The MRCGP Study Book T. A. I. Bouchier Hayes,John Fry,Eric Gambrill,Alistair Moulds,K. Young.2012-12-06 The Membership examination of the Royal College of General Practitioners has evolved and matured as a seal and a test on completion of vocational training. More than 1000 candidates are taking the examination each year and an increasing majority are trainees who have completed their three year training period. The whole concept and philosophy of the MRCGP has been questioned by critical cynics who refuse to accept general practice as a field of medical practice worthy of recognition as a specialty with its own core of know ledge, skills and expertise and with its own special epidemiology, pathology, clinical presentations and management. These cynical critics are being answered by the growth of the examination and its recognition within the profession as an important and necessary goal to be achieved. The MRCGP exam has arrived, it is here to stay and it will continue to grow and evolve. The exam is no easy obstacle to negotiate. It has a regular failure rate of 1 in 3 and it requires special preparation and study of its examinees if they are to understand its aims, contents and methods. It must not be assumed that even the brightest trainee can walk off the street, enter the examination hall and be confident of passing. It requires a few months of careful and guided preparation.

5 FIVE DATA SCIENCE PROJECTS FOR ANALYSIS, CLASSIFICATION, PREDICTION, AND SENTIMENT

ANALYSIS WITH PYTHON GUI Vivian Siahaan,Rismon Hasiholan Sianipar.2022-04-29 PROJECT 1: SUPERMARKET SALES ANALYSIS AND PREDICTION USING MACHINE LEARNING WITH PYTHON GUI The dataset used in this project consists of the growth of supermarkets with high market competitions in most populated cities. The dataset is one of the historical sales of supermarket company which has recorded in 3 different branches for 3 months data. Predictive data analytics methods are easy to apply with this dataset. Attribute information in the dataset are as follows: Invoice id: Computer generated sales slip invoice identification number; Branch: Branch of supercenter (3 branches are available identified by A, B and C); City: Location of supercenters; Customer type: Type of customers, recorded by Members for customers using member card and Normal for without member card; Gender: Gender type of customer; Product line: General item categorization groups - Electronic accessories, Fashion accessories, Food and beverages, Health and beauty, Home and lifestyle, Sports and travel; Unit price: Price of each product in \$; Quantity: Number of products purchased by customer; Tax: 5% tax fee for customer buying; Total: Total price including tax; Date: Date of purchase (Record available from January 2019 to March 2019); Time: Purchase time (10am to 9pm); Payment: Payment used by customer for purchase (3 methods are available - Cash, Credit card and Ewallet); COGS: Cost of goods sold; Gross margin percentage: Gross margin percentage; Gross income: Gross income; and Rating: Customer stratification rating on their overall shopping experience (On a scale of 1 to 10). In this project, you will perform predicting rating using machine learning. The machine learning models used in this project to predict clusters as target variable are K-Nearest Neighbor, Random Forest, Naive Bayes, Logistic Regression,

Decision Tree, Support Vector Machine, LGBM, Gradient Boosting, XGB, and MLP. Finally, you will plot boundary decision, distribution of features, feature importance, cross validation score, and predicted values versus true values, confusion matrix, learning curve, performance of the model, scalability of the model, training loss, and training accuracy.

PROJECT 2: DETECTING CYBERBULLYING TWEETS USING MACHINE LEARNING AND DEEP LEARNING WITH PYTHON GUI As social media usage becomes increasingly prevalent in every age group, a vast majority of citizens rely on this essential medium for day-to-day communication. Social media's ubiquity means that cyberbullying can effectively impact anyone at any time or anywhere, and the relative anonymity of the internet makes such personal attacks more difficult to stop than traditional bullying. On April 15th, 2020, UNICEF issued a warning in response to the increased risk of cyberbullying during the COVID-19 pandemic due to widespread school closures, increased screen time, and decreased face-to-face social interaction. The statistics of cyberbullying are outright alarming: 36.5% of middle and high school students have felt cyberbullied and 87% have observed cyberbullying, with effects ranging from decreased academic performance to depression to suicidal thoughts. In light of all of this, this dataset contains more than 47000 tweets labelled according to the class of cyberbullying: Age; Ethnicity; Gender; Religion; Other type of cyberbullying; and Not cyberbullying. The data has been balanced in order to contain ~8000 of each class. The models used in this project are K-Nearest Neighbor, Random Forest, Naive Bayes, Logistic Regression, Decision Tree, Support Vector Machine, Adaboost, LGBM classifier, Gradient Boosting, XGB classifier, LSTM, and CNN. Three feature scaling used in machine learning are raw, minmax scaler, and standard scaler. Finally, you will develop a GUI using PyQt5 to plot cross validation score, predicted values versus true values, confusion matrix, learning curve, decision boundaries, performance of the model, scalability of the model, training loss, and training accuracy.

PROJECT 3: HIGHER EDUCATION STUDENT ACADEMIC PERFORMANCE ANALYSIS AND PREDICTION USING MACHINE LEARNING WITH PYTHON GUI The dataset used in this project was collected from the Faculty of Engineering and Faculty of Educational Sciences students in 2019. The purpose is to predict students' end-of-term performances using ML techniques. Attribute information in the dataset are as follows: Student ID; Student Age (1: 18-21, 2: 22-25, 3: above 26); Sex (1: female, 2: male); Graduated high-school type: (1: private, 2: state, 3: other); Scholarship type: (1: None, 2: 25%, 3: 50%, 4: 75%, 5: Full); Additional work: (1: Yes, 2: No); Regular artistic or sports activity: (1: Yes, 2: No); Do you have a partner: (1: Yes, 2: No); Total salary if available (1: USD 135-200, 2: USD 201-270, 3: USD 271-340, 4: USD 341-410, 5: above 410); Transportation to the university: (1: Bus, 2: Private car/taxi, 3: bicycle, 4: Other); Accommodation type in Cyprus: (1: rental, 2: dormitory, 3: with family, 4: Other); Mother's education: (1: primary school, 2: secondary school, 3: high school, 4: university, 5: MSc., 6: Ph.D.); Father's education: (1: primary school, 2: secondary school, 3: high school, 4: university, 5: MSc., 6: Ph.D.); Number of sisters/brothers (if available): (1: 1, 2: 2, 3: 3, 4: 4, 5: 5 or above); Parental status: (1: married, 2: divorced, 3: died - one of them or both); Mother's occupation: (1: retired, 2: housewife, 3: government officer, 4: private

Model Rules of Professional Conduct American Bar Association. House of Delegates, Center for Professional Responsibility (American Bar Association). 2007 The Model Rules of Professional Conduct provides an up-to-date resource for information on legal ethics. Federal, state and local courts in all jurisdictions look to the Rules for guidance in solving lawyer malpractice cases, disciplinary actions, disqualification issues, sanctions questions and much more. In this volume, black-letter Rules of Professional Conduct are followed by numbered Comments that explain each Rule's purpose and provide suggestions for its practical application. The Rules will help you identify proper conduct in a variety of given situations, review those instances where discretionary action is possible, and define the nature of the relationship between you and your clients, colleagues and the courts.

Cosmopolitan Elites Huju. 2023-11-28 Cosmopolitan Elites narrates the birth, everyday life, and fracturing of a Western-dominated global order from its margins. It offers a critical sociological examination of the elite Indian Foreign Service and

its members, many of whom were present at the founding of this order. Kira Hujū explores how these diplomats set out to remake the service in the name of a radically anti-colonial global subaltern, but often ended up seeking status within its hierarchies through social mimicry of its most powerful actors. This is a book about the struggles of belonging: it revisits what it takes to be a recognized member of international society and asks what the experience of historically marginalized actors inside the diplomatic club can tell us about the evident woes of global order today. In interrogating how Indian diplomats learned to live under a Westernized world order, it also offers a sociologically grounded reading of what might happen in spaces like India as the world transitions past Western domination. An awkward balancing act animates the order-making of India's cosmopolitan diplomats: despite a genuine desire to strive toward a postcolonial world founded on diversity, difference, and the symbolic representation of a global subaltern, there is a strong sense of a lingering caricature-like notion of a white, European-dominated homogenous club, to which Indian diplomats feel a deep-rooted and colonially embedded desire to belong. Cosmopolitanism operates inside this balancing act not as an international ethic upholding an equal, tolerant, or liberal global order, but rather as an elite aesthetic which presumes cultural compliance, diplomatic accommodation, and social assimilation into Western mores. Based on 85 interviews with Indian diplomats, politicians, and foreign policy experts, as well as archival work in New Delhi, the book asks what the experience of historically marginalized actors inside the diplomatic club tells us about the social hierarchies of race, class, religion, gender, and caste under global order.
