General Knowledge for Competitive Examinations in Urban / Regional Planning Sakshi Sahni, The idea of the book floated about seven years ago, back in 2015, in the reading room of Bhai Gurdas Library, Guru Nanak Dev University, Amritsar when I (Sakshi Sahni) was preparing for my Ph.D. entrance exam along with Hardeep Sekhon who was preparing for Assistant Town Planner exam. As time flew, Sanjay Mishra got involved with the tedious task of typing registers. Puneet Mehra got involved in co-ordinating, sorting and arranging the PPSC papers. Simranjot Singh took all the task of sketching and preparing illustrations using various software like Autocad, Sketchup, coral draw, photo shop etc. Gulpreet Kaur helped in the academic section editing and drafting. Rawal Singh helped in history of Architecture questions and its framing. The huge daunting task which seemed impossible was completed in the span of seven years by consistent efforts of all the authors with grace of almighty. With all of us placed at different locations, managed to contribute what we could do at our best. Planning students were great motivation and inspiration to us for whom the work has been produced and will help in their PPSC and GATE exam preparation. Since all the authors are the product of Guru Ram Das school of Planning, who made us what we are today we would sincerely like to express our gratitude towards our alma mater and would like to dedicate this book to Guru Ram Das ji and to the Department which is celebrating its 50th anniversary this year.

Sustainable Urbanism in Developing Countries Uday Chatterjee,Arindam Biswas,Jenia Mukherjee,Dinabandhu Mahata,2022-04-19 The mushrooming of illegal housing on the periphery of cities is one of the main consequences of rapid urbanisation associated with social and environmental problems in the developing countries. Sustainable Urbanism in Developing Countries discusses the linkage between urbanism and sustainability and how sustainable urbanism can be implemented to overcome the problems of housing and living conditions in urban areas. Through case studies from India, Indonesia, China, etc., using advanced GIS techniques, this book analyses several planning and design criteria to solve the physical, social, and economic problems of urbanisation and refers to urban planning as an effective measure to protect and

promote the cultural characteristics of specific locations in these developing countries. FEATURES Investigates an interdisciplinary approach to urbanism, including urban ecology, ecosystem services, sustainable landscapes, and advanced geographical systems Analyses unique case studies of rapid urbanisation from a local to a national scale in countries such as India, Sri Lanka, China, Bangladesh, Malaysia, and Indonesia and their global impact Examines the use of GIS and spatial statistics in analysing urban sprawl and the massive amount of data gathered by every operational activity of municipalities Focuses on the holistic perspective of sustainable urbanism and the harmony in the human–nature relationship to achieve sustainable development Covers a wide range of issues manifested in urban areas with economic, societal, and environmental implications contributed by leading scholars from the Global South

Smart Metropolitan Regional Development T.M. Vinod Kumar,2018-05-31 This book discusses the concept and practice of a smart metropolitan region, and how smart cities promote healthy economic and spatial development. It highlights how smart metropolitan regional development can energize, reorganize and transform the legacy economy into a smart economy; how it can help embrace Information and Communications Technology (ICT); and how it can foster a shared economy. In addition, it outlines how the five pillars of the third industrial revolution can be achieved by smart communities. In addition, the book draws on 16 in-depth city case studies from ten countries to explore the state of the art regarding the smart economy in smart cities – and to apply the lessons learned to shape smart metropolitan economic and spatial development.

E-Governance for Smart Cities T. M. Vinod Kumar,2014-11-26 This book highlights the electronic governance in a smart city through case studies of cities located in many countries. "E-Government" refers to the use by government agencies of information technologies (such as Wide Area Networks, the Internet, and mobile computing) that have the ability to transform relations with citizens, businesses, and other arms of government. These technologies can serve a variety of different ends: better delivery of government services to citizens, improved interactions with business and industry, citizen empowerment through access to information, or more efficient government management. The resulting benefits are less corruption, increased transparency, greater convenience, revenue growth, and/or cost reductions. The book is divided into three parts. • E-Governance State of the Art Studies of many cities • E-Governance Domains Studies • E-Governance Tools and Issues

Smart Economy in Smart Cities T. M. Vinod Kumar,2016-08-25 The present book highlights studies that show how smart

cities promote urban economic development. The book surveys the state of the art of Smart City Economic Development through a literature survey. The book uses 13 in depth city research case studies in 10 countries such as the North America, Europe, Africa and Asia to explain how a smart economy changes the urban spatial system and vice versa. This book focuses on exploratory city studies in different countries, which investigate how urban spatial systems adapt to the specific needs of smart urban economy. The theory of smart city economic development is not yet entirely understood and applied in metropolitan regional plans. Smart urban economies are largely the result of the influence of ICT applications on all aspects of urban economy, which in turn changes the land-use system. It points out that the dynamics of smart city GDP creation takes 'different paths,' which need further empirical study, hypothesis testing and mathematical modelling. Although there are hypotheses on how smart cities generate wealth and social benefits for nations, there are no significant empirical studies available on how they generate urban economic development through urban spatial adaptation. This book with 13 cities research studies is one attempt to fill in the gap in knowledge base.

Planning Indian Megacity Regions S. K. Kulshrestha,2021-10-17 This book focuses on spatial planning of megacities that are growing in Asia, Africa, and America. These cities are not be seen in isolation from their respective influence regions. They complement each other. Most of the solutions to the problems of such cities are found in their respective regions, and, on the other hand, the regions derive their strength from their respective megacities. There is a need for promoting integrated spatial planning of megacity regions. The five chapters in this book highlight the spatial planning of such regions.

Smart Master Planning for Cities T. M. Vinod Kumar,2022-05-16 This book, based on international collaborative research, presents a state-of-the-art design for "Smart Master Planning" for all metropolises, megacities and meta cities as well as at sub-city zonal and community and neighborhood level. Smart Master Planning accepts that all cities are a smart city in making in a limited way as far as the six components for Smart Cities; namely, smart people, smart economy, smart environment, smart mobility and smart Governance are concerned. Smart Master Planning in any city can only be designed and executed by active roles of Smart People and Smart City Government and is a joint and synchronous effort of E-Democracy, E-Governance and ICT-IOT system in a 24 hour 7-day framework on all activities. In addition to use of Information and Communication Technologies, and Remote Sensing, the design of smart Master Planning utilizes domain specific tools of many aspects of a city to realize the coordinated, effective and efficient planning, management, development and conservation that improve ecological, social, biophysical, psychological and economic well-being in an equitable manner without compromising the sustainability of development ecosystems and stakeholders. This book will present 12 case studies covering more than 12 cities or more cities centered on domain-specific smart planning components. Case studies of Domain Innovations include Urban Land management, Master Planning for Water Management, Comprehensive Master Planning

Innovations, Smart Use of Master Plan basics, Integrated Smart Master Planning, and Citizen-Centric Master Planning.

Development in Coastal Zones and Disaster Management Amita Singh,R. Lalitha S. Fernando,Nivedita P. Haran,2020-10-13 In the last two decades, coastal regions have relatively endured some of the fiercest oceanic and geophysical disasters than the earlier decades. Yet, disaster management governance fails to match the human, nonhuman and environmental calamity which is unfolding in its most frequent and unpredictable pattern. Between the Asian Tsunami of 2004 to the devastating Chennai and Kerala floods of 2018 the socio-industrial-livelihood impact alerts governments towards a greater and more serious compliance to laws for coastal conservation. The United Nations Office for Disaster Risk Reduction (UNDRR) in 2018 had shocking statistics to share as the deaths and damages related to only Tsunami disaster at the coasts to 251,770 and US$280 billions respectively in the last 20 years (1998-2017) as compared to 998 and US$ 2.7 billion in the previous 20 years (1978-1997). Coastal conservation is no more a question of casual governance but has become a need for survival. The region of South Asia which ranks much higher in its vulnerability, weak resilience and relatively undersupplied governance structures ought to take this responsibility on a priority. The spirit of Hyogu Declaration and the Sendai Framework for Action suggests preparedness and resilience building as key approach areas in coastal governance. The book is incomparable in its holistic and transdisciplinary social science based approach to disaster management which links conservation of marine flora and fauna, ecosystems and land management with decision making processes and coastal regulations. These grass root findings from the subcontinent are substantiated by a section on the most powerful court battle on the Kerala Floods as a guideline for readers to discerningly identify an 'Act of God' often used as a veil to hide lack of preparedness, apathy and political greed. This book becomes indispensable reading for anyone involved in research, administration or any level of decision making for the mitigation and prevention of disasters.

Resource Management, Sustainable Development and Governance Baleshwar Thakur,Rajiv R. Thakur,Srikumar Chattopadhyay,Rajesh K. Abhay,2022-01-01 This book examines the relationship between natural resource management, sustainable development, and governance with case studies from India and other places covering disaster risk reduction, conflict resolution, capacity building, climate change adaptation and resilience, citizen engagement and ecological conservation. Though the studies focus mostly on cases in India, the volume discusses how governance can be employed to help develop and implement sustainable practices globally through the lens of the United Nations Sustainable Development

Goals (SDGs) framework. Readers will learn how to integrate concepts of resource management, sustainable development, and governance to improve human resilience to global environmental change, and to assess the proper development approaches to assist economically stressed and resource-deprived individuals. The book will be of use to graduate students and academics, policy makers, planners, and nonprofits.
