The Social Life Of Monkeys And Apes S. Zuckerman,2013-11-05 This is Volume IV of four in a collection on Comparative Psychology. Originally published in 1932, this study is referred to as a classic, in both historical terms and its usefulness in the study of primates.

Monkeys and Apes Camilla De La Bédoyère,2015-07-15 We should learn as much as we can about our closest relatives in the animal world: apes, monkeys, and other primates. Throughout this comprehensive book, readers will discover the differences and similarities among different species of primates through 100 facts grouped by topic and their accompanying fun-fact boxes, diagrams, activities, and quizzes. Beautiful photographs of these amazing animals in their native habitats, including big-eyed tarsiers clinging to trees and teeth-baring baboons displaying their aggression, aid readers in visualizing the many important zoological details.

Monkeys & Apes Camilla De La Bédoyère,2014-07-15 Aligned with the Common Core's standards of promoting the independent reading and comprehension of informative texts, this book uses a question/answer format for maximum simplicity and appeal. The differences between monkeys and apes, unique traits and behaviors of a variety of species, and mini-activities have been carefully combined to create a winning—and educational—mix that will delight young readers.

Apes, Monkeys, Children, and the Growth of Mind Juan Carlos Gómez,2009-07 What can the study of young monkeys and apes tell us about the minds of young humans? In this fascinating introduction to the study of primate minds, Juan Carlos Gomez identifies evolutionary resemblances--and differences--between human children and other primates. He argues that primate minds are best understood not as fixed collections of specialized cognitive capacities, but more dynamically, as a range of abilities that can surpass their original adaptations. In a lively overview of a distinguished body of cognitive

developmental research among nonhuman primates, Gomez looks at knowledge of the physical world, causal reasoning (including the chimpanzee-like errors that human children make), and the contentious subjects of ape language, theory of mind, and imitation. Attempts to teach language to chimpanzees, as well as studies of the quality of some primate vocal communication in the wild, make a powerful case that primates have a natural capacity for relatively sophisticated communication, and considerable power to learn when humans teach them. Gomez concludes that for all cognitive psychology's interest in perception, information-processing, and reasoning, some essential functions of mental life are based on ideas that cannot be explicitly articulated. Nonhuman and human primates alike rely on implicit knowledge. Studying nonhuman primates helps us to understand this perplexing aspect of all primate minds.

Monkeys and Apes Mark Carwardine, Martin Camm, 1989-01-01 Introduces twenty members of the monkey-ape family, including gorilla, gibbon, bushbaby, and indri.

Jokes and More About Monkeys and Apes Maria Nelson, 2014-07-15 Monkeys and apes have a reputation for being funny animals. At zoos, the monkey house is one of the most popular places to visit because they do many things that seem awfully silly to people! Readers will enjoy having a whole bunch of jokes to tell about our primate friends. Cool facts, colorful photographs, and illustrations engage readers as they navigate wordplay, puns, and fun. In this case, monkeying around is a good thing!

Monkey Or Ape? Susan Kralovansky, 2014-07 Some types of animals look alike but they are not the same! Monkey or Ape? explores the stealthy differences between the two animals. Kids will learn to look at their size, their tails, how they walk, where they live and more. Simple sentences and eye-catching photographs will keep kids engaged. Fun facts will help them learn new things. Step-by-step animal crafts help kids demonstrate what they have discovered with this fun title. Aligned to Common Core standards and correlated to state standards. Super Sandcastle is an imprint of Abdo Publishing, a division of ABDO.

'Language' and Intelligence in Monkeys and Apes Sue Taylor Parker, Kathleen Rita Gibson, 1994-01-28 This is the first collection of articles completely and explicitly devoted to the new field of 'comparative developmental evolutionary psychology' - that is, to studies of primate abilities based on frameworks drawn from developmental psychology and evolutionary biology. These frameworks include Piagetian and neo-Piagetian models as well as psycholinguistic ones. The articles in this collection - originating in Japan, Spain, Italy, France, Canada and the United States - represent a variety of backgrounds in human and nonhuman primate research, including psycholinguistics, developmental psychology, cultural and

physical anthropology, ethology, and comparative psychology. The book focuses on such areas as the nature of culture, intelligence, language, and imitation; the differences among species in mental abilities and developmental patterns; and the evolution of life histories and of mental abilities and their neurological bases. The species studied include the African grey parrot, cebus and macaque monkeys, gorillas, orangutans, and both common and pygmy chimpanzees.
