, this has tended to be limited to the incremental changes that education can bring about within a given development paradigm, as opposed to its role in challenging dominant conceptions and practices of development and creating alternatives. Through a collection of insightful and provocative chapters, this book will examine the role of learning in shaping new discourses and practices of development. By drawing on contributions from activists, researchers, education and development practitioners from around the world, this book situates learning within the wider political and cultural economies of development. It critically explores if and how learning can shape processes of societal transformation, and consequently a new language and practice of development. This includes offering critical accounts of popular, informal and non-formal learning processes, as well as the contribution of indigenous knowledges, in providing spaces for the co-production of knowledge, thinking and action on development, and in terms of shaping the ways in which citizens engage with and create new understandings of 'development' itself. This book makes an important and original contribution by reframing educational practices and processes in relation to broader global struggles for justice, voice and development in a rapidly changing development landscape.

Topologies of Power John Allen.2016-01-13 Topologies of Power amounts to a radical departure in the way that power and space have been understood. It calls into question the very idea that power is simply extended across a given territory or network, and argues that power today has a new found 'reach'. Topological shifts have subtly altered the reach of power, enabling governments, corporations and NGOs alike to register their presence through quieter, less brash forms of power than domination or overt control. In a world in which proximity and distance increasingly play across one another, topology offers an insight into how power remains continuous under transformation: the same but different in its ability to shape peoples' lives. Drawing upon a range of political, economic and cultural illustrations, the book sets out a clear and accessible account of the topological workings of power in the contemporary moment. It will be invaluable for both students and academics in human geography, politics, sociology, and cultural studies.
