Germany's New Security Demographics Wenke Apt,2013-12-04 Military recruitment will become more difficult in times of demographic aging. The question arises whether demographic change will constrain the capacity of aging states like Germany to conduct foreign policy and pursue their national security interests. Since contemporary military operations still display a strong human element, particular scrutiny is given to the empirical analysis of the determinants of military propensity and military service among youth. An additional human capital projection until 2030 illustrates how the decline in the youth population will interact with trends in educational attainment and adolescent health to further complicate military recruitment in the future. A concluding review of recruiting practices in other NATO countries provides insight in best-practice policy options to reduce the military's sensitivity to demographic change. Following this approach, the book gives prominence to a topic that has thus far been under-represented in the greater discussion of demographic change today, namely the demographic impact on international affairs and strategic calculations.

Reinterpreting Modern Culture Paul van Tongeren,2000 Attempts to elucidate the philosophy of Friedrich Nietzsche through the experience of his writings. After a chapter devoted to Nietzsche's style and the proper way to read the philosopher, chapters focus separately on his thoughts on knowledge and reality, morality and politics, and religion. Each chapter presents fairly lengthy selections from Nietzsche's works (in both German and English) and then proceeds to comment on the texts with the help of additional brief selections. Gender, Health and Ageing Prof. Dr. Gertrud Backes,Vera Lasch,Katja Reimann,2008-05-07 The different research fields - gerontology, gender and health - have generated different views, knowledge and foci on ageing, health and gender. It is now necessary to integrate these aspects into research, policy and practice. The objective of this book is to provide an overview of gender, health and ageing. Important theoretical concepts, such as life course and Lebenslagen in old age, or differences in men's health, are introduced. It is increasingly important to build a European basis of knowledge, to conduct

discussions on European research findings, and to develop European research frameworks. In this volume, central theoretical debates on gender impacts on life course and old-age health, and vital issues of health research in the context of gender and old age are introduced. Specific aspects, such as the impact of gender and age on cardiovascular health, elder abuse and mental health, or care between gender relations, gender roles and gender constructs, are pointed out. Special attention is given to the impact of social, political and economic change in different New EU Member States, like Hungary, Poland and Slovenia.

Qualityland Marc-Uwe Kling,2020-07-14 What if the perfect world wasn't built for you? Welcome to QualityLand, the best country on Earth. Here, a universal ranking system determines the social advantages and career opportunities of every member of society. An automated matchmaking service knows the best partners for everyone and helps with the break up when your ideal match (frequently) changes. And the foolproof algorithms of the biggest, most successful company in the world, TheShop, know what you want before you do and conveniently deliver to your doorstep before you even order it. In QualityCity, Peter Jobless is a machine scrapper who can't quite bring himself to destroy the imperfect machines sent his way, and has become the unwitting leader of a band of robotic misfits hidden in his home and workplace. One day, Peter receives a product from TheShop that he absolutely, positively knows he does not want, and which he decides, at great personal cost, to return. The only problem: doing so means proving the perfect algorithm of TheShop wrong, calling into question the very foundations of QualityLand itself. Qualityland, Marc-Uwe Kling's first book to be translated into English, is a brilliantly clever, illuminating satire in the tradition of Kurt Vonnegut, Douglas Adams, and George Orwell that offers a visionary, frightening, and all-too funny glimpse at a near future we may be hurtling toward faster than it's at all comfortable to admit. So why delay any longer? TheShop already knows you're going to love this book. You may as well head to the cash register, crack the covers, and see why that is for yourself.

Unlocking Luhmann Claudio Baraldi,Giancarlo Corsi,Elena Esposito,2021-04-30 Luhmann's theory is fascinating and complex. It offers incomparably enlightening insights, references and research opportunities, but reveals its utility only after a quite high competence threshold. Using the reticular form of the glossary, this book makes the theory accessible while maintaining its complexity. Without being obstructed by knowledge gaps or by references to concepts presented elsewhere, readers inside and outside sociology get the required support to explore sociological systems theory and to engage with it. Luhmann himself, in his introduction, praises the form of the glossary to cope with the challenges of the theoretical description of our highly complex society.

Handbook of Brewing Hans Michael Eßlinger,2009-04-22 This comprehensive reference combines the technological know-how from five centuries of industrial-scale brewing to meet the needs of a global economy. The editor and authors draw on the expertise gained in the world's most competitive beer market (Germany), where many of the current technologies

were first introduced. Following a look at the history of beer brewing, the book goes on to discuss raw materials, fermentation, maturation and storage, filtration and stabilization, special production methods and beer mix beverages. Further chapters investigate the properties and quality of beer, flavor stability, analysis and quality control, microbiology and certification, as well as physiology and toxicology. Such modern aspects as automation, energy and environmental protection are also considered. Regional processes and specialties are addressed throughout the entire book, making this a truly global resource on brewing.

Burnout, Fatigue, Exhaustion Sighard Neckel,Anna Katharina Schaffner,Greta Wagner,2017-06-19 This interdisciplinary book explores both the connections and the tensions between sociological, psychological, and biological theories of exhaustion. It examines how the prevalence of exhaustion – both as an individual experience and as a broader socio-cultural phenomenon – is manifest in the epidemic rise of burnout, depression, and chronic fatigue. It provides innovative analyses of the complex interplay between the processes involved in the production of mental health diagnoses, socio-cultural transformations, and subjective illness experiences. Using many of the existing ideologically charged exhaustion theories as case studies, the authors investigate how individual discomfort and wider social dynamics are interrelated. Covering a broad range of topics, this book will appeal to those working in the fields of psychology, sociology, medicine, psychiatry, literature, and history.

Free Composition Heinrich Schenker,2001 The first two volumes of Heinrich Schenker's masterwork *Neue musikalische Theorien und Phantasien*, *Harmonielehren* (1906), and *Kontrapunkt* (1910 and 1922), laid the foundations for the harmonic aspect of his theory. The specific voice-leading component was a later development, progressing with brilliance over the last 15 years of his life. It is in *Free Composition* (*Freie Satz*, 1935) that the idea of voice-leading receives its most detailed and precise formulation. Pendragon Press is honored to make this distinguished reprint available once again, with a new preface by Carl Schacter.

Deutsche Biographische Enzyklopädie der Theologie und der Kirchen (DBETH) Bernd Moeller,Bruno Jahn,2011-05-03 Die *Deutsche Biographische Enzyklopädie der Theologie und der Kirchen (DBETH)* bietet biographische Artikel zu 8.000

Personen aus dem Bereich der Kirchen, der Theologie und der nichtchristlichen Religionen im deutschen Sprachraum. Dieses Personallexikon der Kirchen- und Religionsgeschichte reicht vom Frühmittelalter bis zur Gegenwart, es umspannt also einen Zeitraum von weit mehr als einem Jahrtausend. Christen der verschiedenen Konfessionen und Gemeinschaften, Juden, die als Theologen und religiöse Amtsträger hervorgetreten sind, und Repräsentanten der Religionswissenschaft werden mit ihrer Lebensgeschichte und ihrem Lebenswerk vorgestellt. Die DBETH ist ein nach Art und Umfang einzigartiges lexikalisches Werk. Der geographische Raum, auf den die Deutsche Biographische Enzyklopädie der Theologie und der Kirchen sich bezieht, ist durch die deutsche Sprache definiert. Er umfasst neben Deutschland, Österreich und der deutschsprachigen Schweiz auch das Elsass und Siebenbürgen, das Baltikum und Südtirol. Die biographischen Artikel sind frei von Wertungen und Zensuren, lebende Personen sind nicht berücksichtigt. Jene Frauen und Männer, die erheblichen Einfluss zu Lebzeiten und weitreichende Wirkungen nach ihrem Tod ausgeübt haben, erfahren eine umfangreichere Darstellung, die von Fachleuten verfasst und signiert ist. Die Artikel sind fast durchweg mit Angaben über weiterführende Literatur versehen. Ein Personen- und ein Ortsregister erleichtern die Benützung und erschließen Zusammenhänge. Der Personenkreis ist weit gefasst: Theologen, kirchliche Amtsträger, Philosophen mit religiös-theologischen Schwerpunkten sowie Künstler, bei denen die kirchlichen Themen und Aufgaben im Vordergrund standen - Schriftsteller, Musiker, Maler und Bildhauer, Baumeister. Einbezogen sind ferner weltliche Fürsten, die spezifische kirchenpolitische Wirkungen hatten. Pfarrer, die sich als Schriftsteller oder Naturkundige Verdienste erworben haben, wurden ebenso wenig vergessen wie Ordensleute, die als Astronomen oder Mathematiker Beachtung verdienen.

Demographic Aspects of Migration Thomas Salzmann, Barry Edmonston, James Raymer, 2010-08-24 Dr. Albert Schmid
President of the Federal Office for Migration and Refugees According to the United Nations, about 200 million people of the estimated world population of 6.8 billion are international migrants - that corresponds to about three per cent of the total world population. The proportion of international migrants in the global population has increased only marginally in the last 40 years. But, as a result of global population growth, the absolute number of migrants has increased, and their structure and spatial distribution has changed considerably. A structural shift has taken place primarily in the industrialised countries, where less than 20 per cent of the global workers are now living, but where more than 60 per cent of all migrants worldwide reside. Since 1990, more than 16 million people have moved to Germany, while about 11 million have left the country in the same period. Altogether, 15 million people of international migration origin are living in Germany, comprising almost 19 per cent of Germany's current population of 82 million. At the end of 2006, about 64 million people out of Europe's population of 732 million, or nine per cent, lived in a European country they were not born in. But why does anybody migrate at all? People

decide to leave because, in general, they expect to find better conditions and opportunities in other countries or regions.
