Teaching and the Case Method Louis B. Barnes, Carl Roland Christensen, Abby J. Hansen, 1994 This third edition of *Teaching and the Case Method* is a further response to increased national and international interest in teaching, teachers, and learning, as well as the pressing need to enhance instructional effectiveness in the widest possible variety of settings. Like its predecessors, this edition celebrates the joys of teaching and learning at their best and emphasizes the reciprocal exchange of wisdom that teachers and students can experience. It is based on the belief that teaching is not purely a matter of inborn talent. On the contrary, the knowledge, skills, and attitudes that make for excellence in teaching can be analyzed, abstracted, and learned. One key premise of *Teaching and the Case Method* is that all teaching and learning involve a core of universally applicable principles that can be discerned and absorbed through the study and discussion of cases.

Ethics in Public Service for the New Millennium Richard Chapman, 2019-07-12 This title was first published in 2000: The focus of this analysis is that of moral standards in public service, with special attention to the role(s) of officials. It presents discussion of some of the issues that seem to the contributors to be of pressing importance and that seem to have relevance for public service in the new millennium. It concentrates in particular on public officials, and the constraints imposed on them by the political environment in liberal democracies.

ICT Innovations 2012 Smile Markovski, Marjan Gusev, 2013-03-26 The present stage of the human civilization is the e-society, which is build over the achievements obtained by the development of the information and communication technologies. It affects everyone, from ordinary mobile phone users to designers of high quality industrial products, and

every human activity, from taking medical care to improving the state governing. The science community working in computer sciences and informatics is therefore under constant challenge; it has to solve the new appeared theoretical problem as well as to find new practical solutions. The fourth ICT Innovations Conference, held in September 2012 in Ohrid, Macedonia, was one of the several world-wide forums where academics, professionals and practitioners presented their last scientific results and development applications in the fields of high performance and parallel computing, bioinformatics, human computer interaction, security and cryptography, computer and mobile networks, neural networks, cloud computing, process verification, improving medical care, improving quality of services, web technologies, hardware implementations, cultural implication. In this book the best 37 ranked articles are presented.

Talk Like TED Carmine Gallo, 2014-03-04 Ideas are the currency of the twenty-first century. In order to succeed, you need to be able to sell your ideas persuasively. This ability is the single greatest skill that will help you accomplish your dreams. Many people have a fear of public speaking or are insecure about their ability to give a successful presentation. Now public speaking coach and bestselling author Carmine Gallo explores what makes a great presentation by examining the widely acclaimed TED Talks, which have redefined the elements of a successful presentation and become the gold standard for public speaking. TED ? which stands for technology, entertainment, and design ? brings together the world's leading thinkers. These are the presentations that set the world on fire, and the techniques that top TED speakers use will make any presentation more dynamic, fire up any team, and give anyone the confidence to overcome their fear of public speaking. In his book, Carmine Gallo has broken down hundreds of TED talks and interviewed the most popular TED presenters, as well as the top researchers in the fields of psychology, communications, and neuroscience to reveal the nine secrets of all successful TED presentations. Gallo's step-by-step method makes it possible for anyone to deliver a presentation that is engaging, persuasive, and memorable. Carmine Gallo's top 10 Wall Street Journal Bestseller Talk Like TED will give anyone who is insecure about their public speaking abilities the tools to communicate the ideas that matter most to them, the skill to win over hearts and minds, and the confidence to deliver the talk of their lives. The opinions expressed by Carmine Gallo in TALK LIKE TED are his own. His book is not endorsed, sponsored or authorized by TED Conferences, LLC or its affiliates.

Lodusky Frances Hodgson Burnett, 2020-03-16 A fiction novel penned by Frances Hodgson Burnett. This narrative

explores the life and customs of North Carolina, providing readers with a heartfelt depiction of the region's culture and traditions. A heartwarming read for those who enjoy American literature and cultural narratives.

International Business Law and Lex Mercatoria Filip De Ly, 1992 Traditionally, legal problems arising in connection with international business transactions had to be solved by a national law. This view was challenged in post war scholarly writing and transnational practice. It was argued that transnational rules (such as transnational contracts, general conditions, trade usages, general principles, uniform rules, arbitral cases) should be applied instead. Often, these transnational rules are referred to as *lex mercatoria*. This volume analyzes the different legal approaches to international business problems (including the theory of *lex mercatoria*) as well as their implications for international practice. As such, the relevance and importance of substantive law and conflict of laws and of national, international and transnational rules are discussed both with regard to their application by national courts and by international commercial arbitrators.

Biodegradable Plastics and Polymers Y. Doi, K. Fukuda, 2013-10-22 In the past 25 years, plastic products have gained universal use not only in food, clothing and shelter, but also in the transportation, construction, medical and leisure industries. Whereas previously synthetic plastics were developed as durable substitute products, increasing concern for the global environment and solid waste management has resulted in an urgent demand for biodegradable plastics. The main topics of the Third International Scientific Workshop were as follows: 1. Biodegradation of polymers and plastics 2. Environmental degradation of plastics 3. Synthesis and properties of new biodegradable plastic materials 4. Biodegradation and morphologies of polymer blends 5. Development of biodegradation test methods 6. Governmental policy, regulation and standards.

The Identity of Nations Montserrat Guibernau, 2013-04-25 What is national identity? What are the main challenges posed to national identity by the strengthening of regional identities and the growth of cultural diversity? How is right-wing nationalism connected to the desire to preserve a traditional image of national identity? Can we forge a new kind of national identity that responds to the challenges of globalization and other deep-seated changes? In this important new book, Montserrat Guibernau answers these and other compelling questions about the future of national identity. For Guibernau, the nation-states traditional project to unify its otherwise diverse population by generating a shared sense of national identity among them was always contested, and was accomplished with various degrees of success in Europe and North America. Such processes involved the cultural and linguistic homogenization of an otherwise diverse citizenry and were pursued by different means according to the specific contexts within which they were applied. At present, the impact of strong structural socio-political and economic transformations has resulted in greater challenges being posed to the idea that all citizens of a state should share a homogeneous national identity. Diversity is increasing, and plans for further European integration contain the potential to generate significant tensions, casting greater doubt on the classical concept of national identity. As a

result, we are faced with a set of new dilemmas concerning the way in which national identity is constructed and defined. The book offers a theoretical as well as a comparative approach, with case studies involving Austria, Britain, Canada and Spain, as well as the European Union and the United States of America. The Identity of Nations will be essential reading for advanced students and professional scholars in sociology, politics and international relations.

Designing the School Curriculum Peter S. Hlebowitsh, 2005 Designing the School Curriculum takes a practical, step-by-step approach, giving students the thorough grounding in the process that leads to confident and effective practitioners. The author emphasizes the discretionary judgment of the individual teacher and acknowledges that the curriculum design process is completed only in the unique and spontaneous learning exchanges between students and teachers. Practical ideas on the formation of school purposes, the design of school-wide experiences, effective implementation, and the creation of responsive evaluative mechanisms help students to fulfill the goal of the text to design an authentic and effective curriculum. After an introductory chapter examining the role of the teacher in the design process and two brisk chapters leading students through the theoretical foundations of curriculum development, the text launches into the curriculum design process, giving a close look to each element. Hlebowitsh makes a valuable contribution to the field with this new text, offering a contemporary treatment of classic curriculum design theory and, most importantly, equipping students to engage in effective curriculum design themselves.

Law of Connection John C. Maxwell, 2012-08-27 Elizabeth Dole has mastered it. If husband Bob had done the same, he might have become the forty-third president of the United States. It's called the Law of Connection.

Future Shop Jim Snider, Terra Ziporyn, 2008-03 Some day, consumer information sources like those envisaged by Snider and Ziporyn will materialize. The more this book is read, the sooner it will happen. ---F.M. Scherer, Professor of Business and Government, Harvard University Snider and Ziporyn powerfully describe the glass highways of the future, which will not only benefit consumers but will also provide fantastic opportunities for schools, hospitals, businesses, and the average American as we enter the Information Age of the 21st century. ---Conrad Burns, Chair of U.S. Senate Communications Subcommittee Future Shop is a look into tomorrow's world of household/buying. It is full of surprises, disconcerting ideas, and useful information. I would think that forward-looking businesses would profit from it as much as forward-looking consumers. ---Robert Heilbroner, Professor of Economics, New School for Social Research Future Shop describes a telecommunications age in which the foundations of our market economy will be radically different. The authors present a bold, innovative manifesto for change. It's amazing that work on a subject that means so much to consumers has not appeared before. ---Marvin Cetron, author of American Renaissance Future Shop is well-intentioned, well-reasoned and intentionally provocative--Snider and Ziporyn deliver on their promise to remake the very idea of consumerism. ---Jonathan Kirsch, Los Angeles Times Book Review The authors have documented and quantified what most of us know through personal experience; that our retail distribution system has become increasingly inefficient and is fostering confusion and abuse to the consumer. The enormous conservation of resources in our society that this book describes makes its contribution significant. ---R.K. Snelling, Executive Vice President of BellSouth Communications *****
***** For hundreds of years the marketplace has been growing more complex and more confusing for consumers to navigate. Published in 1992, long before the Internet became a household word. Future Shop argued that new information technologies, combined with innovative public policies, could help consumers overcome that confusion. A prescient manifesto of the coming revolution in e-commerce, Future Shop's vision of consumer empowerment still resonates today. This reprint of Future Shop includes a new preface analyzing the huge changes in the consumer marketplace during the past twenty years and forecasting that the changes in the consumer marketplace over the next twenty years could be even greater.
