Planning Indian Megacity Regions S. K. Kulshrestha.2021-10-17 This book focuses on spatial planning of megacities that are growing in Asia, Africa, and America. These cities are not be seen in isolation from their respective influence regions. They complement each other. Most of the solutions to the problems of such cities are found in their respective regions, and, on the other hand, the regions derive their strength from their respective megacities. There is a need for promoting integrated spatial planning of megacity regions. The five chapters in this book highlight the spatial planning of such regions.

General Knowledge for Competitive Examinations in Urban / Regional Planning Sakshi Sahni. The idea of the book floated about seven years ago, back in 2015, in the reading room of Bhai Gurdas Library, Guru Nanak Dev University, Amritsar when I (Sakshi Sahni) was preparing for my Ph.D. entrance exam along with Hardeep Sekhon who was preparing for Assistant Town Planner exam. As time flew, Sanjay Mishra got involved with the tedious task of typing registers. Puneet Mehra got involved in co-ordinating, sorting and arranging the PPSC papers. Simranjot Singh took all the task of sketching and preparing illustrations using various software like Autocad, Sketchup, coral draw, photo shop etc. Gulpreet Kaur helped in the academic section editing and drafting. Rawal Singh helped in history of Architecture questions and its framing. The huge daunting task which seemed impossible was completed in the span of seven years by consistent efforts of all the authors with grace of almighty. With all of us placed at different locations, managed to contribute what we could do at our best. Planning students were great motivation and inspiration to us for whom the work has been produced and will help in their PPSC and GATE exam preparation. Since all the authors are the product of Guru Ram Das school of Planning, who made us what we are today we would sincerely like to express our gratitude towards our alma mater and would like to dedicate this book to Guru Ram Das ji and to the Department which is celebrating its 50th anniversary this year.

Local government planning for community food systems Raja, S.; Sweeney, E.; Mui, Y.; Frimpong Boamah, E.. Over the last couple of decades, local governments have started taking action to address food system challenges. Many innovative food policies have taken place in cities in particular. However, despite major developments spearheaded by visionary local leaders

and communities in recent years, local governments in low- and middle-income countries (LMICs) continue to face major challenges in integrating food security, nutrition and sustainable food systems in their agenda. This publication introduces a new knowledge base for understanding food planning and governance processes and models in local governments of low- and middle-income countries, a valuable counterbalance to the prevailing literature and experience from high-income countries. It provides practical insights on the needs, challenges and opportunities in local food planning practice in three countries in Asia, Africa and Latin America and the Caribbean. Based on reported cases, this publication offers a broad guiding framework and a methodology for subnational government bodies - including city, metropolitan, regional, distinct and parish governments - that takes into consideration the uniqueness of each local context.

Malaysian Town and Country Planning Ainul Jaria Maidin.2012

Subaltern Urbanisation in India Eric Denis,Marie-Hélène Zérah.2017-03-01 This volume decentres the view of urbanisation in India from large agglomerations towards smaller urban settlements. It presents the outcomes of original research conducted over three years on subaltern processes of urbanization. The volume is organised in four sections. A first one deals with urbanisation dynamics and systems of cities with chapters on the new census towns, demographic and economic trajectories of cities and employment transformation. The interrelations of land transformation, social and cultural changes form the topic of the “land, society, belonging” section based on ethnographic work in various parts of India (Karnataka, Himachal Pradesh, Arunachal Pradesh and Tamil Nadu). A third section focuses on public policies, governance and urban services with a set of macro-analysis based papers and specific case studies. Understanding the nature of production and innovation in non-metropolitan contexts closes this volume. Finally, though focused on India, this research raises larger questions with regard to the study of urbanisation and development worldwide.

India Migration Report 2020 S. Irudaya Rajan.2020-11-26 India Migration Report 2020 examines how migration surveys operate to collect, analyse and bring to life socio-economic issues in social science research. With a focus on the strategies and the importance of information collected by Kerala Migration Surveys since 1998, the volume: Explores the effect of male migration on women left behind; attitudes of male migrants within households; the role of transnational migration and its effect on attitudes towards women; Investigates consumption of remittances and their utilization; asset accumulation and changing economic statuses of households; financial inclusion of migrants and migration strategies during times of crises like the Kerala floods of 2018; Highlights the twenty-year experience of the Kerala Migration Surveys, how its model has been adapted in various states and led to the proposed large-scale India Migration Survey; and Explores issues of migration politics and governance, as well as return migration strategies of other countries to provide a roadmap for India. The volume will be of interest to scholars and researchers of development studies, economics, demography, sociology and social anthropology, and migration and diaspora studies.

Green Buildings and Sustainable Engineering Harald Drück,Radhakrishna G. Pillai,Manoj G Tharian,Aysha Zeneeb Majeed.2018-07-14 This book comprises the proceedings of the International Conference on Green Buildings and Sustainable Engineering (GBSE 2018), which focused on the theme “Transforming our Built Environment through Innovation and Integration towards a Smart and Sustainable Future”. The papers included address all aspects of green buildings and sustainability practices in civil engineering, and offer a valuable reference resource for researchers, practitioners, and policy makers.

Sustainable Urbanism in Developing Countries Uday Chatterjee,Arindam Biswas,Jenia Mukherjee,Dinabandhu Mahata.2022-04-19 The mushrooming of illegal housing on the periphery of cities is one of the main consequences of rapid urbanisation associated with social and environmental problems in the developing countries. Sustainable Urbanism in Developing Countries discusses the linkage between urbanism and sustainability and how sustainable urbanism can be implemented to overcome the problems of housing and living conditions in urban areas. Through case studies from India, Indonesia, China, etc., using advanced GIS techniques, this book analyses several planning and design criteria to solve the physical, social, and economic problems of urbanisation and refers to urban planning as an effective measure to protect and promote the cultural characteristics of specific locations in these developing countries. FEATURES Investigates an interdisciplinary approach to urbanism, including urban ecology, ecosystem services, sustainable landscapes, and advanced geographical systems Analyses unique case studies of rapid urbanisation from a local to a national scale in countries such as India, Sri Lanka, China, Bangladesh, Malaysia, and Indonesia and their global impact Examines the use of GIS and spatial statistics in analysing urban sprawl and the massive amount of data gathered by every operational activity of municipalities Focuses on the holistic perspective of sustainable urbanism and the harmony in the human-nature relationship to achieve sustainable development Covers a wide range of issues manifested in urban areas with economic, societal, and environmental implications contributed by leading scholars from the Global South

Model Town and Country Planning Act India. Ministry of Health and Family Planning.1962

Localism and the Design of Political Systems Rick Harmes.2020-12-31 This book examines localism as a political idea and policy approach and explains what localism is about, why it is growing in importance and how it relates to other themes in politics. Illustrated with case studies from the United Kingdom, mainland Europe and the Indian sub-continent, the book analyses localism in conceptual and theoretical terms and locates it within the overall landscape of political thought. Key themes covered in the book include place, space and scale; decentralization and devolution; multi-level governance; public value; democracy and empowerment; and political design. With the focus on the bottom-up, constructivist aspects of localism, the book argues that localism is most likely to work successfully in a political order where sovereignty is ‘distributed’ across various social spheres and levels of government. It offers a comprehensive view of localism by

synthesizing its various strands and creating a distinctive framework for design and evaluation. This book will be of particular interest to scholars, students and practitioners of localism, particularly within local and regional government, public administration and policy, human and political geography, and urban studies.

Development Charges Shishir Mathur.2024-03-31 The book studies development charges to show how they are inadequate for India and suggests better ways to levy them.

The Changing Security Dynamics of the Persian Gulf Kristian Coates Ulrichsen.2018-02-01 The contradictory trends of the 'post-Arab Spring' landscape form both the backdrop to, and the focus of, this volume on the changing security dynamics of the Persian Gulf, defined as the six GCC states plus Iraq and Iran. The political and economic upheaval triggered by the uprisings of 2011, and the rapid emergence of the Islamic State of Iraq and Syria in 2014, have underscored the vulnerability of regional states to an intersection of domestic pressures and external shocks. The initial phase of the uprisings has given way to a series of messy and uncertain transitions that have left societies deeply fractured and ignited violence both within and across states. The bulk of the protests, with the notable exception of Bahrain, occurred outside the Gulf region, but Persian Gulf states were at the forefront of the political, economic, and security response across the Middle East. This volume provides a timely and comparative study of how security in the Persian Gulf has evolved and adapted to the growing uncertainty of the post-2011 regional landscape.

Smart Economy in Smart Cities T. M. Vinod Kumar.2016-08-25 The present book highlights studies that show how smart cities promote urban economic development. The book surveys the state of the art of Smart City Economic Development through a literature survey. The book uses 13 in depth city research case studies in 10 countries such as the North America, Europe, Africa and Asia to explain how a smart economy changes the urban spatial system and vice versa. This book focuses on exploratory city studies in different countries, which investigate how urban spatial systems adapt to the specific needs of smart urban economy. The theory of smart city economic development is not yet entirely understood and applied in metropolitan regional plans. Smart urban economies are largely the result of the influence of ICT applications on all aspects of urban economy, which in turn changes the land-use system. It points out that the dynamics of smart city GDP creation takes 'different paths,' which need further empirical study, hypothesis testing and mathematical modelling. Although there are hypotheses on how smart cities generate wealth and social benefits for nations, there are no significant empirical studies available on how they generate urban economic development through urban spatial adaptation. This book with 13 cities research studies is one attempt to fill in the gap in knowledge base.

Fifth World Congress on Disaster Management: Volume V S. Anand Babu.2023-04-27 World Congress on Disaster Management (WCDM) brings researchers, policy makers and practitioners from around the world in the same platform to discuss various challenging issues of disaster risk management, enhance understanding of risks and advance actions for

reducing risks and building resilience to disasters. The fifth WCDM deliberates on three critical issues that pose the most serious challenges as well as hold the best possible promise of building resilience to disasters. These are Technology, Finance, and Capacity. WCDM has emerged as the largest global conference on disaster management outside the UN system. The fifth WCDM was attended by more than 2500 scientists, professionals, policy makers, practitioners all around the world despite the prevalence of pandemic.

Land and Disaster Management Strategies in Asia Huong Ha.2014-09-01 This book focuses on land and disaster governance in Asian countries. The Asian region has become increasingly vulnerable to natural disasters, including floods, cyclones, storms, earthquakes, drought, typhoons and tsunamis. Further, as a result of unsustainable changes being made in patterns of land use, catchment and coastal zones, increasing population density, migration patterns, and the spread of consumer culture across countries, the impact of natural disasters has increased manifold. The book addresses two major concerns in this field. Firstly, it discusses topics intended to raise awareness among all stakeholders of the critical aspects of disaster management in the context of Asia. Secondly, it calls upon policymakers, researchers, academics, practitioners, private enterprises and civil society organizations, as well as all those who have been, are and will be affected by natural disasters to search for innovative and novel approaches to reducing risk and managing disasters.

The Sri Lankan Economy Prema-chandra Athukorala,Edimon Ginting,Hal Hill,Utsav Kumar.2017-10-01 This is a pivotal period in Sri Lanka's economic development. The end of conflict opens a door for accelerated economic growth and poverty reduction. Reform is needed to regain momentum because fiscal imbalances and rising public debt could jeopardize macroeconomic stability. The economy would benefit from significant trade and commercial policy reform. The labor market suffers from sluggish growth of formal sector employment and from skills mismatches, which can be addressed by changes in education policy and systems. The book analyzes these and related critical constraints on the Sri Lankan economy, and proposes a set of policy reforms that would lay the foundations for more rapid and inclusive development.

Corporations and Sustainability Jose P D.2017-09-08 *Corporations and Sustainability: The South Asian Perspective* is a collection of contributions from leading academics and practitioners which provides an overview of the key challenges and opportunities related to sustainability in South Asia. The last two decades have seen rapid and often dramatic changes in the institutional, economic and ecological contexts in which firms operating in South Asian economies find themselves. South Asia is increasingly seen both as a driver of global economic growth as well as a barrier to sustainable development. The most significant driver of change in the region has been the economic liberalization attempts of national governments, resulting in easier and faster flows of information, labour and capital between these economies and the rest of the world. Consequently, global environmental and social concerns are increasingly driving governmental and corporate decision-making processes for firms operating in South Asia. In responding to these emerging challenges, firms have begun to re-

evaluate and redesign their strategies, structures and processes as well as incorporate sustainability principles into their strategies. Corporations and Sustainability: The South Asian Perspective thus delivers an important perspective for researchers as well as students of master's-level courses on business and environment. It is particularly useful for those trying to understand the key sustainability challenges in the South Asian context as well as some of the solutions emerging in the critical areas of heavy industry and also service sectors.

Professional's Guide to Real Estate Law and Practice in India Sourish Mohan Mitra. 2022-01-05 About the Book Real estate touches everyone at some point of time in their lives and is much more than buying, selling or leasing immovable property. It is a whole economy in itself and is often called one of the key drivers of the economy. This book contains a collection of real-life situations faced by common people while undertaking real estate transactions. It provides historical perspective for the current legislations and their evolution from the 19th century British India through more than seventy four years of independent India to the 21st century. It captures modern day practices, malpractices and reforms in the real estate sector. The book endeavours to bring out the practical nuances of dealing in real estate through numerous judicial pronouncements and contractual scenarios, which will enable everyone to understand the legal aspects and make informed choices while undertaking real estate transactions. Key Features - A curated commentary on real estate laws in India that is easy to read, comprehend and apply by everyone including lawyers, students, businessmen, investors, entities, organisations and the common people. - Holistic coverage of laws relating to real estate including their origin, evolution, and impact on modern-day governance structure. - Compilation of case laws spanning over a century showcasing the active role played by the judiciary in interpreting the law. - Highlights the complexities of maintaining records and administrative angle which led to reforms and easy access for the general public. - Underlines the importance of financial funding and sources to secure credit for real estate matters. - Special focus on environmental damage due to expanding real estate requirements, its implications and legal recourse. - Dedicated chapter on common malpractices and fraudulent activities. - Practical instances on how to gear up to handle real estate transactions and avoid common pitfalls.

Environmental Policy in India Natalia Ciecierska-Holmes, Kirsten Jørgensen, Lana Laura Ollier, D. Raghunandan. 2019-11-28 This book systematically introduces historical trajectories and dynamics of environmental policy and governance in India. Following the features of environmental policy in India as outlined in Chapter 1, subsequent chapters explore domestic and international factors that shape environmental policy in the country. The chapters examine the interplay between governmental and non-governmental actors, and the influence of social mobilisation and institutions on environmental policy and governance. Analysing various policy trajectories, the chapters identify and explore five central environmental policy subsystems: forests, water, climate, energy and city development. The authors drill down into the social, economic, political and ecological dimensions of each system, shedding light on why striking a balance between

national economic growth and environmental sustainability is so challenging. Drawing on political science theories of policy processes and related theoretical concepts, this innovative edited volume will be of great interest to students and scholars of environmental policy and politics and South Asian studies more broadly.

Smart Living for Smart Cities T. M. Vinod Kumar.2020-05-05 This book, based on extensive international collaborative research, highlights the state-of-the-art design of “smart living” for metropolises, megacities, and metacities, as well as at the community and neighbourhood level. Smart living is one of six main components of smart cities, the others being smart people, smart economy, smart environment, smart mobility and smart governance. Smart living in any smart city can only be designed and implemented with active roles for smart people and smart city government, and as a joint effort combining e-Democracy, e-Governance and ICT-IoT systems. In addition to using information and communication technologies, the Internet of Things, Internet of Governance (e-Governance) and Internet of People (e-Democracy), the design of smart living utilizes various domain-specific tools to achieve coordinated, effective and efficient management, development, and conservation, and to improve ecological, social, biophysical, psychological and economic well-being in an equitable manner without compromising the sustainability of development ecosystems and stakeholders. This book presents case studies covering more than 10 cities and centred on domain-specific smart living components. The book is issued in two volumes. and this volume focus on city studies.

The Supreme Court Reports Annual Digest2012

Urban and Regional Planning and Development Rajiv R. Thakur,Ashok K. Dutt,Sudhir K. Thakur,George M. Pomeroy.2020-02-10 This book discusses urban planning and regional development practices in the twentieth century, and ways in which they are currently being transformed. It addresses questions such as: What are the factors affecting planning dynamics at local, regional, national and global scales? With the push to adopt a market paradigm in land development and infrastructure, the relationship between resource management, sustainable development and the role of governance has been transformed. Centralized planning is giving way to privatization, not only in the traditional regions but also in newly emerging regions of Asia, Africa and Latin America. Further, attempts are being made to bring planning related decision-making closer to the people who are most affected by it. Presenting a collection of studies from scholars around the world and highlighting recent advances in the field, the book is a valuable reference guide for those engaged in urban transformations, whether as graduate students, researchers, practitioners or policymakers.

International Handbook of Disaster Research Amita Singh.2023-11-04 This handbook is a comprehensive source of information, analysis and directions in disaster studies. It goes beyond the oft-explored issues of management and science related to the topic and explores policies, governance, law and decision-making combined with the processes of implementation and enforcement, all the while integrating the latest science and technology updates related to the topic,

such as artificial intelligence and early warning systems. It brings together studies which relate to sociology, politics and institutional economics, which work under the impact of resource availability, issues of leadership and international laws. Disasters are trans-boundary and disaster studies are trans-disciplinary. It is this aspect which would form the fulcrum of contributions and present a new, refreshing and innovative design for the handbook. The transformatory pedagogy which started with the Hyogo Framework for action 2005-2015 and The Sendai Framework for Disaster Risk Reduction 2015-2030 outlines seven clear targets and four priorities for action to prevent new and reduce existing disaster risks. The four priority areas around which the book would revolve are (i) Understanding disaster risk; (ii) Strengthening disaster risk governance to manage disaster risk; (iii) Investing in disaster reduction for resilience and; (iv) Enhancing disaster preparedness for effective response, and to Build Back Better in recovery, rehabilitation and reconstruction.

Development in Coastal Zones and Disaster Management Amita Singh, R. Lalitha S. Fernando, Nivedita P.

Haran.2020-10-13 In the last two decades, coastal regions have relatively endured some of the fiercest oceanic and geophysical disasters than the earlier decades. Yet, disaster management governance fails to match the human, nonhuman and environmental calamity which is unfolding in its most frequent and unpredictable pattern. Between the Asian Tsunami of 2004 to the devastating Chennai and Kerala floods of 2018 the socio-industrial-livelihood impact alerts governments towards a greater and more serious compliance to laws for coastal conservation. The United Nations Office for Disaster Risk Reduction (UNDRR) in 2018 had shocking statistics to share as the deaths and damages related to only Tsunami disaster at the coasts to 251,770 and US\$280 billions respectively in the last 20 years (1998-2017) as compared to 998 and US\$ 2.7 billion in the previous 20 years (1978-1997). Coastal conservation is no more a question of casual governance but has become a need for survival. The region of South Asia which ranks much higher in its vulnerability, weak resilience and relatively undersupplied governance structures ought to take this responsibility on a priority. The spirit of Hyogo Declaration and the Sendai Framework for Action suggests preparedness and resilience building as key approach areas in coastal governance. The book is incomparable in its holistic and transdisciplinary social science based approach to disaster management which links conservation of marine flora and fauna, ecosystems and land management with decision making processes and coastal regulations. These grass root findings from the subcontinent are substantiated by a section on the most powerful court battle on the Kerala Floods as a guideline for readers to discerningly identify an 'Act of God' often used as a veil to hide lack of preparedness, apathy and political greed. This book becomes indispensable reading for anyone involved in research, administration or any level of decision making for the mitigation and prevention of disasters.

Governance for Urban Services Shabbir Cheema.2020-03-02 This book examines three vital issues in urbanization and democratization: the institutional structures and processes of urban local governance to improve access to urban services; their outcomes in relation to low-income groups' access to services, citizen participation in local governance, accountability

of local leaders and officials, and transparency in local governance; and the factors that influence access to urban services, especially for the poor and marginalized groups. Further, it describes decentralization policies, views of the residents of slums on the effectiveness of government programs, and innovations in inclusive local governance and access to urban services.

Development and Disaster Management Amita Singh, Milap Punia, Nivedita P. Haran, Thiyam Bharat Singh. 2018-06-15

This book highlights the relationship between disasters and development through a socio-cultural study of human geography and governance institutions. It studies the cause, context and consequences of disasters in one of the most fragile Himalayan regions in India. The book establishes the fact that disaster management is built within the framework of good governance, without which it has no meaning. For lack of effective and responsive governance, development has lagged behind and even though the frequency of disasters has been increasing, little is being done to redesign developmental frameworks to prevent ensuing losses. Besides, the near absence of governmental support during recurrent disasters, communities have cumulatively become reservoirs of innovations to cope up with disasters. The resilience plans need not follow implanted models but may be cost effective only if they apply a bottom up approach. Just as the region is culturally diverse so are the challenges encountered by local communities in terms of generating resilience to every disaster. Despite more than a decade of the Disaster Management Act (DMA) of 2005, most of the states in this northeastern fringe of India continue to wait for its implementation beyond mere structures and offices. The book suggests that urgent action is required in accordance with the DMA 2005 towards inter-agency coordination, proactive participation of local governance, mobilization of Community based Organizations (CBOs) and curriculum based training in every academic and technical institution. Governments of these northeastern states of India should establish accountability of State Disaster Management Authorities and inspire them to participate proactively with communities for an effective resilience building in the region.

Achieving food system resilience & equity in the era of global environmental change Albie F. Miles, Valarie Blue Bird Jernigan, Philip Dobie, Anja Gassner, Casey Hoy, Noa Kekuewa Lincoln, Kathleen Merrigan, Jennifer Sowerwine, Samina Raja. 2023-02-27

Transformative Law and Public Policy Sony Pellissery, Babu Mathew, Avinash Govindjee, Arvind Narrain. 2019-10-28

This book explores the convergence of law and public policy. Drawing on case studies from Asia, Europe, the Middle East and Australia, it examines how judicial and political institutions are closely linked to the socio-economic concerns of the citizens. The essays argue for the utilization of both legislative and executive, private and public spheres of society as vehicles for transformative social change and to safeguard against violations of socio-economic rights. The volume will be of great interest to both public and private stakeholders, as well as professionals, including NGOs and think tanks, working in the areas of law, government, and public policy. It will also be immensely useful to academics and researchers of

constitutionalism, policymaking and policy integration, social justice and minority rights.

E-Governance for Smart Cities T. M. Vinod Kumar.2014-11-26 This book highlights the electronic governance in a smart city through case studies of cities located in many countries. “E-Government” refers to the use by government agencies of information technologies (such as Wide Area Networks, the Internet, and mobile computing) that have the ability to transform relations with citizens, businesses, and other arms of government. These technologies can serve a variety of different ends: better delivery of government services to citizens, improved interactions with business and industry, citizen empowerment through access to information, or more efficient government management. The resulting benefits are less corruption, increased transparency, greater convenience, revenue growth, and/or cost reductions. The book is divided into three parts. • E-Governance State of the Art Studies of many cities • E-Governance Domains Studies • E-Governance Tools and Issues

Yearbook of International Organizations 2014-2015, Volumes 1a & 1b (Set) Union Of International Associations, Union of International Associations.2014-06-16 Volume 1 (A and B) covers international organizations throughout the world, comprising their aims, activities and events.

Recent Advances in Materials, Mechanics and Management Sheela Evangeline, M.R. Rajkumar, Saritha G. Parambath.2019-05-14 These proceedings present a selection of papers presented at the 3rd International Conference on Materials Mechanics and Management 2017 (IMMM 2017), which was jointly organized by the Departments of Civil Engineering, Mechanical Engineering and Architecture of College of Engineering Trivandrum. Developments in the fields of materials, mechanics and management have paved the way for overall improvements in all aspects of human life. The quest for meeting the requirements of the rapidly increasing population has led to revolutionary construction and production technologies aiming at optimum management and use of natural resources. The objective of this conference was to bring together experts from academic institutions, industries, research organizations and professionals for sharing of knowledge, expertise and experience in the emerging trends related to Civil Engineering, Mechanical Engineering and Architecture. IMMM 2017 provided opportunities for young researchers to actively engage in research discussions, new research interests, research ethics and professional development.

Governing Locally Babu Jacob, Suraj Jacob.2022-02-03 Studies how habits of governance create institutional rigidities that dislodge law-given local autonomy to improve urban public services.

Managing Persistent Organic Pollutants in India Paromita Chakraborty, Luca Nizzetto, Girija Bharat, Eirik Steindal, Satish Sinha.2023-07-12 Persistent Organic Pollutants (POPs) are a class of chemicals that are persistent, bio accumulative and toxic (PBT), which are restricted for use under the Stockholm Convention. They adversely impact the environment, human and animal health. Most of the POPs are semi-volatile organic compounds (SVOCs) and known to have a

long-range transport potential and are often deposited in colder climate and found in places away from the regions they are produced. POPs are usually hydrophobic (i.e., “water-hating”) and lipophilic (i.e., “fat-loving”) chemicals, due to which they bind to solids, particularly organic matter, and fatty tissues in both marine and terrestrial environments. As a result, POPs may move up the food chain. This book focuses on determining the sources, fate, analytical techniques of detecting POPs as well as their health impacts. It further dwells on the regulatory aspects, management of POPs, best environmental practices (BEPs), Indian and international case studies, gaps in understanding the regulatory aspects. A few key recommendations for the way forward form the concluding chapters of this book.

TERI Energy & Environment Data Diary and Yearbook (TEDDY) 2016/17 TERI.2018-03-22 TERI Energy & Environment Data Diary and Yearbook (TEDDY) is an annual publication brought out by The Energy and Resources Institute (TERI) since 1986. It is the only comprehensive energy and environment yearbook in India that provides updated information on the energy supply sectors (coal and lignite, petroleum and natural gas, power, and renewable energy sources), energy demand sectors (agriculture, industry, transport, household), and local and global environment sectors (environment and climate change). The publication also provides a review of the government policies that have implications for the sectors of the Indian economy. In TEDDY, an account of India’s commercial energy balances is given, which provide comprehensive information on energy flows within different sectors of the economy and how they have been changing over time. These energy balances and conversion factors are a valuable ready reckoner for researchers, scholars, and organizations working in the energy sector. After the introductory chapters, for the ease of readers, TEDDY has been divided into sections on energy supply, energy demand, and local and global environment. Interactive graphs, figures, maps, and tables have been used throughout the chapters to explain facts, which make the book an interesting read. In addition, detailed tables at the end of each chapter represent statistical data on each of the above-mentioned sectors. The publication is accompanied by a complimentary CD containing full text. The publication has more than 15,000 readers across the globe and is often cited in international peer-reviewed journals and policy documents.

City Planning in India, 1947-2017 Ashok Kumar, Sanjeev Vidyarthi, Poonam Prakash.2020-07-07 This book is a comprehensive history of city planning in post-independence India. It explores how the nature and orientation of city planning have evolved in India’s changing sociopolitical context over the past hundred or so years. The book situates India’s experience within a historical framework in order to illustrate continuities and disjunctions between the pre- and post-independent Indian laws, policies, and programs for city planning and development. It focuses on the development, scope, and significance of professional planning work in the midst of rapid economic transition, migration, social disparity, and environmental degradation. The volume also highlights the need for inclusive planning processes that can provide clean air, water, and community spaces to large, diverse, and fast growing communities. Detailed and insightful, this volume will be of

interest to researchers and students of public administration, civil engineering, architecture, geography, economics, and sociology. It will also be useful for policy makers and professionals working in the areas of town and country planning.

Smart Master Planning for Cities T. M. Vinod Kumar.2022-05-16 This book, based on international collaborative research, presents a state-of-the-art design for “Smart Master Planning” for all metropolises, megacities and meta cities as well as at sub-city zonal and community and neighborhood level. Smart Master Planning accepts that all cities are a smart city in making in a limited way as far as the six components for Smart Cities; namely, smart people, smart economy, smart environment, smart mobility and smart Governance are concerned. Smart Master Planning in any city can only be designed and executed by active roles of Smart People and Smart City Government and is a joint and synchronous effort of E-Democracy, E-Governance and ICT-IOT system in a 24 hour 7-day framework on all activities. In addition to use of Information and Communication Technologies, and Remote Sensing, the design of smart Master Planning utilizes domain specific tools of many aspects of a city to realize the coordinated, effective and efficient planning, management, development and conservation that improve ecological, social, biophysical, psychological and economic well-being in an equitable manner without compromising the sustainability of development ecosystems and stakeholders. This book will present 12 case studies covering more than 12 cities or more cities centered on domain-specific smart planning components. Case studies of Domain Innovations include Urban Land management, Master Planning for Water Management, Comprehensive Master Planning Innovations, Smart Use of Master Plan basics, Integrated Smart Master Planning, and Citizen-Centric Master Planning.

Resource Management, Sustainable Development and Governance Baleshwar Thakur,Rajiv R. Thakur,Srikumar Chattopadhyay,Rajesh K. Abhay.2022-01-01 This book examines the relationship between natural resource management, sustainable development, and governance with case studies from India and other places covering disaster risk reduction, conflict resolution, capacity building, climate change adaptation and resilience, citizen engagement and ecological conservation. Though the studies focus mostly on cases in India, the volume discusses how governance can be employed to help develop and implement sustainable practices globally through the lens of the United Nations Sustainable Development Goals (SDGs) framework. Readers will learn how to integrate concepts of resource management, sustainable development, and governance to improve human resilience to global environmental change, and to assess the proper development approaches to assist economically stressed and resource-deprived individuals. The book will be of use to graduate students and academics, policy makers, planners, and nonprofits.

Smart Metropolitan Regional Development T.M. Vinod Kumar.2018-05-31 This book discusses the concept and practice of a smart metropolitan region, and how smart cities promote healthy economic and spatial development. It highlights how smart metropolitan regional development can energize, reorganize and transform the legacy economy into a smart economy; how it can help embrace Information and Communications Technology (ICT); and how it can foster a shared economy. In

addition, it outlines how the five pillars of the third industrial revolution can be achieved by smart communities. In addition, the book draws on 16 in-depth city case studies from ten countries to explore the state of the art regarding the smart economy in smart cities - and to apply the lessons learned to shape smart metropolitan economic and spatial development.

The Routledge Handbook on Spaces of Urban Politics Kevin Ward, Andrew E. G. Jonas, Byron Miller, David Wilson. 2018-04-30 The Routledge Handbook on Spaces of Urban Politics provides a comprehensive statement and reference point for urban politics. The scope of this handbook's coverage and contributions engages with and reflects upon the most important, innovative and recent critical developments to the interdisciplinary field of urban politics, drawing upon a range of examples from within and across the Global North and Global South. This handbook is organized into nine interrelated sections, with an introductory chapter setting out the rationale, aims and structure of the Handbook, and short introductory commentaries at the beginning of each part. It questions the eliding of 'urban politics' into the 'politics of the city', reconsidering the usefulness of the distinction between 'old' and 'new' urban politics, considering issues of 'class', 'gender', 'race' and the ways in which they intersect, appear and reappear in matters of urban politics, how best to theorize the roles of capital, the state and other actors, such as social movements, in the production of the city and, finally, issues of doing urban political research. The various chapters explore the issues of urban politics of economic development, environment and nature in the city, governance and planning, the politics of labour as well as living spaces. The concluding sections of the Handbook examine the politics over alternative visions of cities of the future and provide concluding discussions and reflections, particularly on the futures for urban politics in an increasingly 'global' and multidisciplinary context. With over forty-five contributions from leading international scholars in the field, this handbook provides critical reviews and appraisals of current conceptual and theoretical approaches and future developments in urban politics. It is a key reference to all researchers and policy-makers with an interest in urban politics.

Recent Trends in River Corridor Management Vinay Chembolu, Subashisa Dutta. 2022-04-22 This book presents the select proceedings of the 1st International Conference on River Corridor Research and Management (RCRM 2021). It describes various topics on fluvio-hydro-ecological processes of river systems. The topics covered include river dynamics and morphological changes, river health and ecological aspects and satellite remote sensing for river corridor studies. The book also discusses the morphological behavior of gravel and sand-bed rivers, hydrological and hydraulics modeling and other important aspects of riverine ecology. The book will be a valuable reference for research scholars, academicians, river scientists and practitioners working in the areas of river science.

The Kerala Town And Country Planning Ordinance 2014: Bestsellers in 2023 The year 2023 has witnessed a noteworthy

surge in literary brilliance, with numerous compelling novels captivating the hearts of readers worldwide. Lets delve into the realm of top-selling books, exploring the captivating narratives that have captivated audiences this year. The Kerala Town And Country Planning Ordinance 2014 : Colleen Hoover's "It Ends with Us" This touching tale of love, loss, and resilience has gripped readers with its raw and emotional exploration of domestic abuse. Hoover masterfully weaves a story of hope and healing, reminding us that even in the darkest of times, the human spirit can succeed. Uncover the Best : Taylor Jenkins Reids "The Seven Husbands of Evelyn Hugo" This spellbinding historical fiction novel unravels the life of Evelyn Hugo, a Hollywood icon who defies expectations and societal norms to pursue her dreams. Reids captivating storytelling and compelling characters transport readers to a bygone era, immersing them in a world of glamour, ambition, and self-discovery. Discover the Magic : Delia Owens "Where the Crawdads Sing" This captivating coming-of-age story follows Kya Clark, a young woman who grows up alone in the marshes of North Carolina. Owens spins a tale of resilience, survival, and the transformative power of nature, captivating readers with its evocative prose and mesmerizing setting. These popular novels represent just a fraction of the literary treasures that have emerged in 2023. Whether you seek tales of romance, adventure, or personal growth, the world of literature offers an abundance of engaging stories waiting to be discovered. The novel begins with Richard Papen, a bright but troubled young man, arriving at Hampden College. Richard is immediately drawn to the group of students who call themselves the Classics Club. The club is led by Henry Winter, a brilliant and charismatic young man. Henry is obsessed with Greek mythology and philosophy, and he quickly draws Richard into his world. The other members of the Classics Club are equally as fascinating. Bunny Corcoran is a wealthy and spoiled young man who is always looking for a good time. Charles Tavis is a quiet and reserved young man who is deeply in love with Henry. Camilla Macaulay is a beautiful and intelligent young woman who is drawn to the power and danger of the Classics Club. The students are all deeply in love with Morrow, and they are willing to do anything to please him. Morrow is a complex and mysterious figure, and he seems to be manipulating the students for his own purposes. As the students become more involved with Morrow, they begin to commit increasingly dangerous acts. The Secret History is a masterful and thrilling novel that will keep you wondering until the very end. The novel is a cautionary tale about the dangers of obsession and the power of evil.

If you are a student who needs books related to their subjects or a traveller who loves to read on the go, BookBoon is just what you want. It provides you access to free eBooks in PDF format. From business books to educational textbooks, the site features over 1000 free eBooks for you to download. There is no registration required for the downloads and the site is extremely easy to use. Because this site is dedicated to free books, there's none of the hassle you get with filtering out paid-for content on Amazon or Google Play Books. We also love the fact that all the site's genres are presented on the homepage, so you don't have to waste time trawling through menus. Unlike the bigger stores, Free-Ebooks.net also lets you sort results by publication date, popularity, or rating, helping you avoid the weaker titles that will inevitably find their way onto open publishing platforms (though a book has to be really quite poor to receive less than four stars). We now offer a wide range of services for both traditionally and self-published authors. What we offer. Newsletter Promo. Promote your discounted or free book.
