When Mammoths Walked the Earth Caroline Arnold,2002 Describes the physical characteristics, known habits, and fossil sites of mammoths, prehistoric animals closely related to the elephant.

Mammoths of the Great Plains Eleanor Arnason,2010-05-01 When President Thomas Jefferson sent Lewis and Clark to

explore the West, he told them to look especially for mammoths. Jefferson had seen bones and tusks of the great beasts in Virginia, and he suspected—he hoped!—that they might still roam the Great Plains. In Eleanor Arnason’s imaginative alternate history, they do: shaggy herds thunder over the grasslands, living symbols of the oncoming struggle between the Native peoples and the European invaders. And in an unforgettable saga that soars from the badlands of the Dakotas to the icy wastes of Siberia, from the Russian Revolution to the AIM protests of the 1960s, Arnason tells of a modern woman’s struggle to use the weapons of DNA science to fulfill the ancient promises of her Lakota heritage. PLUS: “Writing SF During World War III,” and an Outspoken Interview that takes you straight into the heart and mind of one of today’s edgiest and most uncompromising speculative authors.

Mammoth John Varley, 2006 Stumbling upon a perfectly frozen woolly mammoth in the northern wilds of Canada, a mammoth hunter is stunned when he also finds the mummified body of a Stone Age man, dating from around 12,000 years ago, wearing a modern-day wristwatch. Reprint.

Mammoth Heather Amery, 1996 Describes the physical characteristics and habits of the prehistoric ancestor of the elephant and discusses why it may have become extinct.

Woolly Mammoth Ron Wilson, 1984 Presents information on this Ice Age creature and follows a young mammoth through his first year to his first mating.

Woolly Mammoths Melissa Higgins, 2019-05-01 Tusks over 10 feet long made woolly mammoths intimidating ice age animals. Awesome illustrations accompany carefully leveled text about food, habitat, behavior, and extinction, bringing woolly mammoths to life like never before.

Mammoth Science DK, 2020-08-04 David Macaulay's troupe of curious mammoths lead you through the basics of physics, biology, and chemistry in this unconventional and highly original guide to science. From the interior of an atom to the solar system and beyond, the mammoths seek to understand the science! These intrepid science demonstrators will go to incredible lengths to educate and entertain. They wrestle with magnets to understand their powerful force, make mammoth models of different materials explore what gives them mass, and step into an X-ray machine to reveal the bones beneath their woolly exterior. Observing and recording the mammoth's behavior is bestselling illustrator David Macaulay, whose *How Machines Work* won the Royal Society Young People's Book Prize in 2016. Renowned for his ability to explain complex ideas with simple genius, Macaulay captures the oddball humor of his subject matter, making Macaulay's Mammoth Science the

perfect introduction to scientific principles for the young and the young-at-heart.

Woolly Ben Mezrich,2017-07-04 The bestselling author of *The Accidental Billionaires* and *The 37th Parallel* tells the fascinating Jurassic Park-like story of the genetic restoration of an extinct species—the woolly mammoth. “Paced like a thriller...Woolly reanimates history and breathes new life into the narrative of nature” (NPR). With his “unparalleled” (Booklist, starred review) writing, Ben Mezrich takes us on an exhilarating and true adventure story from the icy terrain of Siberia to the cutting-edge genetic labs of Harvard University. A group of scientists work to make fantasy reality by splicing DNA from frozen woolly mammoth into the DNA of a modern elephant. Will they be able to turn the hybrid cells into a functional embryo and potentially bring the extinct creatures to our modern world? Along with this team of brilliant scientists, a millionaire plans to build the world’s first Pleistocene Park and populate a huge tract of the Siberian tundra with ancient herbivores as a hedge against an environmental ticking time bomb that is hidden deep within the permafrost. More than a story of genetics, this is a thriller illuminating the real-life race against global warming, of the incredible power of modern technology, of the brave fossil hunters who battle polar bears and extreme weather conditions, and the ethical quandary of cloning extinct animals. This “rollercoaster quest for the past and future” (Christian Science Monitor) asks us if we can right the wrongs of our ancestors who hunted the woolly mammoth to extinction and at what cost?

Woolly Mammoth Helen Frost,2005 Simple text and illustrations present woolly mammoths, their body parts, and behavior.

How to Clone a Mammoth Beth Shapiro,2020-09-08 An insider's view on bringing extinct species back to life Could extinct species, like mammoths and passenger pigeons, be brought back to life? In *How to Clone a Mammoth*, Beth Shapiro, an evolutionary biologist and pioneer in ancient DNA research, addresses this intriguing question by walking readers through the astonishing and controversial process of de-extinction. From deciding which species should be restored to anticipating how revived populations might be overseen in the wild, Shapiro vividly explores the extraordinary cutting-edge science that is being used to resurrect the past. Considering de-extinction's practical benefits and ethical challenges, Shapiro argues that the overarching goal should be the revitalization and stabilization of contemporary ecosystems. Looking at the very real and compelling science behind an idea once seen as science fiction, *How to Clone a Mammoth* demonstrates how de-extinction will redefine conservation's future.

The Mammoth Mission AQEEL AHMED,2023-05-08 Summary of the story: *The Mammoth Mission* is a heartwarming children's story about a tribe of Mammoths who live in a forest and their journey to protect their home and the creatures that live within it. When the Mammoths notice a dark cloud moving towards them, they set out on a mission to warn the other creatures in the forest. Along the way, they encounter a fairy who offers to help them defeat the evil sorcerer who cast the dark cloud over the forest. The Mammoths show bravery and selflessness as they embark on their journey, facing challenges

and overcoming obstacles to protect their home. With the help of the fairy, they defeat the sorcerer and save the forest from destruction. As a token of her appreciation, the fairy gifts the Mammoths powerful tools to aid them in their future endeavors. With these gifts, the Mammoths become the protectors of the forest and work tirelessly to keep it safe. Years pass, and the Mammoths grow old but continue to patrol the forest, keeping it safe from harm. They become a legend in the forest, inspiring generations to come to become stewards of the environment. In the end, the Mammoths fulfill their mission, leaving behind a legacy of bravery and selflessness. Their story reminds us that even the smallest creatures can make a big difference and that protecting the environment is a responsibility that we all share.

Top of Form Bottom of Form Story Begins: Once upon a time. In a far-off land, where the sun always shone and the breeze was always warm, there lived a tribe of creatures called the Mammoths. These were gentle giants, who roamed the verdant forests that surrounded their home, in search of food and play. They were proud and majestic creatures, with long tusks that curved up towards the sky, and thick, shaggy fur that protected them from the elements. The Mammoths were a peaceful tribe, and they lived in harmony with all the other creatures in the forest. They were known for their kindness and their generosity, and many of the smaller creatures in the forest looked up to them as protectors and friends. The Mammoths had a deep connection to nature and the world around them. They knew every inch of the forest and could navigate through it with ease, using their keen sense of smell and their powerful memories. They understood the seasons and the cycles of nature, and they lived in balance with the land, taking only what they needed and giving back what they could. Despite their size and strength, the Mammoths were not invincible. They faced challenges and dangers in their world, just like any other creature. There were predators in the forest, who saw the Mammoths as a source of food. There were harsh winters, where food and water were scarce, and the Mammoths had to rely on their instincts and their resilience to survive. But the Mammoths were not afraid of these challenges. They faced them head-on, with bravery and courage. They had a deep sense of community, and they looked out for each other, sharing food and resources when times were tough. They knew that they were stronger together than they were alone, and they worked as a team to overcome any obstacle. One of the greatest challenges that the Mammoths faced was the encroachment of humans on their land. As humans began to settle in the nearby valleys, they started to clear the forests, destroying the Mammoths' natural habitat. The Mammoths watched with sadness as their home was destroyed, and they knew that they had to do something to protect themselves and their land. The Mammoths organized themselves into a council, with the wisest and most experienced among them leading the way. They decided that they needed to take action to stop the humans from destroying their home. They began to reach out to other creatures in the forest, forming alliances and building coalitions. Together, the Mammoths and their allies worked to raise awareness about the destruction of the forest. They talked to the humans, trying to reason with them and persuade them to stop cutting down the trees. They organized protests and demonstrations, trying to get the attention of the wider world and bring pressure to bear on humans. The

Mammoths knew that they faced an uphill battle, but they were determined to protect their home. They knew that the forest was not just their home, but the home of countless other creatures as well, and they felt a deep responsibility to protect it. As time went on, the Mammoths and their allies began to make progress. They convinced some of the humans to stop cutting down the trees, and they worked with others to create protected areas within the forest. They continued to raise awareness and to fight for their cause, even in the face of resistance and opposition. Eventually, the humans began to see the error of their ways. They realized that they had been destroying something precious and irreplaceable, and they started to work with the Mammoths and their allies to protect the forest. They set up conservation programs and reforestation projects, and they started to work towards a future where humans and nature could coexist in harmony. The Mammoths watched with pride as their home was restored and protected. They knew that their efforts had made a difference, and they felt a deep sense of satisfaction and gratitude. They had worked tirelessly to protect their home, and their hard work had paid off. Over time, the Mammoths became known as champions of the forest. They were respected and admired by all the creatures in the forest, who saw them as symbols of strength and determination. They continued to live in harmony with nature, cherishing the land that they had fought so hard to protect. Despite the challenges that they had faced, the Mammoths remained optimistic about the future. They knew that there would always be challenges and obstacles to overcome, but they felt confident in their ability to face them with bravery and resilience. The Mammoths were used to spending their days playing and having fun in the forest. They would roam around, grazing on the lush greenery, splashing in the streams, and playing games with each other. They enjoyed the simple pleasures of life and never worried about the future. But one day, something unusual happened. The sky, which was always blue and clear, began to change. It started with a faint haze, which gradually grew thicker and darker. The Mammoths, who were playing a game of tag, paused to look up at the sky. They saw a huge, ominous cloud moving towards them, covering the sun, and casting a deep shadow over the forest. The Mammoths were confused and frightened. They had never seen anything like this before and didn't know what to make of it. They looked at each other, wondering if they should run or hide, but they could not move. The sky continued to darken, and the cloud grew closer and larger. The Mammoths could hear strange rumbling sounds coming from the cloud, and they felt the ground shaking beneath their feet. Suddenly, the cloud burst open, and a fierce storm descended upon the forest. The wind howled, the rain poured down in sheets, and lightning flashed across the sky. The Mammoths huddled together, trying to find shelter from the storm, but there was none.
