*Sociology of Love* Gennaro Iorio,2020-10-06 This short book deals with a sociological concept: love-agape. It is an attempt to demonstrate that love-agape resists, indeed insists, as a fact that cannot be reduced or concealed. Its simple goal is to introduce agape into the vocabulary of sociological analysis by demonstrating its potential to demarcate and to interpret social phenomena. Love-agape is presented as a critical concept. On the one hand, love-agape denounces the risks linked to the needs of closed groups, often absolutist and fundamentalist. On the other hand, it represents a concrete reality, lying at the root of a particular type of sociality. A sociality that, rather unconventionally, recognizes differences and distances, but also characterizes their condition of being together, as community founded on the recognition and respect of subjectivity.

*The Constitution of Society* Anthony Giddens,2013-06-28 Anthony Giddens has been in the forefront of developments in social theory for the past decade. In *The Constitution of Society* he outlines the distinctive position he has evolved during that period and offers a full statement of a major new perspective in social thought, a synthesis and elaboration of ideas touched on in previous works but described here for the first time in an integrated and comprehensive form. A particular feature is Giddens's concern to connect abstract problems of theory to an interpretation of the nature of empirical method in the social sciences. In presenting his own ideas, Giddens mounts a critical attack on some of the more orthodox sociological views. *The Constitution of Society* is an invaluable reference book for all those concerned with the basic issues in contemporary social theory.

*The Division of Labor in Society* Émile Durkheim,2013 mile Durkheim is often referred to as the father of sociology. Along with Karl Marx and Max Weber he was a principal architect of modern social science and whose contribution helped established it as an academic discipline. *The Division of Labor in Society*, published in 1893, was his first major contribution to the field and arguably one his most important. In this work Durkheim discusses the construction of social order in modern societies, which he argues arises out of two essential forms of solidarity, mechanical and organic. Durkheim further examines how this social order has changed over time from more primitive societies to advanced industrial ones. Unlike Marx, Durkheim does not argue that class conflict is inherent to the modern Capitalistic society. The division of labor is an essential component to the practice of the modern capitalistic system due to the increased economic efficiency that can arise out of specialization; however Durkheim acknowledges that increased specialization does not serve all interests equally well. This important and foundational work is a must read for all students of sociology and economic philosophy.

*A Sociology of Ireland* Hilary Tovey,Perry Share,2003 Reflects recent social developments with new chapters on Civil Society, Popular Culture and Everyday Life Has a strong central argument related to the nature of Irish society Looks at Ireland's positioning in a globalising world Considers a wide range of aspects of the social structure and culture Written in an accessible and interesting style Includes a comprehensive bibliography of Irish and overseas references Suitable for Sociology courses in Irish universities and Institutes of Technology at both undergraduate and postgraduate level including general arts programmes, applied social studies, social studies/social work.

*The Warfare between Science & Religion* Jeff Hardin,Ronald L Numbers,Ronald A. Binzley,2018-10-15 A “very welcome volume” of essays questioning the presumption of irreconcilable conflict between science and religion (*British Journal for the History of Science*). The “conflict thesis”—the idea that an inevitable, irreconcilable conflict exists between science and religion—has long been part of the popular imagination. *The Warfare between Science and Religion* assembles a group of distinguished historians who explore the origin of the thesis, its reception, the responses it drew from various faith traditions,

and its continued prominence in public discourse. Several essays examine the personal circumstances and theological idiosyncrasies of important intellectuals, including John William Draper and Andrew Dickson White, who through their polemical writings championed the conflict thesis relentlessly. Others consider what the thesis meant to different religious communities, including evangelicals, liberal Protestants, Roman Catholics, Eastern Orthodox Christians, Jews, and Muslims. Finally, essays both historical and sociological explore the place of the conflict thesis in popular culture and intellectual discourse today. Based on original research and written in an accessible style, the essays in *The Warfare between Science and Religion* take an interdisciplinary approach to question the historical relationship between science and religion, and bring much-needed perspective to an often-bitter controversy. Contributors include: Thomas H. Aechtner, Ronald A. Binzley, John Hedley Brooke, Elaine Howard Ecklund, Noah Efron, John H. Evans, Maurice A. Finocchiaro, Frederick Gregory, Bradley J. Gundlach, Monte Harrell Hampton, Jeff Hardin, Peter Harrison, Bernard Lightman, David N. Livingstone, David Mislin, Efthymios Nicolaidis, Mark A. Noll, Ronald L. Numbers, Lawrence M. Principe, Jon H.
