*The Man Who Laughs* Victor Hugo.2011-05-01 Moving away from the explicitly political content of his previous novels, Victor Hugo turns to social commentary in *The Man Who Laughs*, an 1869 work that was made into a popular film in the 1920s. The plot deals with a band of miscreants who deliberately deform children to make them more effective beggars, as well as the long-lasting emotional and social damage that this abhorrent practice inflicts upon its victims.

*Cataclysms* Laurent Testot.2020-11-09 Humanity is by many measures the biggest success story in the animal kingdom; but what are the costs of this triumph? Over its three million years of existence, the human species has continuously modified nature and drained its resources. In *Cataclysms*, Laurent Testot provides the full tally, offering a comprehensive environmental history of humanity's unmatched and perhaps irreversible influence on the world. Testot explores the interconnected histories of human evolution and planetary deterioration, arguing that our development from naked apes to *Homo sapiens* has entailed wide-scale environmental harm. Testot makes the case that humans have usually been catastrophic for the planet, "hyperpredators" responsible for mass extinctions, deforestation, global warming, ocean acidification, and unchecked pollution, as well as the slaughter of our own species. Organized chronologically around seven technological revolutions, *Cataclysms* unspools the intertwined saga of humanity and our environment, from our shy beginnings in Africa to today's domination of the planet, revealing how we have blown past any limits along the way—whether by exploding our own population numbers, domesticating countless other species, or harnessing energy from fossils. Testot's book, while sweeping, is light and approachable, telling the stories—sometimes rambunctious, sometimes appalling—of how a glorified monkey transformed its own environment beyond all recognition. In order to begin reversing our environmental disaster, we must have a better understanding of our own past and the incalculable environmental costs incurred at every stage of human innovation. *Cataclysms* offers that understanding and the hope that we can now begin to reform our relationship to the Earth.

*Collapsus* Collectif.2020-02-26 Réchauffement climatique, extinction de centaines de milliers d'espèces, pollutions globales, guerres de l'eau et d'autres ressources, migrations massives... tous ces dangers convergent et se démultiplient en

un péril unique que des certains ont commencé à envisager : celui d'un effondrement global de la civilisation, voire de la biosphère elle-même, engagée dans une tragique « sixième extinction ». Première grande synthèse sur cette question d'urgence, quarante spécialistes de toutes disciplines nous livrent ici le fruit de leurs travaux - les philosophes Dominique Bourg et Christian Godin, l'agronome Pablo Servigne, les historiens Jean-Baptiste Fressoz et Valérie Chansigaud, le militante écologiste Lamya Essemlali et la femme politique Delphine Batho, l'ingénieur Philippe Bihouix, la juriste Valérie Cabanes, le biologiste Pierre-Henri Gouyon, le journaliste Stéphane Foucart, l'économiste Gaël Giraud et tant d'autres. Sous la direction du journaliste Laurent Testot et de l'expert en risques Laurent Aillet, Collapsus dresse un état des lieux et nous aide à comprendre les dynamiques en cours afin d'engager nos choix citoyens. Une quarantaine d'auteurs experts et militants pour l'ouvrage de référence sur la collapsologie.

The Dog and Its Genome Elaine A. Ostrander, Urs Giger, Lindblad-Toh Kerstin. 2007-04 Dogs of different breeds can range remarkably in size, shape, and behavior, and yet they all carry essentially the same genome, making them a particularly fascinating model for genome plasticity. The recent release of the complete sequence of the dog genome provides an exciting new context in which to consider such variation. Twentyfive chapters written by experts in the field include various aspects of morphological and behavioral variation in dogs, their origins and domestication, and their unique value as a model system for many common but complex human diseases such as diabetes and cancer.

**Midnight at the Pera Palace: The Birth of Modern Istanbul** Charles King. 2014-09-15 “Timely . . . brilliant . . . hugely enjoyable, magnificently researched and deeply absorbing.”—Jason Goodwin, New York Times Book Review At midnight, December 31, 1925, citizens of the newly proclaimed Turkish Republic celebrated the New Year. For the first time ever, they had agreed to use a nationally unified calendar and clock. Yet in Istanbul—an ancient crossroads and Turkey's largest city—people were looking toward an uncertain future. Never purely Turkish, Istanbul was home to generations of Greeks, Armenians, and Jews, as well as Muslims. It welcomed White Russian nobles ousted by the Russian Revolution, Bolshevik assassins on the trail of the exiled Leon Trotsky, German professors, British diplomats, and American entrepreneurs—a multicultural panoply of performers and poets, do-gooders and ne'er-do-wells. During the Second World War, thousands of Jews fleeing occupied Europe found passage through Istanbul, some with the help of the future Pope John XXIII. At the Pera Palace, Istanbul's most luxurious hotel, so many spies mingled in the lobby that the manager posted a sign asking them to relinquish their seats to paying guests. In beguiling prose and rich character portraits, Charles King brings to life a remarkable era when a storied city stumbled into the modern world and reshaped the meaning of cosmopolitanism.

**Les Sagesses orientales** Laurent Testot. 2021-01-07 Un panorama des sagesses et croyances en Asie Dans les mondes indiens (en sus de l'Inde toute l'Asie australe, Birmanie, Bali, Thaïlande, Laos, Cambodge...) et chinois (Asie orientale, soit Chine, mais aussi Japon, Corées, Mongolie, Viêtnam, Sibérie), des pensées, des religions, des philosophies ont prospéré

depuis longtemps. On les dit sages, parce qu'on attend souvent d'elles des réponses que nous désespérons de trouver dans nos idéologies occidentales. Dans l'univers indien, on trouve la spiritualité de l'hindouisme comme du soufisme, l'exotisme du sikhisme ou du jaïnisme, la sérénité du bouddhisme des Anciens... Du monde chinois, on retient la méditation du bouddhisme du Grand Véhicule, les panthéons turbulents du bouddhisme tantrique ou du shintô, la morale confucéenne, la reconnexion taoïste ou chamanique avec la nature... Tout cela a une histoire, longue, complexe. Que nous allons explorer en détail. Nous verrons que les religions, en Orient comme ailleurs, sont faites de tolérance et de violence ; d'art et de négation ; de philosophie et d'idolâtrie... Bref, qu'on y trouve toujours ce que l'on cherche.

**Handbook of the Anthropocene** Nathanaël Wallenhorst, Christoph Wulf.2023-08-21 This Handbook is a collection of contributions of more than 300 researchers who have worked to grasp the Anthropocene, this new geological epoch characterised by a modification of the conditions of habitability of the Earth for all living things, in its biogeophysical and socio-political reality. These researchers also sought to define a historical and prospective anthropology that integrates social, economic, cultural and political issues as well as, of course, environmental ones. What are the anthropological changes needed to ensure that our human adventure will be able to continue in the Anthropocene? And what are the educational and political issues involved? Anthropocene is fast becoming a widely-used term, but thus far, there been no reference work explaining the thoughts of the greatest experts of the present day on this subject (at the intersection of biogeophysical and socio-political knowledge). A scientific and political concept (but which is also the conceptual vehicle for

conveying the scientific community's sense of concern), this complex term is explained by international experts as they reflect on scientific arguments taking place in earth system science, the social sciences and the humanities. What these researchers from different disciplines have in common is a healthy concern for the future and how to prepare for it in the Anthropocene and also the identification of possible anthropological changes. This Handbook encourages readers to immerse themselves in reflections on the human adventure through descriptions of our differing heritages and the future that is in the process of being written.

*Why Penguins Communicate* Pierre Jouventin,F.Stephen Dobson.2017-09-15 Why Penguins Communicate: The Evolution of Visual and Vocal Signals is a comprehensive and condensed review of several hundred publications on the evolution of penguin behaviors, particularly signaling, linking genetics and ecology via such behavioral adaptations as nuptial displays. This exciting work has developed from the authors' many years researching on the behavioral strategies of penguins, such as the unique vocal signatures for individual recognition. Studies of penguins on islands surrounding Antarctica are presented, fully showcasing the behavioral significance of visual ornaments (mating displays) and how and why penguins behave via adaptive evolutionary explanations. Through this evolutionary lens, the authors address several questions involving their identification and taxonomy, habitat and location, breeding, and differences between penguins and other seabirds. Each species occupies a unique ecological niche, and behaviors permit separating the species through mutual display. Although model organisms in science are diverse and specialized, we see the entire integration in penguins, from acoustical and optical physics, to behavioral display and speciation. This work highlights the adaptive significance of their behavior through an evolutionary point- of-view. Provides a focused view on visual and vocal communication behavior, also presenting the family of penguins as a model for acoustical studies Considers the role of ecological and social environments on the evolution of communication in penguins Spans the gap between the scientific community and an interested lay audience, featuring a readable style for students, professional researchers in biology, ornithologists, ethologists and penguin enthusiasts alike Ideal resource for graduate seminar courses on evolution of behavior, marine ecology, polar biology and ornithology

La Nouvelle Histoire du Monde Laurent Testot.2019-11-14 Une première synthèse, résumant l'essentiel des trois millions d'années de l'histoire de l'humanité. Une carte, un chapitre consacré à une thématique particulière suivis d'une chronologie mondiale, le tout agrémenté d'illustrations. Vous tenez entre vos mains l'histoire de l'humanité. Ce livre résume, pour la première fois en français, l'histoire globale du genre humain, de ses premiers pas en Afrique il y a 3 millions d'années à son entrée dans le 21e siècle, alors que nous prenons conscience de ce que nous sommes devenus une force géologique plus puissante que les volcans ou les glaciations, capables d'altérer le climat et les biotopes. Chaque chapitre s'ouvre sur une carte donnant à voir, à l'échelle planétaire, les événements en cours, et se clôt sur une chronologie évoquant les moments

décisifs de la période considérée. Le texte, puisant dans le trésor de connaissances accumulé au magazine Sciences Humaines depuis près de trente ans, conjugue les acquis de l'histoire, de l'archéologie, de l'anthropologie, de l'économie, de la géographie, de la démographie..., pour camper une synthèse de ce que nous savons aujourd'hui des passés de l'humanité. Vous tenez entre vos mains l'histoire de l'humanité, car comprendre pourquoi la Chine a été l'hyperpuissance du Monde jusqu'au milieu du 18e siècle, pourquoi les voyages de Christophe Colomb ont fait entrer la planète dans une nouvelle ère, et comment l'Occident a construit le Monde d'aujourd'hui, c'est se donner les clés d'un savoir dont nous aurons besoin, demain, pour éviter le scénario du pire.

**The Equality of the Human Races** Joseph-Anténor Firmin.2002 This is the first paperback edition of the only English-language translation of the Haitian scholar Antnor Firmin's *The Equality of the Human Races*, a foundational text in critical anthropology first published in 1885 when anthropology was just emerging as a specialized field of study. Marginalized for its radical position that the human races were equal, Firmin's lucid and persuasive treatise was decades ahead of its time. Arguing that the equality of the races could be demonstrated through a positivist scientific approach, Firmin challenged racist writings and the dominant views of the day. Translated by Asselin Charles and framed by Carolyn Fluehr-Lobban's substantial introduction, this rediscovered text is an important contribution to contemporary scholarship in anthropology, pan-African studies, and colonial and postcolonial studies.

El Niño : histoire et géopolitique d'une bombe climatique Laurent TESTOT, Jean-Michel Valantin.2023-10-18 En 2023, El Niño fait son grand retour. Ce phénomène climatique récurrent, généré par l'océan Pacifique, réchauffe brutalement l'atmosphère. Inscrit dans l'histoire de nos civilisations, il va avoir un impact violent sur l'actualité géopolitique la plus brûlante. Car les historiens en retracent l'influence, aussi globale que redoutable, jusque dans un passé lointain. Le phénomène est souvent associé à des périodes de ruptures et d'effondrements civilisationnels, de l'Égypte antique aux cités-États mayas. Certains épisodes du XIXe siècle sont corrélés aux pires violences, de la défaite de la Grande Armée napoléonienne en Russie, jusqu'à l'histoire coloniale de l'Inde sous la domination britannique. Au XXe siècle, il a amplifié nombre des bouleversements politiques, économiques et militaires. Le cycle de 2023 est porteur de risques climatiques et géopolitiques inédits. Aujourd'hui, El Niño aggrave l'emballement climatique et ses effets en cascade. Or les marchés agro-alimentaires mondiaux sont déjà sous très haute tension du fait des interactions entre la guerre en Ukraine, la rivalité sino-américaine, la crise de l'énergie et la multiplication de phénomènes climatiques extrêmes toujours plus marqués. À quoi va ressembler un monde chauffé à blanc, sur fond de tensions internationales, de migrations climatiques et de guerres de l'eau – qu'elles se jouent entre villages ou entre grandes puissances, comme les États-Unis et la Chine, déstabilisées par le climat et en compétition féroce pour les ressources ? El Niño 2023-2024 pourrait être un crash-test climatique. Nos sociétés sont-elles

Separation Anxiety in Dogs Malena DeMartini-Price, CTC.2020-10-23 It has now been six years since the release of Malena DeMartini-Price's best selling first book, Treating Separation Anxiety in Dogs. Not one to rest on her laurels, Malena has been busy teaching and mentoring dog trainers worldwide to become Certified Separation Anxiety Trainers (CSAT). Working in collaboration with a large network of trainers to collect data and conduct research, new strategies have been developed on many of the key elements of treating separation anxiety. Now, in a completely new book, Malena share these strategies for the use of current technologies, no absence management, and improved desensitization techniques. Any trainer or guardian dealing with separation anxiety will find this book a valued resource.

**The Man Who Laughs** Victor Hugo.2022-01-11 The Man Who Laughs (1869) is a novel by Victor Hugo. Written while Hugo was living in exile on the island of Guernsey, The Man Who Laughs is set between the 17th and 18th centuries in England, a time of political unrest and class conflict in which he identified parallels to France of the 19th century. Although the novel was largely panned at the time, it has since been recognized as one of Hugo's greatest works. The Man Who Laughs has inspired over a dozen adaptations in film, theater, and comics, including a 1928 American silent film that served as source material for the Joker in the original 1940 issue of Batman. "Again the child set himself to sweep away the snow. The neck of the dead woman appeared; then her shoulders, clothed in rags. Suddenly he felt something move feebly under his touch. It was something small that was buried, and which stirred. The child swiftly cleared away the snow, discovering a wretched little body—thin, wan with cold, still alive, lying naked on the dead woman's naked breast." Abandoned by a group of Comprachicos, criminals who buy and capture children for the purpose of mutilating them and forcing them to work as beggars or performers, the young Gwynplaine wanders the English coast alone. During a storm, he discovers an infant girl and her dead mother lying in the snow, and endeavors to save the child. Left with no choice but to rely on strangers,

Gwynplaine joins a carnival run by the merciful Ursus, a man with a pet wolf. Horrified at first by the boy's disfigurement, which has left a perpetual smile on his face, Ursus agrees to care for the children and soon finds that Gwynplaine is a versatile and lucrative attraction at his shows. When the Duchess Josiana attends the carnival to see Gwynplaine, now a young man, she finds herself strangely attracted to him. With a beautifully designed cover and professionally typeset manuscript, this edition of Victor Hugo's *The Man Who Laughs* is a classic work of French literature reimagined for modern readers.

**Les Lumières - Une révolution de la pensée** Laurent Testot.2022-10-27 Le mythe des Lumières est la colonne vertébrale des États-nations européens... un livre à lire alors que l'Europe est de plus en plus fréquemment remise en cause. Le siècle des Lumières est certes celui du triomphe inespéré de la raison, mais il est aussi celui où l'on comprend que la bêtise jamais ne sera terrassée. Il est ce moment où l'on proclame les droits de l'homme, la liberté des citoyens, l'égalité des sexes, mais où se dérobe l'application effective de ces beaux principes. Les inégalités économiques s'amorcent, les traites esclavagistes déportent dans des conditions inhumaines des millions d'Africains vers l'Amérique, et les femmes toujours doivent obéir aux hommes. Quant à la liberté d'expression, cet ADN des philosophes, elle ne prospère que par artifice, quand un esprit libre critique l'absolutisme entre deux scènes torrides d'un roman pornographique diffusé clandestinement. C'est à la découverte de ces Lumières-là que nous vous invitons, avec les meilleurs spécialistes pour guides. Car il faut toujours éclairer le passé, pour le purger des zones d'ombre qu'il nous a léguées, et pour exalter les héritages que l'on souhaite préserver, en conscience : un monde libéré de l'emprise des dogmes et des absolutismes, où chacun jouit de droits fondamentaux.

**Impies et païens entre Antiquité et Moyen Age** Lionel Mary, Michel Sot.2002 L'impie manque au devoir de piété tel qu'il est défini de son temps : il est indifférent aux représentations et aux pratiques reconnues. Mais il leur est le plus souvent hostile, blasphémateur et sacrilège. Le païen se caractérise par son altérité par rapport aux religions monothéistes - judaïsme, christianisme et islam qui le désignent par ce mot. C'est dans le christianisme latin au IV<sup>e</sup> siècle que le mot *paganus* a pris le sens de païen, comme le montre la première des dix études ici rassemblées. La seconde contribution introduit à une recherche morphologique et sémantique sur les mots *pius* et *impius* en latin préchrétien, tandis que la troisième s'interroge sur les emplois de *impius* et *impietas* dans la Vulgate, l'ouvrage de loin le plus lu de l'histoire de l'Occident. Au-delà des mots, les autres études permettent de saisir impies et païens --En situation du II<sup>e</sup> siècle à l'époque carolingienne. Qu'est-ce que la piété pour le géographe et voyageur grec Pausanias, grand visiteur de sanctuaires? Comment dans l'Antiquité tardive, sont jugées les violations de sépultures? De quelle façon les conduites impies provoquent-elles, dans l'hagiographie carolingienne, des miracles de châtement? Quant aux païens, l'attitude qu'il convient d'avoir à leur égard est admirablement suggérée par Augustin. L'étude de la lettre d'un de ses correspondants, qui témoigne d'une diabolisation du

paganisme au tournant des IV<sup>e</sup> et V<sup>e</sup> siècles, montre comment l'évêque d'Hippone appelle à une attitude raisonnable et ouverte. Le pape Grégoire le Grand (590-604) va plus loin et invite à transformer les lieux de culte païens en lieux de culte chrétiens : des études archéologiques présentées ici attestent que cela s'est fait. Et la remarquable correspondance d'Alcuin dont le vocabulaire est très finement analysé, permet de saisir ses conceptions de la conversion des païens, saxons et avars en particulier, dans la continuité d'Augustin et de Grégoire. Les païens sont des chiens : ils aboient et ils mordent. Mais, expose la dernière contribution qui n'est pas la moins originale, Jérôme et Augustin ont montré que ces chiens avaient faim de l'Évangile et bien des savants de la renaissance carolingienne ont repris ce thème qui court de l'Antiquité au Moyen Âge

**La grande histoire de l'Afrique** Laurent Testot. 2023-10-26 Un aperçu de l'Histoire de l'Afrique pour lequel nous explorerons des lieux emblématiques ; des trajectoires de vie ; des énigmes, comme celle posée par les San, qui constitueraient par leur génétique le plus vieux peuple de la Terre... C'est un continent trop peu présent dans nos livres d'histoire. Et pourtant. C'est là où est née l'humanité, là où avec l'Égypte a fleuri le plus durable des empires, là où des femmes ont pu exercer le pouvoir. C'est un bloc géographique, qui a été victime des plus importantes entreprises de déportation et de spoliation de l'histoire, mais aussi un lieu où un philosophe du 17<sup>e</sup> siècle pouvait être rationaliste. C'est un continent immense qui abrite une part croissante de la jeunesse mondiale et se trouve à l'avant-garde du changement climatique. Il a pour nom Afrique

**L'humain en devenir** Michel J.F. Dubois.2020-06-01 Les descriptions actuelles du devenir de l'humanité laissent deviner que le problème réside dans notre relation à la technique. Ce qu'elle nous apporte et nous enlève, ce que nous sommes avec ou sans elle. L'humain en devenir relate la relation que nous avons avec la technique. Nous ne pouvons plus nous en passer, mais nous voudrions l'oublier et pouvoir envisager un monde psychosocial qui n'ait rien de sociotechnique, sans connaître l'origine de la technique, de son développement, de son intrication dès le commencement avec ce qui sera l'espèce humaine. Cet ouvrage analyse ainsi cette trajectoire grâce à laquelle l'espèce qui deviendra l'humain, toujours en devenir, ne peut plus être pensée séparément de la technique, et ce malgré 2 600 ans de philosophies qui ont voulu l'écarter. Il expose des successions de « choix » techniques, dans une des nombreuses lignées des hominidés, qui ont conduit à l'humain, incapable de vivre sans technique.

**Homo Canis. Storia di un rapporto millenario** Laurent Testot.2022-02-14 Sin dall'antichità il cane ha affiancato l'essere umano nella caccia e nell'allevamento del bestiame, e da almeno 15.000 anni è considerato il miglior amico dell'uomo, al punto da essersi adattato alle sue abitudini ed esserne diventato un inseparabile alleato di vita. Può sembrare difficile da credere, ma tutti i cani, dal chihuahua al basset hound, discendono dai lupi, ed è stato proprio l'intervento umano a svolgere un ruolo cruciale nel modificare il loro corredo genetico, producendo, nel corso dei secoli, la grande diversità di razze cui siamo abituati oggi. In che modo, e perché, il lupo si è evoluto nel cane, l'animale domestico per eccellenza? Come hanno iniziato a vivere con noi questi temibili animali? Homo Canis è un libro ricco di informazioni sulle diverse razze canine, sulle origini della loro creazione e sulle evoluzioni cui sono state soggette. Testot traccia un affascinante affresco che non tralascia le razze meno conosciute e i racconti più sorprendenti. Dallo xoloitzcuintle, il cane nudo messicano, al dingo australiano e al cane canoro della Nuova Guinea; dall'akita inu, l'incarnazione canina dello spirito giapponese, al mastino, utilizzato dai conquistadores contro gli amerindi; dal bassotto, che durante il Medioevo e fino alla Rivoluzione Industriale era impiegato per far ruotare i girarrosti, al nobile bichon, con il suo prestigioso pedigree. Il libro non tralascia poi di dedicare spazio a tutti quei cani che sono stati gli eroi della nostra infanzia, come i celebri 101 dalmata, Rin Tin Tin e Lassie.

**Biosocialities, Genetics and the Social Sciences** Sahra Gibbon, Carlos Novas.2007-07-20 Biosocialities, Genetics and the Social Sciences explores the social, cultural and economic transformations that result from innovations in genomic

knowledge and technology. This pioneering collection uses Paul Rabinow's concept of biosociality to chart the shifts in social relations and ideas about nature, biology and identity brought about by developments in biomedicine. Based on new empirical research, it contains chapters on genomic research into embryonic stem cell therapy, breast cancer, autism, Parkinson's and IVF treatment, as well as on the expectations and education surrounding genomic research. It covers four main themes: novel modes of identity and identification, such as genetic citizenship the role of institutions, ranging from disease advocacy organizations and voluntary organizations to the state the production of biological knowledge, novel life-forms, and technologies the generation of wealth and commercial interests in biology. Including an afterword by Paul Rabinow and case studies on the UK, US, Canada, Germany, India and Israel, this book is key reading for students and researchers of the new genetics and the social sciences - particularly medical sociologists, medical anthropologists and those involved with science and technology studies.
