Companero Jorge G. Castañeda, 2009-07-16 By the time he was killed in the jungles of Bolivia, where his body was displayed like a deposed Christ, Ernesto Che Guevara had become a synonym for revolution everywhere from Cuba to the barricades of Paris. This extraordinary biography peels aside the veil of the Guevara legend to reveal the charismatic, restless man behind it. Drawing on archival materials from three continents and on interviews with Guevara's family and associates, Castaneda follows Che from his childhood in the Argentine middle class through the years of pilgrimage that turned him into a committed revolutionary. He examines Guevara's complex relationship with Fidel Castro, and analyzes the flaws of character that compelled him to leave Cuba and expend his energies, and ultimately his life, in quixotic adventures in the Congo and Bolivia. A masterpiece of scholarship, Companero is the definitive portrait of a figure who continues to

fascinate and inspire the world over.

Korda Alberto Korda, Cristina Vives, Mark Sanders, 2008 This book covers all aspects of Korda's extraordinary career with specific reference to his interest in fashion, the revolution and other features of Cuban society. Starting with his early advertising work from the early 1950s the book traces Korda's entry into the world of fashion and his belief in what he termed an 'aesthetics of beauty'. He explored this idea not only in the sensuous curves of the female form but also in the unique landscape of Cuba as well as within the magnificence of the heroic revolutionary. The book also includes his extensive documentation of Castro and Che. *A Revolutionary Lens* is a celebration of Korda's belief in beauty and has been edited with full support of Alberto Korda's daughter Diana Diaz of the Korda estate.

River of Night John Ringo, Mike Massa, 2019-07-02 A NEW NOVEL IN JOHN RINGO'S BESTSELLING BLACK TIDE RISING SERIES. Sequel to *The Valley of Shadows*. Tom Smith used to be somebody. Now he's just another refugee, fleeing the smoking ruins of civilization. Well, maybe not just another refugee. Late of the Bank of the Americas where he used to be the global managing director for Security, Tom and his fellow survivors watched New York City burn. His plan to save New York long enough to find a cure for the zombie virus hadn't survived the bloody scrimmage between angry cops, cunning gangsters, and rapacious City officials. Now only millions of infected humans, driven mad by the high infectious tailored rabies virus, inhabited the city. But Tom and some trusted allies were able to stay one step ahead and escaped offshore. Now they're holed up in a safe house in coastal Virginia and it's time to breakout. Between him and his objective, one of the bank's prepared evacuation camps in the Cumberland Valley, are hundreds of miles of clogged roads, burnt-out towns and howling mobs of infected humans who know only hunger. He must corral his motley team, complete with middle-schoolers, to navigate the treacherous landscape. And yet he feels his odds are good. But there's always someone smarter. And they like things just the way they are. Without a fat checkbook and the team of hired spec-ops mercenaries it used to bring, how will Tom Smith fend off entrepreneurial marauders, a brilliant sociopath or two and a kill-count hungry member of

the E-4 mafia? And if he pulls it off, no one is sure how they will they re-start civilization. But Tom Smith has the spark of an idea. At the publisher's request, this title is sold without DRM (Digital Rights Management). About *Black Tide Rising*: “. . . an entertaining batch of . . . action-packed tales. Comedy has a place in this harsh reality, and these stories stir adventure and emotion at a frantic clip throughout. Zombie fiction fans will be thrilled.—Library Journal About the *Black Tide Rising* Series: “Not only has Ringo found a mostly unexplored corner of the zombie landscape, he's using the zombie frame to tackle a broader theme: the collapse and rebirth of civilization. American Moonshot Douglas Brinkley, 2019-04-02 Instant New York Times Bestseller As the fiftieth anniversary of the first lunar landing approaches, the award winning historian and perennial New York Times bestselling author takes a fresh look at the space program, President John F. Kennedy’s inspiring challenge, and America’s race to the moon. “We choose to go to the Moon in this decade and do the other things, not because they are easy, but because they are hard; because that goal will serve to organize and measure the best of our energies and skills, because that challenge is one that we are willing to accept, one we are unwilling to postpone, and one we intend to win.”—President John F. Kennedy On May 25, 1961, JFK made an astonishing announcement: his goal of putting a man on the moon by the end of the decade. In this engrossing, fast-paced epic, Douglas Brinkley returns to the 1960s to recreate one of the most exciting and ambitious achievements in the history of humankind. *American Moonshot* brings together the extraordinary political, cultural, and scientific factors that fueled the birth and development of NASA and the Mercury, Gemini and Apollo projects, which shot the United States to victory in the space race against the Soviet Union at the height of the Cold War. Drawing on new primary source material and major interviews with many of the surviving figures who were key to America’s success, Brinkley brings this fascinating history to life as never before. *American Moonshot* is a portrait of the brilliant men and women who made this giant leap possible, the technology that enabled us to propel men beyond earth’s orbit to the moon and return them safely, and the geopolitical tensions that spurred Kennedy to commit himself fully to this audacious dream. Brinkley’s ensemble cast of New

Frontier characters include rocketeer Wernher von Braun, astronaut John Glenn and space booster Lyndon Johnson. A vivid and enthralling chronicle of one of the most thrilling, hopeful, and turbulent eras in the nation's history, *American Moonshot* is an homage to scientific ingenuity, human curiosity, and the boundless American spirit.

Nanotechnology Stefan Sepeur, 2008 The chemical nanotechnology is one of the special areas of nanotechnology. By varying the composition, shape, size or character of the surface, these nanoparticles can be shaped time and again into small building blocks, resulting in unprecedented scopes for material design. At this moment in time, the developments in the field of modern nanotechnology provide amazing success stories, such as the possibility for reconstructing surface structures for industrial materials that are demonstrated to us in nature. The reader will receive an overview of coatings systems based on the application of chemical nanotechnology. Practitioners will be given an introduction to nanostructured coatings and experts will find the account of various silanebased materials useful.

Supermaterials Rudi Cloots, M. Ausloos, Marek Pekala, Alan J. Hurd, Gilbert Vacquier, 2012-12-06 What is a supermaterial? A concise definition is by no means obvious, but a clue can be obtained from the topics discussed here.. In addition to superconductors, the reader will encounter magnetic effects of many kinds, including giant and even colossal ones, organic conductors, photoconductors, and even 400-year-old Japanese ceramics. Processing is a prominent pursuit in supermaterials research, especially but not exclusively of the superconductors. The papers on characterisation and theory break new ground, particularly in pursuit of new optoelectronic phenomena. The parade of new materials recently synthesised, often containing four or more elements, is surprising. But it is in its reporting of new applications that the book stands out: from circuits to sensors, supermaterials are making their impact on society.
