Segeln mit Kindern Nils Theurer, 2014-06-24 Segeln macht Spaß – auch Kindern. Dennoch haben viele Eltern Angst, mit ihren Sprösslingen auf einen längeren oder auch kürzeren Törn zu gehen. So viel ist zu beachten, so viel kann falsch gemacht werden, so viel Unsicherheit und unterschiedliche Meinungen gibt es zum Segeln mit Kindern. Was ist zu bedenken, wenn man mit Kindern an Bord gehen will? Welche Yachten sind geeignet? Welche Rettungssysteme, Reviere, Fahrtdauer? Nils Theurer, Journalist bei der YACHT, hat den derzeitigen Stand aller Erkenntnisse zum Familiensegeln zusammengetragen. Wer noch nie mit Kindern an Bord einer Segelyacht war, bekommt erste Informationen. Wer schon ein alter Hase auf diesem Gebiet ist, findet zahlreiche Tipps und Empfehlungen. Meinungen und Fakten werden optisch deutlich getrennt. Gastbeiträge namhafter Segelautoren lockern die Kapitel auf und bieten ein großes Spektrum an Erfahrung zum Segeln mit Kindern. So ist das Buch einerseits unterhaltend und bietet gleichzeitig solides Wissen.

Quality Management in Food Chains European Association of Agricultural Economists. Seminar, Ludwig Theuvsen, 2007

This publication comprises material on recent studies on quality management in agri-food chains. Due to several food crisis's (e.g. BSE, Foot-and-Mouth disease) and growing demands for food quality and safety, quality management systems and quality assurance schemes have been widely adopted in different countries in recent years. Scientific knowledge about the

features, the acceptance and the effectiveness and efficiency of these newly introduced quality management initiatives, has remained scarce until now. The material by experts in the field, focuses on the evaluation of quality management systems and quality assurance schemes. The main issues are the costs and benefits of quality management given the influence of the public sector and consumers' expectations about food quality and safety. Not only are benchmarking and harmonisation methods examined with regard to their impact on the effectiveness of quality assurance schemes, but, also the role of trust, cooperation and integration for efficient quality management is discussed. Different economic theories such as microeconomics, organization and marketing theory as well as advanced statistical methods are applied. Concepts are discussed from the various points of view of industrialised, export-oriented and developing countries throughout the book. The information in this book give a comprehensive review of quality management concepts in food chains and highlight future research directions from a global perspective. This book is of interest to all those who concern themselves with the topic, be it in academia or in the professional sector.

Environmental Impacts of Traditional and Innovative Forest-based Bioproducts Andreja Kutnar,Subramanian Senthilkannan Muthu,2016-03-21 This book provides a comprehensive description of traditional and innovative forest-based bioproducts, from pulp and paper, wood-based composites and wood fuels to chemicals and fiber-based composites. The descriptions of different types of forest-based bioproducts are supplemented by the environmental impacts involved in their processing, use, and end-of-life phase. Further, the possibility of reusing, recycling and upgrading bioproducts at the end of their projected life cycle is discussed. As the intensity of demand for forest biomass is currently changing, forest-based industries need to respond with innovative products, business models, marketing and management. As such, the book concludes with a chapter on the bioproducts business and these products' role in bioeconomies.

Marketing Renewable Energy Carsten Herbes,Christian Friege,2017-06-23 This book answers questions such as: How do you market green electricity or bio-methane? What is the right price for renewable energy? How do the legal framework and customer preferences influence marketing strategies? Is direct marketing or online marketing the key to success? Answers to these and many other questions can be found in this volume, which gathers contributions from leading researchers and respected practitioners. Employing an easy-to-follow, clearly structured format, it combines the latest research results and concrete case studies to help readers understand the fundamentals of marketing for renewable energies and new business models from different countries.

Relevant Chemistry Education Ingo Eilks, Avi Hofstein, 2015-07-22 This book is aimed at chemistry teachers, teacher educators, chemistry education researchers, and all those who are interested in increasing the relevance of chemistry teaching and learning as well as students' perception of it. The book consists of 20 chapters. Each chapter focuses on a certain issue related to the relevance of chemistry education. These chapters are based on a recently suggested model of the relevance of science education, encompassing individual, societal, and vocational relevance, its present and future implications, as well as its intrinsic and extrinsic aspects. "Two highly distinguished chemical educators, Ingo Eilks and Avi Hofstein, have brought together 40 internationally renowned colleagues from 16 countries to offer an authoritative view of chemistry teaching today. Between them, the authors, in 20 chapters, give an exceptional description of the current state of chemical education and signpost the future in both research and in the classroom. There is special emphasis on the many attempts to enthuse students with an understanding of the central science, chemistry, which will be helped by having an appreciation of the role of the science in today's world. Themes which transcend all education such as collaborative work, communication skills, attitudes, inquiry learning and teaching, and problem solving are covered in detail and used in the context of teaching modern chemistry. The book is divided into four parts which describe the individual, the societal, the vocational and economic, and the non-formal dimensions and the editors bring all the disparate leads into a coherent narrative, that will be highly satisfying to experienced and new researchers and to teachers with the daunting task of teaching such an intellectually demanding subject. Just a brief glance at the index and the references will convince anyone interested in chemical education that this book is well worth studying; it is scholarly and readable and has tackled the most important issues in chemical education today and in the foreseeable future." - Professor David Waddington, Emeritus Professor in Chemistry Education, University of York, United Kingdom

Nitrate and Man Jean L'hirondel, 2002 This book focuses on the issue of the toxicity or innocuousness of nitrate. The nitrogen cycle, the metabolism of nitrate, the pathological and physiological levels of nitrate in body fluids, and the beneficial effects of nitrate (particularly in the areas of infectious digestive diseases, cardiovascular diseases and cancer) are discussed. Regulations concerning nitrate are examined. It is shown that, contrary to common belief, nitrate from vegetables and tap water presents no danger to human health.

Hydrogen as an Energy Carrier Carl-Jochen Winter, Joachim Nitsch, 2012-12-06 The technologies of hydrogen's energetic utilization have been known for a long time. But aspects of system analysis, energy economics, and ecology that would come into play in introducing it into energy systems have received much less attention. For those reasons, this book attempts to show the development path of a hydrogen economy, based on assured technological knowledge. One special concern has

been to demonstrate, on one hand, how these developments would fit into existing energy supply structures, and, on the other, how they would contribute to further development of the energy system as a whole. With that goal in mind it is necessary to contrast the obvious advantages of hydrogen with the large efforts that would be required for its introduction. This total-systems approach led to a three-part organization of the book that also aids the reader in quickly identifying those parts that are of special interest to him. Section A essentially explains why it is necessary today to think about a new synthetic energy carrier. It also describes the irreplaceable and growing role of hydrogen as a chemical raw material, and it explains technologies that already exist for its energetic use or that need further development. An attempt has also been made to prove that hydrogen's safety characteristics indeed permit its handling and use as an energy carrier. Hopefully, all this will show that hydrogen, together with electricity, could be the universally employable energy carrier of a future non-fossil energy supply system.

Dear Evelyn Kathy Page, 2018-09-04 WINNER OF THE 2018 ROGERS WRITERS' TRUST FICTION PRIZE A 2018 KIRKUS BEST BOOK OF THE YEAR A GLOBE AND MAIL BEST BOOK OF 2018 A TORONTO STAR TOP TEN BOOK OF THE YEAR A WINNIPEG FREE PRESS FAVOURITE BOOK OF THE YEAR A QUILL & QUIRE BEST BOOK OF 2018 Born between the wars on a working-class London street, Harry Miles wins a scholarship and a chance to escape his station, but discovers instead that poetry is what offers him real direction. While searching for more of it he meets Evelyn Hill on the steps of Battersea Library. The two fall in love as the world prepares once again for war, but their capacity to care for each other over the ensuing decades becomes increasingly tested. Twisting and startling, harrowing and deeply tender, Dear Evelyn explores how two very different people come together to shape and reshape each other over a lifetime. It is a compelling and unconventional love story that will leave its mark on any reader who has ever loved.

The Restless Girls Jessie Burton, 2019-03-05 A riveting feminist retelling, filled with excitement, imagination, magic, and just the right touch of darkness. -Madeline Miller, #1 New York Times bestselling author of Circe From acclaimed New York Times bestselling author Jessie Burton comes her debut middle-grade--a girl-forward fairy tale retelling of The Twelve Dancing Princesses about sisterhood, imagination, and bravery, lushly packaged and with beautiful full-color illustrations. For the twelve daughters of King Alberto, Queen Laurelia's death is a disaster beyond losing a mother. The king decides his daughters must be kept safe at all costs, and for the girls, those costs include their lessons, their possessions, and most importantly, their freedom. But the sisters, especially the eldest, Princess Frida, will not bend to this fate. She still has one possession her father cannot take: the power of her imagination. And so, with little but wits and ingenuity to rely on, Frida and her sisters begin their fight to be allowed to live on their own terms. The Restless Girls is a sparkling whirl of a fairy tale--one that doesn't need a prince to save the day, and instead is full of brave, resourceful, clever young women.

Teaching As A Reflective Practice Ian Westbury, Stefan Hopmann, Kurt Riquarts, 2012-08-06 This volume presents a mix of translations of classical and modern papers from the German Didaktik tradition, newly prepared essays by German scholars and practitioners writing from within the tradition, and interpretive essays by U.S. scholars. It brings this tradition, which virtually dominated German curricular thought and teacher education until the 1960s when American curriculum theory entered Germany--and which is now experiencing a renaissance--to the English-speaking world, where it has been essentially unknown. The intent is to capture in one volume the core (at least) of the tradition of Didaktik and to communicate its potential relevance to English-language curricularists and teacher educators. It introduces a theoretical tradition which, although very different in almost every respect from those we know, offers a set of approaches that suggest ways of thinking about problems of reflection on curricular and teaching praxis (the core focus of the tradition) which the editors believe are accessible to North American readers--with appropriate translation. These ways of thinking and related praxis are very relevant to notions such as reflective teaching and the discourse on teachers as professionals. By raising the possibility that the new tradition of Didaktik can be highly suggestive for thinking through issues related to a number of central ideas within contemporary discourse--and for exploring the implications of these ideas for both teacher education and for a curriculum theory appropriate to these new contexts for theorizing, this book opens up a gold mine of theoretical and practical possibilities.

To Night Owl, From Dogfish Meg Wolitzer, Holly Goldberg Sloan, 2019-02-18 Told almost entirely through emails, this is the exuberant, funny story of two girls who try to get their gay fathers back together. It's a novel about the true meaning of family, written by two exceptional and beloved authors. Avery Bloom is anxious and academic and afraid of the water. Bett Devlin is brash and athletic and loves to surf. The only things they seem to have in common are their age - twelve - and the fact that their dads have fallen in love with each other. Now their dads are sending them to the same sleepaway camp, against their will, so that they can become friends. But when the girls reluctantly grow to like each other and start looking forward to becoming a family, their dads fall out of love. Can Avery and Bett figure out a way to bring their fathers back together now that they can't imagine a life without a stepsister?
