The External Wealth of Nations Mr. Gian-Maria Milesi-Ferretti, Mr. Philip R. Lane, 1999-08-01 Capital flows are closely monitored, but surprisingly little is known about the stocks of external assets and liabilities held by countries, especially in the developing world. This paper constructs estimates of foreign assets and liabilities and their equity and debt subcomponents for 66 industrial and developing countries for the period 1970-97. It explores the sensitivity of estimates of stock positions to the treatment of valuation effects not captured in balance of payments data. Finally, it characterizes the stylized facts of estimated stocks and asks whether there are trends in net foreign asset positions and differences in debt-equity ratios across countries.

Le Tumulte Noir Jody Blake, 1999-01-01 Jody Blake demonstrates in this book that although the impact of African-American music and dance in France was constant from 1900 to 1930, it was not unchanging. This was due in part to the stylistic development and diversity of African-American music and dance, from the prewar cakewalk and ragtime to the postwar Charleston and jazz. Successive groups of modernists, beginning with the Matisse and Picasso circle in the 1900s and concluding with the Surrealists and Purists in the 1920s, constructed different versions of la musique and la danse negre. Manifested in creative and critical works, these responses to African-American music and dance reflected the modernists' varying artistic agendas and historical climates.

The Order of Minims in Seventeenth-Century France P.J.S. Whitmore, 2012-12-06 Thinking of the text from the *Dies frae* (S. Matthew, XXV, 40). It is also probable that this other Saint Francis, partly out of admiration for his illustrious compatriot of Assisi and partly from a compelling urge to be superlative in all things, chose the title in opposition to the

Franciscans, the Fratres Minori, 1 who had previously adopted this style taken from Saint Matthew, XXIII, 8. The title Minim was confirmed in these words ... eosque Eremitos Ordinis Minimorum Fratrum Eremitarum F. Francesci de Paula in posterum nuncupari, taken from the Papal Bull, Meritis religiosae vitae, of 26 February, 1493. The earliest reference to the Order in France is in a fragment preserved in the Bibliotheque de l'Arsenal called, La regle et vie de Frere Franfois, pauvre et humble hermite de Paule, laquelle donne a tous ses 2 freres voulant entrer et vivre en son ordre. The dating of this manuscript should be accepted with considerable reserve; it bears a clearly legible 1474, although it seems most unlikely that any reference to an Order occurred before the Bull of 1493 or that any Rule appeared in French before the Founder's visit to Louis XI in 1483. 3 The fame of Francis and his reputation as a guerisseur had reached the French court where Louis XI was sick and dying; the King summoned him to the chateau of Le Plessis-Ies-Tours, but it required the intervention of the Pope to make the hermit undertake the journey

Taking the Country's Side Sébastien Marot, 2022-03-15 An argument for the cross-fertilization of agriculture and architecture Making the case for situating agriculture as the twin of architecture, Taking the Country's Side looks back on the 10,000-year history of these two disciplines in order to show a path forward for their mutual cooperation. This volume argues that the concept of permaculture could inform urban design today.

The most powerful vampire of all time returns in our Stepping Stone Classic adaption of the original tale by Bran Stoker. Colouring Textiles A. Nieto-Galan, 2013-04-17 Colouring Textiles is an attempt to provide a new cross-cultural comparative approach to the art of dyeing and printing with natural dyestuffs in the eighteenth and nineteenth centuries. Divided into thematic chapters, it uncovers new data from the vast historical heritage of natural dyestuffs from a range of European cities, to present new historiographic insights for the understanding of this technology. Through a sort of anatomic dissection, the book explores the study and cultivation of dye-plants in botanical gardens and plantations, and the tacit values hidden in dyeing workshops, factories, laboratories, or national and international exhibitions. It metaphorically submits the natural dyestuffs of the eighteenth and nineteenth centuries to a series of systematic historical tests, and traces back the circulation of those sources of colours through colonial spaces, dye works, cross-cultural networks, schools of artistic design, and science-based industries for the making of synthetic colorants. Colouring Textiles contributes to a better understanding of the role of natural dyestuffs in the processes of industrialization in Western Europe. Audience: Historians of science and technology, historians of chemistry, philosophers, economic historians, professional chemists, arts and crafts historians, and

cultural anthropologists.

Harquitectes Ilka Ruby, Andreas Ruby, Javier García-Germán, 2016 The architecture studio HARQUITECTES was established in 2000 and based in Sabadell, Barcelona. It is managed by four partner architects: David Lorente Ibáñez, Josep Ricart Ulldemolins, Xavier Ros Majó and Roger Tudó Galí. They have lectured all over Europe and America, and their works have been recognized with several awards and selected for exhibitions at home and abroad. They have addressed the parlous Spanish economy by adapting their work to any type of commission, from public buildings - such as schools and university facilities - to single-family houses. This publication represents the first comprehensive monograph on their work.

Six Canonical Projects by Rem Koolhaas Ingrid Böck, 2015-05-01 Rem Koolhaas (born in 1944) has been part of the international architecture avant-garde since the nineteen-seventies. His numerous worldwide awards include the Pritzker Prize in 2000 for his lifetime achievement. This book interprets his many buildings and projects for the first time through his own comprehensive theoretical oeuvre, comprising polemics manifestos, books about cultural studies such as *Delirious New York*, and so-called “design patents”. Rem Koolhaas developed an evolutionary design method that linked theory and practice, whereby an idea is applied to several projects and combined with others in different ways, so that it is continuously evolving. The book not only combines this architectural knowledge with the intellectual history of the concepts, but also reinterprets the function of the authors or the architects and their originality.

Common European Framework of Reference for Languages Council of Europe, 2002 This Framework has been widely adopted in setting curriculum standards, designing courses, developing materials and in assessment and certification. This compendium of case studies is written by authors who have a considerable and varied experience of using the Framework in their professional context. The aim is to help readers develop their understanding of the Framework and its possible uses in different sectors of education.

The Futurist Moment Marjorie Perloff, 2003-12-03 This volume examines the flourishing of Futurist aesthetics in the European art and literature of the early twentieth century. Futurism was an artistic and social movement that was largely an Italian phenomenon, though there were parallel movements in Russia, England and elsewhere. The Futurists admired speed, technology, youth and violence, the car, the airplane and the industrial city, all that represented the technological triumph of humanity over nature. This work looks at the prose, visual art, poetry, and the manifestos of Futurists from Russia to Italy. The author reveals the Moment's impulses and operations, tracing its echoes through the years to the work of postmodern figures like Roland Barthes. This updated edition reexamines the Futurist Moment in the light of a new century, in which Futurist aesthetics seem to have steadily more to say to the present
