The Costs of Taxation and the Marginal Cost of Funds Mr. Joel Slemrod, Shlomo Yitzhaki. 1995-08-01 It is argued that taxation causes three kinds of deadweight losses and two types of direct costs. The deadweight losses arise from substitution, evasion, and avoidance activities while the direct costs are administrative and compliance costs. Some of these social costs tend to be discontinuous and/or nonconvex. Because most models of taxation ignore some components of the social costs of taxation, their conclusions cannot be of a general nature. An alternative approach to policy evaluation is to rely on a marginal efficiency cost of funds rule which can indicate appropriate directions of reforms. The paper discusses its merits, applicability, and limitations, as well as its relationship to other concepts.

Competency-Based Performance Reviews Robin Kessler. 2008-02-15 Managers working in today's organizations often focus more on results than on the people who achieve those results. But regularly evaluating the performance of your employees is critical to improving the efficiency and output of your organization. Performance reviews have changed significantly in the past few years. Companies today are looking for the key characteristics, known as competencies, that help the most successful people in their field to be so successful. Managers and employees need to focus on those competencies, especially during performance review discussions. Competency-Based Performance Reviews offers you a new and more effective way to handle performance reviews and to coach your employees to emphasize the knowledge, skills, and abilities that they have and the organization needs. Most sophisticated U.S. and international employers are using competency-based systems to select, interview, and evaluate the performance of employees. Fortune 500 corporations such as American Express, Anheuser Busch, Coca-Cola, Disney, Federal Express, IBM, Johnson & Johnson, and Pfizer are all looking for specific competencies. This book will give you the guidance you need to: — Perform competency-based reviews on your employees. — Help your team get the recognition they deserve in division meetings by providing the evidence to justify higher performance rankings. — Develop your own competencies—and those of your employees. — Coach employees to recognize competency-based accomplishments and advocate for themselves throughout the year. — Write smarter, targeted competency-based

accomplishment statements to use on performance review forms. By putting these competency-based performance reviews into practice, managers can strengthen their organizations, their careers, as well as the careers of their employees. Competency-Based Performance Reviews includes sample phrases to use on reviews, as well as sample accomplishment statements to guide employees to improving and writing their own.

Total Performance Scorecard Hubert Rampersad.2004-02-18 In the post-Enron climate corporate executives are increasingly pressured to increase productivity and create an ethical, trustworthy organizational climate. 'Total Performance Scorecard' introduces a concept of organizational improvement and change management that combines the Balanced Scorecard model with the learning organization theory. The TPS contains a personal balanced scorecard, which is tied to an organizational balanced scorecard. These scorecards reflect not only performance goals but personal learning and growth goals as well, and the organizational scorecards also address organizational climate issues. Continuous improvement, change management, 360 degree feedback, and the learning organization are theories that the TPS makes use of in a very straightforward way. If implemented, the TPS enables a company to tie personal goals to organizational goals and tie personal performance to organizational performance, all within a culture that supports integrity, personal growth, learning, and open communication. Cooperation in Modern Society Anders Biel,Mark Snyder, Tom R. Tyler,Mark Van Vugt.2012-12-06 Why do so many people volunteer to help others in need in society today? What makes people give up the convenience of driving their car to benefit a better environment? And why are citizens, in general, quite prepared to pay taxes to ensure adequate health care, and support for the elderly and unemployed? These are examples of a more fundamental question addressed in this book: why do people cooperate for the welfare of their community, state, or organization? *Cooperation in Modern Society* is a unique collection of contributions from internationally reputed scholars across the social sciences.

Ibn Ashur Muhammad Al-Tahir Ibn Ashur.2006 Shaikh Muhammad al-Tahir ibn Ashur is the most renowned Zaytuna Imam and one of the great Islamic scholars of the 20th century. The publication of this translation of Shaikh Ibn Ashur's *Treatise on Maqasid al-Shari'ah* is a breakthrough in studies on Islamic law in the English language. In this book, Ibn Ashur proposed Maqasid as a methodology for the renewal of the theory of Islamic law, which has not undergone any serious development since the era of the great imams. Ibn Ashur - quite courageously - also addressed the sensitive topic of the intents/Maqasid of Prophet Muhammad (SAAS) behind his actions and decisions. He introduced criteria to differentiate between the Prophetic traditions that were meant to be part of Islamic law and the Prophetic actions/ sayings that were

meant to be for the sake of specific purposes such as political leadership, court judgment, friendly advice, and conflict resolution. But Ibn Ashur's most significant contribution in this book has been the development of new Maqasid by coining new, contemporary, terminology that were never formulated in traditional *usul al-fiqh*. For example, Ibn Ashur developed the theory of the 'preservation of lineage' into 'the preservation of the family system', the 'protection of true belief' into 'freedom of beliefs', etc. He also introduced the concepts of 'orderliness', 'natural disposition', 'freedom', 'rights', 'civility', and 'equality' as Maqasid in their own right, and upon which the whole Islamic law is based. This development opens great opportunities for Islamic law to address current and real challenges for Muslim societies and Muslim minorities.

The New Public Service Janet V Denhardt, Robert B. Denhardt. 2016-09-16 This widely praised work provides a framework for the many voices calling for the reaffirmation of democratic values, citizenship, and service in the public interest. The expanded edition includes an all-new chapter that addresses the practical issues of applying these ideals in actual, real-life situations. *The New Public Service, Expanded Edition* is organized around a set of seven core principles: serve citizens, not customers; seek the public interest; value citizenship and public service above entrepreneurship; think strategically, act democratically; recognize that accountability isn't simple; serve, rather than steer; and value people, not just productivity. The book asks us to think carefully and critically about what public service is, why it is important, and what values ought to guide what we do and how we do it. It celebrates what is distinctive, important and meaningful about public service and considers how we might better live up to those ideals and values. All students and serious practitioners in public administration and public policy should read this book. While debates about public policy issues will surely continue, this compact, clearly written volume provides an important framework for public service based on and fully integrated with citizen discourse and the public interest.

The Routledge Handbook of Hotel Chain Management Maya Ivanova, Stanislav Ivanov, Vincent P. Magnini. 2016-05-05 Understanding the global hotel business is not possible without paying specific attention to hotel chain management and

dynamics. Chains are big business, approximately 80 percent of hotels currently being constructed around the world are chain affiliated and, in 2014, the five largest brands held over a one million rooms. The high economic importance of the hotel chains and their global presence justifies the academic research in the field however, despite this, there is no uniform coverage in the current body of literature. This Handbook aids in filling the gap by exploring and critically evaluates the debates, issues and controversies of all aspects of hotel chains from their nature, fundamentals of existence and operation, expansion, strategic and operational aspects of their activities and geographical presence. It brings together leading specialists from range of disciplinary backgrounds and regions to provide state-of-the-art theoretical reflection and empirical research on current issues and future debates. Each of the five inter-related section explores and evaluates issues that are of extreme importance to hotel chain management, focusing on theoretical issues, the expansion of hotel chains, strategic and operational issues, the view point of the individual affiliated hotel and finally the current and future debates in the theory and practice of hotel chain management arising from globalisation, demographic trends, sustainability, and new technology development. It provides an invaluable resource for all those with an interest in hotel management, hospitality, tourism and business encouraging dialogue across disciplinary boundaries and areas of study. This is essential reading for students, researchers and academics of Hospitality as well as those of Tourism, Marketing, Business and Events Management.

Young People, Rights and Place Stuart C. Aitken. 2018-05-16 Concern is growing about children's rights and the curtailment of those rights through the excesses of neoliberal governance. This book discusses children's spatial and citizenship rights, and the ways young people and their families push against diminished rights. Armed initially with theoretical concerns about the construction of children through the political status quo and the ways youth rights are spatially segregated, the book begins with a disarmingly simple supposition: Young people have the right to make and remake their spaces and, as a consequence, themselves. This book de-centers monadic ideas of children in favor of a post-humanist perspective, which embraces the radical relationality of children as more-than-children/more-than-human. Its empirical focus begins with the struggles of Slovenian Izbrisani ('erased') youth from 1992 to the present day and reaches out to child rights and youth activists elsewhere in the world with examples from South America, Eastern Europe and the USA. The author argues that universal child rights have not worked and pushes for a more radical, sustainable ethics, which dares to admit that children's humanity is something more than we, as adults, can imagine. Chapters in this groundbreaking contribution will be of interest to students, researchers and practitioners in the social sciences, humanities and public policy.

Ecocity Berkeley Richard Register. 1987 Ecocity Berkeley offers innovative city planning solutions that would work anywhere, but the book offers a vision of what the future can be like with a fair amount of planning beforehand. This book is very inspirational, and could be used to advocate similar planning improvements in any large city. This book is meant for anyone interested in environmental activism, and anyone looking for serious innovations in their city.

Tax Compliance and Tax Morale Benno Torgler.2007-01-01 The book will be of considerable assistance to students and other researchers working in the area of compliance behaviour, or more generally, in the area of designing empirical studies. Margaret Mc Kerchar, The British Accounting Review Torgler s book is a valuable contribution to the tax field, especially as it pioneers research into tax morale that is in its infancy and helps redress the US domination of the tax-compliance literature. It places econometric analysis where it rightly belongs as the supporting act, not the main feature! and takes a holistic approach in attempting to explain the complex area of human behaviour that tax compliance involves, whatever the country. Jeff Pope, Agenda Benno Torgler has written an exciting and important book. His careful and imaginative use of survey and experimental data explores important behavioral and institutional dimensions of tax policy and administration that have been too long neglected. The book provides a thorough exposition of what we now know about these issues as well as a rich menu of suggestions about how to do empirical research on the relation between citizens and states and how to build social capital through rethinking how states tax their citizens. Richard M. Bird, University of Toronto, Canada The question of why citizens pay their taxes has attracted increased attention in the tax compliance literature of late. In this book, Benno Torgler considers the evidence that suggests that enforcement efforts cannot fully explain the high degree of tax compliance within society. To attempt to resolve this puzzle, numerous researchers have argued that citizens attitudes towards paying taxes (defined as tax morale) help to explain the high degree of compliance. Yet most have treated tax morale itself as a black box, failing to discuss the issues influencing it. This unique volume provides important new insights into the factors that shape the emergence and maintenance of citizens willingness to cooperate with tax legislations in different societies. Distinctive in its examination of citizen tax morale and tax compliance, this book will be of great interest to academics, researchers and students concerned with economics, political science, sociology, social psychology and accounting. It will also appeal to policymakers and practitioners.

Visual Heritage in the Digital Age Eugene Ch'ng, Vincent Gaffney, Henry Chapman.2013-12-04 Heritage is everywhere, and an understanding of our past is increasingly critical to the understanding of our contemporary cultural context and place in global society. Visual Heritage in the Digital Age presents the state-of-the-art in the application of digital technologies to heritage studies, with the chapters collectively demonstrating the ways in which current developments are liberating the study, conservation and management of the past. Digital approaches to heritage have developed significantly over recent decades in terms of both the quantity and range of applications. However, rather than merely improving and enriching the ways in which we understand and engage with the past, this technology is enabling us to do this in entirely new ways. The chapters contained within this volume present a broad range of technologies for capturing data (such as high-definition laser scanning survey and geophysical survey), modelling (including GIS, data fusion, agent-based modelling), and engaging with

heritage through novel digital interfaces (mobile technologies and the use of multi-touch interfaces in public spaces). The case studies presented include sites, landscapes and buildings from across Europe, North and Central America, and collections relating to the ancient civilisations of the Middle East and North Africa. The chronological span is immense, extending from the end of the last ice age through to the twentieth century. These case studies reveal new ways of approaching heritage using digital tools, whether from the perspective of interrogating historical textual data, or through the applications of complexity theory and the modelling of agents and behaviours. Beyond the data itself, Visual Heritage in the Digital Age also presents fresh ways of thinking about digital heritage. It explores more theoretical perspectives concerning the role of digital data and the challenges that are presented in terms of its management and preservation.
