Sustainability Through Innovation in Product Life Cycle Design Mitsutaka Matsumoto,Keijiro Masui,Shinichi Fukushima,Shinsuke Kondoh.2016-09-19 This book consists of chapters based on selected papers presented at the EcoDesign2015 symposium (9th International Symposium on Environmentally Conscious Design and Inverse Manufacturing). The symposium, taking place in Tokyo in December 2015, has been leading the research and practices of eco-design of products and product-related services since it was first held in 1999. The proceedings of EcoDesign2011 were also published by Springer. Eco-design of products and product-related services (or product life cycle design) are indispensable to realize the circular economy and to increase resource efficiencies of our society. This book covers the state of the art of the research and the practices in eco-design, which are necessary in both developed and developing countries. The chapters of the book, all of which were peer-reviewed, have been contributed by authors from around the world, especially from East Asia, Europe, and Southeast Asia. The features of the book include (1) coverage of the latest topics in the field, e.g., global eco-design management, data usage in eco-design, and social perspectives in eco-design; (2) an increased number of authors from Southeast Asian countries, with a greater emphasis on eco-design in emerging economies; (3) high-quality manuscripts, with the number of chapters less than half of that of the previous book.

Riding the Bus with My Sister Rachel Simon.2013-03-05 A “heartwarming, life-affirming” memoir of a relationship with an intellectually disabled sibling: “Read this book. It might just change your life” (Boston Herald). Beth is a spirited woman with an intellectual disability who lives intensely and often joyfully, and spends most of her days riding the buses in Pennsylvania. The drivers, a lively group, are her mentors; her fellow passengers, her community—though some display less patience or kindness than others. Her sister, Rachel, a teacher and writer, camouflages her emotional isolation by leading a hyperbusy life. But one day, Beth asks Rachel to accompany her on public transportation for an entire year—and Rachel accepts. This wise, funny, deeply affecting book is the chronicle of that remarkable time, as Rachel learns how to live in the moment, how to pay attention to what really matters, how to change, how to love—and how to slow down and enjoy the ride. Weaving in anecdotes and memories of terrifying maternal abandonment, fierce sisterly loyalty, and astonishing forgiveness, Rachel Simon brings to light a world that is almost invisible to many people, finds unlikely heroes in everyday life, and, without sentimentality, wrestles with her own limitations and portrays Beth as the endearing, feisty, independent person she is. “With tenderness and fury, heartbreak and acceptance . . . Simon comes to the inescapable conclusion that we are all riders on the bus, and on the bus we are all the same.” —Jacquelyn Mitchard, author of *The Deep End of the Ocean*

GMOs Anurag Chaurasia, David L. Hawksworth, Manoela Pessoa de Miranda.2020-11-30 This book covers a broad

spectrum of topics related to GMOs and allied new gene-based technologies, biodiversity, and ecosystem processes, bringing together the contributions of researchers and regulators from around the world. The aim is to offer a clear view of the benefits and effects of genetically modified crops, insects, and other animals on the soil microbiome and ecological processes. Contributors examine issues related to the development of risk assessment procedures and regulations designed to maximize benefits while minimizing risks. Beyond the scientific challenges of GMOs, the book explores the broad and contentious terrain of ethical considerations. The contributors discuss such questions as the unintended, possibly unforeseen, consequences of releasing GMOs into ecosystems, and the likelihood that the full effects of GMOs could take years, even decades, of close monitoring to become evident. The importance of developing a precautionary approach is stressed. The final chapter describes the critical issues of governance and regulation of new and emerging gene-based technologies, as nations grapple with the consequences of adopting the Cartagena Protocol on Biosafety (CPB). The volume includes an extensive Annex which outlines legal perspectives on the state of GMO governance around the world, with more than 20 examples from nations in Africa, South and Central America, Asia, Australasia, and Europe.

Wildlife Biodiversity Conservation Susan C. Underkoffler, Hayley R. Adams. 2021-06-26 This book addresses the multidisciplinary challenges in biodiversity conservation with a focus on wildlife crime and how forensic tools can be applied to protect species and preserve ecosystems. Illustrated by numerous case studies covering different geographical regions and species the book introduces to the fundamentals of biodiversity conflicts, outlines the unique challenges of wildlife crime scenes and reviews latest techniques in environmental forensics, such as DNA metagenomics. In addition, the volume explores the socio-economic perspective of biodiversity protection and provides an overview of national and international conservation laws. The field of conservation medicine stresses the importance of recognizing that human health, animal health, and ecosystem health are inextricably interdependent and the book serves as important contribution towards achieving the UN Sustainable Developmental Goals, in particular SDG 15, Life on Land. The book addresses graduate students, scientists and veterinary professionals working in wildlife research and conservation biology.

Creatures of the Dark L. Alterman, Gerald A. Doyle, M.K. Izard. 2013-03-09 The papers in this volume are representative of those presented at a conference entitled *Creatures of the Dark: The Nocturnal Prosimians*, held at Duke University, June 9-12, 1993. The purpose of the conference, attended by more than 100 scientists, was to assemble, for the first time ever, scholars from diverse fields with a common interest in the nocturnal prosimian primates. The history of the precursors of this meeting are outlined in the *Historical Perspective* by Doyle (this volume). Most of the invited papers are presented here in modified form, as are several papers originally presented as posters. Two papers are included that were not presented, due to scheduling conflicts and health considerations. Some papers, delivered from the podium, are not included in this volume. Interactions among conference participants resulted in many revisions to the contributions, as did the comments of reviewers and the editors. Several papers which contained new data or new interpretations of familiar phenomena met with constructive criticism, resulting in modification of the original papers. We thank all of the contributors for their patience and cooperation, and commend the numerous reviewers who generously donated their time and expertise. We greatly appreciate funding from the National Institutes of Health, the Wenner Gren Foundation for Anthropological Research, the Duke University Center for International Studies, the Duke University Primate Center, and Drs. Charles Putman of Duke University and Malcolm Gillis, currently of Rice University.

Participatory Mangrove Management in a Changing Climate Rajarshi DasGupta,Rajib Shaw.2017-01-24 This book outlines the performance and management of mangroves in the changing climatic scenario of the Asia-Pacific region and draws examples and lessons from the national and community-driven mangrove conservation programs of relevant countries including Pakistan, India, Bangladesh, Sri Lanka, Myanmar, Thailand, Cambodia, Indonesia, the Philippines, and Japan as well as the Pacific islands. By highlighting the major drawbacks that hinder effective mangrove conservation, the book contributes towards enhancing climate resilience of communities through proposition of corrective methods and ameliorative approaches of mangrove conservation. Mangroves play an important role in adapting to climate change and provide a plethora of ecosystem services that are fundamental to human survival. Yet these ecosystems are exceptionally prone to extinction due to increased human interventions and changes in environmental boundary conditions. Especially in the Asia-Pacific region, mangroves have dwindled at an exceptional high rate over the past three decades. As the threat of climate change hovers over millions of people in this region, particularly those who crowd the low-lying coastal areas, conservation/restoration of mangroves through appropriate policies and practices remain highly imperative. The primary target readers for this book are students and researchers in the fields of conservation and management of mangroves, especially from the developing tropical countries of the Asia-Pacific region. Other target groups comprise policy planners, practitioners, and NGO workers, who will be able to apply the collective knowledge from this work towards proactive mangrove conservation through effective mediation in local communities.

Pathways to Change Matthew D. Selekman.1993-09-17 Few therapists dispute the difficulties in treating troublesome or reluctant adolescents. Filling a gap in the literature, this volume specifically addresses the clinician's needs for working with this difficult population. Matthew D. Selekman presents a Solution-Oriented Brief Family Therapy approach, a highly pragmatic and innovative therapy model for working with these challenging cases. Encouraging therapeutic improvisation and incorporating the use of humor, Selekman demonstrates how the clinician can capitalize on the strengths and resources of family members, peers, and other involved mental health professionals to resolve the client's presenting problems rapidly. His approach artfully integrates cutting edge therapeutic ideas from Steve de Shazer, Michael White, Tom Andersen, and the

Galveston group. Dispelling the notion that the Solution-Oriented Brief Therapy model is merely a band-aid approach, the author demonstrates powerful methods for facilitating systemic, lasting change. *PATHWAYS TO CHANGE* includes many helpful features that enable mental health and addiction professionals to conduct effective brief therapy successfully with difficult adolescents and their families. Selekman provides detailed guidelines for therapeutic task design and selection, purposeful systemic interviewing, and empirically based strategies for engaging difficult adolescents, and ways to collaborate with involved helping professionals from larger systems. He also presents a blueprint for how to conduct his Solution-Oriented Parenting group, which can be utilized as an alternative to regular family therapy or when therapists are unable to engage the adolescents in treatment. Incorporating case examples and actual interview transcripts to highlight key therapeutic techniques, Selekman presents a comprehensive, ecosystemic therapeutic approach that provides useful therapeutic options for working with a challenging population. *PATHWAYS TO CHANGE* is an important resource for psychologists, psychotherapists, social workers, addiction professionals, family therapists, and anyone working with difficult adolescents and their families.

Microplastic Contamination in Aquatic Environments Eddy Y Zeng.2023-11-10 This second edition of *Microplastic Contamination in Aquatic Environments: An Emerging Matter of Environmental Urgency* presents 14 chapters, through which a team of global, expert contributors cover a full range of microplastic research. The first chapter describes the general patterns for sources, occurrence, and transport of microplastics to lead off the book. The next batch of chapters covers sampling analytical methods for quantifying microplastics in the environment, followed by chapters addressing the association of chemicals with microplastics. A large cluster of chapters focus on the fate and transport of microplastics in wastewater treatment plants, freshwater systems, marine environment, terrestrial settings, and riverine runoff that connects terrestrial and marine systems. The next few chapters examine biotransport and effects of microplastics in organisms. The last two chapters are dedicated to two emerging research areas: nanoplastics in the environment and management strategies for global plastic pollution. Outlooks for future research to better understand the situation and further improvements of microplastic research are also covered. In the 6 years since the previous edition published, this fast-moving area has evolved,

and the contents of this revision reflect that. There are numerous brand-new chapters, chapters that have been revised, and chapters that have been completely refocused. This book provides an overview of microplastics research. It is a guide for researchers to better understand the occurrence of microplastics. Ideally, this book provides basic background knowledge of microplastics for oceanographers, ecologists, and climatologists. Provides an overview of the advantages and disadvantages of different methods for sampling, identification, and enumeration of microplastics Contains contributions from world experts with a diverse range of backgrounds, all brought together by a well-known, experienced editor Presents information on microplastics in a unified place, with easy access for the reader
