Knowledge and the Indian Ocean Sara Keller,2018-09-27 This volume examines Western India's contributions to the spread of ideas, beliefs and other intangible ties across the Indian Ocean world. The region, particularly Gujarat and Bombay, is well-established in the Indian imaginary and in scholarship as a mercantile hub. These essays move beyond this identity to examine the region as a dynamic place of learning and a host of knowledge, tracing the flow of knowledge, aesthetic sensibilities, values, memories and genetic programs. Contributors traverse the fields of history, anthropology, agriculture, botany, medicine, sociology and more to offer path-breaking perspectives on Western India's deep socio-cultural impact across the centuries. Western India emerges as a pivotal region in the maritime world as a transmitter of knowledge.

The Manual of Photography Elizabeth Allen,Sophie Triantaphillidou,2012-11-12 The tenth edition of The Manual of Photography is an indispensable textbook for anyone who is serious about photography. It is ideal if you want to gain insight into the underlying scientific principles of photography and digital imaging, whether you are a professional photographer, lab technician, researcher or student in the field, or simply an enthusiastic amateur. This comprehensive guide takes you from

capture to output in both digital and film media, with sections on lens use, darkroom techniques, digital cameras and scanners, image editing techniques and processes, workflow, digital file formats and image archiving. This iconic text was first published in 1890 and has aided many thousands of photographers in developing their own techniques and understanding of the medium. Now in full colour, *The Manual of Photography* still retains its clear, reader-friendly style and is filled with images and illustrations demonstrating the key principles. Not only giving you the skills and know-how to take stunning photographs, but will also allowing you to fully understand the science behind the creation of great images.

Macrocriminology and Freedom John Braithwaite, 2022-02-15 How can power over others be transformed to 'power with'? It is possible to transform many institutions to build societies with less predation and more freedom. These stretch from families and institutions of gender to the United Nations. Some societies, times and places have crime rates a hundred times higher than others. Some police forces kill at a hundred times the rate of others. Some criminal corporations kill thousands more than others. Micro variables fail to explain these patterns. Prevention principles for that challenge are macrocriminological. Freedom is conceived in a republican way as non-domination. Tempering domination prevents crime; crime prevention reduces domination. Many believe a high crime rate is a price of freedom. Not Braithwaite. His principles of crime control are to build freedom, temper power, lift people from poverty and reduce all forms of domination. Freedom requires a more just normative order. It requires cascading of peace by social movements for non-violence and non-domination. Periods of war, domination and anomie cascade with long lags to elevated crime, violence, inter-generational self-violence and ecocide. Cybercrime today poses risks of anomic nuclear wars. Braithwaite's proposals refine some of criminology's central theories and sharpen their relevance to all varieties of freedom. They can be reduced to one sentence. Strengthen freedom to prevent crime, prevent crime to strengthen freedom. 'A true magnum opus, *Macrocriminology and Freedom* is a thought provoking and generative book from one of criminology's intellectual giants. John Braithwaite reaches far and wide across societies, time, and disciplines to advance no less than a theory of how to build a society that simultaneously reduces both domination and crime. His ambitious ideas on cascades of non-dominating collective efficacy and crime prevention, for example, and their connections to social movements and political freedom, go well beyond usual criminological discourse. Chock full of theoretical propositions and bold insights, this a book that will keep criminologists busy for years. *Macrocriminology and Freedom* should not just be read, but better yet, savoured.' – Robert J. Sampson, Henry Ford II Professor of the Social Sciences, Harvard University 'In this majestic theorisation of the relationship between crime and freedom John Braithwaite isolates the unique power of macrocriminology as a lens through which to comprehend and challenge many of the fundamental crises facing our planet. Very few scholars have the breadth and overview to succeed in a mission of this order ... Braithwaite does. This extraordinary book is an object lesson for all who seek to understand and

resist domination and the crimes of power that flow from it.’ – Penny Green, Professor of Law and Globalisation, Queen Mary University of London ‘For over 40 years, John Braithwaite has been a voice of wisdom, hope and humanity in criminology. This dazzling new book weaves together all the main themes of his influential work, reanimating many of the core concepts of the discipline, as well as incorporating interdisciplinary resources from south and north, east and west, to produce an elegant and ambitious explanatory and normative account of crime as freedom-threatening domination. Decentring criminal justice as the solution to crime, Braithwaite shows that, on a global scale, the aspiration to tackle crimes, ranging from interpersonal violence through corporate crimes to ecocide, lies in the development of freedom-enhancing, power-tempering institutions in the political, economic and social spheres.’ – Nicola Lacey, Professor of Law, Gender and Social Policy, London School of Economics ‘Macrocriminology and Freedom is a criminological epic, an expansive and erudite story that sweeps across history and contexts. The book is frightening in showing how cascading events can produce catastrophes from crime to environmental destruction. But in the end, its message is hopeful, identifying pathways—or “normative rivers”—for guiding freedom from domination and crime. Drawing on his distinguished career, John Braithwaite has bestowed an extraordinary gift—a book, like other masterpieces, that will yield special insights each time we take an excursion through its pages.’ – Francis T. Cullen, Distinguished Research Professor Emeritus, University of Cincinnati ‘In this engaging book John Braithwaite reinvigorates discussions about crime and its control. While advocating a macro approach, the book is punctuated not only with insights and data from smaller-scale studies conducted in a range of jurisdictions, but also with auto-biographical vignettes. The effect creates a deeply personal account of the perils of state, non-state and market violence and authoritarianism and the potential and indeed duty, of criminologists to work towards their reduction, by refocusing their efforts on explaining and tackling crime in its myriad of forms.’ – Mary Bosworth, Professor of Criminology, University of Oxford and Monash University ‘John Braithwaite has had a unique influence on criminology globally. In this encyclopaedic text he synthesises a wealth of criminological knowledge, particularly in the sphere of anomie theory, into broader debates about the nature of domination and freedom in contemporary society. He defends the relevance of criminological theory, while urging criminology to be activist rather than reactive and technocratic, counter-hegemonic rather than neutral. Not for the first time, John Braithwaite has challenged criminologists to construct theories that cut across micro and macro structures. This book will stir debate. It deserves a broad readership.’ – Harry Blagg, Professor of Criminology, University of Western Australia

Electrical Palestine Fredrik Meiton, 2019-01-15 Electricity is an integral part of everyday life—so integral that we rarely think of it as political. In *Electrical Palestine*, Fredrik Meiton illustrates how political power, just like electrical power, moves through physical materials whose properties govern its flow. At the dawn of the Arab-Israeli conflict, both kinds of power were circulated through the electric grid that was built by the Zionist engineer Pinhas Rutenberg in the period of British rule

from 1917 to 1948. Drawing on new sources in Arabic, Hebrew, and several European languages, *Electrical Palestine* charts a story of rapid and uneven development that was greatly influenced by the electric grid and set the stage for the conflict between Arabs and Jews. Electrification, Meiton shows, was a critical element of Zionist state building. The outcome in 1948, therefore, of Jewish statehood and Palestinian statelessness was the result of a logic that was profoundly conditioned by the power system, a logic that has continued to shape the area until today.

Knowledge and Civil Society Johannes Glückler,Heinz-Dieter Meyer,Laura Suarsana,2021-12-08 This open access book focuses on the role of civil society in the creation, dissemination, and interpretation of knowledge in geographical contexts. It offers original, interdisciplinary and counterintuitive perspectives on civil society. The book includes reflections on civil and uncivil society, the role of civil society as a change agent, and on civil society perspectives of undone science. Conceptual approaches go beyond the tripartite division of public, private and civic sectors to propose new frameworks of civic networks and philanthropic fields, which take an inclusive view of the connectivity of civic agency across sectors. This includes relational analyses of epistemic power in civic knowledge networks as well as of regional giving and philanthropy. The original empirical case studies examine traditional forms of civic engagement, such as the German landwomen's associations, as well as novel types of organizations, such as giving circles and time banks in their geographical context. The book also offers insider reflections on doing civil society, such as the cases of the Umbrella Movement in Hong Kong, epistemic activism in the United States, and the #FeesMustFall movement in South Africa.

Landscapes and Landforms of France Monique Fort,Marie-Françoise André,2013-08-23 The *Landforms and Landscapes of France* provides an informative and attractive overview of the most scenic landscapes of France. The geodiversity of France is emphasized, for example the glacial landscapes of the Mont-Blanc Massif, the volcanoes of the French Massif Central, the chalk cliffs and sand dunes of the Atlantic coast, the granitic landscapes of Corsica or the lagoons and coral reefs of French Polynesia. The objectives are to provide the reader with an enjoyable and informative description of the selected sites within their regional geographical and geological settings; to offer an up-to-date survey of the evolution of France's landscape; and to give additional information on the cultural value of the selected sites wherever appropriate (prehistoric paintings, legends related to sites, famous vineyards, etc.). The book is a richly illustrated reference work that makes accessible for the first time a wealth of information currently scattered among many national and regional journals. It will be of benefit to earth scientists, environmental scientists, tourism geographers and conservationists

Creolization and Diaspora in the Portuguese Indies Stefan Halikowski Smith,2011-09-23 This book examines the sizeable Portuguese community in Ayutthaya, the chief river-state in Siam, during a period in which Portuguese power in the region declined. The analysis turns on the creolization and diaspora that affected this community, as well as problems with

international trade, the Christian conversion process, and European rivalries.

Hmong/Miao in Asia Nicholas Tapp, Jean Michaud, Christian Culas, Gary Y. Lee, 2004 This volume presents the most comprehensive collection of research on Hmong culture and life in Asia yet to be published. It compliments the abundant material on the Hmong diaspora by focusing instead on the Hmong in their Asian homeland. The contributors are scholars from a number of different backgrounds with a deep knowledge of Hmong society and culture, including several Hmong. The first group of essays addresses the fabric of Hmong culture by considering issues of history, language, and identity among the Hmong/Miao from Laos to China. The second part introduces the challenges faced by the Hmong in contemporary Thailand, Laos, and Vietnam. Nicholas Tapp is senior fellow in anthropology at the Australian National University. Jean Michaud is associate researcher in Asian studies at University de Montreal. Christian Culas is a member of the National Center for Scientific Research in Marseille. Gary Yia Lee is senior ethnic liaison officer for New South Wales.

Resource Recovery from Waste Miriam Otoo, Pay Drechsel, 2018-03-20 Humans generate millions of tons of waste every day. This waste is rich in water, nutrients, energy and organic compounds. Yet waste is not being managed in a way that permits us to derive value from its reuse, whilst millions of farmers struggle with depleted soils and lack of water. This book shows how Resource Recovery and Reuse (RRR) could create livelihoods, enhance food security, support green economies, reduce waste and contribute to cost recovery in the sanitation chain. While many RRR projects fully depend on subsidies and hardly survive their pilot phase, hopeful signs of viable approaches to RRR are emerging around the globe including low- and middle-income countries. These enterprises or projects are tapping into entrepreneurial initiatives and public- private partnerships, leveraging private capital to help realize commercial or social value, shifting the focus from treatment for waste disposal to treatment of waste as a valuable resource for safe reuse. The book provides a compendium of business options for energy, nutrients and water recovery via 24 innovative business models based on an in-depth analysis of over 60 empirical cases, of which 47 from around the world are described and evaluated in a systematic way. The focus is on organic municipal, agro-industrial and food waste, including fecal sludge, supporting a diverse range of business models with potential for large-scale out-and up-scaling.

Communication in Peacebuilding Stefanie Pukallus, 2021-11-17 This book is concerned with the role that communication - understood as including both the factual and fictional mass media as well as the performative and visual arts - can play in post-civil war peacebuilding. It engages with questions of how a society can move from the civil war conditions of discursive dehumanisation to peaceful cooperation in post-civil war settings and how peacebuilders can help communities utilise the transformative capacity of communication to encourage the reimagining of and engagement with former enemies as co-citizens. Ultimately, civil and peaceful cooperation depends on the observance of discursive civility and the building of safe discursive spaces in which civil engagement between different groups of society (including former combatants and survivors)

can safely take place. This book argues that understanding communicative peacebuilding in this way is fundamental to the achievement of self-sustainable everyday peace.
