Nanopolitics Handbook Nanopolitics Nanopolitics Group.2014-01-15 The invention of new modes of sensibility is vital to enriching and sustaining political engagements, labours and lives in the situated contexts of urban collectivity. The nanopolitics handbook investigates the neoliberal city and workplace, the politics of crisis and austerity, precarious lives and modes of collaboration - through bodies and their encounters. Starting from the exploration of what bodies can do - with curiosity, courage and care - nanopolitics is a proposal for producing new collective subjectivations. Based on the experiments and experiences of the nanopolitics group, this book proposes exercises, concepts and ideas as little maps and machines for action. Drawing on social movements, grassroots organizing, dance, theatre and bodywork, the reflections and practices here present strategies for navigating and reconfiguring the playing field of 'nanopolitics', activating its entanglement with the major politics of our time--Publisher's description

Predicting Species Occurrences J. Michael Scott,Patricia Heglund,Michael L. Morrison.2002-02 Predictions about where different species are, where they are not, and how they move across a landscape or respond to human activities -- if timber is harvested, for instance, or stream flow altered -- are important aspects of the work of wildlife biologists, land managers, and the agencies and policymakers that govern natural resources. Despite the increased use and importance of model predictions, these predictions are seldom tested and have unknown levels of accuracy.Predicting Species Occurrences addresses those concerns, highlighting for managers and researchers the strengths and weaknesses of current approaches, as well as the magnitude of the research required to improve or test predictions of currently used models. The book is an outgrowth of an international symposium held in October 1999 that brought together scientists and researchers at the forefront of efforts to process information about species at different spatial and temporal scales. It is a comprehensive reference that offers an exhaustive treatment of the subject, with 65 chapters by leading experts from around the world that: review the history of the theory and practice of modeling and present a standard terminology examine temporal and spatial scales in terms of their influence on patterns and processes of species distribution offer detailed discussions of state-of-the-

art modeling tools and descriptions of methods for assessing model accuracy discuss how to predict species presence and abundance present examples of how spatially explicit data on demographics can provide important information for managers An introductory chapter by Michael A. Huston examines the ecological context in which predictions of species occurrences are made, and a concluding chapter by John A. Wiens offers an insightful review and synthesis of the topics examined along with guidance for future directions and cautions regarding misuse of models. Other contributors include Michael P. Austin, Barry R. Noon, Alan H. Fielding, Michael Goodchild, Brian A. Maurer, John T. Rotenberry, Paul Angermeier, Pierre R. Vernier, and more than a hundred others. Predicting Species Occurrences offers important new information about many of the topics raised in the seminal volume Wildlife 2000 (University of Wisconsin Press, 1986) and will be the standard reference on this subject for years to come. Its state-of-the-art assessment will play a key role in guiding the continued development and application of tools for making accurate predictions and is an indispensable volume for anyone engaged in species management or conservation.

The Rainbow of Desire Augusto Boal.2013-05-13 Rainbow of Desire is a handbook of exercises with a difference. It is Augusto Boal's bold and brilliant statement about the therapeutic ability of theatre to liberate individuals and change lives. Now translated into English and comprehensively updated from the French, Rainbow of Desire sets out the techniques which help us `see' for the first time the oppressions we have internalised. Boal, a Brazilian theatre director, writer and politician, has been confronting oppression in various forms for over thirty years. His belief that theatre is a means to create the future has inspired hundreds of groups all over the world to use his techniques in a multitude of settings. This, his latest work, includes such exercises as: * The Cops in the Head and their anti-bodies * The screen image * The image of the future we are

afraid of * Image and counter-imageand many more. Rainbow of Desire will make fascinating reading for those already familiar with Boal's work and is also completely accessible to anyone new to Theatre of the Oppressed techniques.

From Song to Book Sylvia Huot.2019-05-15 As the visual representation of an essentially oral text, Sylvia Huot points out, the medieval illuminated manuscript has a theatrical, performative quality. She perceives the tension between implied oral performance and real visual artifact as a fundamental aspect of thirteenth- and fourteenth-century poetics. In this generously illustrated volume, Huot examines manuscript texts both from the performance-oriented lyric tradition of *chanson courtoise*, or courtly love lyric, and from the self-consciously literary tradition of Old French narrative poetry. She demonstrates that the evolution of the lyrical romance and *dit*, narrative poems which incorporate thematic and rhetorical elements of the lyric, was responsible for a progressive redefinition of lyric poetry as a written medium and the emergence of an explicitly written literary tradition uniting lyric and narrative poetics. Huot first investigates the nature of the vernacular book in the thirteenth and fourteenth centuries, analyzing organization, page layout, rubrication, and illumination in a series of manuscripts. She then describes the relationship between poetics and manuscript format in specific texts, including works by widely read medieval authors such as Guillaume de Lorris, Jean de Meun, and Guillaume de Machaut, as well as by lesser-known writers including Nicole de Margival and Watriquet de Couvin. Huot focuses on the writers' characteristic modifications of lyric poetics; their use of writing and performance as theme; their treatment of the poet as singer or writer; and of the lady as implied reader or listener; and the ways in which these features of the text were elaborated by scribes and illuminators. Her readings reveal how medieval poets and book-makers conceived their common project, and how they distinguished their respective roles.

Divination on stage Folke Gernert.2021-02-08 Magicians, necromancers and astrologers are assiduous characters in the European golden age theatre. This book deals with dramatic characters who act as physiognomists or palm readers in the fictional world and analyses the fictionalisation of physiognomic lore as a practice of divination in early modern Romance theatre from Pietro Aretino and Giordano Bruno to Lope de Vega, Calderón de la Barca and Thomas Corneille.

Amériques Transculturelles Afef Benessaïeh.2010-03-03 La transculturalité constitue une nouvelle façon de concevoir les cultures, c'est-à-dire non plus comme des îlots distincts, mais plutôt comme des réseaux interactifs de sens et de pratiques. Ces identités transculturelles qui n'entrent pas aisément dans le seul moule d'une nation ou d'une ethnie abondent particulièrement dans les Amériques, par exemple les Chicanos, les Franco-Ontariens, les Créoles et les immigrants de deuxième et de troisième génération. De Québec à l'Argentine, cet ouvrage se penche sur ces identités qui se construisent au carrefour de la similitude et de la différence. -- Transculturality is a new way of viewing culture that sees cultures not as separate islands that are easily differentiated from one another, but as connected and interacting webs of meaning and

practice. The Americas in particular offer many examples of transcultural identities that do not fit easily into one national or ethnic mold: Chicanos, Franco-Ontarians, Creoles, and second and third generation immigrants. From Quebec to Argentina, this volume explores these identities which create themselves in a space between sameness and difference.

Divining Slavery and Freedom João José Reis.2015-04-20 Since its original publication in Portuguese in 2008, this first English translation of *Divining Slavery* has been extensively revised and updated, complete with new primary sources and a new bibliography. It tells the story of Domingos Sodré, an African-born priest who was enslaved in Bahia, Brazil in the nineteenth century. After obtaining his freedom, Sodré became a slave owner himself, and in 1862 was arrested on suspicion of receiving stolen goods from slaves in exchange for supposed 'witchcraft'. Using this incident as a catalyst, the book discusses African religion and its place in a slave society, analyzing its double role as a refuge for blacks as well as a bridge between classes and ethnic groups (such as whites who attended African rituals and sought help from African diviners and medicine men). Ultimately, *Divining Slavery* explores the fluidity and relativity of conditions such as slavery and freedom, African and local religions, personal and collective experience and identities in the lives of Africans in the Brazilian diaspora.

Sounding the Cape Denis Martin.2013 For several centuries Cape Town has accommodated a great variety of musical genres which have usually been associated with specific population groups living in and around the city. Musical styles and genres produced in Cape Town have therefore been assigned an identity which is first and foremost social. This volume tries to question the relationship established between musical styles and genres, and social - in this case pseudo-racial - identities. In *Sounding the Cape*, Denis-Constant Martin recomposes and examines through the theoretical prism of creolisation the history of music in Cape Town, deploying analytical tools borrowed from the most recent studies of identity configurations. He demonstrates that musical creation in the Mother City, and in South Africa, has always been nurtured by contacts, exchanges and innovations whatever the efforts made by racist powers to separate and divide people according to their origin. Musicians interviewed at the dawn of the 21st century confirm that mixture and blending characterise all Cape Town’s musics. They also emphasise the importance of a rhythmic pattern particular to Cape Town, the ghoema beat, whose origins are obviously mixed. The study of music demonstrates that the history of Cape Town, and of South Africa as a whole, undeniably fostered creole societies. Yet, twenty years after the collapse of apartheid, these societies are still divided along lines that combine economic factors and racial categorisations. Martin concludes that, were music given a greater importance in educational and cultural policies, it could contribute to fighting these divisions and promote the notion of a nation that, in spite of the violence of racism and apartheid, has managed to invent a unique common culture.

Games for Actors and Non-Actors Augusto Boal.2005-06-29 Games for Actors and Non-Actors is the classic and best selling book by the founder of Theatre of the Oppressed, Augusto Boal. This thoroughly updated and substantially revised second edition includes: two new essays by Boal on major recent projects in Brazil Boal's description of his work with the Royal Shakespeare Company a revised introduction and translator's preface a collection of photographs taken during Boal's workshops, commissioned for this edition new reflections on Forum Theatre.

Elements of Structural Syntax Lucien Tesnière.2015-02-11 This volume appears now finally in English, sixty years after the death of its author, Lucien Tesnière. It has been translated from the French original into German, Spanish, Italian, and Russian, and now at long last into English as well. The volume contains a comprehensive approach to the syntax of natural languages, an approach that is foundational for an entire stream in the modern study of syntax and grammar. This stream is known today as dependency grammar (DG). Drawing examples from dozens of languages, many of which he was proficient in, Tesnière presents insightful analyses of numerous phenomena of syntax. Among the highlights are the concepts of valency and head-initial vs. head-final languages. These concepts are now taken for granted by most modern theories of syntax, even by phrase structure grammars, which represent, in a sense, the opposite sort of approach to syntax from what Tesnière was advocating. Legislative Theatre Augusto Boal.2005-07-28 Augusto Boal's reputation is now moving beyond the realms of theatre and drama therapy, bringing him to the attention of a wider public. Legislative Theatre is the latest and most remarkable stage in his work. 'Legislative Theatre' is an attempt to use Boal's method of 'Forum Theatre' within a political system to create a truer form of democracy. It is an extraordinary experiment in the potential of theatre to affect social change. At the heart of his method of Forum Theatre is the dual meaning of the verb 'to act': to perform and to take action. Forum Theatre invites members of the audience to take the stage and decide the outcome, becoming an integral part of the performance. As a politician in his native Rio de Janeiro, Boal used Forum Theatre to motivate the local populace in generating relevant legislation. In Legislative Theatre Boal creates new, theatrical, and truly revolutionary ways of involving everyone in the

democratic process. This book includes: * a full explanation of the genesis and principles of Legislative Theatre * a description of the process in operation in Rio * Boal's essays, speeches and lectures on popular theatre, Paulo Freire, cultural activism, the point of playwrighting, and much else besides.

Rethinking Architecture Neil Leach.2005-12-20 Brought together for the first time - the seminal writing on architecture by key philosophers and cultural theorist of the twentieth century. Issues around the built environment are increasingly central to the study of the social sciences and humanities. The essays offer a refreshing take on the question of architecture and provocatively rethink many of the accepted tenets of architecture theory from a broader cultural perspective. The book represents a careful selection of the very best theoretical writings on the ideas which have shaped our cities and our experiences of architecture. As such, Rethinking Architecture provides invaluable core source material for students on a range of courses.

Global History and New Polycentric Approaches Manuel Perez Garcia, Lucio De Sousa.2017-12-06 This book is open access under a CC BY 4.0 license. Rethinking the ways global history is envisioned and conceptualized in diverse countries such as China, Japan, Mexico or Spain, this collection considers how global issues are connected with our local and national communities. It examines how the discipline had evolved in various historiographies, from Anglo Saxon to southern European, and its emergence in Asia with the rapid development of the Chinese economy motivation to legitimate the current uniqueness of the history and economy of the nation. It contributes to the revitalization of the field of global history in Chinese historiography, which have been dominated by national narratives and promotes a debate to open new venues in which important features such as scholarly mobility, diversity and internationalization are firmly rooted, putting aside national specificities. Dealing with new approaches on the use of empirical data by framing the proper questions and hypotheses and connecting western and eastern sources, this text opens a new forum of discussion on how global history has penetrated in western and eastern historiographies, moving the pivotal axis of analysis from national perspectives to open new venues of global history.

One Hundred Years of Solitude Gabriel García Márquez.2022-10-11 One of the twentieth century's enduring works, *One Hundred Years of Solitude* is a widely beloved and acclaimed novel known throughout the world and the ultimate achievement in a Nobel Prize-winning career. The novel tells the story of the rise and fall of the mythical town of Macondo through the history of the Buendía family. Rich and brilliant, it is a chronicle of life, death, and the tragicomedy of humankind. In the beautiful, ridiculous, and tawdry story of the Buendía family, one sees all of humanity, just as in the history, myths, growth, and decay of Macondo, one sees all of Latin America. Love and lust, war and revolution, riches and

poverty, youth and senility, the variety of life, the endlessness of death, the search for peace and truth—these universal themes dominate the novel. Alternately reverential and comical, *One Hundred Years of Solitude* weaves the political, personal, and spiritual to bring a new consciousness to storytelling. Translated into dozens of languages, this stunning work is no less than an account of the history of the human race.

Where is the Field? Laura Hirvi, Hanna Snellman. 2018-03-02 The book sheds light on the experiences of immigrants in different parts of the world and other insightful reflections on the art of carrying out fieldwork in the present day, when the task of locating the 'field' seems to present a particular challenge for researchers. This book is of interest to experienced ethnographers working in the discipline of migration studies and also to scholars conducting ethnographic research in other fields.

Mexico at the World's Fairs Mauricio Tenorio-Trillo. 2018-06-01 This intriguing study of Mexico's participation in world's fairs from 1889 to 1929 explores Mexico's self-presentation at these fairs as a reflection of the country's drive toward nationalization and a modernized image. Mauricio Tenorio-Trillo contrasts Mexico's presence at the 1889 Paris fair—where its display was the largest and most expensive Mexico has ever mounted—with Mexico's presence after the 1910 Mexican Revolution at fairs in Rio de Janeiro in 1922 and Seville in 1929. Rather than seeing the revolution as a sharp break, Tenorio-Trillo points to important continuities between the pre- and post-revolution periods. He also discusses how, internationally, the character of world's fairs was radically transformed during this time, from the Eiffel Tower prototype, encapsulating a wondrous symbolic universe, to the Disneyland model of commodified entertainment. Drawing on cultural, intellectual, urban, literary, social, and art histories, Tenorio-Trillo's thorough and imaginative study presents a broad cultural history of Mexico from 1880 to 1930, set within the context of the origins of Western nationalism, cosmopolitanism, and modernism. Rio 2016 Andrew Zimbalist.2017-09-12 A clear-eyed, critical examination of the social, political, and economic costs of hosting the 2016 summer Olympics The selection of Rio de Janeiro as the site of the summer 2016 Olympic Games set off jubilant celebrations in Brazil—and created enormous expectations for economic development and the advancement of Brazil as a major player on the world stage. Although the games were held without major incident, the economic, environmental, political, and social outcomes for Brazil ranged from disappointing to devastating. Corruption scandals trimmed the fat profits that many local real estate developers had envisioned, and the local government was driven into bankruptcy. At the other end of the economic spectrum, some 77,000 residents of Rio's poorest neighborhoods—the favelas—were evicted and forced to move, in many cases as far as 20 or 30 miles to the west. Hosting the games ultimately cost Brazil \$20 billion, with little positive to show for the investment. Rio 2016 assembles the views of leading experts on Brazil and the Olympics into a clear-eyed assessment of the impact of the games on Brazil in general and on the lives of Cariocas, as Rio's residents are known. Edited by sports economist Andrew Zimbalist, the other contributors include Juliana Barbassa, Jules Boykoff, Jamil Chade, Stephen Essex, Renata Latuf, and Theresa Williamson.

Democratization in Morocco Lise Storm.2007-10-29 This book explores the political games of the Moroccan democratization process in the period from independence in 1956 until 2006. By combining a great degree of political theory with empirical material on Morocco, it analyzes the strategies and actions of the various political actors and evaluates the level of democracy present in the country after the adoption of new constitutions in 1962, 1970, 1972, 1980, 1992 and 1996. Lise Storm demonstrates that in at least some instances, democratization has been more than simply a survival strategy - every so often, key figures within the political elite have taken the democratization process further than strictly needed for them to stay in power. In the case of Morocco, it has been the monarch who on more than one occasion has moved the country further towards the democratic ideal than he necessarily had to, and that sometimes even against the wishes of one or more of the established political parties. This book illustrates how the Moroccan political parties, like so many of their counterparts in the region, have become the main obstacle to further democratization as most of them have never honoured - or appear to have abandoned - the key function of political parties: popular representation. Democratization in Morocco will be a very valuable contribution to students and researchers interested in the dynamics behind the Moroccan democratization and the role of electoral politics in North African and Middle Eastern politics.

Global History with Chinese Characteristics Manuel Perez-Garcia.2020-11-02 This open access book considers a pivotal era in Chinese history from a global perspective. This book's insight into Chinese and international history offers timely and challenging perspectives on initiatives like "Chinese characteristics", "The New Silk Road" and "One Belt, One Road" in broad historical context. *Global History with Chinese Characteristics* analyses the feeble state capacity of Qing China questioning the so-called "High Qing" (shèng qīng 盛清) era's economic prosperity as the political system was set into a "power paradox" or "supremacy dilemma". This is a new thesis introduced by the author demonstrating that interventionist states entail weak governance. Macao and Marseille as a new case study aims to compare Mediterranean and South China markets to provide new insights into both modern eras' rising trade networks, non-official institutions and interventionist impulses of autocratic states such as China's Qing and Spain's Bourbon empires.
