**An Introduction to the Philosophy of Education** Michael Demiashkevich.2012-03-31

*Best Practice in Motivation and Management in the Classroom* Dennis G. Wiseman, Gilbert Hunt.2008 This text offers practical information and vicarious practice for both beginning as well as veteran teachers to become more knowledgeable, skilled, and effective in their work. Through study, application of what has been studied, and the analysis and evaluation of the end result of this application, teachers who care to improve can improve. And, teachers who are already successful in their teaching can be even more successful. Effective teachers are active learners themselves. This text therefore provides a specific context and focus for this active learning in the areas of student motivation and classroom management which are considered critical for best practice in teaching in classrooms today. The book reviews appropriate strategies when responding to specific types of student misbehavior and also discusses zero tolerance policies, expulsion, teaching special students, addressing diversity, violence, school uniforms, and drug abuse as related to management and motivation. It is highlighted with supporting case study examples, question and activity sections by chapter, and a helpful glossary. Also provided is an overview of ten popular models for classroom management with the theorists associated with their development. By reading this book, teachers will get their students to achieve at high levels in demonstrating what they have learned through the application of the most important, intertwined areas of motivation and classroom management.

**The Metaphysics of Education (1914)** Arthur Cary Fleshman.2009-08 This scarce antiquarian book is a facsimile reprint of the original. Due to its age, it may contain imperfections such as marks, notations, marginalia and flawed pages. Because we believe this work is culturally important, we have made it available as part of our commitment for protecting, preserving, and promoting the world's literature in affordable, high quality, modern editions that are true to the original work.

**Philosophical Foundations for the Curriculum** Allen Brent.2018-02-22 In this book, first published in 1978, Allen Brent sets out to explore some of the questions raised by theorists and philosophers regarding curriculum. He starts by investigating whether all knowledge is the product of social conditions of particular times or places, or whether there is some kind of universal framework implicit in the claims to knowledge which men make. He looks at the work of Plato, Newman,

Freire and Hirt and how, each of them in a strikingly different way, they have tried to give us an objective basis for curriculum judgements and how the validity of that basis is attacked by contemporary sociologists of knowledge. This book is aimed primarily at students who are concentrating on the philosophy of education or curriculum theory.

**Exploring Education** Alan R. Sadovnik, Peter W. Cookson, Jr., Susan F. Semel, Ryan W. Coughlan.2017-10-10 This much-anticipated fifth edition of Exploring Education offers an alternative to traditional foundations texts by combining a point-of-view analysis with primary source readings. Pre- and in-service teachers will find a solid introduction to the foundations disciplines -- history, philosophy, politics, and sociology of education -- and their application to educational issues, including school organization and teaching, curriculum and pedagogic practices, education and inequality, and school reform and improvement. This edition features substantive updates, including additions to the discussion of neo-liberal educational policy, recent debates about teacher diversity, updated data and research, and new selections of historical and contemporary readings. At a time when foundations of education are marginalized in many teacher education programs and teacher education reform pushes scripted approaches to curriculum and instruction, Exploring Education helps teachers to think critically about the what and why behind the most pressing issues in contemporary education.

**Curriculum** Allan C. Ornstein, Francis P. Hunkins.2013 The ideal resource for researchers, theoreticians, and practitioners of curriculum; a ready reference for teachers, supervisors, and administrators who participate in curriculum making; and a widely popular text for courses in curriculum planning, development, implementation, and evaluation, this book presents a comprehensive, thoroughly documented, balanced overview of the foundations, principles, and issues of curriculum today. The information presented encourages readers to consider choices and then formulate their own views on curriculum.

**Dare the School Build a New Social Order?** George Sylvester Counts.1978 George S. Counts was a major figure in American education for almost fifty years. Republication of this early (1932) work draws special attention to Counts's role as a social and political activist. Three particular themes make the book noteworthy because of their importance in Counts's plan for change as well as for their continuing contemporary importance: (1) Counts's criticism of child-centered progressives; (2) the role Counts assigns to teachers in achieving educational and social reform; and (3) Counts's idea for the reform of the American economy.

Philosophical Foundations of Education Howard Ozmon,Samuel M. Craver.1990 Presenting breadth and depth of coverage in a highly readable style, the 8th edition of this popular survey text again provides balanced treatment of all the major schools of thought about education. The authors address how philosophical ideas about education developed over time arranging their coverage in chronological order and pay close attention to historical context, while emphasizing each philosophy' s continuing relevance to education today. For each philosophy, they show its application in aims, curriculum, methods, and teaching. Additionally, they critically assess each philosophy, and examine how numerous other scholars view it. The new edition now offers a greater emphasis on women and minorities such as Montessori, De Beauvoir, Greene, DeBois, King, and West.

Philosophy of Education William Hare,John P. Portelli.2013-11-04 Revised and updated with 25 new essays, the fourth

edition of this bestselling collection brings together more than 30 leaders in the field of educational theory. An engaging exploration of the ideas and trends shaping education in today's classrooms, *Philosophy of Education* includes topics on high-stakes testing, consumerism in education, and social justice issues in the classroom. How can we teach students moral values while avoiding indoctrination? How should a teacher deal with controversial issues in the classroom? What role should standards play in education, and who develops those standards? And why is the link between theory and practice in the classroom important in the first place? *Philosophy of Education* provides students, teachers, and administrators with a lively and accessible introduction to the central debates and issues in education today.

**Philosophical Foundations of Education** Howard Ozmon, Samuel M. Craver. 2003 The purpose of this volume is to show how philosophical ideas about education developed over time, with due regard to historical influences and settings, and with an emphasis on how these ideas continue to have relevance for education and life. This book was conceived as an introductory text in the philosophy of education, but it leads students from simple to complex philosophical ideas.

**Issues in African Education** A. Abdi, A. Cleghorn. 2005-11-04 This book addresses major sociological issues in sub-Saharan African education today. Its fourteen contributors present a thoroughly African world-view within a sociology of education theoretical framework, allowing the reader to see where that theory is relevant to the African context and where it is not. Several of the chapters bring a much-needed cultural nuance and critical theoretical perspective to the issues at hand. The sixteen chapters thus aim to be of interest internationally, to those who work in such fields as social and political foundations of comparative and international education, and development studies, including university professors, teacher educators, researchers, school teachers, tertiary education students, consultants and policy makers.

**Philosophical Documents in Education** Tony W. Johnson, Ronald F Reed. 2013-11-01 Basic Approach/Summary For preservice and inservice teachers studying the historical and philosophical foundations of education. An anthology of primary sources that explores the philosophy of teaching and learning through a wide variety of viewpoints throughout history. The introduction to the fourth edition of *Philosophical Documents in Education* asks the simple question, what does it mean to be educated? That simple but profound inquiry is answered throughout the anthology's 16 chapters by both classical and contemporary educators, progressives, and philosophers. Driven by the idea that students can better understand and practice their profession by reading, contemplating, and discussing philosophical and historical literature, this collection of primary sources exposes readers to a wealth of ideas regarding teaching, learning, schooling, and instruction - from ancient texts to modern selections.

*Historical and Philosophical Foundations of Education* Gerald Lee Gutek. 1997 Structured around the biographies of educators, philosophers and world figures, this book combines both a historical overview of world education and a balanced treatment of educational philosophies. It emphasizes the importance of contexts and situations in the development of

educational ideas.

*The Ethics of Educational Leadership* Ronald W. Rebores.2014 This book presents a foundations approach to educational ethics which applies theory to practice using case studies, exercises, discussion statements, and questions. Through the ethical ideas and notions of 20 philosophers and psychologists-from the Ancient Historical Period, the Modern Period, and the Contemporary Historical Period. Through this presentation, tomorrow's educational leaders can evaluate the philosophical ideas of others and use what they discover to develop their own way of approaching their leadership responsibilities. In this new edition, five new chapters deal with the legal aspect of ethics, and how communication creates the milieu within which ethics is practiced.--Publisher's description.

**Contextualizing Teaching** Joe L. Kincheloe,Patrick Slattery,Shirley R. Steinberg.2000 Designed for the Foundations of Education course, this book takes a postmodern approach to the material. Show introduction to professor.

Brain and Culture Bruce E. Wexler.2008-08-29 Research shows that between birth and early adulthood the brain requires sensory stimulation to develop physically. The nature of the stimulation shapes the connections among neurons that create the neuronal networks necessary for thought and behavior. By changing the cultural environment, each generation shapes the brains of the next. By early adulthood, the neuroplasticity of the brain is greatly reduced, and this leads to a fundamental shift in the relationship between the individual and the environment: during the first part of life, the brain and mind shape themselves to the major recurring features of their environment; by early adulthood, the individual attempts to make the environment conform to the established internal structures of the brain and mind. In *Brain and Culture*, Bruce Wexler explores the social implications of the close and changing neurobiological relationship between the individual and the environment, with particular attention to the difficulties individuals face in adulthood when the environment changes beyond their ability to maintain the fit between existing internal structure and external reality. These difficulties are evident in bereavement, the meeting of different cultures, the experience of immigrants (in which children of immigrant families are more successful than their parents at the necessary internal transformations), and the phenomenon of interethnic violence. Integrating recent neurobiological research with major experimental findings in cognitive and developmental psychology—with illuminating references to psychoanalysis, literature, anthropology, history, and politics—Wexler presents a wealth of detail to support his arguments. The groundbreaking connections he makes allow for reconceptualization of the effect of cultural change on the brain and provide a new biological base from which to consider such social issues as culture wars and ethnic violence.

Ethics for Educational Leaders Weldon Beckner.2004 Appropriate to all levels of professional development for educational leaders, this brief book emphasizes the practical application of contrasting philosophical and ethical concepts to realistic educational leadership challenges. Recognizing that educational administrators are required to make decisions in

problem situations without ideal solutions, the major purpose of the book is to provide a philosophical and theoretical base along with practical suggestions and activities to use that foundation in making the best decisions possible in difficult situations. Throughout this book five main objectives are presented to guide the student, emphasizing the practical uses of philosophy and ethics by educational leaders.

**Indigenous Philosophies of Education Around the World** John Petrovic, Roxanne M. Mitchell. 2018-01-12 This volume explores conceptualizations of indigeneity and the ways that indigenous philosophies can and should inform educational policy and practice. Beginning with questions and philosophies of indigeneity itself, the volume then covers the indigenous philosophies and practices of a range of communities—including Sami, Maori, Walpiri, Navajo and Kokama peoples. Chapter authors examine how these different ideals can inform and create meaningful educational experiences for communities that reflect indigenous ways of life. By applying them in informing a philosophy of education that is particular and relevant to a given indigenous community, this study aims to help policy makers and educational practitioners create meaningful educational experiences.

*Philosophical Foundations of Education* Winston C. Thompson. 2023-03-23 This volume introduces philosophy as a foundational discipline of education. Taking a broadly inclusive approach to the branches of philosophy, it offers an accessible yet duly rigorous orientation to the field. Revealing the values, premises, arguments, and conclusions that inform contemporary philosophical discussions of education, this book equips its readers with the conceptual and analytical resources necessary to engage with and make meaningful contributions to that grand discourse for years to come. About the Educational Foundations series: Education, as an academic field taught at universities around the world, emerged from a range of older foundational disciplines. The Educational Foundations series comprises six volumes, each covering one of the foundational disciplines of philosophy, history, sociology, policy studies, economics and law. This is the first reference work to provide an authoritative and up-to-date account of all six disciplines, showing how each field's ideas, methods, theories and approaches can contribute to research and practice in education today. The six volumes cover the same set of key topics within education, which also form the chapter titles: - Mapping the Field - Purposes of Education - Curriculum - Schools and Education Systems - Learning and Human Development - Teaching and Teacher Education - Assessment and Evaluation This structure allows readers to study the volumes in isolation, by discipline, or laterally, by topic, and facilitates a comparative, thematic reading of chapters across the volumes. Throughout the series, attention is paid to how the disciplines comprising the educational foundations speak to social justice concerns such as gender and racial equality.

*Shared Religious Foundations of Education* Hamid Reza Alavi. 2017-05-08 This book is one of the many Islamic publications distributed by Mustafa Organization throughout the world in different languages with the aim of conveying the message of Islam to the people of the world. Mustafa Organization is a registered Organization that operates and is sustained

through collaborative efforts of volunteers in many countries around the world, and it welcomes your involvement and support. Its objectives are numerous, yet its main goal is to spread the truth about the Islamic faith in general and the Shi`a School of Thought in particular due to the latter being misrepresented, misunderstood and its tenets often assaulted by many ignorant folks, Muslims and non-Muslims. Organization's purpose is to facilitate the dissemination of knowledge through a global medium, the Internet, to locations where such resources are not commonly or easily accessible or are resented, resisted and fought!

**Aesthetics and the Philosophy of Art** Robert Stecker.2010-02-16 Praised in its original edition for its up-to-date, rigorous presentation of current debates and for the clarity of its presentation, Robert Stecker's new edition of *Aesthetics and the Philosophy of Art* preserves the major themes and conclusions of the original, while expanding its content, providing new features, and enhancing accessibility. Stecker introduces students to the history and evolution of aesthetics, and also makes an important distinction between aesthetics and philosophy of art. While aesthetics is the study of value, philosophy of art deals with a much wider array of questions including issues in metaphysics, epistemology, the philosophy of mind, as well value theory. Described as a 'remarkably unified introduction to many contemporary debates in aesthetics and the philosophy of art,' Stecker specializes in sympathetically laying bear the play of argument that emerges as competing views on a topic engage each other. This book does not simply present a controversy in its current state of play, but instead demonstrates a philosophical mind at work helping to advance the issue toward a solution.

**Philosophical Documents in Education** Ronald F. Reed,Tony W. Johnson.1996 *Philosophical Documents in Education*, 3/e, masterfully argues that students can better understand and practice their profession by reading, contemplating, and discussing the great philosophic tradition in education. An edited anthology of 18 primary source materials in educational philosophy, this text provides a wide range of both historical and contemporary viewpoints.--BOOK JACKET.

**Issues in Syllabus Design** .2017-11-11 *Issues in Syllabus Design* addresses the major types of syllabuses in language course development and provides readers with the theoretical foundations and practical aspects of implementing syllabuses for use in language teaching programs.

**Enhancing Humanity** N. Aloni.2014-10-09 In Jean PaulSartre's *Nausea*, Roquentin feels bound to listen to the sentimental ramblings about humanism and humanity by the Self Taught Man. Is it my fault, muses Roquentin, in all he tells me, I recognize the lack of the genuine article? Is it my fault if, as he speaks, I see all the humanists I have known rise up? I have known so many ofthem! And then he lists the radical humanist, the so calledleft humanist, and Communist Humanist, the Catholic humanist, all claiming a passion for their fellow men. But there are others, a swarm of others: the humanist philosopher who bends over his brothers like a wise older brother with a sense of his responsibility; the humanist who loves men as they are, the humanist who loves men as they ought to be, the one who wants to save them with their consent, and

the one who will save them in spite of themselves. . . . Quite naturally, the skeptical Roquentin ends by saying how they all hate each other: as individuals, not as men. Fully aware of the misuse and false comfort in the use of the term, Professor Aloni proceeds to restore meaning to the word as well as appropriate its educational significance. There is a freshness in this book, a restoration of a lost clarity, a regaining of authentic commitment.

*Foundations of Education* Samuel M. Craver, Maïke Ingrid Philipsen. 2011-06-30 *Foundations of Education* is organized around the major problems facing contemporary American education. It offers a thorough, scholarly treatment of these problems from historical, philosophical, and sociological perspectives, bringing together relevant findings from those disciplines to analyze and illuminate a wide range of issues. Each chapter focuses on a core topic (including race, gender, equal opportunities, school governance) to give students a solid overview, providing intellectually sound material that offers real depth and challenges students to think creatively. Packed with exercises, discussion questions, international case studies for comparative purposes and supported by a fully up-to-date companion website, this is a text that responds to current developments, changes, and trends in teacher education. *Foundations of Education* will prepare a new generation of educators for a globalized and technology-driven society that needs to be aware of its best educational traditions, its current problems and its future possibilities.
