Cold War Modernists Greg Barnhisel. 2015-02-24 European intellectuals of the 1950s dismissed American culture as nothing more than cowboy movies and the A-bomb. In response, American cultural diplomats tried to show that the United States had something to offer beyond military might and commercial exploitation. Through literary magazines, traveling art exhibits, touring musical shows, radio programs, book translations, and conferences, they deployed the revolutionary aesthetics of modernism to prove—particularly to the leftists whose Cold War loyalties they hoped to secure—that American art and literature were aesthetically rich and culturally significant. Yet by repurposing modernism, American diplomats and cultural authorities turned the avant-garde into the establishment. They remade the once revolutionary movement into a content-free collection of artistic techniques and styles suitable for middlebrow consumption. *Cold War Modernists* documents how the CIA, the State Department, and private cultural diplomats transformed modernist art and literature into pro-Western propaganda during the first decade of the Cold War. Drawing on interviews, previously unknown archival materials, and the stories of such figures and institutions as William Faulkner, Stephen Spender, Irving Kristol, James Laughlin, and Voice of America, Barnhisel reveals how the U.S. government reconfigured modernism as a trans-Atlantic movement, a joint endeavor between American and European artists, with profound implications for the art that followed and for the character of American identity.

The Art of Solidarity Jessica Stites Mor, Maria del Carmen Suescun Pozas. 2018-10-17 The Cold War claimed many lives and inflicted tremendous psychological pain throughout the Americas. The extreme polarization that resulted from pitting capitalism against communism held most of the creative and productive energy of the twentieth century captive. Many artists responded to Cold War struggles by engaging in activist art practice, using creative expression to mobilize social change. *The Art of Solidarity* examines how these creative practices in the arts and culture contributed to transnational solidarity campaigns that connected people across the Americas from the early twentieth century through the Cold War and its immediate aftermath. This collection of original essays is divided into four chronological sections: cultural and artistic production in the pre-Cold War era that set the stage for transnational solidarity organizing; early artistic responses to the

rise of Cold War polarization and state repression; the centrality of cultural and artistic production in social movements of solidarity; and solidarity activism beyond movements. Essay topics range widely across regions and social groups, from the work of lesbian activists in Mexico City in the late 1970s and 1980s, to the exchanges and transmissions of folk-music practices from Cuba to the United States, to the uses of Chilean arpilleras to oppose and protest the military dictatorship. While previous studies have focused on politically engaged artists or examined how artist communities have created solidarity movements, this book is one of the first to merge both perspectives.

The Palgrave Handbook of Cold War Literature Andrew Hammond.2020-09-04 This book offers a comprehensive guide to global literary engagement with the Cold War. Eschewing the common focus on national cultures, the collection defines Cold War literature as an international current focused on the military and ideological conflicts of the age and characterised by styles and approaches that transcended national borders. Drawing on specialists from across the world, the volume analyses the period's fiction, poetry, drama and autobiographical writings in three sections: dominant concerns (socialism, decolonisation, nuclearism, propaganda, censorship, espionage), common genres (postmodernism, socialism realism, dystopianism, migrant poetry, science fiction, testimonial writing) and regional cultures (Asia, Africa, Oceania, Europe and the Americas). In doing so, the volume forms a landmark contribution to Cold War literary studies which will appeal to all those working on literature of the 1945-1989 period, including specialists in comparative literature, postcolonial literature, contemporary literature and regional literature.

Visual Representations of the Cold War and Postcolonial Struggles Midori Yamamura, Yu-Chieh Li.2021-06-25 The essays and artworks gathered in this volume examine the visual manifestations of postcolonial struggles in art in East and Southeast Asia, as the world transitioned from the communist/capitalist ideological divide into the new global power structure under neoliberalism that started taking shape during the Cold War. The contributors to this volume investigate the visual art that emerged in Australia, China, Cambodia, Indonesia, Korea, Okinawa, and the Philippines. With their critical views and new approaches, the scholars and curators examine how visual art from postcolonial countries deviated from the communist/capitalist dichotomy to explore issues of identity, environment, rapid commercialization of art, and independence. These foci offer windows into some lesser-known aspects of the Cold War, including humanistic responses to the neo-imperial exploitations of people and resources as capitalism transformed into its most aggressive form. Given its unique approach, this seminal study will be of great value to scholars of 20th-century East Asian and Southeast Asian art history and visual and cultural studies.

Art of War in an Asymmetric World Barry Scott Zellen.2012 The work examines the rise of the movements against globalization, modernization, and Western dominance that followed the collapse of the bipolar world and the end of the Cold War and that culminated with today's global jihadist movements. It describes how the U.S. had to adapt to this new,

asymmetrical world of conflict with its strategic, doctrinal and theoretical responses to the threats of terrorism and insurgency that defined the Global War on Terror (GWOT). Unique in the breadth of its scope, the book connects movements from the Zapatista uprising to Al Qaeda's global jihad within a broad.

Socialist Internationalism and the Gritty Politics of the Particular Kristin Roth-Ey.2023-04-06 This collection takes a case study approach to enter into and explore spaces of 'Second-Third World' interaction during the Cold War. From the dining halls of a university, to hospital wards, construction sites, military barracks, pubs and more, the chapters drop the scale down from the global to the particular to better see, understand and interpret the complex nature of these spaces. These ordinary spaces are examined to understand how they were conceived, constructed, shaped and reshaped by people over time. Many are physical places of encounter, while others are more abstract, embodying ideological goals. In exploring these spaces the contributors show how the Second and Third World actors understood them and connected them to ideas such as gender and space, the space of the nation, of the modern and of the self. Essentially, it seeks to unravel how these spaces between Second and Third Worlds worked, and what, if anything, was distinctive and consequential about them. *Second-Third World Spaces in the Cold War* explores the ways in which these Second and Third World actors collaborated and clashed in these everyday spaces, and brings these multi-faceted, multi-actor histories to a vital centre ground.

Historical Dictionary of the Russo-Japanese War Rotem Kowner.2017-04-06 The Russo-Japanese War was fought for 19 months (8 February 1904- 5 September 1905) between the empires of Japan and the Russia over the southern part of Manchuria and the Korean Peninsula. While essentially a colonial conflict, the war became a major engagement both in scale and innovation unseen until then. In recent years there has been a growing awareness that this event marks a historical juncture far more important than it was usually taken to be. This second edition of the *Historical Dictionary of the Russo-Japanese War* offers a major revision of the highly praised first edition, which, by all accounts, has been the standard work on this conflict in any language during the last decade. The book contains a chronology, an introduction, appendixes, and an extensive bibliography. Moreover, the dictionary section has some 800 new or fully revised cross-referenced entries on the battles, weaponry, and major personalities of the war, as well as various international events and conflicts, agreements, schemes, and projects that led to the war. This book is an excellent resource for students, researchers, and anyone wanting to know more about the Russo-Japanese War.

Understanding the Cold War Elspeth O'Riordan.2022-09-29 This book provides an advanced introduction to the Cold War, assessing its origins, development and conclusion as a dynamic interaction between superpower confrontation and complex regional and local situations. The evolution of the subject's scholarly debate is discussed throughout and the contest situated alongside enduring historical themes including decolonisation, development, nationalism and globalisation. Regional case studies, on Europe, East and Southeast Asia, Latin America and the Middle East, illuminate the Cold War's global reach.

Thematic analysis considers competition in military, strategic and economic spheres, as well as in aspects of culture, ideology, society, and Human Rights. The Cold War's transnational elements and facets of international cooperation are also highlighted. The book unpacks the subject's extensive scholarly discourse, underlining the interdisciplinary character of today's Cold War historiography and the importance of understanding that its development has been informed by a vibrant interface between international history, international relations and the Cold War itself.

EU Policies in a Global Perspective Gerda Falkner, Patrick Müller. 2013-11-20 Recent decades have seen a rise in the significance of governance layers beyond the nation state and even Europe. Nonetheless, few efforts have been made thus far to systematically examine the EU's interaction with global policy regimes. This book maps the relative importance of EU policies in the multi-level global governance system, in comparison with national and global activities. It provides a unique comparative analysis of the EU's capacity for projecting its policies outward. Focusing on trade policy, agriculture, food safety, competition, social rights, environmental policy, transport, migration, nuclear non-proliferation, or financial regulation, each chapter contributes to a better understanding of the EU's role in shaping global policies, the mechanisms it uses and the conditions leading to success or failure. The contributors' comparative research highlights that policy export is a demanding phenomenon that faces severe limitations and frequently comes with drawbacks. Still, EU policy export played a key role in shaping the rules of the global trade regime and influenced global policy outcomes - at least to a minor extent or in technical aspects - in the majority of the covered policy areas. Overall however, this book reveals that the EU not only aims to export its policies, but interacts with its global environment in a number of distinct ways, including policy import and policy protection, to shield it from global pressures. Concluding with a comparison of all policies on the meta-level and relevant policy recommendations, this book will be of interest to students, scholars and practitioners of European politics, European public policy, global governance and international relations.

Fall-Out Shelters for the Human Spirit Michael L. Krenn. 2006-03-08 During the Cold War, culture became another weapon in America's battle against communism. Part of that effort in cultural diplomacy included a program to arrange the exhibition of hundreds of American paintings overseas. Michael L. Krenn studies the successes, failures, contradictions, and controversies that arose when the U.S. government and the American art world sought to work together to make an international art program a reality between the 1940s and the 1970s. The Department of State, then the United States Information Agency, and eventually the Smithsonian Institution directed this effort, relying heavily on the assistance of major American art organizations, museums, curators, and artists. What the government hoped to accomplish and what the art community had in mind, however, were often at odds. Intense domestic controversies resulted, particularly when the effort involved modern or abstract expressionist art. Ultimately, the exhibition of American art overseas was one of the most controversial Cold War initiatives undertaken by the United States. Krenn's investigation deepens our understanding of the

cultural dimensions of America's postwar diplomacy and explores how unexpected elements of the Cold War led to a redefinition of what is, and is not, American.

Global Perspectives on Critical Architecture Gevork Hartoonian.2016-03-03 Judging from the debates taking place in both education and practice, it appears that architecture is deeply in crisis. New design and production techniques, together with the globalization of capital and even skilled-labour, have reduced architecture to a commodified object, its aesthetic qualities tapping into the current pervasive desire for the spectacular. These developments have changed the architect's role in the design and production processes of architecture. Moreover, critical architectural theories, including those of Breton, Heidegger and Benjamin, which explored the concepts of technology, modernism, labour and capital and how technology informed the cultural, along with later theories from the 1960s, which focused more on the architect's theorization of his/her own design strategies, seem increasingly irrelevant. In an age of digital reproduction and commodification, these theoretical approaches need to be reassessed. Bringing together essays and interviews from leading scholars such as Kenneth Frampton, Peggy Deamer, Bernard Tschumi, Donald Kunze and Marco Biraghi, this volume investigates and critically addresses various dimensions of the present crisis of architecture. It poses questions such as: Is architecture a conservative cultural product servicing a given producer/consumer system? Should architecture's affiliative ties with capitalism be subjected to a measure of criticism that can be expanded to the entirety of the cultural realm? Is architecture's infusion into the cultural the reason for the visibility of architecture today? What room does the city leave for architecture beyond the present delirium of spectacle? Should the thematic of various New Left criticisms of capitalism be taken as the premise of architectural criticism? Or alternatively, putting the notion of criticality aside is it enough to confine criticism to the production of insightful and pleasurable texts?

Global Perspectives on Amateur Film Histories and Cultures Masha Salazkina, Enrique Fibla.2021-01-05 For too long, the field of amateur cinema has focused on North America and Europe. In *Global Perspectives on Amateur Film Histories and Cultures*, however, editors Masha Salazkina and Enrique Fibla-Gutiérrez fill the literature gap by extending that focus and increasing inclusivity. Through carefully curated essays, Salazkina and Fibla-Gutiérrez bring wider meaning and significance to the discipline through their study of alternative cinema in new territories, fueled by different historical and political circumstances, innovative technologies, and ambitious practitioners. The essays in this volume work to realize the radical societal democratization that shows up in amateur cinema around the world. In particular, diverse contributors highlight the significance of amateur filmmaking, the exhibition of amateur films, the uses and availability of film technologies, and the inventive and creative approaches of filmmakers and advocates of amateur film. Together, these essays shed new light on alternative cinema in a wide range of cities and countries where amateur films thrive in the shadow of commercial and conventional film industries.

Situating Global Art Sarah Dornhof, Nanne Buurman, Birgit Hopfener, Barbara Lutz. 2018-05-31 In recent years, the term global art has become a catchphrase in contemporary art discourses. Going beyond additive notions of canon expansion, this volume encourages a differentiated inquiry into the complex aesthetic, cultural, historical, political, epistemological and socio-economic implications of both the term global art itself and the practices it subsumes. Focusing on diverse examples of art, curating, historiography and criticism, the contributions not only take into account (new) hegemonies and exclusions but also the shifting conditions of transcultural art production, circulation and reception.

Global Perspectives on the Psychology of Terrorism Chitadze, Nika. 2022-09-16 The constant threat of terror leads to the destabilization of the political, economic, and social situation in the state. Lack of confidence in personal safety contributes to the growth of anxiety, fears, and mental stress, which negatively affects psychological health, leading to the development of various psychosomatic disorders among the population. *Global Perspectives on the Psychology of Terrorism* discusses the psychological aspects of terrorism, including the determination of the main types of terrorism and the psychological characteristics of terrorists and terrorist groups. It further speaks on the negative impact of terrorism on the mass consciousness, as well as the ways to deal with stress in people exposed to the impact of terrorist attacks, features of human behavior in extreme situations, and methods of psychological support in times of crisis. Covering topics such as state terrorism, international security, and cyberterrorism, this premier reference source is an excellent resource for government officials, sociologists, representatives of mass media, non-governmental organizations, politicians, psychologists, students and faculty of higher education, librarians, researchers, and academicians.

The Cold War David Painter. 2002-03-11 The Cold War dominated international relations for forty-five years. It shaped the foreign policies of the United States and the Soviet Union and deeply affected their societies, domestic situations and their government institutions. Hardly any part of the world escaped its influence. David Painter provides a compact and analytical study that examines the origins, course, and end of the Cold War. His overview is global in perspective, with an emphasis on the Third World as well as the contested regions of Asia and Central America, and a strong consideration of economic issues. He includes discussion of: the global distribution of power the arms race the world economy. *The Cold War* gives a concise, original and interdisciplinary introduction to this international state of affairs, covering the years between 1945 and 1990.

Horizontal Art History and Beyond Agata Jakubowska, Magdalena Radomska. 2022-07-08 This book is devoted to the concept of horizontal art history—a proposal of a paradigm shift formulated by the Polish art historian Piotr Piotrowski (1952–2015)—that aims at undermining the hegemony of the discourse of art history created in the Western world. The concept of horizontal art history is one of many ideas on how to conduct nonhierarchical art historical analysis that have been developed in different geopolitical locations since at least the 1970s, parallel to the ongoing process of decolonization. This book is a critical examination of horizontal art history which provokes a discussion on the original concept of horizontal art

history and possible methods to extend it. This is an edited volume written by international scholars who acknowledge the importance of the concept, share its basic assumptions and are aware both of its advantages and limitations. The book will be of interest to scholars working in art history, art historiography and postcolonial studies.

Re-envisioning the Contemporary Art Canon Ruth E Iskin.2016-12-08 *Re-envisioning the Contemporary Art Canon: Perspectives in a Global World* seeks to dissect and interrogate the nature of the present-day art field, which has experienced dramatic shifts in the past 50 years. In discussions of the canon of art history, the notion of 'inclusiveness', both at the level of rhetoric and as a desired practice is on the rise and gradually replacing talk of 'exclusion', which dominated critiques of the canon up until two decades ago. The art field has dramatically, if insufficiently, changed in the half-century since the first protests and critiques of the exclusion of 'others' from the art canon. With increased globalization and shifting geopolitics, the art field is expanding beyond its Euro-American focus, as is particularly evident in the large-scale international biennales now held all over the globe. Are canons and counter-canons still relevant? Can they be re-envisioned rather than merely revised? Following an introduction that discusses these issues, thirteen newly commissioned essays present case studies of consecration in the contemporary art field, and three commissioned discussions present diverse positions on issues of the canon and consecration processes today. This volume will be of interest to instructors and students of contemporary art, art history, and museum and curatorial studies.

Migration into art Anne Ring Petersen.2017-12-13 This book addresses a topic of increasing importance to artists, art historians and scholars of cultural studies, migration studies and international relations: migration as a profoundly transforming force that has remodelled artistic and art institutional practices across the world. It explores contemporary art's critical engagement with migration and globalisation as a key source for improving our understanding of how these processes transform identities, cultures, institutions and geopolitics. The author explores three interwoven issues of enduring interest: identity and belonging, institutional visibility and recognition of migrant artists, and the interrelations between aesthetics and politics, including the balancing of aesthetics, politics and ethics in representations of forced migration.

The Global Contemporary Art World Jonathan Harris.2017-07-27 The final installment in the critically-acclaimed trilogy on globalization and art explores the growing dominance of Asian centers of art This book takes readers on a fascinating journey around five Asian centers of contemporary art and its myriad institutions, agents, forms, materials, and languages, while posing vital questions about the political economy of culture and the power of visual art in a multi-polar world. He analyzes the financial powerhouse of Art Basel Hong Kong, new media art in South Korea, the place of the Kochi Biennale within contemporary art in India, transnational art and art education in China, and the geo-politics of art patronage in Palestine, and he develops a highly original synthesis of theoretical perspectives and empirical research. Drawing on detailed case studies and personal insights gained from his extensive experience of the contemporary art scene in Asia, Professor

Harris examines the evolving relationship between the western centers of art practice, collection, and validation and the emerging “peripheries” of Asian Tiger societies with burgeoning art centers. And he arrives at the somewhat controversial conclusion that dominance of the art world is rapidly slipping away from Europe and North America. The *Global Contemporary Art World* is essential reading for undergraduates and postgraduate students in modern and contemporary art, art history, art theory and criticism, cultural studies, the sociology of culture, and globalization studies. It is also a vital resource for research students, academics, and professionals in the art world.

Art and Politics During the Cold War Michał Wenderski. 2024-02-29 Drawing on thousands of historical documents from Polish and Dutch archives, this book explores Cold War cultural exchange between so-called ‘smaller powers’ of this global conflict, which thus far has been predominately explored from the perspective of the two superpowers or more pivotal countries. By looking at how cultural, artistic and scholarly relations were developed between Poland and the Netherlands, Michał Wenderski sheds new light on the history of the Cultural Cold War that was not always orchestrated solely by its main players. Less pivotal states - for example, Poland and the Netherlands - likewise intentionally created their international cultural policies and shaped their cultural exchange with countries from the other side of the Iron Curtain. This study reconstructs these policies and identifies the varying factors that influenced them - both official and less formal. The book will be of interest to scholars working in art history, history of the Cold War, post-war European history, international cultural relations, Dutch studies and Polish studies.

The Global Cold War Odd Arne Westad, Professor of International History Odd Arne Westad. 2005-10-24 The Cold War shaped the world we live in today - its politics, economics, and military affairs. This book shows how the globalization of the Cold War during the last century created the foundations for most of the key conflicts we see today, including the War on Terror. It focuses on how the Third World policies of the two twentieth-century superpowers - the United States and the Soviet Union - gave rise to resentments and resistance that in the end helped topple one superpower and still seriously challenge the other. Ranging from China to Indonesia, Iran, Ethiopia, Angola, Cuba, and Nicaragua, it provides a truly global perspective on the Cold War. And by exploring both the development of interventionist ideologies and the revolutionary movements that confronted interventions, the book links the past with the present in ways that no other major work on the Cold War era has succeeded in doing.

Globalizing East European Art Histories Beáta Hock, Anu Allas. 2018-05-30 This edited collection reassesses East-Central European art by offering transnational perspectives on its regional or national histories, while also inserting the region into contemporary discussions of global issues. Both in popular imagination and, to some degree, scholarly literature, East-Central Europe is persistently imagined as a hermetically isolated cultural landscape. This book restores the diverse ways in which East-Central European art has always been entangled with actors and institutions in the wider world. The

contributors engage with empirically anchored and theoretically argued case studies from historical periods representing notable junctures of globalization: the early modern period, the age of Empires, the time of socialist rule and the global Cold War, and the most recent decades of postsocialism understood as a global condition.

Pioneers of the Global Art Market Christel H. Force.2020-11-26 By the turn of the twentieth century, Paris was the capital of the art world. While this is usually understood to mean that Paris was the center of art production and trading, this book examines a phenomenon that has received little attention thus far: Paris-based dealers relied on an ever-expanding international network of peers. Many of the city's galleries capitalized on foreign collectors' interest by expanding globally and proactively cultivating transnational alliances. If the French capital drew artists from around the world—from Cassatt to Picasso—the contemporary-art market was international in scope. Art dealers deliberately tapped into a growing pool of discerning collectors in northern and eastern Europe, the UK, and the USA. International trade was rendered not just desirable but necessary by the devastating effects of wars, revolutions, currency devaluation and market crashes which stalled collecting in Europe. *Pioneers of the Global Art Market* assembles original scholarship based on a close inspection of and fresh perspective on extant dealer records. It caters to an amplified curiosity concerning the emergence and workings of our unprecedented contemporary-centric and global art market. This anthology fills a significant gap in the expanding field of art market studies by addressing how, initially, contemporary art, which is now known as historical modernism, made its way into collections: who validated what by promoting and selling it, where, and how. It includes unpublished material, concrete examples, bibliographical and archival references, and should appeal to academics, curators, educators, dealers, collectors, artists and art lovers alike. It celebrates the modern art dealer as transnational impresario, the global reach of the modern-art market, and the impact of traders on the history of collecting, and ultimately on the history of art.

[The Free World](#) Louis Menand.2021-04-20 An engrossing and impossibly wide-ranging project . . . In *The Free World*, every seat is a good one. —Carlos Lozada, *The Washington Post* *The Free World* sparkles. Fully original, beautifully written . . . One hopes Menand has a sequel in mind. The bar is set very high. —David Oshinsky, *The New York Times Book Review* | Editors' Choice One of *The New York Times's* 100 best books of 2021 | One of *The Washington Post's* 50 best nonfiction books of 2021 | A *Mother Jones* best book of 2021 In his follow-up to the Pulitzer Prize-winning *The Metaphysical Club*, Louis Menand offers a new intellectual and cultural history of the postwar years. The Cold War was not just a contest of power. It was also about ideas, in the broadest sense—economic and political, artistic and personal. In *The Free World*, the acclaimed Pulitzer Prize-winning scholar and critic Louis Menand tells the story of American culture in the pivotal years from the end of World War II to Vietnam and shows how changing economic, technological, and social forces put their mark on creations of

the mind. How did elitism and an anti-totalitarian skepticism of passion and ideology give way to a new sensibility defined by freewheeling experimentation and loving the Beatles? How was the ideal of “freedom” applied to causes that ranged from anti-communism and civil rights to radical acts of self-creation via art and even crime? With the wit and insight familiar to readers of *The Metaphysical Club* and his *New Yorker* essays, Menand takes us inside Hannah Arendt’s Manhattan, the Paris of Jean-Paul Sartre and Simone de Beauvoir, Merce Cunningham and John Cage’s residencies at North Carolina’s Black Mountain College, and the Memphis studio where Sam Phillips and Elvis Presley created a new music for the American teenager. He examines the post war vogue for French existentialism, structuralism and post-structuralism, the rise of abstract expressionism and pop art, Allen Ginsberg’s friendship with Lionel Trilling, James Baldwin’s transformation into a Civil Right spokesman, Susan Sontag’s challenges to the New York Intellectuals, the defeat of obscenity laws, and the rise of the New Hollywood. Stressing the rich flow of ideas across the Atlantic, he also shows how Europeans played a vital role in promoting and influencing American art and entertainment. By the end of the Vietnam era, the American government had lost the moral prestige it enjoyed at the end of the Second World War, but America’s once-despised culture had become respected and adored. With unprecedented verve and range, this book explains how that happened.

De-Centering Cold War History Jadwiga E. Pieper Mooney, Fabio Lanza. 2013-01-25 *De-Centering Cold War History* challenges the Cold War master narratives that focus on super-power politics by shifting our analytical perspective to include local-level experiences and regional initiatives that were crucial to the making of a Cold War world. Cold War histories are often told as stories of national leaders, state policies and the global confrontation that pitted a Communist Eastern Bloc against a Capitalist West. Taking a new analytical approach this book reveals unexpected complexities in the historical trajectory of the Cold War. Contributions from an international group of scholars take a fresh look at historical agency in different places across the world, including Africa, Asia, Europe and the Americas. This collaborative effort shapes a street-level history of the global Cold War era, one that uses the analysis of the 'local' to rethink and reframe the wider picture of the 'global', connecting the political negotiations of individuals and communities at the intersection of places and of meeting points between 'ordinary' people and political elites to the Cold War at large. Essential reading for all students of Cold War history.

An Analysis of Odd Arne Westad's The Global Cold War Patrick Glenn, Bryan Gibson. 2017-07-05 For those who lived through the Cold War period, and for many of the historians who study it, it seemed self-evident that the critical incidents that determined its course took place in the northern hemisphere, specifically in the face-off between NATO and the Warsaw Pact in Europe. In this view, the Berlin Wall mattered more than the Ho Chi Minh Trail, and the Soviet intervention in Hungary was vastly more significant than Soviet intervention in Korea. It was only the fine balance of power in the northern theatre that redirected the attentions of the USA and the USSR elsewhere, and resulted in outbreaks of proxy warfare

elsewhere in the globe - in Korea, in Vietnam and in Africa. Odd Arne Westad's triumph is to look at the history of these times through the other end of the telescope - to reconceptualize the Cold War as something that fundamentally happened in the Third World, not the First. The thesis he presents in *The Global Cold War* is highly creative. It upends much conventional wisdom and points out that the determining factor in the struggle was not geopolitics, but ideology - an ideology, moreover, that was heavily flavoured by elements of colonialist thinking that ought to have been alien to the mindsets of two avowedly anti-colonial superpowers. Westad's work is a fine example of the creative thinking skill of coming up with new connections and fresh solutions; it also never shies away from generating new hypotheses or redefining issues in order to see them in new ways.

Entangled East and West Simo Mikkonen, Giles Scott-Smith, Jari Parkkinen. 2018-12-17 Despite increasing scholarship on the cultural Cold War, focus has been persistently fixed on superpowers and their actions, missing the important role played by individuals and organizations all over Europe during the Cold War years. This volume focuses on cultural diplomacy and artistic interaction between Eastern and Western Europe after 1945. It aims at providing an essentially European point of view on the cultural Cold War, providing fresh insight into little known connections and cooperation in different artistic fields. Chapters of the volume address photography and architecture, popular as well as classical music, theatre and film, and fine arts. By examining different actors ranging from individuals to organizations such as universities, the volume brings new perspective on the mechanisms and workings of the cultural Cold War. Finally, the volume estimates the pertinence of the Cold War and its influence in post-1991 world. The volume offers an overview on the role culture played in international politics, as well as its role in the Cold War more generally, through interesting examples and case studies.

Gender, Sexuality, and the Cold War Philip E. Muehlenbeck. 2021-04-30 As Marko Dumančić writes in his introduction to *Gender, Sexuality, and the Cold War*, despite the centrality of gender and sexuality in human relations, their scholarly study has played a secondary role in the history of the Cold War. . . . It is not an exaggeration to say that few were left unaffected by Cold War gender politics; even those who were in charge of producing, disseminating, and enforcing cultural norms were called on to live by the gender and sexuality models into which they breathed life. This underscores the importance of this volume, as here scholars tackle issues ranging from depictions of masculinity during the all-consuming space race, to the vibrant activism of Indian peasant women during this period, to the policing of sexuality inside the militaries of the world. *Gender, Sexuality, and the Cold War* brings together a diverse group of scholars whose combined research spans fifteen countries across five continents, claiming a place as the first volume to examine how issues of gender and sexuality impacted both the domestic and foreign policies of states, far beyond the borders of the United States, during the tumult of the Cold War. Proxy Wars from a Global Perspective Pawel Bernat, Cüneyt Gürer, Cyprian Aleksander Kozera.2023-11-02 Proxy warfare is a growing international phenomenon. Although states have used proxies in armed conflicts for centuries, evolving regional and global security architecture is now forcing states to radically change the way contemporary conflicts are fought. Based on ten case studies, this reassesses exactly how these changing global and systemic factors are shaping the ways in which states use non-state actors as proxies in their armed conflicts. Examining the use of proxy warfare worldwide, focusing on the last decade's conflicts, this volume brings together contributions from scholars of international relations and global security studies in order to explore cases of armed conflict of particular regional and global significance. These include recent developments in the conflict in Israel and Palestine, the Central African Republic, Libya, Mali, Central Asia, Syria, Ukraine, Nagorno-Karabakh, Brazil and Yemen. By drawing on both theory and practise, it offers a re-evaluation of contemporary understanding of outsourced warfare, with policy implications for how we understand and negotiate with states using proxy warfare in the future.

H.C. Westermann at War David McCarthy.2004 This book examines the antiwar work of one American artist in relation to the cultural history of the Cold War. The study provides new and detailed information on this important artist, while also contributing to the study of masculinity, dissent, art, violence, and war in the last half of the twentieth century. The study clearly reveals that artists' protests against American foreign policy began well before the official U.S. entry in the Vietnam War, and that not all combat veterans looked back fondly on their experience of the Good War. Finally, in drawing attention

to the challenges of being a man in a hostile world, Westermann's art enters into a much broader consideration of gender long before this issue became topical in contemporary art. director of the American Studies Program at Rhodes College in Tennessee.

New Histories of Art in the Global Postwar Era Flavia Frigeri, Kristian Handberg. 2021-03-24 This book maps key moments in the history of postwar art from a global perspective. The reader is introduced to a new globally oriented approach to art, artists, museums and movements of the postwar era (1945-70). Specifically, this book bridges the gap between historical artistic centers, such as Paris and New York, and peripheral loci. Through case studies, previously unknown networks, circulations, divides and controversies are brought to light. From the development of Ethiopian modernism, to the showcase of Brazilian modernity, this book provides readers with a new set of coordinates and a reassessment of well-trodden art historical narratives around modernism. This book will be of interest to scholars in art historiography, art history, exhibition and curatorial studies, modern art and globalization.

Universal - International - Global Antje Kempe, Beata Hock, Marina Dmitrieva. 2023-01-23 This collection of articles explores a possible alternative beginning of Global Art History and World Art Studies, two methodologies that set a worldwide focus in the study of art around the 2000s. Teaching back to earlier efforts to conceive of the international community in a less Eurocentric way, the volume proposes a tentative link between socialist internationalism as a political and cultural diplomatic principle in the Soviet Block and some new approaches to art and cultural historiography introduced there. In the Second World, universal art history or Weltkunstgeschichte were endorsed as frameworks for the teaching and writing of art history. Authors in this book interrogate whether world art history as practiced by socialist scholars had aspirations and achievements comparable to today's Global Art History and World Art Studies. Or was this knowledge production in an internationalist paradigm a mere foil for communist rhetoric, behind which severed cultural relations to the Western world could also be recommenced?

American History from a Global Perspective David Russo. 2000-03-30 This study is the first interpretive text for the study of American exceptionalism and the first overall assessment of geographic, political, economic, social, and cultural aspects of the American past written from a global perspective. Russo argues that life in the United States can be better understood if it is examined from either a wider perspective-the English speaking world, the Western Hemisphere, Western Civilization-or a narrower perspective-regional and local variations. Even when the Americans were innovative-in their multi-ethnic and multi-racial society, in their egalitarian social beliefs, in their political democracy-their innovations were soon copied by others. Therefore, Russo argues, they are no longer distinctly American. Using nations as the basis for fields of study can both reveal and distort the historical record. When one considers different perspectives, America's uniqueness recedes in importance. American culture was a variant of a wider Western culture. The American economy was an extension of Western capitalism,

whether agrarian, commercial, or industrial. American society was a Western society with racial castes and multi-ethnic additions to the population. American government functioned like other Western governments, even with innovative forms: Republican, then democratic. The American past is thus seen to be far less distinctive than previous syntheses have assumed.

Cold War in the White Cube Delia Solomons.2023-04-28 In 1959, the very year the Cuban Revolution amplified Cold War tensions in the Americas, museumgoers in the United States witnessed a sudden surge in major exhibitions of Latin American art. Surveying the 1960s boom of such exhibits, this book documents how art produced in regions considered susceptible to communist influence was staged on U.S. soil for U.S. audiences. Held in high-profile venues such as the Guggenheim Museum, the Walker Art Center, MoMA, and the Art Institute of Chicago, the exhibitions of the 1960s Latin American art boom did not define a single stylistic trend or the art of a single nation but rather attempted to frame Latin America as a unified whole for U.S. audiences. Delia Solomons calls attention to disruptive artworks that rebelled against the curatorial frames purporting to hold them and reveals these exhibitions to be complex contact zones in which competing voices collided. Ultimately, through multiple means—including choosing to exclude artworks with readily decipherable political messages and evading references to contemporary inter-American frictions—the U.S. curators who organized these shows crafted projections of Pan-American partnership and harmony, with the United States as leader, interpreter, and good neighbor, during an era of brutal U.S. interference across the Americas. Theoretically sophisticated and highly original, this survey of Cold War-era Latin American art exhibits sheds light on the midcentury history of major U.S. art museums and makes an important contribution to the fields of museum studies, art history, and Latin American modernist art.

Neocolonial Fictions of the Global Cold War Steven Belletto, Joseph Keith.2019-06-03 Bringing together noted scholars in the fields of literary, cultural, gender, and race studies, this edited volume challenges us to reconsider our understanding of the Cold War, revealing it to be a global phenomenon rather than just a binary conflict between U.S. and Soviet forces. Shining a spotlight on writers from the war's numerous fronts and applying lenses of race, gender, and decolonization, the essayists present several new angles from which to view the tense global showdown that lasted roughly a half-century. Ultimately, they reframe the Cold War not merely as a divide between the Soviet Union and the United States, but between nations rich and poor, and mostly white and mostly not. By emphasizing the global dimensions of the Cold War, this innovative collection reveals emergent forms of post-WWII empire that continue to shape our world today, thereby raising the question of whether the Cold War has ever fully ended.

Local Consequences of the Global Cold War Jeffrey A. Engel.2007 Up to now the study of cold war history has been fully engaged in stressing the international character and broad themes of the story. This volume turns such diplomatic history upside down by studying how actions of international relations affected local popular life. Each chapter has its origins in a major international issue, and then unfolds the consequences of that issue for some region or city. Thus the starting

points for the various contributions are great unifying questions regarding postwar occupation, militarization, industrialization, and decolonization. But the ending points are small and dispersed, such as movies in Japan, race relations in the American South, forests in East Germany, and industry in Novosibirsk. Collectively, these stories show how the cold war affected every facet of life--East and West, urban and rural, in developed and developing nations, in the superpowers and on the periphery of the international system.

The Cultural Cold War and the Global South Kerry Bystrom, Monica Popescu, Katherine Zien. 2021-07-27 This volume investigates the cultural sites where the global Cold War played out. It brings to view unpredictable encounters that arose as writers, artists, filmmakers, and intellectuals from or aligned with the Third World navigated the ideological and material constraints set by superpowers and emerging regional powers. Often these encounters generated communitas and solidarity, while at times they fed old and new conflicts. Pushing forward recent scholarship that tracks the Cold War in the Global South and draws on postcolonial approaches, our contributors use archival, secondary, and ethnographic sources to trace the afterlives and memories of key figures and to explore meetings that performed cultural diplomacy. Our focus on sites of encounter or exchange underscores the situated, interpersonal, and embodied dimensions through which much of the cultural Cold War was experienced. While the global conflict divided citizens along ideological fault lines, it also linked people through circulating media—novels, film, posters, journals, and theatre—and multinational conferences that brought artists, intellectuals, and political activists together. Such contacts introduced new axes of solidarity and hierarchies of exclusion. Examining these connections and disjunctures, this new and necessary mapping of the cultural Cold War highlights under-addressed locations in Asia, Africa, and Latin America.

Global Art and the Cold War John J. Curley. 2019-01-29 In this readable and highly original book, John J. Curley presents the first synthetic account of global art during the Cold War. Through a careful examination of artworks drawn from America, Europe, Russia and Asia, he demonstrates the inextricable nature of art and politics in this contentious period. He dismantles the usual narrative of American abstract painting versus figurative Soviet Socialist Realism to reveal a much more nuanced, contradictory and ambivalent picture of art making, in which the objects themselves, like spies, dissembled, housed and managed ideological differences.
