**The Imperative of Responsibility** Hans Jonas.1984 Hans Jonas here rethinks the foundations of ethics in light of the awesome transformations wrought by modern technology: the threat of nuclear war, ecological ravage, genetic engineering, and the like. Though informed by a deep reverence for human life, Jonas's ethics is grounded not in religion but in metaphysics, in a secular doctrine that makes explicit man's duties toward himself, his posterity, and the environment. Jonas offers an assessment of practical goals under present circumstances, ending with a critique of modern utopianism.

**Yangzhou, A Place in Literature** Roland Altenburger, Margaret B. Wan, Vibeke Børdahl. 2015-01-31 One of the famous canal cities of the world and a former center of culture, trade, transportation, and fashion, the old town of Yangzhou evokes

romantic bridges, beautiful courtesans, fine gardens, and eccentric painters. It is also remembered as a war-torn ruin after the Qing conquest and the Taiping Rebellion, and as a city in decline as trade shifted to seaports and railways. Yangzhou, A Place in Literature, the first anthology to center on a Chinese city and its local region, offers a wealth of literary, semi-literary, and oral texts representing social life over three hundred years of dramatic change between the seventeenth and twentieth centuries. The selections in this volume represent a wide range of literary forms and styles, both elite and popular, with subjects ranging from literature, history, theater, and art to the history of architecture and gardening, and of material culture at large. Readers will come across rarely found details of everyday life, the sights, smells, and sounds of the lanes and teahouses, a world of taverns, pilgrimages, communal baths, fish markets, salt merchants, acting troupes, and food in one of the wealthiest cities of imperial China. Each text has an introductory essay and rich textual notes by an expert in the relevant field. The general introduction provides an in-depth discussion of the roles of the local in historical, cultural, literary, and linguistic terms, as mirrored by the wide range of translated sources collected in this volume. The selected texts are historically and intellectually important in their own right, but the volume greatly enhances their collective value by combining them, arranging them in historical sequence, and providing a dense network of cross-references that invite comparisons and reveal contrasts in style, form, focus, and topic. With its compelling accounts of material culture, urban spaces, entertainment, and gender, Yangzhou, A Place in Literature will fascinate scholars and students alike by opening a window to the rich cultural history of Yangzhou. The volume can serve as a textbook for courses on traditional and modern Chinese literature, popular culture, the city, or social history. It will be of great interest to scholars of East Asian studies, as well as to those in a variety of comparative fields, such as urban studies, theater studies, and gender studies.

Painting the Future Louise Hay, Lynn Lauber. 2012-02-06 Jonathan Langley's life took a devastating turn when he lost his eyesight to a rare illness. Once a successful painter and printmaker, Jonathan now lives in complete darkness, rarely leaving his apartment and angry at the world. When he encounters his precocious 11-year-old neighbor, Lupe, the two form an unlikely friendship. Her cheerful presence shatters his hardened exterior, revealing a gentle man struck by tragedy. Lupe leads him to a fresh perspective by showing him the power of kindness, compassion, and love. Based on the celebrated teachings of Louise Hay, Painting the Future explores the power of positive thinking in healing past struggles and learning to live a joyful, heart-centered life.

**The Biophilia Effect** Clemens Arvay, MSc. 2018-02-01 Did you know that spending time in a forest activates the vagus nerve, which is responsible for inducing calm and regeneration? Or that spending just one single day in a wooded area increases the number of natural killer cells in the blood by almost 40 percent on average? We've all had an intuitive sense of the healing power of nature. Clemens G. Arvay's new book brings us the science to verify this power, sharing fascinating research along with teachings and tools for accessing the therapeutic properties of the forest and natural world. Already a

bestseller in Germany, *The Biophilia Effect* is a book that transforms our understanding of our interconnection with nature—and shows us how to engage the natural world wherever we live for greater health, inspiration, rejuvenation, and spiritual sustenance.

**Translational Neurosonology** Angelika Alonso, M. G. Hennerici, Stephen Philip Meairs. 2015 Diagnostic ultrasound has become an elementary tool for evaluating cerebrovascular diseases and plays a prominent role in routine clinical practice. Many publications attempt to cover the continuous progress of its diagnostic and even therapeutic applications. However, the impact ultrasound has made in recent years in the fields of animal studies and human research is less well known. This publication provides an overview on exciting current attempts in neurological diseases, ranging from experimental approaches to established imaging modes ready to be incorporated into the routine of daily practice. The first part of the book concentrates on basic principles of neurosonology and focuses on contrast imaging, specific ultrasound contrast agents and safety aspects. The following chapters deal with different vascular ultrasound applications, allowing an optimized characterization of atherosclerotic disease and monitoring of cerebral autoregulation. In addition, the role of parenchymal ultrasound imaging in cerebrovascular diseases and movement disorders is illustrated. The final chapters look at promising new therapeutic approaches implementing ultrasound although they are still no more than experimental. The book can be highly recommended to clinical neurologists with good knowledge in clinical ultrasound who wish to gain a compact and updated insight into the plethora of capabilities of neurosonology in the future.

*Sex Money Kiss* Gene Simmons.2005-10-01 Let's face it, just because I stick out my tongue a lot and spit fire doesn't mean I have any qualifications to advise anyone on relationship, money or career issues. I don't. Yet I've lived with a beautiful woman for twenty years with never a cross word between us, in a relationship based on honesty and full disclosure. I've amassed a fortune--and expert business people work for me. And for three decades I've been in KISS--a band that has scaled the heights and broken every possible record, from album sales to touring to merchandising and licensing. What I have and have always had (thanks in full to my mother's wisdom) is an abiding faith in me. Call it a life philosophy: a philosophy about money (mine!) and happiness (mine again). Animal Beauty Christiane Nusslein-Volhard.2019-05-14 An illustrated exploration of colors and patterns in the animal kingdom, what they communicate, and how they function in the social life of animals. Are animals able to appreciate what humans refer to as "beauty"? The term scarcely ever appears nowadays in a scientific description of living things, but we humans may nonetheless find the colors, patterns, and songs of animals to be beautiful in apparently the same way that we see beauty in works of art. In *Animal Beauty*, Nobel Prize-winning biologist Christiane Nüsslein-Volhard describes how the colors and patterns displayed by animals arise, what they communicate, and how they function in the social life of animals. Watercolor drawings illustrate these amazing instances of animal beauty. Darwin addressed the topic of ornament in his

1871 book *The Descent of Man and Selection in Relation to Sex*, and did not hesitate to engage with criteria of beauty, convinced that animals experienced color and ornament as attractive and agreeable in the same way that we do, and that the role this played in mate choice pointed to a “sexual selection” distinct from natural selection. Nüsslein-Volhard examines key examples of ornament and sexual selection in the animal kingdom and lays the groundwork for biological aesthetics. Noting that color patterns have not been a research priority—perhaps because they appeared to be nonessential luxuries rather than functional necessities—Nüsslein-Volhard looks at recent scientific developments on the topic. In part because of Nüsslein-Volhard's own research on the zebrafish, it is now possible to decipher the molecular genetic mechanisms that lead to production of colors in animal skin and its appendages and control its pattern and distribution.

Helrunar Jan Fries.2005-12-09 Preface to the new edition: When I went to school, my history teacher told us about the old Germani. In her opinion, the Taunus mountains were populated by a bunch of brawny brawlers who wore horned helmets and small pieces of pelt. They lived in hilltop settlements which were fortified by ringwalls. Barely able to manage agriculture, they had to rely on hunting to fill their stomachs. They lived in shabby huts with mud-plastered walls and when the Romans came, they fought the invaders with crude swords, pointy sticks and by hurling rocks at them... Nowadays, the ringwalls of the Taunus are known as the work of La Tène Celts, who lived on the heights in well organised cities. For this new edition much of the text has been rewritten and updated. A large section on the bronze ages, the Celts, Germani and the later Vikings added. The theme of Wodan and Helja has been elaborated with more detail on pagan Scandinavia. The chapter on magical rune inscriptions has been extended, on Seidr/seething trances rewritten, the bibliography updated and twelve pages of new illustrations added. The runes are a pan-European magical language. Its roots lie in the ancient pagan beliefs of our ancestors, who built many thousands of stones circles, long barrows and dolmens throughout ancient Europe. These same symbols and techniques were used by the pagan Celts and Germans. This book is a complete manual of magick based upon arcane symbolism and secret techniques.

*Constellation* Adrien Bosc.2016-05-10 This best-selling debut novel from one of France's most exciting young writers is based on the true story of the 1949 disappearance of Air France's Lockheed Constellation and its famous passengers On October 27, 1949, Air France's new plane, the Constellation, launched by the extravagant Howard Hughes, welcomed thirty-eight passengers aboard. On October 28, no longer responding to air traffic controllers, the plane disappeared while trying to land on the island of Santa Maria, in the Azores. No one survived. The question Adrien Bosc's novel asks is not so much how, but why? What were the series of tiny incidents that, in sequence, propelled the plane toward Redondo Mountain? And who were the passengers? As we recognize Marcel Cerdan, the famous boxer and lover of Edith Piaf, and we remember the musical prodigy Ginette Neveu, whose tattered violin would be found years later, the author ties together their destinies: “Hear the dead, write their small legend, and offer to these thirty-eight men and women, like so many constellations, a life

and a story.”
