

Identifying Factors Affecting Acceptance Of E Procurement

Mila Gascó

An Analysis Into the Factors Affecting the Uptake of Applications of E-procurement, Within the UK Public Sector Daniel J. McConnell, 2009 Electronic procurement (e-procurement) has been widely adopted across the private sector, and as such various aspects of its adoption has been researched. The adoption of e-procurement in the public sector is not as widespread, especially in relation the UK Central and Local Government sectors, and accordingly there has been limited research into the factors affecting the adoption of e-procurement technologies, within this context. Consequently, this study, which has been undertaken with five case study organisations spread across the UK Central and Local Government sectors, aims to add to current published literature, and in particular provide an understanding of the relationship between the factors identified which have affected adoption, and the extent of adoption of e-procurement solutions. This research provides a number of significant contributions to current published literature including a comprehensive definition and conceptualisation of e-procurement and a holistic research framework which facilitates understanding the relationships between the level of adoption by the case study organisations and the factors affecting their decisions. Additionally, this study demonstrates that there is a high degree of commonality between the case study organisations in terms of their levels of adoption, and the factors that have affected such adoption. Of these factors, there are four that are particularly important, as they haven't previously attracted much attention in the literature. More specifically, this research highlights the importance of understanding an organisation's procurement landscape, the impact (both negative and positive) of public policy on adoption, the impact of enhanced organisational standing and the need for vision and leadership from senior stakeholders.

State, Institutions and Democracy Norman Schofield, Gonzalo Caballero, 2016-10-25 This book presents a set of original and innovative contributions on state, institutions and democracy in the field of political economy. Modern political economy has implied the interaction between politics and economics to understand political, electoral and public issues in different nations, and in this volume a group of leading political economists and political scientists from Europe, America and Asia provides theoretical advances, modelling and case studies on main topics in political economy. The analysis of the role and performance of politics and democracy in diverse nations implies the study of the organization of the state, lobbying,

political participation, public policies, electoral politics, public administration and the provision of public services. This book provides advances in the research frontier of these topics and combines historical evidence, institutional analysis, mathematical models and empirical analysis in an interdisciplinary approach. Political and social scientists, economists and those interested in the performance of states, democracy and elections can find new research results in this volume.

Leadership, Management, and Adoption Techniques for Digital Service Innovation Sandhu, Kamaljeet,2019-12-27 There are many advantages to incorporating digital services in business, including improved data management, higher transparency, personalized customer service, and cost reduction. Innovation is a key driver to how digital services are formed, developed, delivered, and used by consumers, employees, and employers. The largest differentiator comes from having a digitally empowered workforce. Companies increasingly need digital workers to establish greater digital skills to bear on every activity. Business leaders especially need to steer digital priorities, drive innovation, and develop digital platforms. Leadership, Management, and Adoption Techniques for Digital Service Innovation is an essential reference source that discusses the adoption of digital services in multiple industries and presents digital technologies to address and further advance innovation to drive successful solutions. Featuring research on topics such as cloud computing, digital business, and value creation, this book is ideally designed for managers, leaders, executives, directors, IT consultants, academicians, researchers, industry professionals, students, and practitioners.

Technology Development and Platform Enhancements for Successful Global E-Government Design Bwalya, Kelvin Joseph,2013-12-31 While electronic research has developed in many governments around the world, the majority of its research has focused on the supply and demand aspects of e-government instead of the focus on technology integration for successful e-government design. Technology Development and Platform Enhancements for Successful Global E-Government Design compiles the shared experiences of e-government designers and practitioners with a focus on technological design. By highlighting the different technological nuances that need to be incorporated into successful e-government designs, this book is a useful tool for professionals and researchers concerned with the organizational development in different types of e-government communities and environments.

E-Procurement Success Jason R. Eaton,2003-03-01 The Air Force currently funds projects chartered with studying and developing e-Procurement systems. Through review and analysis of various e- Procurement projects, factors attributing to successful implementation of e- Procurement systems will be deduced and provided as a useful guide for federal agencies initiating e-Procurement projects. By identifying critical success factors this research should: 1) improve preimplementation planning, 2) improve spend decisions, and 3) decrease implementation time by eliminating unnecessary steps. This research

utilized the current literature to identify specific factors important in the e-Procurement implementation process. Once the factors were determined, a survey was developed to measure the factors in organizations with an e-Procurement system. All fifty state governments were contacted to determine if they had implemented e-Procurement systems and, if they responded affirmatively, were surveyed regarding what they have identified as the factors most instrumental in their e-Procurement implementation. The survey looked specifically at six key areas of e-Procurement implementation: 1) technology, 2) management, 3) processes, 4) suppliers, 5) budget, and 6) benefits. Each organization's tangible and intangible benefits were assessed to further substantiate the value organizations should be getting from e-Procurement.

Smart Contracts in UAE Public Procurement. Factors Influencing Adoption and Policy Implications Moazam Ali, 2024-06-18 Doctoral Thesis / Dissertation from the year 2024 in the subject Business economics - Project Management, grade: 3.7, British University in Dubai, course: Project Management, language: English, abstract: The purpose of this study is to examine people's perceptions about the use of smart contracts through blockchain technology for public procurement in the United Arab Emirates (UAE). The research integrates the Technology Acceptance Model (TAM), the Technology-Organization-Environment (TOE) framework, and the Innovation Diffusion Theory (IDT) to develop a conceptual framework for understanding the factors that influence the behavioral intention to adopt smart contracts in the public procurement process. The study employs a quantitative research methodology. Data was collected through a survey questionnaire distributed to key stakeholders involved in public procurement, including government officials, suppliers, and citizens. The survey instrument measured constructs such as relative advantage, complexity, trialability, observability, perceived compatibility, perceived enjoyment, technology awareness, perceived risk, perceived efforts, and perceived constraints from suppliers, regulations, and business partners. The findings reveal that relative advantage, trialability, observability, perceived compatibility, perceived enjoyment, and technology awareness have a significant positive influence on the behavioral intention to adopt smart contracts in public procurement. Conversely, complexity, perceived risk, and perceived constraints from suppliers, regulations, and business partners have a significant negative influence on the behavioral intention. The results also indicate that the TAM model moderates the relationships between the various factors and behavioral intention.

E-procurement Dale Neef,2001 In the e-world it is the B2B marketplace. And in the B2B marketplace, the hottest thing-- and the thing most likely to turn companies a profit--is e-procurement. This book provides the platform for establishing a company's eprocurement strategy and the necessary steps that will follow in implementing that strategy.

International Handbook of Public Procurement Khi V. Thai,2017-09-25 Since the 1990s, government at all levels is under increasing pressure to do more with less. However, despite the U.S. government spending about 15 to 20 percent of its GDP on contracts for goods and services, there is a paucity of reference books for public procurement officials and very few textbooks for courses on the subject. Filling this void, the International Handbook of Public Procurement provides the knowledge necessary to understand how procurement works and how to improve the cost-effectiveness of procurement systems. Taking a multidisciplinary approach, the book focuses on the managerial, economic, political, and legal aspects of this topic. It begins with a conceptual framework and highlights various reforms occurring in certain countries. By examining these improvements, readers are able to apply this knowledge to their own strategies. The next section presents selected cases that illustrate the public procurement process, examining systems in various nations including Germany, China, South Africa, Cambodia, Uganda, and Estonia. The book also discusses the rise of electronic procurement systems (E-procurement) and reviews the benefits of these efficient systems. Other topics presented in this comprehensive volume include practical discussions on contract negotiations, bidding, price strategies and cost analysis, and an insightful chapter on the market's response to contract award announcements. A virtual encyclopedia from numerous international experts, this book was assembled by Khi V. Thai, Professor at Florida Atlantic University and Editor of the Journal of Public Procurement. Dr. Thai has provided technical assistance in the area of public procurement to governments across the world. Empowering those on all sides of the issue, this volume dispenses advice valuable to government officials and contractors, as well as providing a comprehensive text for public administration students.

eBusiness & eCommerce Andreas Meier, Henrik Stormer,2009-03-26 This textbook focuses on the members of the digital value chain of eBusiness and eCommerce and dedicates a separate chapter to each member part: eProducts & eServices, eProcurement, eMarketing, eContracting, eDistribution, ePayment, as well as eCustomer Relationship

Management. In addition to business models and business webs, digital procurement and marketing processes are likewise addressed such as electronic negotiation processes, security questions with digital signatures, as well as electronic supplier relationship management and customer relationship management. The topics are described based on explicit procedures and descriptive examples of application. The gradual set-up of an electronic Webshop for DVD's serves as a continuous case study. The book is directed towards students of economics at universities and technical colleges; it is also suitable for executives, project leaders, and company experts who deal with the digital value chain.

Encyclopedia of E-Commerce Development, Implementation, and Management Lee, In, 2016-03-31 The convenience of online shopping has driven consumers to turn to the internet to purchase everything from clothing to housewares and even groceries. The ubiquity of online retail stores and availability of hard-to-find products in the digital marketplace has been a catalyst for a heightened interest in research on the best methods, techniques, and strategies for remaining competitive in the era of e-commerce. The Encyclopedia of E-Commerce Development, Implementation, and Management is an authoritative reference source highlighting crucial topics relating to effective business models, managerial strategies, promotional initiatives, development methodologies, and end-user considerations in the online commerce sphere. Emphasizing emerging research on up-and-coming topics such as social commerce, the Internet of Things, online gaming, digital products, and mobile services, this multi-volume encyclopedia is an essential addition to the reference collection of both academic and corporate libraries and caters to the research needs of graduate-level students, researchers, IT developers, and business professionals. .

Multi-Criteria Decision-Making Models for Website Evaluation Vatansever, Kemal, Akgül, Yakup, 2019-05-15 With almost every business application process being linked with a web portal, the website has become an integral part of any organization. Satisfying the end user's needs is one of the key principles of designing an effective website. Because there are different users for any given website, there are different criteria that users want. Thus, evaluating a website is a multi-criteria decision-making problem in which the decision maker's opinion should be considered for ranking the website. Multi-Criteria Decision-Making Models for Website Evaluation is a critical scholarly resource that covers the strategies needed to evaluate the navigability and efficacy of websites as promotional platforms for their companies. Featuring a wide range of topics including linguistic modelling, e-services, and site quality, this book is ideal for managers, executives, website designers, graphic artists, specialists, consultants, educationalists, researchers, and students.

E-Business Management Michael J. Shaw, 2006-04-11 E-Business Management: Integration of Web Technologies with Business Models contains a collection of articles by leading information systems researchers on important topics related to the development of e-business. The goal is to enhance the understanding of the state of the art in e-business, including the most current and forward-looking research. The book emphasizes both business practices and academic research made

possible by the recent rapid advances in the applications of e-business technology. The book should help graduate students, researchers, and practitioners understand major e-business developments, how they will transform businesses, and the strategic implications to be drawn.
