Richard Titmuss Stewart, John.2020-06-02 This is the first full-length biography of Richard Titmuss, a pioneer of social policy research and an influential figure in Britain's post-war welfare debates. Drawing on his own papers, publications, and interviews with those who knew him, the book discusses Titmuss's ideas, particularly those around the principles of altruism and social solidarity, as well as his role in policy and academic networks at home and overseas. It is an enlightening portrait of a man who deepened our understanding of social problems as well as the policies that respond most effectively to them.

Responsible Gambling Howard J. Shaffer,Alexander Blaszczynski,Robert Ladouceur,Peter Collins.2019 This volume reflects the perspectives of a diverse group of primary stakeholders interested in responsible gambling activities and programs. It also marks a watershed moment in the activities of the International Group on Responsible Gambling. The Reno Model (Blaszczynski, Ladouceur, & Shaffer, 2004) has provided the seminal architecture for understanding, creating, and implementing responsible gambling activities and programs. This model stimulated considerable interest and growth of responsible gambling activities around the world. This development contributed to the establishment of our international working group on responsible gambling--and the need to bring together a variety of divergent perspectives associated with responsible gambling. Stakeholders often overlook these viewpoints, protect a narrow view of responsible gambling, and avoid the scientific evidence associated with responsible gambling. Consequently, the primary purpose of this book is to discuss and formulate guidelines, elaborate principles, and stimulate discussion related to responsible gambling policies and activities. In addition, this book emphasizes the continuing need to empirically evaluate the efficacy, reach, and influence of

responsible gambling activities. The contents of this volume represent the viewpoints of key stakeholders who are vested with the obligation to minimize harm and protect consumers (e.g., regulators, governments, academics, clinicians, individuals, gamblers and the general community). This first of its kind book provides an overall summary of the respective viewpoints, insights, and critical but constructive suggestions relevant to advancing the aims and objectives of responsible gambling--

Winning at Slot Machines Jim Regan.2005-06-01 A guide to making money at the most popular of all casino games. Whether you're out to win big bucks or merely pass the time in fun and amusement, you owe it to yourself to learn everything you can about one-armed bandits. In this easy-to-read and highly informative book, you will learn all about the types of slot machines. You'll discover what makes them actually pay off. You'll find out what you should know about gaming laws, what the IRS expects of you, and the general rules of gaming conduct. In order to increase your chances of winning money at slot machines, you must match your gaming objectives with the right kinds of slots. This book tells you how to do this, too. Regan was a slots manager for the MGM Grand Hotel in Reno, NV.

The Algorithm Design Manual Steven S Skiena.2009-04-05 This newly expanded and updated second edition of the best-selling classic continues to take the mystery out of designing algorithms, and analyzing their efficacy and efficiency. Expanding on the first edition, the book now serves as the primary textbook of choice for algorithm design courses while maintaining its status as the premier practical reference guide to algorithms for programmers, researchers, and students. The reader-friendly Algorithm Design Manual provides straightforward access to combinatorial algorithms technology, stressing design over analysis. The first part, Techniques, provides accessible instruction on methods for designing and analyzing computer algorithms. The second part, Resources, is intended for browsing and reference, and comprises the catalog of algorithmic resources, implementations and an extensive bibliography. NEW to the second edition: • Doubles the tutorial material and exercises over the first edition • Provides full online support for lecturers, and a completely updated and improved website component with lecture slides, audio and video • Contains a unique catalog identifying the 75 algorithmic problems that arise most often in practice, leading the reader down the right path to solve them • Includes several NEW war stories relating experiences from real-world applications • Provides up-to-date links leading to the very best algorithm implementations available in C, C++, and Java
