

Humans Animals And Society An Introduction To Hum

Aubrey Manning,James Serpell

Animals and Society Margo DeMello,2021-04-13 Human-animal studies is an interdisciplinary field that explores the spaces that animals occupy in human social and cultural worlds. It examines the interactions humans and animals have with each other and the ways animal lives intersect with human societies. Since existing social orders rely on the exploitation of animals to serve human needs, the questions posed by human-animal studies touch upon a wide range of fundamental issues. *Animals and Society* provides a broad overview of this rapidly growing field. Margo DeMello offers students and scholars a holistic and comprehensive picture of the state of inquiry into the relationships that exist between humans and other animals. She considers interactions between animals and humans in social organizations, such as the family, the legal system, and political and religious institutions. A major focus is the social construction of animals in world cultures and the way in which these social meanings are used to reinforce and perpetuate hierarchical human relationships such as racism, sexism, and class privilege. The book also examines how different human groups construct a range of identities for themselves and for others through animals. This second edition of *Animals and Society* is fully updated and expanded throughout, enhancing the book's relevance for student and activist readers alike. It includes many new international examples, all-new case studies, and updated supplementary readings.

Humans, Animals, and Society Nik Taylor,2013 Whereas animals have played a central part in human society over the years, when it comes to the social sciences they have largely been neglected. However, interest in Human & Animal Studies (HAS) has grown exponentially in recent years, giving rise to university and college courses around the world specifically on this compelling and vital subject. Considering topics ranging from the human & animal bond, meat eating, and animals in entertainment, this book presents key concepts in simple and easy-to-understand ways as it covers the breadth of empirical work currently being done in the field. Through an examination of ideas such as anthropocentrism and the social construction of animals, it looks at how animals are symbolically transformed, presented, and re-presented as part of human culture. Ultimately, the book argues that there is nothing natural about our social relations with animals, but that animals are made use of and understood through a human lens. *Humans, Animals, and Society* spans the diverse interests of the HAS community and is necessary reading for students and the general public looking to better understand our relationship with animals.

Human-Animal Studies Margo DeMello,2012-04 An exhaustive listing of books, journals, articles, films, conferences, college programs, organizations, and websites from the new and exciting discipline of Human-Animal studies. The information was gathered by leading academics in the humanities, the social sciences, and the natural sciences--this is the only reference of its kind. This project was completed in conjunction with the book *Teaching the Animal*.

Teaching the Animal Margo DeMello,2010 Split into three sections, *Teaching the Animal* provides in-depth analysis of the nature of the discipline, the resources available, expectations of students and faculty, and a number of sample curricula in the fields of humanities, social sciences, and the natural sciences.

Teaching the Animal Margo DeMello,2010 Originally published as part of: *Teaching the animal: human/animal studies across the disciplines*.

Placing Animals Julie Urbanik,2012 As Julie Urbanik vividly illustrates, non-human animals are central to our daily human lives. We eat them, wear them, live with them, work them, experiment on them, try to save them, spoil them, abuse them, fight them, hunt them, buy and sell them, love them, and hate them. *Placing Animals* is the first book to bring together the historical development of the field of animal geography with a comprehensive survey of how geographers study animals today. Urbanik provides readers with a thorough understanding of the relationship between animal geography and the larger animal studies project, an appreciation of the many geographies of human-animal interactions around the world, and insight into how animal geography is both challenging and contributing to the major fields of human and nature-society geography. Through the theme of the role of place in shaping where and why human-animal interactions occur, the chapters in turn explore the history of animal geography and our distinctive relationships in the home, on farms, in the context of labor, in the wider culture, and in the wild.

Animals and Human Society Colin G. Scanes,Samia Toukhsati,2017-09-18 *Animals and Human Society* provides a solid, scientific, research-based background to advance understanding of how animals impact humans. As a resource for both science and non-science majors (including students planning to major in or studying animal science, pre-veterinary medicine, animal behavior, conservation biology, ecotoxicology, epidemiology and evolutionary biology), the book can be used as a text for courses in *Animals and Human Society* or *Animal Science*, or as supplemental material for an *Introduction to Animal Science*. The book offers foundational background to those who may have little background in animal agriculture and have focused interest on companion animals and horses. Animals have had profound effects on people from the earliest times, ranging from zoonotic diseases, to the global impact of livestock, poultry and fish production, to the influences of human-associated animals on the environment (on extinctions, air and water pollution, greenhouse gases, etc.), to the importance of animals in human evolution and hunter-gatherer communities. The volume introduces livestock production (including poultry and aquaculture) but also includes coverage of companion and lab animals. In addition, animal behavior and animal

perception are covered. It can also function as a reference or recommended reading for a capstone class on ethical and public policy aspects related to animals. This book is likewise an excellent resource for researchers, academics or students newly entering a related field or coming from another discipline and needing foundational information, as well as interested laypersons looking to augment their knowledge on the many impacts of animals in human society. Features research-based and pedagogically sound content, with learning goals and textboxes to provide key information Challenges readers to consider issues based on facts rather than polemics Poses ethical questions and raises overall societal impacts Balances traditional animal science with companion animals, animal biology, zoonotic diseases, animal products, environmental impacts and all aspects of human/animal interaction Includes access to PowerPoints that facilitate easy adoption and/or use for online classes

Human-Animal Studies: History Margo DeMello, Georgina Montgomery, 2010-10-01 One in the series of Human-Animal Studies ebooks produced as a result of the (printed) publication of the definitive HAS handbook, *Teaching the Animal: Human-Animal Studies across the Disciplines*. This chapter focuses on history, includes two course syllabi, and has a full resources section covering all disciplines. Includes *History from Below* by Georgina M. Montgomery and Linda Kalof.

Animals and Human Society Aubrey Manning, James Serpell, 2002-11 Modern society is beginning to re-examine its whole relationship with animals and the natural world. Until recently issues such as animal welfare and environmental protection were considered the domain of small, idealistic minorities. Now, these issues attract vast numbers of articulate supporters who collectively exercise considerable political muscle. Animals, both wild and domestic, form the primary focus of concern in this often acrimonious debate. Yet why do animals evoke such strong and contradictory emotions in people - and do our western attitudes have anything in common with those of other societies and cultures? Bringing together a range of contributions from distinguished experts in the field, *Animals and Society* explores the importance of animals in society from social, historical and cross-cultural perspectives.

Animals and Modern Cultures Adrian Franklin, 1999-03-30 The dramatic transformation of relationships between humans and animals in the 20th century are investigated in this fascinating and accessible book. At the beginning of this century these relationships were dominated by human needs and interests, modernization was a project which was attached to the goal of progress and animals were merely resources to be used on the path towards human fulfilment. These relationships are increasingly being subjected to criticism and a new field of interest in human-animal relationships has opened up. We are now urged to be more sensitive and compassionate to animal needs and interests, to understand their mindedness and how their lives and ours are entangled. This book focuses on social change and animals, it is concerned with how humans relate to animals and how this has changed and why. Moreover, it highlights, through chapters on companion animals, hunting and fishing, animal leisures such as birdwatching and wildlife parks, and the meat and livestock industries, how attitudes and

practices towards animals vary widely according to social class, ethnicity, gender, region and nation.

Social Creatures Clifton P. Flynn, 2008 In more than thirty essays, *Social Animals* examines the role of animals in human society. Collected from a wide range of periodicals and books, these important works of scholarship examine such issues as how animal shelter workers view the pets in their care, why some people hoard animals, animals and women who experience domestic abuse, philosophical and feminist analyses of our moral obligations toward animals, and many other topics.

Humans and Animals: Intersecting Lives and Worlds Anja Höing, Arieahn Matamonasa Bennett, 2019-07-22 Addressing the non-human animal from the standpoint of various social and cultural constructions from a global and multidisciplinary perspective, this volume seeks to draw attention to the complexity of the underlying issues and the manifold dimensions of the animal-human bond.

Affect, Space and Animals Jopi Nyman, Nora Schuurman, 2015-11-19 In recent years, animals have entered the focus of the social and cultural sciences, resulting in the emergence of the new field of human-animal studies. This book investigates the relationships between humans and animals, paying particular attention to the role of affect, space, and animal subjectivity in diverse human-animal encounters. Written by a team of international scholars, contributions explore current debates concerning animal representation, performativity, and relationality in various texts and practices. Part I explores how animals are framed as affective, through four case studies that deal with climate change, human-bovine relationships, and human-horse interaction in different contemporary and historical contexts. Part II expands on the issue of relationality and locates encounters within place, mapping the different spaces where human-animal encounters take place. Part III then examines the construction of animal subjectivity and agency to emphasize the way in which animals are conscious and sentient beings capable of experiencing feelings, emotions, and intentions, and active agents whose actions have meaning for the animals themselves. This book highlights the importance of the ways in which affect enables animal agency and subjectivity to emerge in encounters between humans and animals in different contexts, leading to different configurations. It contributes not only to debates concerning the role of animals in society but also to the epistemological development of the field of human-animal studies.

Human-Animal Studies Kenneth/Joel Shapiro, 2008

Animal Studies: An Introduction Paul Waldau, 2013-02-04 Animal studies is a growing interdisciplinary field that incorporates scholarship from public policy, sociology, religion, philosophy, and many other areas. In essence, it seeks to understand how humans study and conceive of other-than-human animals, and how these conceptions have changed over time, across cultures, and across different ways of thinking. This interdisciplinary introduction to the field boldly and creatively foregrounds the realities of nonhuman animals, as well as the imaginative and ethical faculties that humans must engage to consider our intersection with living beings outside of our species. It also compellingly demonstrates that the

breadth and depth of thinking and humility needed to grasp the human-nonhuman intersection has the potential to expand the dualism that currently divides the sciences and humanities. As the first holistic survey of the field, *Animal Studies* is essential reading for any student of human-animal relationships and for all people who care about the role nonhuman animals play in our society.

Animals and Society Wilkie/Inglis, Rhoda Wilkie, David Inglis, 2006-11-30 Animals are crucial to the functioning of any society: they provide humans with food, labour, raw materials, modes of transport, companionship, scientific knowledge through observation and experimentation, and forms of leisure and entertainment. Given both the wide variety of ways in which animals are involved in human societies, and also the broad range of controversies (from vivisection for scientific and commercial purposes, to factory farming) that have arisen, the study of animals is by its very nature interdisciplinary. Each social scientific discipline has distinctive and interesting things to say about the relations that pertain both historically and in the present day between humans and animals. In subjects such as anthropology and geography, the study of human-animal relations has become in recent years a key area of analysis. Other subjects, such as sociology, are now increasingly recognising the need to put animals firmly on their research agendas. This collection brings together the rich diversity of research work from across the social sciences on the topic of human-animal relations, and also provides overviews of research that has been carried out within particular disciplines in this area.

An Introduction to Human-animal Relationships Clive R. Hollin, 2021 *An Introduction to Human-Animal Relationships* is a comprehensive introduction to the field of human-animal interaction from a psychological perspective across a wide range of themes. Hollin examines the topic of the relationships between humans and animals as seen in owning a companion animal alongside more indirect relationships such as our approaches to eating meat. The core issues under discussion include the moral and ethical issues raised in using animals for entertainment, in therapy, to keep us safe, and in sports such as horse racing. The justifications for hunting and killing animals as sport and using animals in scientific experimentation are considered. The closing chapter looks to the future and considers how conservation and climate change may influence human-animal relationships. This key text brings an important perspective to the field of human-animal studies and will be useful to students and scholars in the fields of psychology, sociology, animal welfare, anthrozoology, veterinary science, and zoology.

Animals & Society: Social science perspectives on human-animal interactions David Inglis, 2006

Our Children and Other Animals Dr Kate Stewart, Dr Matthew Cole, 2014-11-28 Focusing on the socialization of the human use of other animals as resources in contemporary Western society, this book explores the cultural reproduction of human-nonhuman animal relations in childhood. With close attention to the dominant practices through which children encounter animals and mainstream representations of animals in children's culture - whether in terms of the selective

exposure of children to animals as 'pets' or as food in the home or in school, or the representation of animals in mass media and social media - Our Children and Other Animals reveals the interconnectedness of studies of childhood, culture and human-animal relations. In doing so it establishes the importance of human-animal relations in sociology, by describing the sociological importance of animals in children's lives and children in animals' lives. Presenting a new typology of the various kinds of human-animal relationship, this conceptually innovative book constitutes a clear demonstration of the relevance of sociology to the interdisciplinary field of human-animal relations and will appeal to readers across the social sciences with interests in sociology, childhood studies, cultural and media studies and human-animal interaction.

Animals In Human Society Daniel Moorehead, 2015-11-03 Including the work of 12 authors from institutions such as Colorado State University, Frostburg State University, Michigan State University, Salisbury University, Texas Woman's University, University of Birmingham, University of California; Irvine, University of California; Merced, and William Jessup University, Rocklin; California, the collection of essays explores the broad range of animals who share our planet and attempts to recognize our responsibility as humans to take their interests seriously.
