Research Methods for Student Radiographers Christopher M. Hayre,Xiaoming Zheng,2021-09-27 This book provides an holistic picture of the application of research in radiography and focuses on multivariant methodological approaches and practices. It will provide readers insight into both contemporary and innovative methods within radiography research, backed up with evidence-based literature. This book may also be translated into other health disciplines as it introduces research to the reader by detailing terms that can often be confusing for students. These remain central in understanding the importance of research in radiography and how the generation of new knowledge is obtained. This will be supported with subsequent chapters concerning the literature, formation of research questions and detail the early beginnings of a research proposal. Chapters will include a wide range of topics, such as quantitative and qualitative methodologies and data collection tools pertinent to radiographic research, whilst discussing data analysis and need for rigor. The authors draw from our experiences, published outputs and clinical work, supported with alternate philosophies and methods used in diagnostic radiography. Each chapter will examine the multifaceted use and application of each 'sub-theme' pertinent to research in radiography, which is presented in a single text for students and, perhaps, practitioners. The targeted audience for this book is interdisciplinary but clearly focuses on those studying undergraduate radiography in response to the limited texts

available. We also anticipate it to provide a useful tool for academics delivering undergraduate radiography programmes and those supporting postgraduate research. The key features will: • explore important research approaches and concepts within diagnostic radiography • provide contemporary evidence-based practice regarding mixed method approaches • provide a 'how to guide' for understanding key research principles in a wide range of radiographic settings • evaluate the impact of research on patients and the radiographer-patient relationship Dr. Christopher Hayre is a Senior Lecturer in Diagnostic Radiography at Charles Sturt University in New South Wales, Australia. Dr. Xiaoming Zheng has been teaching medical radiation science courses at Charles Sturt University since 1998.

Hf Antenna Topics Michael Toia,2017-01-10 For the radio amateur. The Old Patriarch K3MT recollects a number of HF antenna topics. Many are about simple antennas made of ordinary wire. A few concern the effects of real dirt close to the antenna and how it reacts with the antenna's pattern. 8 x 10 format. 105 pages.

Practical Antenna Handbook 5/e Joseph Carr,George Hippisley,2011-10-25 THE DEFINITIVE ANTENNA REFERENCE--FULLY REVISED AND EXPANDED! Design and build your own antennas with the help of this unique guide. Updated and revised to provide clear answers to questions frequently asked by hobbyists and electronics technicians, Practical Antenna Handbook, Fifth Edition blends theoretical concepts with hands-on experience--requiring only high school mathematics Reorganized to flow logically from broad physical principles to specific antenna design and construction techniques, the book begins by covering the fundamentals. Then the half-wave dipole is discussed both as an excellent antenna in its own right and as a conceptual tool for predicting the performance of other designs. Transmission line impedance matching techniques--and a companion Smith chart tutorial--lead into must have accessories for tuning, monitoring, and troubleshooting antenna system performance. Other tools, such as antenna modeling software and network analyzer add-ons for PCs and Macs, are addressed, and concluding chapters offer fresh insights into support structures and installation techniques. NEW TOPICS COVERED INCLUDE: Characteristics of all-driven and parasitic arrays Beverages and small MF/HF receiving loops Top-loaded shunt-fed towers and other verticals Theory and design of Yagi beams Effect of real ground on propagation and antenna patterns, impedance, and efficiency Lightning protection and four kinds of ground systems Zoning and restrictive covenants COVERS A WIDE VARIETY OF ANTENNAS: Dipoles and inverted-Vs Quads, delta, and NVIS loops Wire arrays (bobtail curtain, half-square, rhombic) Verticals and shunt-fed towers Rotatable Yagi beams MF/HF receiving antennas (flag, pennant, K9AY, Beverage) Mobile and portable antennas VHF/UHF/microwave antennas And many more GO TO WWW.MHPROFESSIONAL.COM/CARR5 FOR: * Tables of worldwide geographic coordinates and antenna dimensions vs. frequency * Supplier updates * Author's blog * Additional photographs and schematics * Links to tutorials and specialized calculators

Food Process Engineering Dennis R. Heldman,2012-12-06 The Second Edition of Food Process Engineering by Dr. Dennis Heldman, my former student, and co-author Paul Singh, his former student, attests to the importance of the previous edition. In the Foreword to the First Edition, I noted the need for people in all facets of the food processing industry to consider those variables of design of particular importance in engineering for the food processing field. In addition to recognizing the many variables involved in the biological food product being handled from production to consumption, the engineer must oftentimes adapt equations developed for non-biological materials. As more and more research is done, those equations are appropriately modified to be more accurate or new equations are developed specifically for designing to process foods. This Edition updates equations used. This book serves a very important need in acquainting engineers and technologists, particularly those with a mathematics and physics background, with the information necessary to provide a more efficient design to accomplish the objectives. Of prime importance, at present and in the future, is to design for efficient use of energy. Now, it is often economical to put considerably more money into first costs for an efficient design than previously, when energy costs were a much smaller proportion of the total cost of process engineering.

Compendium of Automatic Morse Code Ed Goss,2017-02-28 Trace the evolution of automatic Morse code devices from the early 1800s to today through this informative text and over 1,100 photos. Beginning with an overview of telegraphy and early key history, fifteen sections explore the equipment used to send messages over long distances. Featured are code readers, oscillators, Morse trainers, electronic keyers, single- and dual-lever paddles, portable paddles, automatic mechanical keys, accessories, and more. Each device is presented in text and images, some with classic advertisements; this combination allows the reader to appreciate device development and better understand the thinking that went into the design. Paddle and key maintenance and adjustment are also examined, as well as computer interfacing and use of the Internet. The book also includes the results of patent studies and historical research, with many new findings presented, making it a must-have for collectors, ham operators, or anyone interested in the history of these communication devices.

Inside the Space Ships George Adamski,2018-03-12 What has happened to George Adamski since he wrote the famous incidents in *Flying Saucers Have Landed*? Since the memorable November 20, 1952, when he first made personal contact with a man from another world? Since December 13, 1952 when he was able to make photographs within 100 feet of the same saucer that had brought his original visitor? *Inside The Space Ships* is Adamski's own story of what has happened to him since then. It begins with his first meeting, a few months later, with a second man from another world—his first meeting with one who speaks to him. This second visitor brings him to a Venusian Scout (flying saucer) and this, in turn, brings him to a mother ship. Later he is conveyed in both a Saturnian Scout and a Saturnian mother ship. Adamski tells us what transpires in these space craft and what the men and women from other worlds have told him. Adamski's photographs of flying saucers, originally published in *Flying Saucers Have Landed*, have since become world-famous as other witnesses in other parts of the world have succeeded in taking photographs identical with his. Now, however, in *Inside The Space Ships*, Adamski gives us 16 photographs and illustrations, no longer of Scouts (flying saucers) mostly, but of the great space ships from which they are launched. The main group of these photographs was taken in April, 1955, and neither the photographs nor a description of them has ever been published before.
