Hyperbaric Oxygenation Therapy Nariyoshi Shinomiya, Yasufumi Asai, 2019-10-09 This book focuses on hyperbaric oxygenation (HBO) therapy from the molecular biology perspective and its clinical applications, including molecular mechanisms of HBO's positive effect on cellular function in hypoxic tissues. HBO is a therapeutic tool that enhances oxygen supply to hypoxic tissues and improves wound healing/tissue remodeling. Currently HBO therapy is applied to a wide range of clinical cases, which include not only acute hypoxic diseases but also many chronic and refractory diseases involving tissue hypoxia or intractable infection. HBO therapy is a well-recognized regimen for many researchers and clinicians. The first half of the book outlines basic molecular mechanisms of HBO and their potential applications for clinical activities, while the second half describes the rationale behind introducing HBO therapy into suitable clinical cases and presents successful clinical reports. It is primarily written for HBO clinicians, physiologists and basic research scientists, but is also of interest to clinicians who have an interest in this field considering introducing HBO therapy.

Francisco Goya Sarah Carr-Gomm, 2011-07-01 Goya is perhaps the most approachable of painters. His art, like his life, is an open book. He concealed nothing from his contemporaries, and offered his art to them with the same frankness. The entrance to his world is not barricaded with technical difficulties. He proved that if a man has the capacity to live and multiply his experiences, to fight and work, he can produce great art without classical decorum and traditional respectability. He was born in 1746, in Fuendetodos, a small mountain village of a hundred inhabitants. As a child he worked in the fields with his two brothers and his sister until his talent for drawing put an end to his misery. At fourteen, supported by a wealthy patron, he went to Saragossa to study with a court painter and later, when he was nineteen, on to Madrid. Up to his thirty-seventh year, if we leave out of account the tapestry cartoons of unheralded decorative quality and five small pictures, Goya painted nothing of any significance, but once in control of his refractory powers, he produced masterpieces with the speed of Rubens. His court appointment was followed by a decade of incessant activity - years of painting and scandal, with intervals of bad health. Goya's etchings demonstrate a draughtsmanship of the first rank. In paint, like Velázquez, he is more or less dependent on the model, but not in the detached fashion of the expert in still-life. If a woman was ugly, he made her a despicable horror; if she was alluring, he dramatised her charm. He preferred to finish his portraits at one sitting and was a tyrant with his models. Like Velázquez, he concentrated on faces, but he drew his heads cunningly, and constructed them out of tones of transparent greys. Monstrous forms inhabit his black-and-white world: these are his most profoundly deliberated productions. His fantastic figures, as he called them, fill us with a sense of ignoble joy, aggravate our devilish instincts and delight us with the uncharitable ecstasies of destruction. His genius attained its highest point in his etchings on the horrors of war. When placed beside the work of Goya, other pictures of war pale into sentimental studies of cruelty. He avoided the

scattered action of the battlefield, and confined himself to isolated scenes of butchery. Nowhere else did he display such mastery of form and movement, such dramatic gestures and appalling effects of light and darkness. In all directions Goya renewed and innovated.

This book has established itself as an indispensable resource and is widely acknowledged as the key text in the field of medical herbalism. Conveniently arranged by organ system, the text provides guidelines for prescribing herbal remedies, with sections on dosage, application, and precautionary measures. Plus, for each plant discussed, you will find lists of their occurrence, botanical features, differentiation from related species, constituents, and medical benefits. Proprietary formulations, full references, and a comprehensive subject index of almost 2,000 entries round out the superb coverage! Weiss's life's work examines the subject of herbal medicine from both a clinical and practical viewpoint, incorporating his personal observations and clinical experience with scientific studies. This material formed the basis of Herbal Medicine, 2E, also by Thieme. The second edition, revised, expanded and modernized by Volker Fintelmann, streamlines the work into a more clinical text, incorporating the latest scientific research

and Commission E findings on the efficacy of herbs. This edition is recommended for allopathic physicians and other medical professionals who are new to the field of herbal medicine. Professor Rudolf Fritz Weiss (1895-1991) is highly regarded as the founding father of modern German phytotherapy. He studied botany and medicine at the University of Berlin, qualifying as a doctor in 1922 and subsequently taking additional qualifications in internal medicine. A teaching post in herbal medicine was interrupted by war service as an army doctor, followed by seven years in Russian captivity as a doctor in prisoner-of-war camp hospitals. After retiring from clinical practice in 1961, he devoted his life to the scientific development and acceptance of herbal medicine. Weiss was appointed as a member of the German Commission E in 1978. He was founder and editor of the *Zeitschrift fuer Phytotherapie*, and lectured on current advances in the subject at the University of Tuebingen.

Postwar Europe and the Eurovision Song Contest Dean Vuletic, 2019-07-25 Postwar Europe and the Eurovision Song Contest examines how the Eurovision Song Contest has reflected and become intertwined with the history of postwar Europe from a political perspective. Established in 1956, the Eurovision Song Contest is the world's largest popular music event and one of the most popular television programmes in Europe, currently attracting a global audience of around 200 million people. Eurovision is often mocked as cultural kitsch because of its over-the-top performances and frivolous song lyrics. Yet there is no cultural medium that connects Europeans more than popular music, the development of which has always been tied to cultural, economic, political, social and technological change - making Eurovision the ideal tool to explain the history of Europe in the last sixty years. This book uses Eurovision as a vehicle to address topics ranging from the Cold War, liberal democracy and communism to nationalism, European integration, economic prosperity and human rights. It analyses these subjects through their cultural, political and social relationships with Eurovision entries as expressed through lyrics and music, as well as by examining public debates that have accompanied the selection of the entries and the organisation of the contest itself. Postwar Europe and the Eurovision Song Contest also considers how states have used Eurovision to define their identities in a European context, be it to assert their national distinctiveness, highlight political issues or affirm their Europeanism or Euroscepticism in the context of European integration. Based on original sources, including hitherto unpublished archival documents from international broadcasting organisations, this is a novel historical study of interest to anyone keen to know more about the postwar history of Europe and its cultural history in particular.

Painting the Future Louise Hay, Lynn Lauber, 2012-02-06 Jonathan Langley's life took a devastating turn when he lost his eyesight to a rare illness. Once a successful painter and printmaker, Jonathan now lives in complete darkness, rarely

leaving his apartment and angry at the world. When he encounters his precocious 11-year-old neighbor, Lupe, the two form an unlikely friendship. Her cheerful presence shatters his hardened exterior, revealing a gentle man struck by tragedy. Lupe leads him to a fresh perspective by showing him the power of kindness, compassion, and love. Based on the celebrated teachings of Louise Hay, *Painting the Future* explores the power of positive thinking in healing past struggles and learning to live a joyful, heart-centered life.

Timeless Mist Terisa Wilcox, 2009-04 Kristianna discovers the magic of Scotland when she comes face to face with the man of her dreams - four hundred years in the past... Art-history major Kristianna Campbell gets more education than she bargains for when she visits Scotland with her college class. On a shopping excursion she picks up an unusual souvenir-an antique pocket watch once owned by Iain MacGregor. The enchanted watch pulls her back through time where she lands smack in the middle of Iain MacGregor's territory-in the year 1603, during the proscription against the MacGregors. Unsure of where she is or how she got there, Kris is stunned when she sees Iain and realizes he's not exactly a stranger to her. She's dreamed of him for weeks. And her attraction to him is stronger in the flesh than in her dreams. Realizing the danger in revealing her real surname of Campbell, Kristianna tells him her last name is Armstrong. The situation is tense as Iain battles enemies on all sides, thanks to King James VI and the decree that the name of MacGregor be outlawed, and the Earl of Argyll, Archibald Campbell's desire to see the MacGregors decimated. Iain has neither the time nor the inclination to deal with the strange lass who mysteriously landed in his territory. But Kristianna affects him in ways no other woman has. To desire her is acceptable, but when she begins to reach the heart he thought long dead, he knows he will never be the same.

The Plebeians Rehearse the Uprising Günter Grass, 2017-05-25 In his first full-length play, Günter Grass takes Bertolt Brecht, the foremost modern German dramatist, as his key figure. On 17 June, 1953, the workers in East Germany rise in rebellion against oppressive measures, but their revolt lacks a voice and a leader. In the East German theatre of which he is the director, the famed Communist poet and playwright, Bertolt Brecht (named 'the boss' in the play), is shown rehearsing his adaption of Shakespeare's *Coriolanus*. The revolution spills over into the stage happenings as a workers' delegation requests that 'the Boss' lend the authority of his voice and fame to their demands for justice and freedom. The intellectual is shown in a tragic dilemma: reasoning keeps him from active commitment until it is too late. He becomes guilty of betraying the workers and his own self.

Making a Middle Landscape Peter G. Rowe, 1992 Today's suburban metropolitan development of single-family homes, shopping centers, corporate offices, and roadway systems constitutes what Peter Rowe calls a middle landscape between the city and the countryside. While others have written about this phenomenon from the point of view of sociology or cultural geography, Rowe looks closely at suburban America in terms of design and physical planning. He builds a case for a new way of seeing and building suburbia, complete with theoretical underpinnings and a basis for design. The directions Rowe

pursues are threefold: what has actually been built since 1920, as simple arrangements of land, buildings, and infrastructure have been transformed into complex multiuse centers; the mythic themes, metaphors, and attitudes driving the production of important cultural artifacts like the home and the workplace; and the definition of design principles for this new landscape. Rowe looks first at how suburban expansion has altered the land, at the new spatiocultural mosaic that has emerged and taken the place of the traditional city. He then examines four cultural artifacts - the house and its garden; the retail realm of roadside franchises and commercial strips, shopping villages and malls; the modern workplace of office parks and corporate estates; and the roadway that has become an essential link to all of these. Running throughout, he notes, is a story of technical planning and mass production where, paradoxically, rational excesses are often cloaked in romantic imagery. He concludes by proposing - and illustrating with numerous examples - a symbolic construct of modern pastoralism that juxtaposes the idea of arcadian simplicity and value against the modern technical temperament.
