Collection of Essays by Legal Advisers of States, Legal Advisers of International Organizations and Practitioners in the Field of International Law United Nations. Office of Legal Affairs, 1999 The world has changed radically since 1989, when the General Assembly declared the period from 1990 to 1999 as the United Nations Decade of International Law. During that time, the international community claimed some major achievements as reflected by the adoption of conventions and treaties. This publication presents a collection of essays from legal advisers of States and international organizations, all of whom are among those committed to promoting respect for international law. Their contribution provides a practical perspective on international law, viewed from the standpoint of those involved in its formation, application and administration.

Guidance for CITES Scientific Authorities, 2002 Use of and trade in wildlife is a fact of life for human society around the globe. Article IV of the CITES Convention requires that exporting countries restrict trade in Appendix II species to levels that are not detrimental either to species' survival, or to their role within the ecosystems in which they occur (known as the 'non-detriment finding?'). Based on two workshops convened by IUCN to develop some pragmatic assistance for Scientific Authorities, this publication presents the background to the development of the non-detriment finding checklist and explains how the checklist itself is designed to work, in the hope that Scientific Authority staff will take and develop the parts of the approach that they find useful.

In Defiance of Painting Christine Poggi, 1992-01-01 The invention of collage by Picasso and Braque in 1912 proved to be a dramatic turning point in the development of Cubism and Futurism and ultimately one of the most significant innovations in twentieth-century art. Collage has traditionally been viewed as a new expression of modernism, one allied with modernism's search for purity of means, anti-illusionism, unity, and autonomy of form. This book - the first comprehensive study of collage and its relation to modernism - challenges this view. Christine Poggi argues that collage did not become a new language of modernism but a new language with which to critique modernism. She focuses on the ways Cubist collage - and the Futurist multimedia work that was inspired by it - undermined prevailing notions of material and stylistic unity, subverted the role of the frame and pictorial ground, and brought the languages of high and low culture into a new relationship of exchange.

Complex Words, Causatives, Verbal Periphrases and the Gerund Petr Čermák, Dana Kratochvílová, Olga Nádvorníková, Pavel Štichauer, 2020-05-01 The monograph focuses on the typological differences between the four most widely spoken Romance languages (Spanish, Portuguese, French and Italian) and Czech. Utilizing data from InterCorp, the parallel corpus project of the Czech National Corpus, the book analyses various categories (expression of potential non-volitional participation, iterativity, causation, beginning of an action and adverbial subordination) to discover differences and similarities between Czech and the Romance languages. Due to the massive amount of data mined, as well as the high number of languages examined, the monograph presents general and individual typological features of the four Romance languages and Czech that often exceed what has previously been accepted in the field of comparative linguistics.

A Grammar of Domari Yaron Matras, 2012-10-01 Domari is an Indo-Aryan language that is now highly endangered. Its speakers were traditionally nomadic metalworkers and musicians who lived in tiny, geographically scattered and socially isolated communities throughout the Middle East. The grammar is based on conversational material recorded in Jerusalem in the mid-1990s with some of the last speakers of this particular variety.

Venice Saved Simone Weil,2019-06-13 Towards the end of her life, the French philosopher and mystic Simone Weil (1909-43) was working on a tragedy, Venice Saved. Appearing here in English for the first time, this play explores the realisation of Weil's own thoughts on tragedy. A figure of affliction, a central theme in Weil's religious metaphysics, the central character offers a unique insight into Weil's broader philosophical interest in truth and justice, and provides a fresh perspective on the wider conception of tragedy itself. The play depicts the plot by a group of Spanish mercenaries to sack Venice in 1618 and how it fails when one conspirator, Jaffier, betrays them to the Venetian authorities, because he feels compassion for the city's beauty. The edition includes notes on the play by the translators as well as introductory material on: the life of Weil; the genesis and purport of the play; Weil and the tragic; the issues raised by translating Venice Saved. With additional suggestions for further reading, the volume opens up an area of interest and research: the literary Weil.
