Shame Annie Ernaux,2020-05-19 WINNER OF THE 2022 NOBEL PRIZE IN LITERATURE My father tried to kill my mother one Sunday in June, in the early afternoon, begins *Shame*, the probing story of the twelve-year-old girl who will become the author herself, and the single traumatic memory that will echo and resonate throughout her life. With the emotionally rich voice of great fiction and the diamond-sharp analytical eye of a scientist, Annie Ernaux provides a powerful reflection on experience and the power of violent memory to endure through time, to determine the course of a life.

A Darker Shade of Sweden John-Henri Holmberg,2014-01-07 Stories by Stieg Larsson, Henning Mankell, and over a dozen other masters of Nordic noir: “A wonderful collection” (Camilla Läckberg). Ever since Stieg Larsson shone a light on Swedish crime writing with his *Girl With the Dragon Tattoo* trilogy, readers around the world have devoured fiction by Scandinavian masters of suspense. *A Darker Shade of Sweden* includes an assortment of outstanding crime fiction—never before published in English and in some cases brand-new to this volume—from Larsson and a wide range of other talents including Henning Mankell, the creator of Kurt Wallander; Åsa Larsson; Eva Gabrielsson; Inger Frimansson; Åke Edwardson; Sara Stridsberg; Maj Sjöwall and Per Wahlöö; and more. Also included is an introduction by Edgar nominee John-Henri Holmberg, exploring the history of these stellar authors and their contributions to crime writing. “Gripping. . . . These unsettlingly dark tales reaffirm the dominance of Swedish writers with original crime fiction.” —The Sun (UK)

Terror and Modernity Donatella Di Cesare,2019-06-10 We are inclined to see terrorist attacks as an aberration, a violent incursion into our lives that bears no intrinsic relation to the fundamental features of modern societies. But does this view misconstrue the relationship between terror and modernity? In this book, philosopher Donatella Di Cesare takes a historical approach and argues that terror is not a new phenomenon, but rather one that has always been a key part of modernity. At its most basic level, terrorism is about the struggle for power and sovereignty. The growing concentration of power in the hands of the state, which is a constitutive feature of modern societies, sows the seeds of terrorism, which is deployed as a weapon by those who are exposed to the violence of the state and feel that they have no other recourse. As Di Cesare

illustrates her argument with examples ranging from the Red Brigades and 9/11 to jihadism and ISIS, her sophisticated analysis will appeal to anyone who wishes to understand contemporary terrorism more deeply, as well as to students and scholars of philosophy and political theory.

Lowering the Voting Age to 16 Jan Eichhorn,Johannes Bergh,2019-11-27 This book explores the consequences of lowering the voting age to 16 from a global perspective, bringing together empirical research from countries where at least some 16-year-olds are able to vote. With the aim to show what really happens when younger people can take part in elections, the authors engage with the key debates on earlier enfranchisement and examine the lead-up to and impact of changes to the voting age in countries across the globe. The book provides the most comprehensive synthesis on this topic, including detailed case studies and broad comparative analyses. It summarizes what can be said about youth political participation and attitudes, and highlights where further research is needed. The findings will be of great interest to researchers working in youth political socialization and engagement, as well as to policymakers, youth workers and activists.

Partisan Wedding Renata Vigano,1999 World War II stories on Italian women in the Resistance as heroines and traitors, and the way they exploited their femininity. In *Red Flag*, a woman hides guns by covering them with a soiled sanitary napkin.

The Power of the Adolescent Brain Thomas Armstrong,2016-07-12 Moody. Reckless. Impractical. Insecure. Distracted. These are all words commonly used to describe adolescents. But what if we recast these traits in a positive light? Teens possess insight, passion, idealism, sensitivity, and creativity in abundance--all qualities that can make a significant positive contribution to society. In this thought-provoking book, Thomas Armstrong looks at the power and promise of the teenage brain from an empathetic, strength-based perspective—and describes what middle and high school educators can do to make the most of their students' potential. Thoroughly grounded in current neuroscience research, the book explains what we know about how the adolescent brain works and proposes eight essential instructional elements that will help students develop the ability to think, make healthy choices, regulate their emotions, handle social conflict, consolidate their identities, and learn enough about the world to move into adulthood with dignity and grace. Armstrong provides practical strategies and real-life examples from schools that illustrate these eight key practices in action. In addition, you'll find a glossary of brain terms, a selection of brain-friendly lesson plans across the content areas, and a list of resources to support and extend the book's ideas and practices. There is a colossal mismatch between how the adolescent brain has evolved over the millennia and the passive, rote learning experiences that are all too common in today's test-obsessed educational climate. See the amazing difference—in school and beyond—when you use the insights from this book to help students tap into the power of their changing brains.

Impossible Languages Andrea Moro,2023-09-19 An investigation into the possibility of impossible languages, searching

for the indelible “fingerprint” of human language. Can there be such a thing as an impossible human language? A biologist could describe an impossible animal as one that goes against the physical laws of nature (entropy, for example, or gravity). Are there any such laws that constrain languages? In this book, Andrea Moro—a distinguished linguist and neuroscientist—investigates the possibility of impossible languages, searching, as he does so, for the indelible “fingerprint” of human language. Moro shows how the very notion of impossible languages has helped shape research on the ultimate aim of linguistics: to define the class of possible human languages. He takes us beyond the boundaries of Babel, to the set of properties that, despite appearances, all languages share, and explores the sources of that order, drawing on scientific experiments he himself helped design. Moro compares syntax to the reverse side of a tapestry revealing a hidden and apparently intricate structure. He describes the brain as a sieve, considers the reality of (linguistic) trees, and listens for the sound of thought by recording electrical activity in the brain. Words and sentences, he tells us, are like symphonies and constellations: they have no content of their own; they exist because we listen to them and look at them. We are part of the data.

Risk Management Maturity Assessment at Central Banks Elie Chamoun,Nicolas Denewet,Antonio Manzanera,Sanjeev Matai,2019-12-27 Effective risk management at central banks is best enabled by a sound framework embedded throughout the organization that supports the design and execution of risk management activities. To evaluate the risk management practices at a central bank, the Safeguards Assessments Division of the IMF’s Finance Department developed a tool that facilitates stocktaking of elements that are present and categorizes the function based on its maturity. Tailored recommendations are then provided to the central bank which provide a roadmap to advance the risk management function.

Albania in the Twentieth Century, A History Owen Pearson,2007-04-03 This is an unparalleled achievement in scholarship on Albania. Owen Pearson presents a complete account of the twentieth century in Albania, from its breakaway from the Ottoman Empire in 1908 to the Kosova War in 1999. In fascinating detail, Pearson chronicles the monarchy of King Zog and the wartime period where Albania became a battleground for the Greek, Italian and German armies. He describes Enver Hoxha's seizure of power, the country's relationship with the post-Stalin Soviet Union and Maoist China's fraternal embrace of Albania, all leading to near-total isolationism and inevitable economic collapse. Pearson concludes with the genocide of Kosovar Albanians at the hands of the Serbian regime of Milosevic that characterized the last decade of twentieth century Albania. Comprising original research, and excerpts from rare Albanian sources, this is a compendium of primary source material that provides a year-by-year and sometimes day-by-day account of Albania's modern history.

The Castle on the Hudson Renato Cantore, 2017-07-25T00:00:00+02:00 Charles Paterno was seven when he left Castelmezzano, a small mountain town in Basilicata to set sail on one of the rattletrap ships headed to America. Thirty years later he was one of the top builders in New York City, among the first to construct the skyscrapers that would form the world's most famous skyline. Intelligence, brilliance, intuition and an ability to stay ahead of the times made him a leading figure in the life of Manhattan. He created garden communities, focused on new technologies and turned to the best architects. Paterno didn't just want to offer houses, but new lifestyles to tens of thousands of people. His first American dream looked like a white castle at the northernmost tip of Manhattan, where he lived for years with his wife and son, surrounded by a small but very loyal retinue. A friend of Giuseppe Prezzolini, he donated a library of 20.000 books, the Paterno Library, to the Casa Italiana at Columbia University. Fiorello La Guardia, the Italian-American mayor of New York City, called him a genius. Born into poverty, Paterno died a wealthy man on the green of the most exclusive country club in Westchester.

Passions and Politics Paul Ginsborg, Sergio Labate, 2019-01-30 The dominant model of democratic politics emphasizes reason at the expense of the passions. Passions have been treated as dangerous, the opposite of reason and the enemy of virtue. Paul Ginsborg and Sergio Labate challenge this model and put forward a very different view, developing an account of modern democratic politics in which both passions and reason play a crucial role. To do justice to the role of passions in politics, we must pay close attention to the way in which they circulate among us; then we must develop a suitable language to describe them – an ‘alphabet of the passions’ that enables us to understand how they combine with one another and connect with certain states of mind in order to shape political outcomes. Adopting this approach enables the authors to shed new light on one of the major phenomena of our time – the triumph of neoliberalism on a world scale. Neoliberalism has worked so well because it has incorporated its own romantic and individualist version of the passions into its worldview, seducing both individuals and families with the allure of consumption. By developing a new model of democratic politics based on the interplay of passions and reason, Ginsborg and Labate provide a much needed framework for understanding the crucial role that passions play in the unfolding of political life. At a time when populist leaders are on the ascendancy and political processes are shaped as much by anger, resentment and fear as they are by reason and argument, this refocusing of political analysis on the role of the passions could not be more timely.

Darknet J. D. Lasica, 2008-05-02 An indispensable primer for those who want to protect their digital rights from the dark forces of big media. -Kara Swisher, author of aol.com The first general interest book by a blogger edited collaboratively by his readers, Darknet reveals how Hollywood's fear of digital piracy is leading to escalating clashes between copyright holders and their customers, who love their TiVo digital video recorders, iPod music players, digital televisions, computers, and other

cutting-edge devices. Drawing on unprecedented access to entertainment insiders, technology innovators, and digital provocateurs-including some who play on both sides of the war between digital pirates and entertainment conglomerates-the book shows how entertainment companies are threatening the fundamental freedoms of the digital age.

Vulnerability as generativity Cristiana Ottaviano,Alessia Santambrogio,2018-04-10T00:00:00+02:00 This book focuses on parenthood and generativity, considered not only a set of biological functions, but as human and socio-cultural capabilities above and beyond gender differences. The authors reconsider in particular the institution of motherhood, emphasizing the historical and social function of women. Alongside a reflection on the gender role of women as mothers and wives, this volume explores male identities and fatherhood. While claiming that parenthood and care are human characteristics - and not just gendered or female attributes - the authors suggest the adoption of a gylanic perspective on inter-gender relationships.

Restorative Justice, Self-interest and Responsible Citizenship Lode Walgrave,2013-05-13 Lode Walgrave has made a highly significant contribution to the worldwide development of the restorative justice movement over the last two decades. This book represents the culmination of his vision for restorative justice. Coming to the subject from a juvenile justice background he initially saw restorative justice as a means of escaping the rehabilitation-punishment dilemma, and as the basis for a more constructive judicial response to youth crime that had been the case hitherto. Over time his conception of restorative justice moved in the direction of focusing on repairing harm and suffering rather than ensuring that the youthful offender met with a 'just' response, and encompassing the notion that restorative justice was not so much about a justice system promoting restoration, more a matter of doing justice through restoration. This book develops Lode Walgrave's conception of restorative justice further, incorporating a number of key elements. • a clearly outcome-based definition of restorative justice • acceptance of the need to use judicial coercion to impose sanctions as part of the reparative process • presenting restorative justice as a fully fledged alternative to the punitive apriorism • development of a more sophisticated concept of the relationship between restorative justice and the law, and acceptance of the need for legal regulation • a consideration of the expansion of a restorative justice philosophy into other areas of social life and the threats and opportunities this provides • a consideration of the implications of the expansion of restorative justice for the discipline of

criminology and democracy

The Welfare of Syrian Refugees Paolo Verme, Chiara Gigliarano, Christina Wieser, Kerren Hedlund, Marc Petzoldt, Marco Santacroce, 2016 The book focuses on the largest refugee crisis of our time: the Syrian refugee crisis. It exploits a wealth of survey and registry data on Syrian refugees living in Jordan and Lebanon to assess their poverty and vulnerability status, understand the predictors of these statuses, evaluate the performance of existing policies toward refugees, and determine the potential for alternative policies. Findings point to a complex situation. In the absence of humanitarian assistance, poverty is extremely high among refugees. Current policies including cash transfers and food vouchers are effective in reducing poverty but they remain short of providing economic inclusion and self-reliance of refugees. A shift toward economic inclusion and self-reliance would require a different humanitarian and development paradigm, one that focuses on growth policies for areas affected by refugees where the target population is constituted by refugees and hosting populations alike. This joint study by the World Bank Group and the United Nations High Commissioner for Refugees helps bridge the historical divide between humanitarian and development work by providing practical solutions for assisting refugees in the short, medium and long-term and to prevent the irreversible loss of social and human capital typically associated with prolonged refugee crises.
