Computer Security William Stallings, Lawrie Brown, 2023-04 Since the fourth edition of this book was published, the field has seen continued innovations and improvements. In this new edition, we try to capture these changes while maintaining a broad and comprehensive coverage of the entire field. There have been a number of refinements to improve pedagogy and user-friendliness, updated references, and mention of recent security incidents, along with a number of more substantive changes throughout the book--

Annual Review in Automatic Programming M. I. Halpern, 2014-05-18 Annual Review in Automatic Programming, Volume 9 deals with automatic programming, with emphasis on the programming language ALGOL 68. The book demonstrates the progression in the formal definition of programming languages from ALGOL 60 through to the revised version of ALGOL 68. Other topics range from real-time operating systems and process control languages to data flow analysis, microprocessors, design automation, real-time system specifications, and Fortran real-time programming. After an introduction to the formal definition of ALGOL 68, this volume turns to an operating system which provides for a flexible interface to support a wide spectrum of real-time language facilities. The chapters that follow focus on data flow through the elements of a real time application, the possibilities as well as the problems of future microprocessor applications in real-time systems, and the design goals and main principles of a monitor called SIMON. A language based upon an automaton model is also described, with particular reference to synchronizations between actions and events. In addition, the book presents a pilot study of the possibility to develop an integrated interactive system for computer aided design of control computer systems and considers the industrial real-time BASIC designed for process control. A chapter discussing the unique distributed DDC system developed by Tokyo Gas Company and Hitachi for city gas production plants concludes the book. This book will be of use to students and professionals interested in programming languages.

Ceux dont on ne redoute rien Mathieu Thomas,2021-08-13T00:00:00-04:00 Dans les bureaux du journal L'Union nationale, Charles rêve d'influencer l'Histoire et de participer à renverser ce maudit projet de Confédération canadienne. Mais que peut donc faire un apprenti typographe qui passe le balai et vomit sa soupe aux pois lorsque les puissants mettent le destin en marche? Un siècle et demi plus tard, Édouard se complait quant à lui dans son avachissement. Traducteur désenchanté depuis l'échec référendaire de 1995, il est devenu un éternel ambigu qui nuance, tergiverse... jusqu'à ce que sa belle voisine et une formidable découverte fassent souffler un vent fou sur sa vie apathique. Entre Charles et Édouard, un même mystère à résoudre : Louis-Joseph Papineau a-t-il rencontré Alexis de Tocqueville lors de son passage à Montréal en 1831? Le voyage du philosophe français cachait-il quelque chose d'inconnu jusqu'à aujourd'hui? Des révoltes des Patriotes

aux manifestations du printemps érable, ce roman détricote l'Histoire et y ajoute quelques chatoyants brins de laine. Toutes les révolutions n'ont pas été tranquilles au pays de ceux dont on ne redoute rien.

Innovation : 50 Success Stories Thierry Bouron, 2017-03-22 LinkedIn, Carrerbuilder, Monster, Google, Wikipedia, Pages jaunes, Paypal, M-Pesa, Square, Airbnb, Booking, Amazon, Ebay, Alibaba, Blablacar, Drivy, Uber, Twitter, Yahoo, Periscope, Criteo... Voici des exemples d'innovations mythiques dans le domaine des services. L'innovation est sans frontière et passe souvent d'un secteur de service à un autre. Ce livre rassemble 50 success stories classées par domaine d'activité : la finance, l'emploi, l'information, le tourisme, la distribution, la communication, le transport, l'économie collaborative... Chacune est présentée dans son contexte historique, « de l'Antiquité au Web ». Ce livre, attractif et accessible, y compris pour des non spécialistes des technologies, dévoile de nombreux exemples de ruptures avec un focus particulier sur l'ère du Web, et ses start-up qui prennent le lead sur de grands groupes. Chaque chapitre présente les acteurs emblématiques qui ont porté ces innovations, dans une rubrique « Serial Entrepreneurs » qui décrit le parcours des inventeurs. Par exemple pour le secteur du tourisme et des voyages : Charles Estienne, Théodore de Mayerne, Thomas Cook, Jay Walker, Rich Borton, Brian Chesky... Le livre est aussi illustré d'interviews de grands innovateurs, comme Brent Hoberman (Lastminute.com), Muhammad Yunus (Grameen Bank, Prix nobel de la Paix), Paul Foster (Indeed), Nicolas Le Douarec (CityzenCar), Marion Carrette (Ouicar.fr), Vincent Cerf (pionnier de l'Internet)... Une lecture agréable et enrichissante, pour comprendre les évolutions de l'offre de services au cours de l'Histoire et mieux maîtriser les bouleversements de nos modes de vie. Chaque entreprise, quelle que soit sa taille et son champ d'activité peut s'en inspirer pour créer un esprit de rupture et de nouveaux axes de croissance.
