Writing Space Jay David Bolter,2001-01-01 This second edition of Jay David Bolter's classic text expands on the objectives of the original volume, illustrating the relationship of print to new media, and examining how hypertext and other forms of electronic writing refashion or remediate the forms and genres of print. Reflecting the dynamic changes in electronic technology since the first edition, this revision incorporates the Web and other current standards of electronic writing. As a text for students in composition, new technologies, information studies, and related areas, this volume provides a unique examination of the computer as a technology for reading and writing.

**Writing Space** Christopher Greig Crysler,2003 Annotation Writing Spaces examines some of the most important discourses in spatial theory of the last four decades, and considers their impact within the built environment disciplines. The book will be a key resource for courses on critical theory in architecture, urban studies and geography, at both the graduate and advanced undergraduate level.

*Writing Space* J. David Bolter,1991 This book is a study of the computer as a new technology for reading and writing -- a technology that may replace the printing press as our principal medium of symbolic communication. One of the main subjects of Writing Space is hypertext, a technique that allows scientists, scholars, and creative writers to construct texts that interact with the needs and desires of the reader. Bolter explores both the theory and practice of hypertext, demonstrating that the computer as hypertext represents a new stage in the long history of writing, one that has far-reaching implications in the fields of human and artificial intelligence, cognitive science, philosophy, semiotics, and literary theory. Through a masterful integration of introductory, historical, illustrative, and theoretical material as well as an accompanying diskette containing a sample of hypertextual writing, Bolter supports his claim that the computer will carry literacy into a new age -- the age of electronic text that will emerge from the age of print that is now passing. His reflections on literacy in contemporary culture lead him to a compelling conclusion: ironically, cultural literacy is becoming almost synonymous with computer literacy.

The Routledge Companion to Humanism and Literature Michael Bryson,2022-03-31 The Routledge Companion to Humanism and Literature provides readers with a comprehensive reassessment of the value of humanism in an intellectual landscape. Offering contributions by leading international scholars, this volume seeks to define literature as a core expressive form and an essential constitutive element of newly reformulated understandings of humanism. While the value of humanism has recently been dominated by anti-humanist and post-humanist perspectives which focused on the flaws and exclusions of previous definitions of humanism, this volume examines the human problems, dilemmas, fears, and aspirations expressed in literature, as a fundamentally humanist art form and activity. Divided into three overarching categories, this companion will explore the histories, developments, debates, and contestations of humanism in literature, and deliver fresh definitions of the new humanism for the humanities. This focus aims to transcend the boundaries of a world in which human life is all too often defined in terms of restrictions—political, economic, theological, intellectual—and lived in terms of obedience, conformity, isolation, and fear. The Routledge Companion to Humanism and Literature will provide invaluable support to humanities students and scholars alike seeking to navigate the relevance and resilience of humanism across world cultures and literatures.

*Charting Literary Urban Studies* Jens Martin Gurr,2020-12-11 Guided by the multifaceted relations between city and text, *Charting Literary Urban Studies: Texts as Models of and for the City* attempts to chart the burgeoning field of literary urban studies by outlining how texts in varying degrees function as both representations of the city and as blueprints for its future development. The study addresses questions such as these: How do literary texts represent urban complexities – and how can they capture the uniqueness of a given city? How do literary texts simulate layers of urban memory – and how can they reinforce or help dissolve path dependencies in urban development? What role can literary studies play in interdisciplinary urban research? Are the blueprints or 'recipes' for urban development that most quickly travel around the globe – such as the 'creative city', the 'green city' or the 'smart city' – really always the ones that best solve a given problem? Or is the global spread of such travelling urban models not least a matter of their narrative packaging? In answering these key questions, this book also advances a literary studies contribution to the general theory of models, tracing a heuristic trajectory from the analysis of literary texts as representations of urban developments to an analysis of literary strategies in planning documents and other pragmatic, non-literary texts.

*Copy(write)* Martine Courant Rife,Shaun Slattery,2011-10-09 Brings together stories, theories, and research that can

further inform the ways in which writing teachers situate and address intellectual property issues in writing classrooms. The essays in the collection identify and describe a wide range of pedagogical strategies, consider theories, present research, explore approaches, and offer both cautionary tales and local and contextual successes.

**Advancing Digital Humanities** P. Arthur, K. Bode, 2014-12-03 Advancing Digital Humanities moves beyond definition of this dynamic and fast growing field to show how its arguments, analyses, findings and theories are pioneering new directions in the humanities globally.

Rhetorical Delivery as Technological Discourse Ben McCorkle, 2012-01-19 According to Ben McCorkle, the rhetorical canon of delivery—traditionally seen as the aspect of oratory pertaining to vocal tone, inflection, and physical gesture—has undergone a period of renewal within the last few decades to include the array of typefaces, color palettes, graphics, and other design elements used to convey a message to a chosen audience. McCorkle posits that this redefinition, while a noteworthy moment of modern rhetorical theory, is just the latest instance in a historical pattern of interaction between rhetoric and technology. In *Rhetorical Delivery as Technological Discourse: A Cross-Historical Study*, McCorkle explores the symbiotic relationship between delivery and technologies of writing and communication. Aiming to enhance historical understanding by demonstrating how changes in writing technology have altered our conception of delivery, McCorkle reveals the ways in which oratory and the tools of written expression have directly affected one another throughout the ages. To make his argument, the author examines case studies from significant historical moments in the Western rhetorical tradition. Beginning with the ancient Greeks, McCorkle illustrates how the increasingly literate Greeks developed rhetorical theories intended for oratory that incorporated “writerly” tendencies, diminishing delivery’s once-prime status in the process. Also explored is the near-eradication of rhetorical delivery in the mid-fifteenth century—the period of transition from late manuscript to early print culture—and the implications of the burgeoning print culture during the nineteenth century. McCorkle then investigates the declining interest in delivery as technology designed to replace the human voice and gesture became prominent at the beginning of the 1900s. Situating scholarship on delivery within a broader postmodern structure, he moves on to a discussion of the characteristics of contemporary hypertextual and digital communication and its role in reviving the canon, while also anticipating the future of communication technologies, the likely shifts in attitude toward delivery, and the implications of both on the future of teaching rhetoric. *Rhetorical Delivery as Technological Discourse* traces a long-view perspective of rhetorical history to present readers a productive reading of the volatile treatment of delivery alongside the parallel history of writing and communication technologies. This rereading will expand knowledge of the canon by not only offering the most thorough treatment of the history of rhetorical delivery available but also inviting conversation about the reciprocal impacts of rhetorical theory and written communication on each other throughout this history.

**Global Perspectives on Digital Literature** Torsa Ghosal,2023-06-22 Global Perspectives on Digital Literature: A Critical Introduction for the Twenty-First Century explores how digital literary forms shape and are shaped by aesthetic and political exchanges happening across languages and nations. The book understands global as a mode of comparative thinking and argues for considering various forms of digital literature—the popular, the avant-garde, and the participatory—as realizing and producing global thought in the twenty-first century. Attending to issues of both political and aesthetic representation, the book includes a diverse group of contributors and a wide-ranging corpus of texts, composed in a variety of languages and regions, including East and South Asia, parts of Europe, Latin America, North America, Australia, and Western Africa. The book’s contributors adopt an array of interpretive approaches to make visible new connections and possibilities engendered by cross-cultural encounters. Among other topics, they reflect on the shifting conditions for production and distribution of literature, participatory cultures and technological affordances of Web 2.0, the ever-changing dynamics of global and local forces, and fundamental questions, such as, What do we mean when we talk about literature today? and What is the future of literature?

*Sensualities/Textualities and Technologies* Susan Broadhurst,Josephine Machon,2016-01-18 This innovative collection features essays by a range of internationally renowned scholars and reconsiders textual practices in contemporary performance, specifically focusing on the exciting exchange between text, body and technology.

**Neverending Stories** R. Lyle Skains,2022-12-29 Digital fiction has long been perceived as an experimental niche of electronic literature. Yet born-digital narratives thrive in mainstream culture, as communities of practice create and share digital fiction, filling in the gaps between the media they are given and the stories they seek. Neverending Stories explores the influences of literature and computing on digital fiction and how the practices and cultures of each have impacted who makes and plays digital fiction. Popular creativity emerges from subordinated groups often excluded from producing cultural resources, accepting the materials of capitalism and inverting them for their own carnivalesque uses. Popular digital fiction goes by many different names: webnovels, adventure games, visual novels, Twitter fiction, webcomics, Twine games, walking

sims, alternate reality games, virtual reality films, interactive movies, enhanced books, transmedia universes, and many more. The book establishes digital fiction in a foundation of innovation, tracing its emergence in various guises around the world. It examines Infocom, whose commercial success with interactive fiction crumbled, in no small part, because of its failure to consider women as creators or consumers. It takes note of the brief flourish of commercial book apps and literary games. It connects practices of cognitive and conceptual interactivity, and textual multiplicity-dating to the origins of the print novel-to the feminine. It pushes into the technological future of narrative in immersive and mixed realities. It posits the transmedia franchises and the practices of fanfiction as examples of digital fiction that will continue indefinitely, regardless of academic notice or approval.

**Towards a Digital Poetics** James O'Sullivan, 2019-07-31 We live in an age where language and screens continue to collide for creative purposes, giving rise to new forms of digital literatures and literary video games. *Towards a Digital Poetics* explores this relationship between word and computer, querying what it is that makes contemporary fictions like *Dear Esther* and *All the Delicate Duplicates*—both ludic and literary—different from their print-based predecessors.
