**Mechanization for Rural Development** Josef Kienzle, John E. Ashburner, B. G. Sims. 2013 This publication gives a wide-ranging perspective on the present state of mechanization in the developing world, and, as such, constitutes a solid platform on which to build strategies for a sustainable future. Farm mechanization forms an integral plank in the implementation of sustainable crop production intensification methodologies and sustainable intensification necessarily means that the protection of natural resources and the production of ecosystem services go hand-in-hand with intensified production practices. This requires specific mechanization measures to allow crops to be established with minimum soil disturbance, to allow the soil to be protected under organic cover for as long as possible, and to establish crop rotations and associations to feed the soil and to exploit crop nutrients from various soil horizons. This work is the starting point to help the reader understand the complexities and requirements of the task ahead.

*Impulsivity and Compulsivity* John M. Oldham. 1996 Traditionally, impulsive and compulsive behaviors have been categorized as fundamentally distinct. However, patients often exhibit both of these behaviors. This common comorbidity has sparked renewed interest in the factors contributing to the disorders in which these behaviors are prominent. Impulsivity and Compulsivity applies a provocative spectrum model to this psychopathology. The spectrum model is consistent with a dimensional model for psychopathology and considers the dynamic interaction of biopsychosocial forces in the development of impulsive and compulsive disorders. In this important work on impulsive/compulsive psychopathology, leading researchers and clinicians share their expertise on the phenomenological, biological, psychodynamic, and treatment aspects of these disorders. Differential diagnosis, comorbidity of the impulsive-compulsive spectrum of disorders, and assessment by the seven-factor model of temperament and character are discussed. Chapters are also dedicated to the antianxiety function of impulsivity and compulsivity, defense mechanisms in impulsive disorders versus obsessive-compulsive disorders, and the unique aspects of psychotherapy with impulsive and compulsive patients. Clinical researchers and clinicians will be enlightened by this exceptional work. The information provided is supplemented with clinical vignettes, and the final chapter provides a synthetic summary that offers a unified, dynamic approach to impulsive and compulsive behavior.

**From the Cotton Field to the Cotton Mill** Holland Thompson.2013-01-18 THE author has spent the greater part of his life in the section described. While living in a rapidly growing mill town ten years ago, the sight of scores of wagons transferring scanty household goods from farmhouses to factory tenements awakened his interest in the sudden transformation of farmers into factory operatives. His interest in the problem has cost much time and trouble. He has read everything available upon the subject, has sifted and compared dozens of statistical tables, and has compiled others. He has visited many mills, has talked with dozens of mill owners, managers, superintendents, overseers, and operatives. The children in the mill, at school or upon the streets, and the parents at home have not been overlooked. The teachers, ministers, and church workers in the mill villages have helped. The business men, the officers of the law, the farmers, and the laborers, black and white, all have added something. Removal from the state gave the opportunity of visiting similar manufacturing establishments in other states, and has also afforded perhaps a truer perspective. However, a part of every

year has been spent in North Carolina, and impressions and opinions have been tested by time, the great touch-stone of truth. Greater hesitation in delivering final judgments has followed increasing knowledge. The interpretation of the life of a people is no slight undertaking. The author cannot speak so confidently as he would have done five years ago. Many phenomena, apparently permanent, have proved to be transient, and unexpected elements have increased the complications. At least he has written the truth as the truth appears after studying the problem for ten years.

Tobacco Culture John van Willigen,Susan C. Eastwood.2014-07-11 Whereas most crops drive farmers apart as they compete for the best prices, the price controls on tobacco bring growers together. The result is a culture unlike any other in America, one often forgotten or overlooked as federal and state governments fight over the spoils of the tobacco settlement. Tobacco Culture describes the process of raising a crop of burley from the perspective and experience of the farmers themselves. In the process of gathering information for the book, the authors performed most steps in the tobacco production process, from dropping plants, burning seedbeds, topping, and cutting to stripping and baling the finished product. Van Willigen and Eastwood document both present practices and historical developments in tobacco farming at the very moment a way of life stands poised for dramatic change. In addition to growing practices, the authors found other common threads linking growers and tobacco producing regions. Where tobacco is grown, it often becomes the major cash crop and carries the health of the economy. Farmer Oscar Richardson states, It's bread and butter. It's the industry of the community, the state as a whole.... You take tobacco out of Kentucky and this farmland wouldn't be worth a nickel. Combining cultural anthropology and oral history, John van Willigen and Susan Eastwood have created a remarkable portrait of the heart of the burley belt in Central Kentucky.
