*The Huainanzi* John S. Major, Sarah A. Queen, Andrew Seth Meyer, Harold D. Roth, 2010-04-14 Compiled by scholars at the court of Liu An, king of Huainan, in the second century B.C.E, The Huainanzi is a tightly organized, sophisticated articulation of Western Han philosophy and statecraft. Outlining all that a modern monarch needs to know, the text emphasizes rigorous self-cultivation and mental discipline, brilliantly synthesizing for readers past and present the full spectrum of early Chinese thought. The Huainanzi locates the key to successful rule in a balance of broad knowledge, diligent application, and the penetrating wisdom of a sage. It is a unique and creative synthesis of Daoist classics, such as the Laozi and the Zhuangzi; works associated with the Confucian tradition, such as the Changes, the Odes, and the Documents; and a wide range of other foundational philosophical and literary texts from the Mozi to the Hanfeizi. The product of twelve years of scholarship, this remarkable translation preserves The Huainanzi's special rhetorical features, such as parallel prose and verse, and showcases a compositional technique that conveys the work's powerful philosophical appeal. This path-breaking volume will have a transformative impact on the field of early Chinese intellectual history and will be of great interest to scholars and students alike.

**Social Memory and State Formation in Early China** Min Li, 2018-05-24 A thought-provoking book on the archaeology of power, knowledge, social memory, and the emergence of classical tradition in early China.

*Healing with Poisons* Yan Liu, 2021-06-22 Open access edition: DOI 10.6069/9780295749013 At first glance, medicine and poison might seem to be opposites. But in China's formative era of pharmacy (200–800 CE), poisons were strategically employed as healing agents to cure everything from abdominal pain to epidemic disease. *Healing with Poisons* explores the ways physicians, religious figures, court officials, and laypersons used toxic substances to both relieve acute illnesses and enhance life. It illustrates how the Chinese concept of du—a word carrying a core meaning of “potency”—led practitioners to devise a variety of methods to transform dangerous poisons into effective medicines. Recounting scandals and controversies involving poisons from the Era of Division to the Tang, historian Yan Liu considers how the concept of du was central to how the people of medieval China perceived both their bodies and the body politic. He also examines the wide range of toxic minerals, plants, and animal products used in classical Chinese pharmacy, including everything from the herb aconite to the popular recreational drug Five-Stone Powder. By recovering alternative modes of understanding wellness and the body's

interaction with foreign substances, this study cautions against arbitrary classifications and exemplifies the importance of paying attention to the technical, political, and cultural conditions in which substances become truly meaningful. *Healing with Poisons* is freely available in an open access edition thanks to TOME (Toward an Open Monograph Ecosystem) and the generous support of the University of Buffalo.

**Astronomy and Calendars - The Other Chinese Mathematics** Jean-Claude Martzloff, 2016-09-01 Presented from the viewpoint of the history of mathematics, this book explores both epistemological aspects of Chinese traditional mathematical astronomy and lunisolar calendrical calculations. The following issues are addressed: (1) connections with non-Chinese cultural areas; (2) the possibility or impossibility of using mathematics to predict astronomical phenomena, a question that was constantly raised by the Chinese from antiquity through medieval times; (3) the modes of representation of numbers, and in particular the zero, found in the context of Chinese calendrical calculations; and (4) a detailed analysis of lunisolar calendrical calculations. Fully worked-out examples and comparisons between the results of calculations and the content of Chinese historical calendars from various periods are provided. Traditional Chinese calendrical and mathematical astronomy consists of permanently reformed mathematical procedures designed to predict, but not explain, phenomena pertaining to astronomy and related areas. Yet, despite appearances, models of the mathematical techniques hidden behind this voluminous corpus reveal that they depend on a limited number of clear-cut mathematical structures. Although only a small fraction of these techniques have been fully studied, what is known surprisingly broadens our knowledge of the history of Chinese mathematics. Sinologists interested in the history of Chinese science, and anyone interested in the history of Chinese mathematics, the Chinese calendar, and the history of Chinese mathematical astronomy from its origin (104 BC) to its European reform (AD 1644) will find this book very useful. The present English language edition is a fully revised and updated version of the French original. Even though this is a research monograph in sinology, no particular sinological background is required, although a basic understanding of 'concrete mathematics' is needed. From the reviews of the French edition: This is a demanding, rigorous book to read ... worth the concentrated study it requires. The rewards are not only in the details but in the general overview that ...[it] provides. Joseph Dauben, *EASTM*, 2011 ...first Work in a Western language to turn to for anyone interested in the details of Chinese calendrical computations. Benno Van Dalen, *ISIS*, 2011 Martzloff's careful scholarship and his overall look at the calendar beyond astronomical calculations, ..., make this book a most valuable contribution to a field of increasing interest. U. D'Ambrosio, *Mathematical Reviews*, 2013

**Comparative Essays in Early Greek and Chinese Rational Thinking** Jean-Paul Reding, 2017-03-02 This collection of essays, by Reding, in the emergent field of Sino-Hellenic studies, explores the neglected inchoative strains of rational thought in ancient China and compares them to similar themes in ancient Greek thought, right at the beginnings of philosophy in both cultures. Reding develops and defends the bold hypothesis that Greek and Chinese rational thinking are one and the same

phenomenon. Rather than stressing the extreme differences between these two cultures - as most other writings on these subjects - Reding looks for the parameters that have to be restored to see the similarities. Reding maintains that philosophy is like an unknown continent discovered simultaneously in both China and Greece, but from different starting-points. The book comprises seven essays moving thematically from conceptual analysis, logic and categories to epistemology and ontology, with an incursion in the field of comparative metaphorology. One of the book's main concerns is a systematic examination of the problem of linguistic relativism through many detailed examples.

**The Huainanzi and Liu An's Claim to Moral Authority** Griet Vankeerberghen,2001-01-01

**Taoism and Self Knowledge** Catherine Despeux,2018-11-26 In Taoism and Self Knowledge, Catherine Despeux develops a history of the Chart for the Cultivation of Perfection a text containing an array of meditative techniques for individual salvation and thunder rites. This chart was transmitted widely among Taoists in Quanzhen tradition.

Animal to Edible Noémie Vialles,1994-06-16 Why do we find it necessary to slaughter living animals in order to enjoy their flesh? And why does this act offend our sensibilities, without necessarily making us into vegetarians? We no longer tolerate sacrifices, public butchering during festivals, butchers operating openly in the middle of our cities. Today, animals are killed in invisible abattoirs, set a good distance from our normal activities. This recent separation between the slaughter-house and the butcher's establishment is somehow essential to the modern meat diet. In her study of abattoirs in south-west France, Noémie Vialles brings to light a complex system of avoidances. Her analysis reveals that beyond the specific denial of the work of the abattoirs lies a whole system of symbolic representations of blood, human beings and animals, a symbolic code that determines the way in which we prepare domestic animals for the table.

Animals Through Chinese History Roel Sterckx,Martina Siebert,Dagmar Schäfer,2019 This innovative collection opens a door into the rich history of animals in China. This title is also available as Open Access.

*History of Ophthalmology* Harold E. Henkes,2012-12-06 When the eyeball is indented in total darkness, within less than 200 mil liseconds an oval or quarter-moon shaped spot of light is perceived in the part of the visual field corresponding to the indented region of the retina. In the seconds following, this phosphene extends across the whole visual field and alters in structure during further eyeball indentation. It is then seen as irregular large bright spots of light, finely structured moving light grains ('light nebula') and stationary bright stars. Regular geometrical patterns appear only when both eyes are indented simultaneously [1]. When the eyeball deformation is released, part of the retina again lights up for another one or two seconds and curved light lines are seen following the course of the larger retinal vessels (Fig. 1). In the following we will review the history of this phenomenon, which played an important role during the first 2200 years of vision theories and in the development of models to explain normal vision. 2. Pre-Socratic philosophers, Plato and Aristotle Alcmaeon of Croton (6-5th century B. C. ), who was a member of the Pythagorean sect and one of the founders of Greek medicine, was the first

to describe mechanical deformation of the eyeball leading to light sensations. According to Aristotle's pupil Theophrastus of Eresos, Alcmaeon reported that 'the eye obviously has fire within, for when the eye is struck fire flashes out' [2, p. 88].

**The Complete Works of Zhuangzi**, 2013-11-26 Only by inhabiting Dao (the Way of Nature) and dwelling in its unity can humankind achieve true happiness and freedom, in both life and death. This is Daoist philosophy's central tenet, espoused by the person—or group of people—known as Zhuangzi (369?-286? B.C.E.) in a text by the same name. To be free, individuals must discard rigid distinctions between good and bad, right and wrong, and follow a course of action not motivated by gain or striving. When one ceases to judge events as good or bad, man-made suffering disappears and natural suffering is embraced as part of life. Zhuangzi elucidates this mystical philosophy through humor, parable, and anecdote, deploying non sequitur and even nonsense to illuminate a truth beyond the boundaries of ordinary logic. Boldly imaginative and inventively worded, the Zhuangzi floats free of its historical period and society, addressing the spiritual nourishment of all people across time. One of the most justly celebrated texts of the Chinese tradition, the Zhuangzi is read by thousands of English-language scholars each year, yet only in the Wade-Giles romanization. Burton Watson's pinyin romanization brings the text in line with how Chinese scholars, and an increasing number of other scholars, read it.

**Communication, Civilization and China** Bin Li, 2021-11-26 Referencing more than 40 ancient works as well as 70 books and papers of contemporary scholars, this book opens up the civilization, society, culture and communication of the Tang Dynasty. The Tang period represented unprecedented prosperity in the ancient world. Combining the socio-cultural background of ancient China and academic achievements of modern times, this book presents an intensive and in-depth exploration of the communicative organisations, methods and ideas of that period. The book looks at Tang methods of communication, from the postal delivery system and first newspaper to military communication in times of peace and war. It also considers questions of literature, poetry and public space as well as the impact of folk culture and communication on the Tang Dynasty, and examines the intellectual atmosphere of the time and debates surrounding freedom of speech and thought, positioning the Tang Dynasty as the end of the classic world and the beginning of modern society.

**Heaven and Earth in Early Han Thought** John S. Major, 1993-08-03 The Huainanzi has in recent years been recognized by scholars as one of the seminal works of Chinese thought at the beginning of the imperial era, a summary of the full flowering of early Taoist philosophy. This book presents a study of three key chapters of the Huainanzi, 'The Treatise on the Patterns of Heaven,' 'The Treatise on Topography,' and 'The Treatise on the Seasonal Rules,' which collectively comprise the most comprehensive extant statement of cosmological thinking in the early Han period. Major presents, for the first time, full English translations of these treatises. He supplements the translations with detailed commentaries that clarify the sometimes arcane language of the text and presents a fascinating picture of the ancient Chinese view of how the world was formed and sustained, and of the role of humans in the cosmos.

**Dao Companion to Xuanxue 玄学 (Neo-Daoism)** David Chai,2020-09-29 This comprehensive volume surveys an important but neglected period of Chinese intellectual history: Xuanxue (Neo-Daoism). It provides a holistic approach to the philosophical and religious traits of this movement via the concepts of non-being, being, and oneness. Thinkers and texts on the periphery of Xuanxue are also examined to show readers that Xuanxue did not arise in a vacuum but is the result of a long and continuous evolution of ideas from pre-Qin Daoism. The 25 chapters of this work survey the major philosophical figures and arguments of Xuanxue, a movement from the Wei-Jin dynastic period (220-420 CE) of early-medieval China. It also examines texts and figures from the late-Han dynasty whose influence on Xuanxue has yet to be made explicitly clear. In order to fully capture the multifaceted nature of this movement, the contributors brilliantly highlight its more socially-oriented characteristics. Overall, this volume presents an unrivaled picture of this exciting period. It details a portrait of intellectual and cultural vitality that rivals, if not surpasses, what was achieved during the Warring States period. Readers of the Yijing, Daodejing, and Zhuangzi will feel right at home with the themes and arguments presented herein, while students and those coming to Xuanxue for the first time will acquire a wealth of knowledge.

**The Art of Rulership** Roger T. Ames,1994-07-01 Ames demonstrates that the political theory contained in *The Art of Rulership* shares an underlying sympathy with precepts of Taoist and Confucian origin, and contains a systematic political philosophy that is not only unique but compelling. The book presents a political theory that tempers lofty ideals with functional practicability.

*The Encyclopaedia Sinica* Samuel Couling,1917

**Encyclopaedia of Asian civilizations** Louis Frédéric,1984

*Chinese Metaphysics and its Problems* Chenyang Li, Franklin Perkins,2015-04-30 The first English-language contributory volume on Chinese metaphysics, covering all major traditions from pre-Qin to the modern period.

*Wandering on the Way* Tzu Chuang,2000-04-01 In this vivid, contemporary translation, Victor Mair captures the quintessential life and spirit of Chuang Tzu while remaining faithful to the original text.
