**The Violin Maker** John Marchese.2010-01-26 “[A] magical, profound, and elegant look at the continued need for high quality in our throw away society.” —Douglas Brinkley, Historian This intensely human story, which moves from an ageless workshop in Brooklyn to the rehearsal rooms of Carnegie Hall and Lincoln Center, and across the globe to Cremona, the birthplace of Stradivari, opens up for the reader the insular and fascinating realm of music, musicians, and the craftsmanship that is essential to that world. How does a simple piece of wood become the king of instruments? On a quest to learn about what many consider the world’s most perfect instrument, author and musician John Marchese befriends Sam Zygmuntowicz, an old-world craftsman in Brooklyn, New York, along with the man who is waiting for Sam’s next violin, Eugene Drucker of the world famous Emerson String Quartet. The violin does something remarkable, magical, and evocative. It is capable of

bringing to life the mathematical marvels of Bach, the moan of a Gypsy melody, the wounded dignity of Beethoven's Concerto in D Major. No other instrument is steeped in such a rich brew of myth and lore—and yet the making of a violin starts with a simple block of wood. The Violin Maker takes the reader on a journey as that block of wood, in the hands of a master craftsman, becomes an instrument to rival one made by the greatest master of all time.

We appreciate your understanding of the imperfections in the preservation process, and hope you enjoy this valuable book.

Violin Making Walter H. Mayson.2013-08 Many persons of good, practical ability, and moderately versed in the laws of acoustics, with an eye for form, and not deficient in a certain conception of art as art; who have the instinct to check any approach to vulgarity, and work on lines, curves and thicknesses, more or less true, elegant, and the best for producing fine tone, have seen, and will yet again see, their efforts of small avail, cast aside, never to assume even mediocre rank in the stern array of violins of modern make, much less of those of ancient Italy, merely because the wood chosen for the instrument made is of an inferior, probably worthless character, which would have been employed to much more purpose had it been used in the construction of a windmill, or the shaft of a mine.

**The Sound of Life's Unspeakable Beauty** Martin Schleske.2020-04-14 Christianity Today Book Award in Culture and the Arts (2021) "In the final analysis, music is prayer cast into sound." One of the greatest luthiers of our time reveals the secrets of his profession—and how each phase of handcrafting a violin can point us toward our calling, our true selves, and the overwhelming power and gentleness of God’s love. Schleske explains that our world is flooded with metaphors, parables, and messages from God. But are we truly listening? Do we really see? Drawing upon Scripture, his life experiences, and his

insights as a master violinmaker, Schleske challenges readers to understand the world, ourselves, and the Creator in fresh ways. The message of this unique book is mirrored in sensitive photographs by Donata Wenders, whose work has appeared in prominent newspapers and magazines, including The New York Times, Rolling Stone, and Esquire, as well as museums and galleries throughout the world.

[American Luthier](#) Quincy Whitney.2016-04-12 From the time of Stradivari, the mysterious craft of violinmaking has been a closely guarded, lucrative, and entirely masculine preserve. In the 1950s Carleen Maley Hutchins was a grade school science teacher, amateur trumpet player, and New Jersey housewife. When musical friends asked her to trade a trumpet for a \$75 viola, she decided to try making one, thus setting in motion a surprising career. A self-taught genius who went head to head with a closed and ancient guild, Hutchins carved nearly 500 stringed instruments over the course of half a century and collaborated on more than 100 experiments in violin acoustics. In answer to a challenge from a composer, she built the first violin octet - a family of eight violins ranging in size from an eleven-inch treble to a seven-foot contrabass, and in register across the gamut of the piano keyboard. She wrote more than 100 technical papers - including two benchmark *Scientific American* cover articles - founded an international society devoted to violin acoustics, and became the only American and the only woman to be honored in Cremona, Italy, the birthplace of Stradivari. Hutchins died in 2009 at the age of ninety-eight.

The most innovative violinmaker of the modern age, she set out to explore two worlds she knew virtually nothing about - violins and acoustical physics. American Luthier chronicles the life of this unsung woman who altered everything in a world that had changed little in three centuries.
