Animals with Sharpies Michael Dumontier, Neil Farber, 2013-06-18 Paintings by two of Canada's most influential contemporary fine artists Animals with Sharpies is a collection of paintings with hand-lettered texts. In each painting, Michael Dumontier and Neil Farber have depicted an animal holding a Sharpie, ostensibly writing a message. These messages are varied in nature: political and religious tracts, confessions, recipes, arithmetic problems, and more. Above all, these paintings are funny, but they are also startlingly poignant and jarring for the humanness of the suffering and longing depicted in these animals' simple words. Dumontier and Farber, two of the founding members of the highly influential art collective the Royal Art Lodge, have been collaborating on art projects for more than fifteen years. Their collaborative style is unique from that found in their individual works and is respected internationally: they've exhibited together in France, Switzerland, Canada, the United States, Belgium, Spain, England, and Germany. Dumontier and Farber have a strong sense

of the absurd, but they are also deeply insightful about the world in which their art is created. *Animals with Sharpies* is a mixture of new, previously unseen pieces and older pieces.

The Sharpie Book Reuel B. Parker, 1993-11-22 *The Sharpie Book* traces the development of the sharpie from its earliest days to the latest plywood-and-epoxy designs; gives comprehensive instructions that can be used to build sharpies of all types and sizes; and includes more than a dozen designs and plans for sharpies from 15 to 40 feet from the likes of Chapelle,

Kunhardt, Munroe, Boiger, Clapham, Kirby, and the author. A sharpie is a long, narrow, flat-bottom craft that evolved in the 19th century along the Connecticut shore as an oyster fisherman's boat. An 1880 report by the U.S. Census Bureau characterized the sharpie as so good a fishing boat and so fast a yacht that it has been adopted in a great many other localities throughout the United States. To this add three more superlatives--easy, cheap, and fast to build--and you have the keys to the sharpie's almost cultlike popularity among backyard boatbuilders.

On a Dark Night I Left My Silent House Peter Handke,2015-12-29 On a Dark Night I Left My Silent House is Nobel Prize winner Peter Handke's evocative, moving, often fantastic, short novel about one man's conflict with himself and his journey toward resolution. During one night shift, an unnamed, middle-aged pharmacist in Taxham, an isolated suburb of Salzburg, tells his story to a narrator. The pharmacist is known and well-respected, but lonely and estranged from his wife. He feels most comfortable wandering about in nature, collecting and eating hallucinogenic mushrooms. One day he receives a blow to the head that leaves him unable to speak, and the narrative is transformed from ironic description into a collection of sensual impressions, observations and reflections. The pharmacist, who is now called the driver, sets out on a quest, travelling into the Alps with two companions—a former Olympic skiing champion and a formerly famous poet--where he is beaten and later stalked by a woman. He drives through a tunnel and has a premonition of death, then finds himself in a surreal, foreign land. In a final series of bizarre, cathartic events, the driver regains his speech and is taken back to his pharmacy—back to his former life, but forever changed. A powerful, poetic exploration of language, longing and dislocation in the human experience, On a Dark Night I Left My Silent House reveals Handke at his magical best.

Play Development in Children with Disabilities Serenella Besio,Daniela Bulgarelli,Vaska Stancheva-Popkostadinova,2016 This book is the result of the first two-year work of Working Group 1 of the network LUDI - Play for children with disabilities. LUDI is an Action (2014-2018) financed by COST; it is a multidisciplinary network of more than 30 countries and almost 100 researchers and practitioners belonging to the humanistic and technological fields to study the topic of play for children with disabilities within the framework of the International Classification of Functioning Disability and Health (WHO, 2001).The principal objective of this book is to bring the LUDI contribution to the important topic of play in children with disabilities, because today an international consensus on the definition of play and disabilities is still lacking. The process of ensuring equity in the exercise of the right to play for children with disabilities requests three actions: to approach this topic through a common language, at least all over Europe; to put play at the centre of the multidisciplinary research and intervention regarding the children with disabilities; to grant this topic the status of a scientific and social theme of full visibility and recognized authority. Children with disabilities face several limitations in play, due to several reasons: impairments; playgrounds, toys and other play tools that are not accessible and usable; environments and contexts that are not accessible nor inclusive; lack of educational awareness and intentionality; lack of specific psycho-pedagogical and rehabilitative

competence; lack of effective intervention methodologies. Moreover, disabled children's lives are dominated by medical and rehabilitative practices in which play is always an activity aiming to reach an objective or to provoke an improvement; play for the sake of play is considered a waste of time. The concept of play for the sake of play strongly refers to the distinction between play activities and play-like activities. Play activities are initiated and carried out by the player (alone, with peers, with adults, etc.) for the only purpose of play itself (fun and joy, interest and challenge, love of race and competition, inlin and dizziness, etc.). They have of course consequences on growth and development, but these consequences are not intentionally pursued. Play-like activities are initiated and conducted by an adult (with one or more children), in educational, clinical, social contexts; they are playful and pleasant, but their main objective is other than play: e.g., cognitive learning, social learning, functional rehabilitation, child's observation and assessment, psychological support, psychotherapy, etc. This book, then, contributes to a clear distinction between play and play-like activities that, hopefully, will bring to new developments in play studies.
