First Steps in SAP S/4HANA Universal Parallel Accounting Janet Salmon,2024-04-03 Universal Parallel Accounting (UPA) is perhaps the most significant innovation since the introduction of the universal journal in SAP S/4HANA. The business requirements behind UPA will be familiar to anyone who has worked in a multinational organization. What is new is the architecture—ledger and currency settings are used consistently, across all financial applications within the organization. If the universal journal was the single document that combined information from the general ledger, asset accounting, controlling, material ledger, and margin analysis, then Universal Parallel Accounting takes the idea a step further by providing consistent ledger and currency settings across all finance applications. This book provides a comprehensive introduction to Universal Parallel Accounting and explains how it is different from previous approaches. Troubleshoot the challenges of working with multiple accounting principles, fiscal year calendars, and currencies in subsidiaries, alongside the common accounting principle, fiscal year calendar, and group currency. Take a closer look at ledgers, accounting principles, and fiscal year variants. Explore key changes to asset accounting, overhead accounting, and inventory accounting. Compare and contrast the approach to calculating WIP and variances—instead of calculating at period-end closing, they are calculated with each goods movement and confirmation. Learn more about the new way to recognize revenue. This book expertly guides readers through key updates to parallel accounting in SAP. - Introduction Parallel Accounting in SAP S/4HANA - Use Cases for Universal Parallel Accounting - How Universal Parallel Accounting differs from Previous Approaches - Explore key changes to asset accounting, overhead accounting, and inventory accounting

SAP ERP Financial Accounting and Controlling Andrew Okungbowa, 2015-06-08 SAP ERP modules are notoriously hard to configure and use effectively without a lot of practice and experience. But as *SAP ERP Financial Accounting and Controlling: Configuration and Use Management* shows, it doesn't have to be so difficult. The book takes a systematic approach that leads SAP Financial Accounting and Controlling (FICO) users step by step through configuring and using all the program's facets. This approach makes configuration complexities manageable. The book's author—SAP expert, trainer, and accountant Andrew Okungbowa—ensures that both you and your end users are up and running quickly and confidently with FICO. He also provides sound and tested procedures that ensure your implementation works without error. *SAP ERP Financial Accounting and Controlling: Configuration and Use Management* is in fact the most comprehensive and easy-to-follow SAP FICO configuration book in the market. It incorporates a hands-on approach, with hundreds of screen shots and practical examples, that allows a person without prior configuration training to make SAP FICO ready for use in the enterprise. You'll find that you don't need to be a rocket scientist to grasp the concepts explained and apply them to your work—even when the finances are complicated, such as with the ins and outs of taxes, currency conversions, or special general ledger entries such as down payments or bills of exchange. Providing an in-depth coverage of both configuration and end user procedures, the book covers most aspects of the SAP FICO certification syllabus—SAP's view of the module's key tasks and procedures—including: Configuring and using the general ledger and accounts payable and receivable screens Configuring and completing closing procedures, asset accounting, and financial reporting Configuring global settings and enterprise variables Accounting for both profit and cost centers Creating a house bank Integrating FICO with other SAP modules Taking a jargon-free tone and providing an abundance of examples, Andrew Okungbowa provides a clear understanding of configuration techniques and the breadth of functionalities encompassed by SAP FICO. And as an accountant, Okungbowa understands the needs of end users as well as of those answering to the CIO.

Management Accounting in Enterprise Resource Planning Systems Severin Grabski, Stewart Leech, Alan Sangster, 2009-05-16 Current evidence points to management accountants using traditional software (such as spreadsheets) for budgeting, ABC, balanced scorecards and other performance management techniques independent of, rather than integrated with Enterprise Resource Planning (ERP) Systems. While there has been some limited research on the effects of ERP systems on management accountants, this report provides a comprehensive analysis of the consequences of implementation of ERP systems for management accountants. • This report provides a theoretical basis for studying the impact of Enterprise Resource Planning (ERP) systems on management accounting and provides critical insights into the opportunities provided by ERP systems for the most efficient use of management accounting techniques. • The seven UK case studies of ERP implementations reveal the correlation between the success of the system implementation and the development of the role of management accountants in business partners thereby identifying the changes and skills required of management accountants. • The book provides guidance to management accountants on the changes they need to make in

order to achieve the most from an ERP system implementation.
