Family Medicine Certification Review Martin S. Lipsky, Mitchell S. King, Jeffrey L. Susman, Robert W Bales, Matthew Hunsaker, 2015-04-24 Written by family physicians, this book is a comprehensive question-and-answer review for the American Board of Family Medicine certification and recertification exams. Questions match the content, complexity, and type of questions on the exam, and fifty clinical set problems--a major portion of the exam--are included. This edition's questions and answers have been completely updated, e.g., questions on hypertension and lipids draw on JNC-VII and ATP-III guidelines. Numerous new tables and charts provide relevant information in a concise, convenient manner. This book is also a valuable study aid for USMLE Step 3 and for physician assistant and nurse practitioner licensure exams.

Questions and Answers for the Diploma in Occupational Medicine, revised edition Clare Fernandes, Karen Nightingale, 2021-08-21 This book is designed to help candidates prepare for the MCQ part of the Diploma in Occupational Medicine exam. The first 150 questions, along with their answers and explanations, are designed to help readers check their understanding. This section of the book is broken down into the core subject areas on which you will be tested: Ethics and the law Effects of work on health Principles of occupational health Clinical occupational health Health and safety at work The book also contains a complete mock practice exam of 60 questions, together with answers and commentary. These questions follow the style of those in the exam and will help fully prepare candidates, by allowing them to develop an understanding of how the exam questions work. Written by a GP Registrar (and winner of the Faculty of Occupational Medicine's Mobbs Fellowship) who recently passed the exam, and checked for accuracy by a Consultant in Occupational Medicine, this book is the ideal revision and practice guide for exam candidates. From reviews: As a recent DOccMed candidate, I consider this book to be a useful reference for those preparing for the written part of the diploma examination... it would be an excellent investment for anyone preparing for the exam. Mcqs for Medical Students and Doctors Inyang Ukot, 2022-03-25 MCQs for Medical Students and Doctors is an unusual multiple-choice question book on three accounts: - It covers thirteen of the specialties in medicine that every medical student has to face and every first-contact physician has to deal with in encounters with their patients irrespective of the doctor's field of specialization; - Unlike many MCQ books, this book goes further by providing comments that accompany >99% of the answers as explanations or additional information. This makes this book an MCQ book with short notes; - It is

different from most, if not all, MCQ books in medicine for the others are usually specialty-specific. This MCQ book successfully covers fundamental topics in three selected pre-clinical subjects viz.: anatomy, pharmacology and therapeutics, and parasitology as well as ten clinical specialties viz.: obstetrics and gynecology, dermatology, anesthesia, mental health, ophthalmology, otorhinolaryngology, general surgery, orthopedics/trauma, internal medicine, and general pediatrics. Detailed material is provided in Book Reviews and How to Use for the reader's guidance.

MCQs in Clinical Medicine R. R. Baliga, 1999 Multiple choice questions (MCQs) are popular with examining bodies because they allow accurate ranking of examinees in a convenient manner. This volume contains over 1600 questions, each with five statements, derived for the fourth edition of Kumar and Clark's Clinical Medicine. Although no explanations accompany the answers at the end of each chapter, every question contains a cross reference to Clinical Medicine, to allow for ready reference to the original text.

Emergency Medicine MCQs Waruna De Alwis, Yolande Weiner, 2012-10-09 An invaluable self-assessment tool for emergency medicine trainees in Australasia. Emergency Medicine MCQs is an essential resource for Australasia's emergency medicine trainees. A practical self-assessment tool, the book assists trainees as they expand and refine their knowledge of emergency medicine, and will ultimately help them pass the Australasian Emergency Medicine Fellowship examination (FACEM). The multiple-choice questions in Emergency Medicine MCQs cover both the core and non-core areas in the Australasian Emergency Medicine Fellowship. Using this text, trainees can revise alone or with their peers to identify the areas in which they need further development. The curriculum is divided into three main areas where trainees require expert

level of knowledge, high level of knowledge and general level of knowledge. It covers important clinical problems encountered in everyday emergency medicine practice - from cardiovascular emergencies through to obstetric and gynaecology emergencies, disaster management and toxicology. As well as being ideal for emergency medicine trainees qualifying through AECM, the book is a useful resource for GPs taking the GEM qualification through ACEM and JMOs 'on call'. Plus, this emergency medicine text is accompanied by an app - a separate product containing 180 randomised multiple-choice questions on all the topics within the book.

Assessing Competence in Professional Performance across Disciplines and Professions Paul F. Wimmers, Marcia Mentkowski, 2016-04-19 This book examines the challenges of cross-professional comparisons and proposes new forms of performance assessment to be used in professions education. It addresses how complex issues are learned and assessed across and within different disciplines and professions in order to move the process of “performance assessment for learning” to the next level. In order to be better equipped to cope with increasing complexity, change and diversity in professional education and performance assessment, administrators and educators will engage in crucial systems thinking. The main question discussed by the book is how the required competence in the performance of students can be assessed during their professional education at both undergraduate and graduate levels. To answer this question, the book identifies

unresolved issues and clarifies conceptual elements for performance assessment. It reviews the development of constructs that cross disciplines and professions such as critical thinking, clinical reasoning, and problem solving. It discusses what it means to instruct and assess students within their own domain of study and across various roles in multiple contexts, but also what it means to instruct and assess students across domains of study in order to judge integration and transfer of learning outcomes. Finally, the book examines what it takes for administrators and educators to develop competence in assessment, such as reliably judging student work in relation to criteria from multiple sources. ... the co-editors of this volume, Marcia Mentkowski and Paul F. Wimmers, are associated with two institutions whose characters are so intimately associated with the insight that assessment must be integrated with curriculum and instructional program if it is to become a powerful influence on the educational process ... Lee Shulman, Stanford University

The Beecham Manual for Family Practice John Fry, 2012-12-06 This third edition of the Beecham Manual has its origins in a manual produced by Selwyn Carson for his general practice in Christchurch, New Zealand. He produced loose-leaf sets of instructions for his practice team and colleagues. Beecham Research Laboratories of New Zealand did a great service for the medical profession by publishing and distributing Dr Carson's manual there. The British version of the Beecham Manual had different objectives. The vocational training programme needed basic resources and the British Manual was created as an easy to read reference book on common problems and methods in general practice. The first and second editions met with enthusiastic approval from principals, trainers and trainees. This third edition follows the same general format but has been completely revised and updated and includes many new additions. The five sections are: o planned care of definable population and other groups o principles of teaching and learning o emergencies and their management o psychiatry o clinical care of common conditions We have kept to simple, clear and brief presentations of our conjoint views based on our experiences in our own practices. We dedicate this third edition to our colleagues involved in caring, learning and teaching. They may not agree with us completely but we hope that we will make them consider our suggestions and use them for thought, debate and discussion. We hope also that it will be used as a work book for the whole practice team.
