Simon Frith

Performing Rites Simon Frith, 1998-02-06 Who's better? Billie Holiday or P. J. Harvey? Blur or Oasis? Dylan or Keats? And how many friendships have ridden on the answer? Such questions aren't merely the stuff of fanzines and idle talk; they inform our most passionate arguments, distill our most deeply held values, make meaning of our ever-changing culture. In *Performing Rites*, one of the most influential writers on popular music asks what we talk about when we talk about music. What's good, what's bad? What's high, what's low? Why do such distinctions matter? Instead of dismissing emotional response and personal taste as inaccessible to the academic critic, Simon Frith takes these forms of engagement as his subject--and discloses their place at the very center of the aesthetics that structure our culture and color our lives. Taking up hundreds of songs and writers, Frith insists on acts of evaluation of popular music as music. Ranging through and beyond the twentieth century, *Performing Rites* puts the Pet Shop Boys and Puccini, rhythm and lyric, voice and technology, into a dialogue about the undeniable impact of popular aesthetics on our lives. How we nod our heads or tap our feet, grin or grimace or flip the dial; how we determine what's sublime and what's for real--these are part of the way we construct our social identities, and an essential response to the performance of all music. Frith argues that listening itself is a performance, both social gesture and bodily response. From how they are made to how they are received, popular songs appear here as not only meriting aesthetic judgments but also demanding them, and shaping our understanding of what all music means.

Music, Encounter, Togetherness Nicholas Cook, 2024 Modern Western musical thought tends to represent music as a thing--a pattern, a structure, even an organism--than as a human practice. *Music, Encounter, Togetherness* focusses on music as something people do, as a mode of encounter between individuals and cultures, and as an agent of interpersonal and social togetherness. It presents music as a utopian dimension of everyday life.

Encounter Images in the Meetings Between Africa and Europe Mai Palmberg, 2001 Positive images of Africa contrast with negative images of misery, war and catastrophes often conveyed by the mass media. This selection of papers debate the images and stereotypes of Africa.

Agency James Russell, 2013-05-24 The idea behind this book is that developing a conception of the physical world and a conception of mind is impossible without the exercise of agency, meaning the power to alter at will one's perceptual inputs. The thesis is derived from a philosophical account of the role of agency in knowledge.; The book is divided into three parts. In

Part One, the author argues that purely representational theories of mind and of mental development have been overvalued, thereby clearing the ground for the book's central thesis. In Part Two, he proposes that, because objective experience depends upon the experience of agency, the development of the object concept in human infants is grounded in the development of executive-attentional capacities. In Part Three, an analysis of the links between agency and self-awareness generates an original theory of the nature of certain stage-like transitions in mental functioning and of the relationship between executive and mentalizing defects in autism.; The book should be of interest to students and researchers in cognitive- developmental psychology, to philosophers of mind, and to anybody with an interest in cognitive science.

Soundweaving Franziska Schroder, Micheal Ó'hAodha, 2014-06-30 This book is about music improvisation. It forges exciting and provocative new links between a range of theories and practices in texts that explore topics as varied as object-oriented ontology, game theory, ethical responsibility and breath. In improvisatory fashion, this book has been edited so that it weaves the texts amongst each other, subversively inserting a tactile piece of text – a text interlaced, as a woven cloth, among the contributing authors. The writings in this volume are both timely and diverse, exploring as they do an array of interdisciplinary and critical discourses, thereby illuminating the field of improvisation from different perspectives within the radical and diverse contexts that undercut contemporary improvisation studies and practices. It consists of eight chapters as researched by practising musicians and theorists and an introduction by one of the most inspiring improvisers of our generation – Evan Parker.

Phenomenology, Uncertainty, and Care in the Therapeutic Encounter Mark Leffert, 2015-08-11 Phenomenology, Uncertainty and Care in the Therapeutic Encounter is the latest in a series of books where Mark Leffert explores the therapeutic encounter as both process and situation; looking for evidence of therapeutic effectiveness rather than accepting existing psychoanalytic concepts of theory or cure without question. Mark Leffert focuses on the uncomfortable fact that analysts and therapists can and do make many mistaken assumptions and false moves within their clinical practice, and that there is a tendency to ignore the significant levels of uncertainty in what they do. Beginning with a discussion of the phenomenology of the self and its relations with the world, the book moves on to explore the notion that interdisciplinary discourse both opens up possibilities in the therapeutic encounter but also imposes healthy constraints on what can be thought or theorized about psychoanalytically. Phenomenology, Uncertainty and Care in the Therapeutic Encounter contributes a new understanding of familiar material and brings a new focus to the care-giving and healing aspects of psychoanalysis and psychotherapy leading to a shift in the analyst's identity from that of one who analyses to one who cares for and heals. This book will be of interest to Psychoanalysts and psychotherapists, neuroscientists and academics in the fields of psychiatry, comparative literature and literature and the mind.

The Cambridge Companion to Pop and Rock Simon Frith, Will Straw, John Street, 2001-08-16 This Companion maps

the world of pop and rock, pinpointing the most significant moments in its history and presenting the key issues involved in understanding popular culture's most vital art form. Expert writers chart the changing patterns in the production and consumption of popular music, the emergence of a vast industry with a turnover of billions and the rise of global stars from Elvis to Public Enemy, Nirvana to the Spice Girls. They trace the way new technologies - from the amplifier to the internet - have changed the sounds and practices of pop and they analyse the way maverick entrepreneurs have given way to multimedia corporations. In particular they focus on the controversial issues concerning race and ethnicity, politics, gender and globalisation. Contains full profiles of a selection of figures from the pop and rock world.

Capitals of Punk Tyler Sonnichsen, 2019-04-09 *Capitals of Punk* tells the story of Franco-American circulation of punk music, politics, and culture, focusing on the legendary Washington, DC hardcore punk scene and its less-heralded counterpart in Paris. This book tells the story of how the underground music scenes of two major world cities have influenced one another over the past fifty years. This book compiles exclusive accounts across multiple eras from a long list of iconic punk musicians, promoters, writers, and fans on both sides of the Atlantic. Through understanding how and why punk culture circulated, it tells a greater story of (sub)urban blight, the nature of counterculture, and the street-level dynamics of that centuries-old relationship between France and the United States.

Taking Popular Music Seriously Simon Frith, 2017-07-05 As a sociologist Simon Frith takes the starting point that music is the result of the play of social forces, whether as an idea, an experience or an activity. The essays in this important collection address these forces, recognising that music is an effect of a continuous process of negotiation, dispute and agreement between the individual actors who make up a music world. The emphasis is always on discourse, on the way in which people talk and write about music, and the part this plays in the social construction of musical meaning and value. The collection includes nineteen essays, some of which have had a major impact on the field, along with an autobiographical introduction.

Pop embraces its own history, with musicians from every genre routinely sampling the sounds of the past. present. Living Through Pop explores popular music's history, and the ways in which it has been produced by musicians, broadcasters, critics and fans. Pupil Strategies Peter Woods, 2011-12-08 What do pupils actually do in school? There are remarkably few studies that take the pupils' perspective and reconstruct experience from their point of view within the context of their own cultures and careers. This volume brings together a number of research studies on various aspects of how pupils cope with schools. The theoretical papers consider amongst other issues a developmental model of the growth of pupil strategies based on primary and secondary socialisation; a discussion of 'interactionist empiricism' which argues for co-ordinated research between micro and macro perspectives and an extended overview of the general sociological background of work on teacher and pupil strategies. The empirical articles consider a number of themes ranging from strategies employed in answering teacher questions to the power and influence of the pupil peer group in the development of attitudes and behaviour.

An Anthology of Australian Albums Jon Stratton, Jon Dale, Tony Mitchell, 2020-01-09 An Anthology of Australian Albums offers an overview of Australian popular music through the lens of significant, yet sometimes overlooked, Australian albums. Chapters explore the unique qualities of each album within a broader history of Australian popular music. Artists covered range from the older and non-mainstream yet influential, such as the Missing Links, Wendy Saddington and the Coloured Balls, to those who have achieved very recent success (Courtney Barnett, Dami Im and Flume) and whose work contributes to international pop music (Sia), to the more exploratory or experimental (Curse ov Dialect and A.B. Original). Collectively the albums and artists covered contribute to a view of Australian popular music through the non-canonical,

emphasizing albums by women, non-white artists and Indigenous artists, and expanding the focus to include genres outside of rock including hip hop, black metal and country.
