Applied Probability and Statistics Mario Lefebvre, 2007-04-03 This book moves systematically through the topic of applied probability from an introductory chapter to such topics as random variables and vectors, stochastic processes, estimation, testing and regression. The topics are well chosen and the presentation is enriched by many examples from real life. Each chapter concludes with many original, solved and unsolved problems and hundreds of multiple choice questions, enabling those unfamiliar with the topics to master them. Additionally appealing are historical notes on the mathematicians mentioned throughout, and a useful bibliography. A distinguishing character of the book is its thorough and succinct handling of the varied topics.

Bourdieu's Secret Admirer in the Caucasus Georgi M. Derluguian, 2005-07-15 Bourdieu's Secret Admirer in the Caucasus is a gripping account of the developmental dynamics involved in the collapse of Soviet socialism. Fusing a narrative of human agency to his critical discussion of structural forces, Georgi M. Derluguian reconstructs from firsthand accounts the life story of Musa Shanib—who from a small town in the Caucasus grew to be a prominent leader in the Chechen revolution. In his examination of Shanib and his keen interest in the sociology of Pierre Bourdieu, Derluguian discerns how and why this dissident intellectual became a nationalist warlord. Exploring globalization, democratization, ethnic identity, and international terrorism, Derluguian contextualizes Shanib's personal trajectory from de-Stalinization through the nationalist rebellions of the 1990s, to the recent rise in Islamic militancy. He masterfully reveals not only how external economic and political forces affect the former Soviet republics but how those forces are in turn shaped by the individuals, institutions, ethnicities, and social networks that make up those societies. Drawing on the work of Charles Tilly, Immanuel Wallerstein, and, of course, Bourdieu, Derluguian's explanation of the recent ethnic wars and terrorist acts in Russia succeeds in illuminating the role of human agency in shaping history.

There are 3 parts: (1) Compares the criminality of internat. jihad groups with domestic right-wing groups. (2) Six case studies of crimes includes trial transcripts, official reports, previous scholarship, and interviews with law enforce. officials and former terrorists are used to explore skills that made crimes possible; or events and lack of skill that the prevented crimes. Includes brief bio. of the terrorists along with descriptions of their org., strategies, and plots. (3) Analysis of the themes in closing arguments of the transcripts in Part 2. Illus.

The Madrasa in Asia Farish A. Noor, Yoginder Sikand, Martin van Bruinessen, 2008 Summary: Since the rise of the Taliban and Al Qaeda, the traditional Islamic schools known as the madrasa have frequently been portrayed as hotbeds of terrorism. For much longer, the madrasa has been considered by some as a backward and petrified impediment to social progress. However, for an important segment of the poor Muslim populations of Asia, madrasas constitute the only accessible form of education. This volume presents an overview of the madrasas in countries such as China, Indonesia, Malaysia, India and Pakistan.--Publisher description.

WHO Estimates of the Global Burden of Foodborne Diseases World Health Organization,2016-01-30 The report presents the first global and regional estimates of the burden of foodborne diseases. The large disease burden from food highlights the importance of food safety, particularly in Africa, South-East Asia and other regions. Despite the data gaps and limitations of these initial estimates, it is apparent that the global burden of foodborne diseases is considerable, and affects individuals of all ages, particularly children

The Enemy at the Gate Andrew Wheatcroft,2009-04-28 In 1683, an Ottoman army that stretched from horizon to horizon set out to seize the Golden Apple, as Turks referred to Vienna. The ensuing siege pitted battle-hardened Janissaries wielding seventeenth-century grenades against Habsburg armies, widely feared for their savagery. The walls of Vienna bristled with guns as the besieging Ottoman host launched bombs, fired cannons, and showered the populace with arrows during the battle for Christianity's bulwark. Each side was sustained by the hatred of its age-old enemy, certain that victory would be won by the grace of God. The Great Siege of Vienna is the centerpiece for historian Andrew Wheatcroft's richly drawn portrait of the centuries-long rivalry between the Ottoman and Habsburg empires for control of the European continent. A gripping work by a master historian, *The Enemy at the Gate* offers a timely examination of an epic clash of civilizations.

Watershed Management for Potable Water Supply National Research Council,Commission on Geosciences, Environment, and Resources,Water Science and Technology Board,Committee to Review the New York City Watershed Management Strategy,2000-02-17 In 1997, New York City adopted a mammoth watershed agreement to protect its drinking water and avoid filtration of its large upstate surface water supply. Shortly thereafter, the NRC began an analysis of the agreement's scientific validity. The resulting book finds New York City's watershed agreement to be a good template for proactive watershed management that, if properly implemented, will maintain high water quality. However, it cautions that the agreement is not a guarantee of permanent filtration avoidance because of changing regulations, uncertainties regarding pollution sources, advances in treatment technologies, and natural variations in watershed conditions. The book recommends that New York City place its highest priority on pathogenic microorganisms in the watershed and direct its resources toward improving methods for detecting pathogens, understanding pathogen transport and fate, and demonstrating that best

management practices will remove pathogens. Other recommendations, which are broadly applicable to surface water supplies across the country, target buffer zones, stormwater management, water quality monitoring, and effluent trading.
