*The Veiled Web* Catherine Asaro.2022-09-27 “A near-future layering of East and West, of religion and technology . . . and of love and its loss—all woven into an intriguing tapestry.” —Diana Gabaldon, bestselling author of the Outlander series Winner of the Homer Award for Best Science Fiction Novel A renowned prima ballerina, Lucia del Mar is far more comfortable expressing herself through dance than with words. Shy and introverted, she spends most of her spare time on her laptop. Still, Lucia’s job forces her out of her comfort zone, which is how she winds up at a White House reception where she meets Rashid al-Jazari, the wealthy CEO of a multinational corporation. Although attracted to him, Lucia can’t help but feel awkward and shrugs off their encounter as a one-time event. Not realizing he feels a similar attraction, she never imagines Rashid will seek out her performances; he is the last person she expects to see when her dance company travels to Italy. Their reunion takes an even more unexpected turn when they’re both drugged and kidnapped. Although they overcome their abductors, it leaves them stranded in North Africa. For her own safety, Lucia agrees to marry Rashid, at least for the time being. As she recovers at his family compound in Morocco, reeling from their brush with danger, she struggles to fit into a culture she knows nothing about—and to deal with her growing feelings for Rashid. At the same time, at his secret office there, Rashid is developing a dramatic leap forward in artificial intelligence combined with virtual reality. He finds himself plunged into a fight for control of his work against powerful international forces, and caught in the middle, Lucia is swept

into that battle . . . “A terrific novel, ripping a path from today’s headlines to tomorrow’s realities.” —Robert J. Sawyer, Nebula Award-winning author

**The UK low carbon transition plan** Great Britain: Department of Energy and Climate Change.2009-07-15 This White Paper sets out the UK's transition plan to 2020 for becoming a low carbon country: cutting emissions, maintaining secure energy supply, maximising economic opportunities and protecting the most vulnerable. The plan will deliver emission cuts of 18 per cent on 2008 levels. Key steps include: all government departments to have carbon budgets; 40 per cent of energy from low carbon sources including 30 per cent of energy from renewables; funding of four demonstrations of capturing and storing emissions from coal power stations; new nuclear power stations. Home will be made greener by: £3.2 billion to help households become more energy efficient; rolling out smart meters to all homes by 2020; piloting pay as you save schemes; introducing clean energy cash-back schemes; a competition for 15 towns and villages to be pioneers in green innovation. Vulnerable sections of society will be helped by: mandated social price support; piloting a community-based approach to delivering green homes in low income areas, helping around 90,000 homes; increasing Warm Front grants. The greening of industry will be addressed through support for development and use of clean technologies, including £120 million in offshore wind and £60 million towards marine energy. Transport will be transformed: carbon dioxide emissions from new cars to be cut across the EU by 40 per cent on 2007 levels and increased support for electric cars; sourcing 10 per cent of UK transport energy from renewable sources. A framework for emissions from farming will be developed. Also published are The UK renewable energy strategy (Cm. 7686, ISBN 9780101768627) and Low carbon transport (Cm. 7682, ISBN 9780101768221).

**Information Operations** Joint Forces Staff College (U.S.).2011-09 The modern means of communication have turned the world into an information fishbowl and, in terms of foreign policy and national security in post-Cold War power politics, helped transform international power politics. Information operations (IO), in which time zones are as important as national boundaries, is the use of modern technology to deliver critical information and influential content in an effort to shape perceptions, manage opinions, and control behavior. Contemporary IO differs from traditional psychological operations practiced by nation-states, because the availability of low-cost high technology permits nongovernmental organizations and rogue elements, such as terrorist groups, to deliver influential content of their own as well as facilitates damaging cyber-attacks (hactivism) on computer networks and infrastructure. As current vice president Dick Cheney once said, such technology has turned third-class powers into first-class threats. Conceived as a textbook by instructors at the Joint Command, Control, and Information Warfare School of the U.S. Joint Forces Staff College and involving IO experts from several countries, this book fills an important gap in the literature by analyzing under one cover the military, technological, and psychological aspects of information operations. The general reader will appreciate the examples taken from recent

history that reflect the impact of IO on U.S. foreign policy, military operations, and government organization.

Waste strategy for England 2007 Great Britain: Department for Environment, Food and Rural Affairs.2007-05-24 It has been estimated that if every country consumed natural resources at the rate of the UK, we would need three planets to live on. Given this scenario, reducing waste is a key aspect of sustainable development, breaking the link between economic growth and waste growth. This White Paper sets out the Government's policy for waste management in England, building on the progress made since the Waste Strategy 2000 (Cm. 4693-I, ISBN 9780101469326 and Cm. 4693-II, ISBN 9780101469333) was published in May 2000. The main elements of the new strategy are: i) to incentivise efforts to reduce, re-use and recycle waste and recover energy from waste, including increasing the landfill tax escalator and consulting on removing the ban on introducing local household charges to promote waste reduction and recycling; ii) to reform regulation to drive the reduction of waste and diversion from landfill while reducing costs to compliant businesses and the regulator, including introducing waste protocols, consulting on the introduction of further restrictions on the landfilling of biodegradable wastes or recyclable materials, and ensuring effective action on flytipping and on illegal dumping abroad; iii) to target action on materials, products and sectors with the greatest scope for improving environmental and economic outcomes, including promoting producer responsibility through setting packaging standards to reduce excess packaging; iv) stimulate investment in collection, recycling and recovery infrastructure, and markets for recovered materials to maximise their energy value; and v) to improve national, regional and local governance, with a clearer performance and institutional framework to deliver better co-ordinated action and services on the ground, including the establishment of a Defra-led Waste Strategy Board to provide leadership within and across government.

The Coming Crisis Victor A. Utgoff.2000 How will continued proliferation of nuclear weapons change the global political order? This collection of essays comes to conclusions at odds with the conventional wisdom. Stephen Rosen and Barry Posen explore how nuclear proliferation may affect US incentives to confront regional aggression. Stephen Walt argues that regional allies will likely prove willing to stand with a strong and ready United States against nuclear-backed aggression. George Quester and Brad Roberts examine long-term strategic objectives in responding to nuclear attack by a regional aggressor. Richard Betts highlights the potential for disastrous mistakes in moving toward and living in a world heavily populated with nuclear-armed states. Scott Sagan explains how the nuclear nonproliferation policies best suited to some states can spur proliferation by others. Caroline Ziemke shows how the analysis of a state's strategic personality can provide insights into why it might want nuclear weapons and how its policies may develop once it gets them. And, Victor Utgoff concludes that the United States seems more likely to intervene against regional aggression when the aggressor has nuclear weapons than when it does not.

Planning and Pollution Control Great Britain. Office of the Deputy Prime Minister.2004 This planning policy statement

applies to England only and replaces extant parts of PPG 23 (1994), Planning and Pollution Control (ISBN 0117529478), which is hereby cancelled. The policies set out in this statement and the advice provided in the annexes (Annex 1 Pollution control, air and water quality (ISBN 0117539317) and Annex 2 Development of land affected by contamination (ISBN 0117539325)), should be taken into account by Regional Planning Bodies and Local Planning Authorities when preparing any development plans. The document also explains the advice, as set out in the statement; government policies on planning and pollution control, and on land affected by contamination; an appendix detailing matters for consideration in preparing local development documents and taking decisions on individual planning applications.

*Sustainable Development in Rural Areas* Great Britain. Office of the Deputy Prime Minister.2004 Sustainable development is the core principle underpinning land use planning. The policies in this statement apply to the rural areas, including country towns and villages and the wider, largely undeveloped countryside up to the fringes of larger urban areas. The key principles identified are: (i) decisions on development should be based on sustainable development principles; (ii) good quality accessible development within towns and villages should be allowed where it benefits the local community; (iii) accessibility should be a key consideration, with emphasis on access by public transport, walking and cycling; (iv) new building in the open countryside away from existing settlements should be strictly controlled; (v) priority should be given to the reuse of brownfield sites. This PPS replaces PPG 7 (1997) with the exception of PPG7's Annex E, which provides further guidance on permitted development rights for agriculture and forestry and will remain extant pending a review by ODPM of the General Permitted Development Order 1995.

Make Projects Duane Wessels, Matthew Weaver. 2008 Shoebox sized and smaller, small form factor PCs can pack as much computing muscle as anything from a PDA to a full-sized desktop computer. They consume less power, have few or no moving parts, and are very quiet. Whether you plan to use one as a standalone PC or want to embed it in your next hacking project, a small form factor PC may be the next thing you build. Small Form Factor PCs is the only book available that shows you how to build small form factor PCs -- from kits and from scratch -- that are more interesting and more personalized than what a full-sized PC can give you. Included in the book are projects for building personal video recorders, versatile wireless access points, digital audio jukeboxes, portable firewalls, and much more. This book shows you how to build eight different systems, from the shoebox-sized Shuttle system down to the stick-of-gum sized gumstix. With thorough illustrations and step-by-step instructions, Small Form Factor PCs makes it easy for anyone who wants to get started building these tiny systems.
