Closed Circuit Television Joe Cieszynski,2003-10-02 Closed Circuit Television (CCTV) surveillance is one of the fastest growing areas in the security industry. This book is an essential guide for professionals involved the installation and maintenance of CCTV systems, system design, specification and purchasing and the management of CCTV systems. Unlike most existing books on CCTV, this title is not just a discussion of security issues, but a thorough guide to the technical side of the subject - cameras and monitors, video recording, cabling and transmission, installation and maintenance. The concise, accessible text makes it for hard-pressed practitioners and students on training courses. The second edition is fully dual-standard for PAL and NTSC systems. New material in the second edition covers lighting issues and equipment, digital signal transmission, integrated CCTV / intruder alarm systems, CAT5 cabling, digital recording, video printers, ancillary equipment, and a glossary. This book is recommended by SITO (the Security Industry Training Organisation, UK) as suitable for its courses, the City and Guilds 1851 programme, and the underpinning knowledge requirement of Level 3 NVQs from SITO / C & G. Joe Cieszynski is a well known magazine writer and a contributor to the SITO distance learning materials on CCTV. He has extensive experience in the industry and as a lecturer. * Demystifies CCTV technology for installers and managers * Concise, accessible text ideal for hard-pressed practitioners and students * Fully dual-standard coverage for PAL and NTSC based systems

Confronting Failures of Justice Paul H. Robinson,Jeffrey Seaman,Muhammad Sarahne,2024-09-17 Most murderers and rapists escape justice, a horrifying fact that has gone largely unexamined until now. This groundbreaking book tours nearly the entire criminal justice system, examining the rules and practices that regularly produce failures of justice in serious criminal cases. Each chapter outlines the nature and extent of justice failures in present practice, describing the interests at stake, and providing real-world examples. Finally, each chapter reviews proposed and implemented reforms that could balance the competing interests in a less justice-frustrating manner and recommends one—sometimes completely original—reform to improve the system. A systematic study of justice failures is long overdue. As this book discusses, regular failures of justice in serious criminal cases undermine deterrence and the criminal justice system’s credibility with the community as a moral authority. The damage caused by unpunished crime is immense and, even worse, falls primarily on

vulnerable minority communities. Now for the first time, students, researchers, policymakers, and citizens have a resource that explains why justice failures occur and what can be done about them.

Guide to Security Considerations and Practices for Rare Book, Manuscript, and Special Collection Libraries

Everett C. Wilkie,2011 The Guide to Security Considerations and Practices for Rare Book, Manuscript, and Special Collection Libraries is the first such book intended specifically to address security in special collection libraries. Containing nineteen chapters, the book covers such topics as background checks, reading room and general building design, technical processing, characteristics and methods of thieves, materials recovery after a theft, and security systems. While other topics are touched upon, the key focus of this volume is on the prevention of theft of rare materials. The work is supplemented by several appendices, one of which gives brief biographies of recent thieves and another of which publishes Allen s important Blumberg Survey, which she undertook after that thief s conviction. The text is supported by illustrations, a detailed index, and an extensive bibliography. The work, compiled and edited by Everett C. Wilkie, Jr., contains contributions from Anne

Marie Lane, Jeffrey Marshall, Alvan Bregman, Margaret Tenney, Elaine Shiner, Richard W. Oram, Ann Hartley, Susan M. Allen, and Daniel J. Slive, all members of the ACRL Rare Books & Manuscripts Section (RBMS) and experts in rare materials and the security of these materials within special collections. This work is essential reading for all those concerned with special collection security, from general library administrators to rare book librarians. -- ¢ From Amazon.com.
