Control numèric I. Conceptes, característiques i elements bàsics Joan Vivancos Calvet,1997 L'objectiu d'aquest text és introduir el lector en els conceptes i les tecnologies que envolten el control numèric (CN) des d'un punt de vista d'aplicació i d'utilització. Es fa una introducció al CN, tant a nivell històric com a nivell d'aplicació, comparant la màquina convencional amb la màquina amb CN. S'exposen les característiques i els elements bàsics de les màquines amb CN, a fi d'entendre el seu funcionament i conèixer les seves possibilitats, i s'introdueixen els conceptes previs que cal tenir clar abans de programar amb CN.

Principles and Practice of Clinical Bacteriology Stephen Gillespie, Peter M. Hawkey, 2006-05-12 Since the publication of the last edition of Principles and Practice of Clinical Bacteriology, our understanding of bacterial genetics and pathogenicity has been transformed due to the availability of whole genome sequences and new technologies such as proteomics and transcriptomics. The present, completely revised second edition of this greatly valued work has been developed to integrate this new knowledge in a clinically relevant manner. Principles and Practice of Clinical Bacteriology, Second Edition, provides the reader with invaluable information on the parasitology, pathogenesis, epidemiology and treatment strategies for each pathogen while offering a succinct outline of the best current methods for diagnosis of human bacterial diseases. With contributions from an international team of experts in the field, this book is an invaluable reference work for all clinical microbiologists, infectious disease physicians, public health physicians and trainees within these disciplines.

Chronobiotechnology and Chronobiological Engineering L.E. Scheving, Franz Halberg, Charles F. Ehret, 2012-12-06 High blood pressure (BP) (with fats and smoking) is one of the three roots of cardio-cerebro-renal disease affecting up to 25% of the adult population. Hence, high blood pressure should be recognized and treated, to reduce any complications and prolong life, as noted by Michael Weber of the Veterans Administration Hospital in Long Beach, California. He further emphasizes the need for monitoring before one starts the treatment of high blood pressure. Indeed, he refers to the results of the Australian study on mild hypertension with a large percentage of placebo responders and rightly suggests that many people are treated who should not be because of 'white-coat-associated high blood pressure'. He also points to the lack of standardization of techniques for data analysis and of methods of BP measurement. Ambulatory monitoring under usual conditions without concomitant recording of events does not allow even a qualitative assessment of the impact of varying stimuli, in Weber's opinion.
