The Construction of Words Geert Booij.2018-04-13 This volume focuses on detailed studies of various aspects of Construction Morphology, and combines theoretical analysis and descriptive detail. It deals with data from several domains of linguistics and contributes to an integration of findings from various subdisciplines of linguistics into a common model of the architecture of language. It presents applications and extensions of the model of Construction Morphology to a wide range of languages. Construction Morphology is one of the theoretical paradigms in present-day morphology. It makes use of concepts of Construction Grammar for the analysis of word formation and inflection. Complex words are seen as constructions, that is, pairs of form and meaning. Morphological patterns are accounted for by construction schemas. These are the recipes for coining new words and word forms, and they motivate the properties of existing complex words. Both schemas and individual words are stored, and hence there is no strict separation of lexicon and grammar. In addition to abstract schemas there are subschemas for subclasses of complex words with specific properties. This architecture of the grammar is in harmony with findings from other empirical domains of linguistics such as language acquisition, word processing, and language change.

Academic Literacy Development Laura-Mihaela Muresan,Concepción Orna-Montesinos.2021-03-11 This edited book brings together an international cast of contributors to examine how academic literacy is learned and mastered in different tertiary education settings around the world. Bringing to the fore the value of qualitative enquiry through ethnographic methods, the authors illustrate in-depth descriptions of genre knowledge and academic literacy development in first and second language writing. All of the data presented in the chapters are original, as well as innovative in the field in terms of content and scope, and thought-provoking regarding theoretical, methodological and educational approaches. The contributions are also representative of both novice and advanced academic writing experiences, providing further insights

into different stages of academic literacy development throughout the career-span of a researcher. Set against the backdrop of internationalisation trends in Higher Education and the pressure on multilingual academics to publish their research outcomes in English, this volume will be of use to academics and practitioners interested in the fields of Languages for Academic Purposes, Applied Linguistics, Literacy Skills, Genre Analysis and Acquisition and Language Education.

The Three-Minute Classroom Walk-Through Carolyn J. Downey, Betty E. Steffy, Fenwick W. English, Larry E. Frase, William K. Poston, Jr..2004-04-20 Change the entire school culture with this collaborative method of supervision! For years, the classic supervision model has frustrated both principals and teachers by fostering superior-subordinate relationships, focusing on teacher conformity rather than growth, or producing checklist data that are irrelevant to the curriculum. The Three-Minute Classroom Walk-Through offers a practical, time-saving alternative that impacts student achievement by cultivating self-reliant teachers who are continuously improving their practice. This method answers principals' key questions: Is the work of my teachers aligned with district curriculum? Are my teachers using research-based best practices? Are they choosing the instructional strategies that will promote student achievement?
