Gregory A. Mihailoff

Crash Course Neurology, 2015

Neurology Anish Bahra, Katia Cikurel, 1999 Crash Course Neurology reflects the way in which students will deal with patients in real-life situations. First, it takes the student through the common patient presentations associated with neurological disease and their differential diagnoses. Part II considers the history and the examination of the patient with a neurological disorder. This is followed by guidelines on how to write up a medical clerking and a consideration of the common neurological investigations. Part III takes the conditions outlined in Part I and considers them in much more detail, looking at background information and management plans. Multiple choice, short-answer and case-based questions make up Part IV and allow the student to assess their understanding and test their performance after having studied the text.

Neurology Mahinda Yogarajah, 2013 This series has been written by students, for students which ensures they are ideal

for today's curriculum. It focuses on systems-based presentation of integrated medical science, and includes clear, straightforward diagrams.

Neurology Christopher Turner, Katia Cikurel, 2006 Crash Course! is a revision series for students on system based and integrated courses. An illustrated outline format in bite-sized chunks makes the content easy to absorb. Hints and Tips and Comprehension Check boxes are built-in features designed to make the series student-friendly. A practice exam at the end enables students to assess their level of understanding. The Basic Science titles are written by medical students for medical students under faculty supervision, the content focuses in on what medical students really need to know. The Clinical titles are written by a senior consultant and a junior doctor who has recent experience of being a student - again making the books as relevant as possible for current medical students

Neurology Joyce Liporace, 2006 Don't panic! Crash Course is here-tDhat perfect set of lecture notes which no student ever really has the time to compile. These books deliver all of the information needed to get through a course or prepare for exams. Clear text covers the essential concepts of each discipline or specialty; learning features expedite mastery of the material; and review questions let readers assess their knowledge. With basic science books written by current medical students under faculty supervision, and clinical titles that pair senior specialists with doctors who have only recently begun training in the relevant field, Crash Course titles are designed to ideally meet the needs of today's medical students. Clear, concise, narrative-style text covers exactly what students need to know-no more, no less. Abundant two-color diagrams explain key concepts in an interesting visual way. Learning features such as hints and tips and comprehension check boxes simplify study. Multiple-choice and short-answer questions at the back of the books facilitate self assessment.
