

Panzer Gunner From My Native Canada To The German

Terrence Booth

Panzer Gunner Bruno Friesen, 2009-07-16 Unique memoir of a Canadian serving in a German armored division What it was like to fight in a tank on the Eastern Front Details on the battlefield performance of the Panzer IV tank Six months before World War II erupted in 1939, Bruno Friesen was sent to Germany by his father in hopes of a better life. Friesen was drafted into the Wehrmacht three years later and ended up in the 7th Panzer Division. Serving as a gunner in a Panzer IV tank and then a Jagdpanzer IV tank destroyer, Friesen experienced intense combat against the Soviets in Romania, Lithuania, and West Prussia.

Panzer Gunner Bruno Friesen, 2008-05-15 The bulk of the book is a detailed account of the author's training, and his subsequent service with 25th Panzer Regiment, part of 7th Panzer Division. Bruno Friesen served as a gunner aboard, initially Panzer IV's, before crewing the lesser-known Jagdpanzer IV tank hunter. Apart from providing a large fund of information about specific German tanks and their combat performance, the author writes in great detail about the combat they experienced on the Eastern Front. If one wants to know how German tank crews fought the Soviets in the last year of the war, then this book provides an outstanding account, containing material simply not found elsewhere.

Panzer Gunner Bruno Friesen, 2008-02-19 An insider's account of training and service in Nazi Germany's twenty-fifth Panzer Regiment during World War II. There are few memoirs available of German Panzer crews that focus on the climactic last 12 months of the war on the Eastern Front, 1944-45. What makes Bruno Friesen's account virtually unique is his family background: his parents came from a German-speaking Mennonite community in Ukraine, and were to all intents and purposes culturally German. To make matters even more complex, in 1924 his parents left the Ukraine for Canada, where Bruno was born. In March 1939 he and his brother Oscar found themselves on a ship bound for Bremerhaven in Germany. He barely spoke German, and had never been to Germany, nevertheless his father envisaged that a better life awaited them in the Third Reich. Needless to say, Bruno became caught up in the Second World War, and in 1942 was drafted into the Wehrmacht. The author provides a full account of his family background, and how, through these unusual circumstances, he found himself a Canadian-born German soldier. The bulk of the book is a detailed account of the author's training, and his subsequent service with 25th Panzer Regiment, part of 7th Panzer Division. As the title suggests, Bruno Friesen served as a gunner aboard, initially, Panzer IVs, before crewing the lesser-known Jagdpanzer IV tank hunter. The author provides a

fantastic amount of information about these two vehicles, and how the crews actually fought in battle with them. This kind of 'hands-on' detail has almost never been available before, particularly such extensive information concerning the characteristics and combat performance of the Jagdpanzer IV. Apart from providing a large fund of information about specific German tanks and their combat performance, the author writes in great detail about the combat the experienced on the Eastern Front, including tank battles in Rumania, spring 1944, Lithuania in the summer of 1944, and West Prussia during early 1945. If one wants to know how German tank crews fought the Soviets in the last year of the war, then this book provides an outstanding account, containing material simply not found elsewhere. The author closes his account by reflecting on his post-war efforts to return to Canada, which eventually succeeded in 1950, and his subsequent life there. This book is not just a critique of armored fighting vehicles and tank warfare, it is above all a very human story, told in a lively, conversational and fluid manner, and is a remarkable contribution to the literature of the Second World War.

Handbook of WWII German Military Symbols & Abbreviations 1943-45 Terrence Booth,2008-03-05 A comprehensive reference guide to German military symbols used on documents, maps, orders of battle and elsewhere. To the uninitiated, German military symbols can appear indecipherable. Yet understanding their meaning is essential to any serious research of the WWII German Armed Forces. This book provides a clear and comprehensive reference to these symbols, as seen in photos, tables of organization and maps for the period May 1943 onwards. The first two parts of the book feature an overview of how the German Armed Forces used the symbols in the field. Parts III, IV and V deal with specific forms and categories of symbols used. The format provides an image of each symbol, accompanied by the relevant German term and its English translation, along with any pertinent information that will aid the reader's understanding of the symbol and the unit that it represented. The final part of the book, containing a list of over 500 abbreviations and their German terms, supplemented by English translations, should prove invaluable to any reader who has more than a passing interest in the Second World War German Armed Forces.

Für Volk and Führer Erwin Bartmann,2013-10-19 Like many Germans, Berlin schoolboy Erwin Bartmann fell under the spell of the Zeitgeist cultivated by the Nazis. Convinced he was growing up in the best country in the world, he dreamt of joining the Leibstandarte, Hitler's elite Waffen SS unit. Tall, blond, blue-eyed, and just seventeen-years-old, Erwin fulfilled his dream on Mayday 1941, when he gave up his apprenticeship at the Glaser bakery in Memeler Strasse and walked into the Lichterfelde barracks in Berlin as a raw, volunteer recruit. On arrival at the Eastern Front in late summer 1941, Erwin was assigned to a frontline communications squad attached to 4.Kompanie and soon discovered that survival was a matter of luck - or the protection of a guardian angel. Good fortune finally deserted Erwin on 11 July 1943 when shrapnel sizzled through his lung during the epic Battle of Kursk-Prokhorovka. Following a period of recovery, and promotion to Unterscharführer, Erwin took up a post as machine-gun instructor with the Ausbildung und Ersatz Bataillon, a training unit based close to the

eastern section of the Berliner Ring Autobahn. When the Red Army launched its massive assault on the Seelow Heights, Erwin's unit, now incorporated into Regiment Falke, was deployed to the southern flank of the Berlin-Frankfurt Autobahn, close to the River Oder. The German defenses soon crumbled and with the end of the Reich inevitable, Erwin was forced to choose between a struggle for personal survival and the fulfillment of his SS oath of 'loyalty unto death'. From the war on the southern sector of the Eastern Front to a bomb-shattered Berlin populated largely by old men and demoralized lonely women, this candid eyewitness account offers a unique and sometimes surprising perspective on the life of a young Leibstandarte SS Adolf Hitler volunteer.

The Silent General - Horne of the First Army Don Farr,2007-06-08 Whether or not Henry Sinclair Horne was the 'silent' General he might certainly, if he were still alive, lay claim to being the 'forgotten' General of the Western Front. His self-effacement in a profession not renowned for shrinking violets undoubtedly made its contribution to his relative anonymity - he wrote no memoirs nor kept anything more than sketchy diaries - but it is still surprising that such an important contributor to the defeat of the German army in the Great War has not until now received the attentions of a biographer. After a customary slow start in the late Victorian army, Henry Horne first made an impact during the Boer War, fortuitously as it was to turn out, under the eyes of a Colonel Douglas Haig. By the outbreak of the Great War, Henry Horne was a Brigadier General. Two years later he was a full General in command of the BEF's First Army. His was one of the most rapid elevations to top rank recorded in the war. In the two years he spent as an army commander he commanded the brilliant capture of Vimy Ridge, the desperate defensive Battle of the Lys, the successful assault on the Drocourt-Quéant Switch, the outstanding crossing of the Canal du Nord and the liberation of Douai, Cambrai, Lens, Valenciennes and Mons. Napoleon always sought to ensure that his generals were lucky. In that respect Henry Horne would have suited him. He was lucky in having a long-standing close professional relationship with the Commander-in-Chief, FM Haig; in having under his command at First Army the elite Canadian Corps and some distinguished British divisions; and in having as his Chief of Staff one of the outstanding staff officers of the war. But there was more to Henry Horne than just luck. This belated biography assesses Henry Horne's relationship with Haig and the Canadian Corps. It also evaluates his contribution to the technical advances of the artillery during the war and describes the battles which he conducted. It attempts to accord to Henry Horne the recognition and credit that he deserves but which has for so long been withheld.

Diary of a Red Devil Albert Blockwell,2008-10-19 Many books have been written about the Second World War and the majority of them either concentrate on a particular battle, campaign or unit. Individual accounts are certainly in a minority and those from the lower ranks even more scarcer. Helion and Co Ltd are therefore pleased to announce the publication of Diary of A Red Devil. It relates the war time experiences of a young man, Albert Blockwell from the northeast of England, who in February 1940 was called up for service with the Army. Initially conscripted into the Royal Army Ordnance Corps and

trained as a vehicle mechanic, he was then posted in March 1940 to a prewar Territorial unit - The 7th Kings Own Scottish Borderers, then a home defense unit based near London. His diary is a most interesting account of a young vehicle mechanic who also had to learn to be a infantry soldier. Albert remained with this unit for all his wartime service, later going to the Shetland Islands when the 7th KOSB were part of OSDEF (Orkney and Shetlands Defence Force). Then in late 1943 much to their surprise the unit was posted to Lincolnshire to become the third infantry unit in the 1st Airlanding Brigade then in the process of returning from Italy with the rest of the 1st Airborne Division. Swapping their glengarries for red berets Albert and his comrades had to adapt to their new way of getting to war by glider. The diary continues with a down to earth account of the highs and lows of the next few months. Then in September 1944 Albert flew to Holland on Operation Market-Garden and his account (written in PoW camp) describes the savage nine days fighting at Arnhem from the slit trench level. Taken prisoner on the last day his account then describes the spartan life in PoW camp without pulling any punches. Sadly Albert died in 2001 but his diary survived and his daughter Maggie Clifton together with help from two published 'Arnhem' authors have edited a unique account of the fighting at Arnhem from the front-line soldier's perspective. Key sales points: Unique personal account of the formation of Britain's airborne forces and their epic actions during Operation Market Garden, The diary is supplemented by extensive annotations from acknowledged Arnhem expert Niall Cherry providing additional information relating to the units and individuals mentioned in Albert's diary, Features a large number of rare photographs and documents.

Coastal Convoys 1939-1945 Nick Hewitt,2009-04-20 Using official records from the National Archives personal accounts from the Imperial War Museum and other sources, Coastal Convoys 1939 1945: The Indestructible Highway describes Britains dependence on coastal shipping and the introduction of the convoy system in coastal waters at the outset of the war. It brings to life the hazards of the German mining offensive of 1939, the desperate battles fought in coastal waters during 1940 and 1941, and the long struggle against German air and naval forces which lasted to the end of the Second World War. Reference is also made to the important role played by coasters during the Dunkirk evacuation in 1940 and the Normandy landings in 1944.

A Question of Pedigree Frank Edwards,2012-09-04 When competition at a British dog show turns deadly, it's up to Inspector Yale to sniff out a killer in this whodunit perfect for Agatha Christie fans. For professional dog breeders across the United Kingdom, competition is everything. If your prized pooch wins Best in Show, you can fetch a fine price for her pups. Ambrose Graveney has long been a fixture on the qualifying circuit, hoping to make it to the ultimate contest, Crufts. But it becomes painfully clear that Ambrose won't be moving on this season—or ever again, for that matter—when the old man's lifeless body suddenly slumps over on the bench where he sits awaiting his entrant's turn. Insp. Simon Yale is dispatched to investigate what initially appears to be a natural death. But Yale suspects something more sinister is afoot in this dog-eat-dog

world full of desperate hopes and old grudges. At once an intriguing puzzle and a fascinating look inside the world of show dog competitions, Frank Edwards's *A Question of Pedigree* will delight mystery lovers and dog fans alike.

Mau Mau Peter Baxter, 2012-12-19 "[An] informative and readable account of the growth of the politically motivated and extremely violent Mau Mau in Kenya." —Military Historical Society The Second World War forever altered the complexion of the British Empire. From Cyprus to Malaya, from Borneo to Suez, the dominoes began to fall within a decade of peace in Europe. Africa in the late 1940s and 1950s was energized by the grant of independence to India, and the emergence of a credible indigenous intellectual and political caste that was poised to inherit control from the waning European imperial powers. In Kenya, however, matters were different. A vociferous local settler lobby had accrued significant economic and political authority under a local legislature, coupled with the fact that much familial pressure could be brought to bear in Whitehall by British settlers of wealth and influence, most of whom were utterly irreconciled to the notion of any kind of political hand over. Mau Mau was less than a liberation movement, but much more than a mere civil disturbance. This book covers the emergence and growth of Mau Mau, and the strategies applied by the British to confront and nullify what was in reality a tactically inexperienced, but nonetheless powerfully symbolic black expression of political violence. That Mau Mau set the tone for Kenyan independence somewhat blurred the clean line of victory and defeat. The revolt was suppressed and peace restored, but events in the colony were nevertheless swept along by the greater movement of Africa toward independences, resulting in the eventual establishment of majority rule in Kenya in 1964.

Frontline and Experimental Flying With the Fleet Air Arm Geoffrey Higgs, 2010-06-19 The first Royal Navy pilot to fly transatlantic non-stop (in a *Buccaneer*) describes his thirty-five-year career in the Fleet Air Arm and as an Empire Test Pilot. The spectacle of Alan Cobham's Flying Circus and the Fleet at anchor in Weymouth inspired the author's lifelong passion for aeroplanes, flying and the Royal Navy. World War Two provided the opportunity to fulfil his ambition and at eighteen he volunteered for the Fleet Air Arm as a pilot. Training in Canada began a Naval flying career that spanned thirty-years. Front line squadron service, embarked on aircraft carriers was followed by qualification as a flying instructor. Selection for the Empire Test Pilots School at Farnborough and qualification as an experimental Test Pilot changed the direction of his naval career. In all he flew nearly one hundred types of aircraft and carried out close to a thousand deck landings. Initial flight testing of several new naval aircraft, as well as research flying in support of the development of aircraft such as the English Electric Lightning and Concorde added to a unique career. Such a long and varied period of flying was not without the inevitable mishaps. A near catastrophic catapult launch of a new naval aircraft, the jamming of the power control system in a research aircraft and hazardous flying through tropical storms at supersonic speeds to determine safety factors for Concorde's intended Far East route were some of the dangers of flying at the cutting edge. As pilot, he flew the first Royal Naval aircraft to cross the Atlantic non-stop without in-flight refuelling or navigational aids. He describes the fascinating ten-

day flight from Croydon to Rangoon across Europe, the Middle East, Pakistan and India to deliver a Percival Provost trainer to the Burmese Air Force. Praise for Frontline and Experimental Flying with the Fleet Air Arm “Follow Higgs from one cockpit/conference room/country to another. You’ll be as surprised as he is that he lived to tell about some of these adventures.” —Speedreaders “This hefty [book] chronicles . . . a life crammed with flying all types of aircraft, mostly shipboard, and the inevitable mishaps. . . . A good read, particularly for those of us who soak up anything to do with ships and aircraft. The shipboard accounts of catapult trials, amongst other sections, are gripping, and the times in Singapore and the Far East add to the appeal, as do the various accounts of life alongside the Americans. Geoffrey Higgs flew nearly 100 different types of aircraft in his career and his love of flying shines through the pages.” —Alan Rawlinson

Congo Unravalled Andrew Hudson, 2012-07-19 A concise, gripping history of the resource-rich yet poverty-wracked nation’s instability and military conflict in the 1960s. Includes maps and photos. Post-independence events in the Republic of the Congo are a veritable Gordian knot. The ambitions of Congolese political leaders, Cold War rivalry, Pan-Africanism, Belgium’s continued economic interests in the country’s mineral wealth, and the strategic perceptions of other southern African states all conspired to wrack Africa’s second largest country with uprisings, rebellions, and military interventions for almost a decade. Congo Unravalled solves the intractable complexity of this violent period by dispassionately outlining the sequence of political and military events in the troubled country. It systematically reviews the first military attempts to stabilize Congo after independence, and the two distinguishing campaigns of the decade—the United Nations military operations to end the secession of the Katanga Province, and the Dragon Operations led by Belgian paratroopers, supported by the US Air Force, launched to end the insurgency in the east—are chronicled in detail. Finally, the mercenary revolt—which tainted the reputation of the modern mercenary in Africa—is described. Lesser known military events—Irish UN forces cut off from the outside world by Katangese gendarmes and mercenaries, and a combined operation in which Belgian paratroopers were dropped from US Air Force C-130 Hercules aircraft and supported by a mercenary ground force to achieve humanitarian ends—go far toward resolving the enigma surrounding post-independence Congo. Praise for the Africa@War books: “A groundbreaking series concept . . . They are recommended as professional military education references.” —Charles D. Melson, Chief Historian, U.S. Marine Corps “Splendid . . . admirably balanced, handy histories.” —Cybermodeler

Hitler's Last Levy Hans Kissel, 2005-06-19 An in-depth account of the formation Nazi Germany’s militia army as a desperate attempt to delay its defeat during the waning days of WWII. A companion volume to the very successful In a Raging Inferno—Combat Units of the Hitler Youth, Hans Kissel’s study offers a highly detailed account of the German Volkssturm, or Home Guard. Formed from men unfit for military service, the young, and the old, this ad-hoc formation saw extensive combat during the desperate defense of the Reich, 1944-45. The author describes the Volkssturm’s training,

leadership, organization, armament, and equipment, in addition to its active service on both the Eastern and Western fronts. The text is supported by an extensive selection of appendices, including translations of documents and many fascinating eyewitness combat reports. This edition also includes over 150 previously unpublished black-and-white photos, and four pages of specially commissioned color uniform plates by Stephen Andrew.

Wasted Years, Wasted Lives Volume 1 Ken Wharton, 2013-07-19 The first volume in this two-part oral history brings to life the experiences of British Army soldiers during the Troubles in the mid 1970s. British Army veteran Ken Wharton has written extensively on the bitter conflict in Northern Ireland, shedding light on the experiences and sacrifices of British military and police. Though often overlooked by historians, many of these committed soldiers and peacekeepers lost their lives in the fighting. Combining his own personal experience with meticulous research and firsthand testimonies from fellow soldiers, Wharton takes readers into the dangerous streets of the Ardoyne and New Lodge, of Andersonstown, Turf Lodge and Ballymurphy, and of the Creggan in Londonderry and the Derrybeg in Newry. He is equally candid and critical of the Loyalist paramilitaries and the Republicans, as well as the Irish-Americans and their political stooges in the US Government. This book is for anyone who wishes to look back and try to understand the madness inflicted upon several generations of innocent Irish and British people.

War Surgery 1914-18 Thomas Scotland, Steven Heys, 2012-06-18 “A most interesting book, both from a World War I historical perspective and from the major changes in medicine that are so well outlined.” —British Journal of Surgery The First World War resulted in appalling wounds that quickly became grossly infected. The medical profession had to rapidly modify its clinical practice to deal with the major problems presented by overwhelming sepsis. Besides risk of infection, there were many other issues to be addressed including casualty evacuation, anesthesia, the use of X-rays, and how to deal with disfiguring wounds—plastic surgery in its infancy. This book focuses closely on the human aspects of the surgery of warfare, and how developments in the understanding of combat injuries occurred. Ten essays covering a wide variety of topics, including the evacuation of casualties; anesthesia, shock, and resuscitation; pathology; X-rays; orthopedic wounds; abdominal wounds; chest wounds; wounds of the skull and brain; and the development of plastic surgery. All material is supported by an extensive number of figures, tables, and images. Those with a passion for the history of this period, even if they have no medical training, will find fascinating information about those surgeons who worked in Casualty Clearing Stations between 1914 and 1918—and laid the foundations for modern war surgery as practiced today.

Flying for Freedom Alois Siska, 2008-10-30 Alois Siska was born in Czechoslovakia and learnt to fly. He escaped to the UK after the German invasion and joined the R.A.F. He describes his experiences flying Wellington bombers. In December 1943 he was shot down and he and surviving members of the crew were adrift in the North Sea for 7 days in appalling conditions. Picked up by the Germans he underwent surgery to his badly wounded legs and became a POW. He suffered at the hands of

the Gestapo and was held in numerous camps including Colditz. His injuries were so extensive that he was put under the care of Archibald McIndoe. Siska chose to return to his native country to join their air force but fell foul of the Communist authorities. His persecution is described in the closing chapters. His rank was restored only in 1991 on the collapse of the Communist regime. Despite his injuries he remained active until 2003 when he died just short of his 90th birthday. He was as an active member of the Czech Ex-R.A.F. Association, the R.A.F. Benevolent Fund in his country, and the Sue Ryder Homes for which he raised considerable funds. His death was marked with a fly-past of the Czech Air Force and he was posthumously awarded the highest military decoration—The Order of the White Lion.

Black Tuesday Over Namsi Earl. J. McGill, 2012-04-10 A gripping true account of warfare in the skies over Korea, when American bombers and North Korean jet fighters would change the course of air combat. On October 23, 1951, an hour and a half before sunrise, nine B-29s of the 307th Bombardment Wing took off from Kadena Air Force Base in Okinawa, Japan, on a bombing mission against Namsi—a North Korean airfield under construction in the heart of the shooting gallery known as MiG Alley. In under six hours, they would engage in a battle that would forever change the conduct of strategic aerial bombardment. Six of the nine aircrafts were shot down; the highest percentage of US bombers ever lost on a major mission. Unfortunately, this event that many experts consider the epic air battle of the Korean War—and perhaps the greatest jet engagement in the history of aerial warfare—has become another forgotten fight in a forgotten war. Here, Earl J. Hill presents the facts and circumstances of the mission from first briefing to final landing using historical documents, firsthand accounts of aircrew members and ground personnel from both sides, and photographs of the mission and its aftermath. This is the story of those who clashed in the skies above Namsi, the events leading up to it, and Black Tuesday's historical impact on the aerial warfare tactics.

Barbarossa Derailed: The Battle for Smolensk 10 July-10 September 1941 David Glantz, 2012-04-10 The second half of a two-part study on Operation Barbarossa, Hitler's plan to invade Soviet Russia during World War II, and what went wrong. At dawn on 10 July 1941, massed tanks and motorized infantry of German Army Group Center's Second and Third Panzer Groups crossed the Dnepr and Western Dvina Rivers, beginning what Hitler and most German officers and soldiers believed would be a triumphal march on Moscow, the Soviet capital. Less than three weeks before, on 22 June Hitler had unleashed his Wehrmacht's massive invasion of the Soviet Union, code-named Operation Barbarossa, which sought to defeat the Soviet Red Army, conquer the country, and unseat its Communist ruler, Josef Stalin. Between 22 June and 10 July, the Wehrmacht advanced up to 500 kilometers into Soviet territory, killed or captured up to one million Red Army soldiers, and reached the western banks of the Western Dvina and Dnepr Rivers, by doing so satisfying the premier assumption of Plan Barbarossa that the Third Reich would emerge victorious if it could defeat and destroy the bulk of the Red Army before it withdrew to safely behind those two rivers. With the Red Army now shattered, Hitler and most Germans expected total victory in a matter of

weeks. The ensuing battles in the Smolensk region frustrated German hopes for quick victory. Once across the Dvina and Dnepr Rivers, a surprised Wehrmacht encountered five fresh Soviet armies. Quick victory eluded the Germans. Instead, Soviet forces encircled in Mogilev and Smolensk stubbornly refused to surrender, and while they fought on, during July, August, and into early September, first five and then a total of seven newly mobilized Soviet armies struck back viciously at the advancing Germans, conducting multiple counterattacks and counterstrokes, capped by two major counteroffensives that sapped German strength and will. Despite immense losses in men and materiel, these desperate Soviet actions derailed Operation Barbarossa. Smarting from countless wounds inflicted on his vaunted Wehrmacht, even before the fighting ended in the Smolensk region, Hitler postponed his march on Moscow and instead turned his forces southward to engage “softer targets” in the Kiev region. The “derailment” of the Wehrmacht at Smolensk ultimately became the crucial turning point in Operation Barbarossa. This groundbreaking study, now significantly expanded, exploits a wealth of Soviet and German archival materials, including the combat orders and operational of the German OKW, OKH, army groups, and armies and of the Soviet Stavka, the Red Army General Staff, the Western Main Direction Command, the Western, Central, Reserve, and Briansk Fronts, and their subordinate armies to present a detailed mosaic and definitive account of what took place, why, and how during the prolonged and complex battles in the Smolensk region from 10 July through 10 September 1941. The structure of the study is designed specifically to appeal to both general readers and specialists by a detailed two-volume chronological narrative of the course of operations, accompanied by a third volume and a fourth, containing archival maps and an extensive collection of specific orders and reports translated verbatim from Russian. The maps, archival and archival-based, detail every stage of the battle.

France at Bay, 1870-1871 Douglas Fermer, 2011-07-12 The Franco-Prussian War did not end with the catastrophic French defeat at Sedan on 1 September 1870 when an entire French army surrendered, the Emperor Napoleon III was captured and his regime collapsed. The war went on for another five agonizing months, and resolved itself into a contest for Paris—for while Paris held out, France was undefeated. The story of this dramatic final phase of the war is the subject of Douglas Fermers masterly account, the sequel to his Sedan 1870. He weaves this story of military victory and defeat into a gripping narrative and it sets the extraordinary events of nearly 150 years ago in the wider context of European history.
